TO HIS HONOUR,

The Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present to your Honour, Report on the Operations of the Department of Lands and Forests for the fiscal year ending 31st October, 1932.

WILLIAM FINLAYSON,

Minister.

HONOURABLE WILLIAM FINLAYSON,
Minister of Lands and Forests.

We have the honour to submit herewith a Report on the Operations of the Department of Lands and Forests for the fiscal year ending 31st October, 1932.

W. C. CAIN,
Deputy Minister, Lands and Forests.

E. J. ZAVITZ,
Deputy Minister, Forestry.

L. V. RORKE, *Surveyor-General.*

Report of the Minister of Lands and Forests of the Province of Ontario

For the Year ending 31st October, 1932

STAFF CHANGES

During the past year three valued employees of the Department died in the persons of Colonel W. R. Smythe, late Inspector of Crown Land Agencies and Supervisor of Settlement; J. H. Milway, Crown Timber Agent at Port Arthur, and E. H. Barnes, Crown Land Agent at Sault Ste. Marie.

After spending many years in public life Colonel Smythe entered the Service on July 1st, 1924, since which date his time has been devoted to the Land and Colonization problems of the Department to its decided advantage and to that of the Settler as well. Colonel Smythe's abilities were particularly fitted for this work and his passing will be regretted by a very wide circle of associates and friends.

Mr. Milway was appointed on October 1st, 1910, since which time he has given particularly efficient service in his work and has enjoyed the confidence of Department and lumbermen alike.

Mr. Barnes entered the permanent service, in 1929, after several years' experience as a practical scaler and special officer of the Department, and his duties as Crown Land Agent have been delegated to the Crown Timber Agent at Sault Ste. Marie who will be responsible for both offices in future.

LAND TRANSACTIONS

During the year 430 Free Grant Cancellations and 996 Sale Cancellations went into effect as compared to 392 and 761 respectively for the preceding year. The increase here may be ascribed to the vigilance of the field staff and to a more or less general check up where it was considered that agricultural activities were not the prime motive.

It will be noted from appendices numbers twelve and thirteen that agricultural land whether free grant or sale was taken in the following ratio with regard to the respective sections of the Province involved:

DISTRICT	FREE GRANTS	SALES
Kenora.....	57	Cochrane.....654
Rainy River.....	110	Temiskaming..... 88
Thunder Bay.....	102	Sudbury.....221
Renfrew.....	28	
Parry Sound.....	25	
Sudbury.....	123	
Nipissing.....	68	
Sundry.....	57	
Total.....	570	963

From the foregoing it will be seen that the bulk of the land sold to settlers was in the great clay belt of Northern Ontario, where it is encouraging to note more or less intensified activities are apparent due to prevailing conditions.

Revenue from Clergy, Common School, Grammar School and University continues to decline as forecast in last year's report.

Under the Summer Resort Regulations there were 378 acres of mainland and 135 acres of islands sold as compared to 251 acres and 258 acres respectively during the previous year, and the individual parcels ranged in size from one-tenth of an acre up to the limit prescribed by the Summer Resort Regulations.

Satisfactory progress has been made with the collection of arrears of old land sales. In many cases payment has been made in full, title has been finally established and patent issued for parcels purchased before Confederation. The work is continuing but the scarcity of money and the prevailing low prices for farm products is certain to protract it.

RELIEF LAND SETTLEMENT SCHEME

As a relief measure and as an aid to those who could qualify for participation in a plan to re-establish certain families on the land the Dominion Government in April, 1932, passed a measure called "The Relief Act." Under this legislation it was provided that the Federal Government would supply \$200 per settler acceptable to the Provincial Authority who would be required to provide a like amount on condition that the Municipality representing the accepted applicant for participation in what became known as "The Relief Land Settlement Scheme" would also contribute \$200, thereby making available a sum of \$600 per family, only those, however, on relief being eligible.

Later in the season the Province entered into an agreement with the Federal Government for participation in this scheme as a result of which, for administrative purposes, a committee of experienced colonization officials employed by the railways, the Federal Government, and other colonization organizations and located in Toronto was appointed to administer the Ontario end of the scheme. The members of this committee serve the Province without special remuneration and as a result of their efforts and the activities of the Departmental staff to the end of October, 138 settlers were placed on farm lots in Northern Ontario.

No cash was advanced in any case. The cost of lumber and supplies was charged directly against the \$600 set aside for the purpose, one-third of which was supplied by the Federal Government and one-third supplied by the municipality involved.

Owing to the abnormally wet season some difficulty was encountered, but those who undertook to create homes for themselves in this way are to be commended for their perseverance and application.

So far as possible the individual's funds have been conserved. In most cases it was necessary to construct either a new frame house or a new log house for the accepted applicants, although in a considerable number of cases partially improved lands were used. As rapidly as possible, that is to say, as the houses were ready for occupancy and the furniture and equipment and other personal possessions of the settler were on the ground, the families were brought in. Most of these settlers were placed in townships on fertile lands along the Canadian National Railway between Hearst and Cochrane and along the Timiskaming and Northern Ontario Railway.

During the coming year it is probable that at least 200 families will be placed in this way thus affording people with agricultural experience, and a desire to undertake the pioneer life and become self-sustaining once more, an opportunity to create a brighter future for themselves in new surroundings.

PROVINCIAL PARKS

In spite of the times the Provincial Parks during the past year enjoyed their customary popularity.

These Provincial areas were dealt with more or less extensively in the 1931 report and additional reference to their area, purpose and attractions is unnecessary at this time.

ALGONQUIN PARK

During the year there was practically no fire damage in the Park and steps were taken towards reorganization of the staff personnel, a number of employees being released, a number of the older employees being superannuated and the work and duty of each remaining officer revised. Necessary arrangements were made for the repair and maintenance and improvement of the Park headquarters buildings and rangers' cabins.

14 arrests were made for offences in trapping and hunting and in each case convictions were obtained.

Some difficulty was experienced with the drinking water supply, corrective measures were applied and the necessary precautions were taken to eliminate the source of the trouble so that the supply will be satisfactory for the coming year.

At the end of the fiscal year there were 21 permanent employees and 11 temporary employees on duty. Compared with the previous year the patronage of the hotels and smaller institutions in the park is estimated to have been reduced by approximately 30%, due largely to the financial stringency.

Nearly 100,000 trout and bass fry were used in the restocking of 9 of the lakes. 53 wolves were disposed of by the staff. The reduction in the number of wolves taken is explained by a notable decrease in the number reported and it would seem apparent that there have been far fewer wolves in the park during the past year. A survey of the fishing license records for the year indicates that there was a slight decrease in the total number issued. A little over 28% of the licensees came from the United States, 31% came from Toronto and Hamilton and the balance came from different parts of Ontario and Canada.

During the year lumber bush operations were conducted in the park by four companies and the timber transported to Airy, Barry's Bay, Opeongo and Fossmill, respectively, for sawing.

Some active measures were taken to combat breeding of mosquitoes and black flies and it is hoped that it will be possible to continue this in a limited way during the coming year at least.

Mention was made in last year's report of the Fairchild aeroplane attached to park headquarters. The total flying hours for the season's operation aggregated 286 hours and 45 minutes. In this connection it is worthy of note that on five occasions during the year this machine was of vital importance and extreme value to the Department and the Park's patrons. In February, Dr. Pocock was flown to Cache Lake to attend a woman too ill to be moved. In July a violent case of acute appendicitis was flown to Toronto where an immediate successful operation was performed. A few days later a badly needed serum was transported in an emergency together with a doctor to make the necessary inoculations at Rock Lake. In another case a woman was taken to Orillia for an operation in the hospital there, and in September a disabled person was removed from Lake Lamuir to Camp Ahmek. In addition to its regular functions the machine is consequently a decided asset to the patrons of the park and gives them the assurance and confidence that in extreme emergency medical attention or hospitalization can be readily and safely obtained.

A marked improvement has been made in the appearance of headquarters and the administrative organization has steadily proceeded with the work of protecting and developing this area for the purposes for which it was set aside.

QUETICO PARK

In Quetico park, deer, moose and other fur-bearing animals, notably otter, mink, beaver and fisher, are reported to be increasing in number. This is especially true of the beaver and is a very gratifying indication of the earnest efforts that have been made by the Superintendent and his staff to eliminate poaching and other hazards to the wild life. Wolves have been reported as not being as numerous as in some other sections. There were, however, 23 wolves caught in Quetico Park during the past fiscal year.

Three arrests were made for poaching within the boundaries of the park and a number of skins and a large number of traps and other equipment were seized.

Ten miles of winter trail were brushed, six new portages were cut, one new dam for water control was built and two old cabins were replaced by new ones, the remainder being kept in repair.

Fishing permits show a decrease and the bulk of those sold were to non-residents which speaks well for the conditions in Quetico Park which appeal to the citizens of the nearby States.

RONDEAU PARK

In Rondeau Park, more or less extensively dealt with in last year's report, there were 270 cottages on lots leased from the Crown. There was a slight increase in the demand for tenting privileges and the average number of tents was 65. The population of more or less permanent summer residents of the park was 1,600; in addition to this there was an average weekday floating population of 1,500 people and at weekends this at times reached 10,000.

The Department maintains a large number of tables, benches and garbage receptacles for the benefit of the public. The number of visitors who come for a week or so and live in tents appears to be annually increasing. Owing to the excellent provincial highways by which Rondeau Park is reached practically all of its visitors come and go by motor and consequently during the weekends the motor traffic on the roads within the park is heavy. As a result it has been necessary to maintain traffic control. During the past year an experienced officer undertook this duty and the results were highly gratifying not only to the park authorities but to the public as well.

It is noted that concessionaires for restaurant, games, bath-house and boats enjoyed a successful season and that these activities added considerably to the pleasure of the park patrons.

Sanitation has been carefully watched and the Department maintains two boats on the lake side of the park for life-saving purposes in addition to drags, life-saving equipment, etc. On the harbour side the Department maintains other equipment for this purpose. In addition to this, the depth of water is indicated at different points by signs and where under-water declivities occur signs are placed. In connection with signs it may be said that the Department has found that for all purposes in controlling a park such as this to the public, painted signs are most necessary for the direction and general information of the public as a consequence of which over 300 sign boards are in use.

The wild life is prospering and increasing in number. Fur-bearing animals are being kept under control by means of traps. During the past year 140 muskrat, 100 coon, 10 skunk, 5 fox and 1 weazel were trapped and the pelts sold.

9 persons were apprehended and convicted for offences in connection with fishing and in all there were 68 convictions for breaches of The Highway Traffic Act, the Liquor Control Act, the Dominion Criminal Code and the Park Regulations.

TIMBER ADMINISTRATION

For the past few years the revenue from our forest resources has annually been in excess of that derived in the early years of the present century. The general slowing up of business throughout the world has, however, as it was

bound to do in its far-reaching effects, become seriously evident in the figures for the fiscal year ending October 31st, 1932. Net revenue from timber for the period was approximately two million dollars as compared with an average of three and a half millions over the past twelve years and a high mark of four million six hundred thousand in 1925. Bush operations were limited to 241 camps employing 7,000 men and details of the cut appear in appendix No. 8. As was to be expected sales of timber were limited to but fifteen transactions. Most of the sawmill yards being filled to or near capacity, many sawmills did not operate, and with an uncertain or indefinite outlook lumbermen were compelled to delay or limit all bush operations and new timber areas were consequently not in demand notwithstanding the fact that the Department took action to reduce the dues in order to stimulate operations and aid unemployment so far as possible.

Of those sales which were consummated under public competition one only attracted more than one tender. Nine of these transactions covered an area of less than one square mile each. In all cases at least the upset price set by the Department was secured, while in certain cases bonuses in addition were paid. It may well be said that the condition of the industry is clearly represented by comparing the fifteen sales made with thirty in 1931 and fifty in 1930. Appendix No. 11 gives the details of these transactions. Moreover, separate and distinct from the lumber industry the number of idle pulp and paper mills must be remembered. Those which continued to operate did so on reduced production basis. A number of operations undertaken were largely to provide employment, and newsprint prices and the markets for newsprint do not indicate any probability of a rapid recovery from the adverse conditions which affect all forest products industries at the present time.

BUSH OPERATIONS

The right to cut timber upon the Crown domain is covered by either an instrument known as a License or an agreement generally designated in respect of a large pulp holding by the term "concession." Timber Licenses issued during the seasonal year ending 30th April, 1932, numbered 688 for an area of 13,947½ square miles. Pulp concessions cover 54,408½ square miles.

A very noticeable, though not unexpected, reduction in the woods' operations took place particularly in the two outstanding types of timber, Red and White Pine and Pulpwood.

A quantity of only 28,761,884 feet B.M. of Red and White Pine was cut which is but 25% of 1931 output which in turn was slightly over half of that for the year 1930.

Tie operations covering Jackpine cutting and certain boom requirements accounted for 32,005,534 feet B.M. or an increase of some four million feet. Hewn ties to the extent of 609,528 were produced or almost 60,000 less than the previous year. The slight excess in the Jackpine cut is of no particular moment when brought into juxtaposition with the cut of 1929-30, when approximately 1,400,000 ties were cut in addition to over 55,000,000 feet B.M. Jackpine.

Other species of log timber such as Spruce, Birch, Maple, etc., decreased by over 9,000,000 feet B.M., the bush cut being but 21,024,566 feet B.M.

On Crown areas the pulpwood cut totalled 176,726 cords or a decrease from the previous year of 88,860. The quantity of exportable material cut on settlers' lands was 176,425 cords, of which, however, only 138,944 cords were really exported. This undoubtedly reflects not only the narrowness of the local market but also the restricted market and lower production in the United States to which country over 400,000 cords were exported the previous year. Of the total cordage exported over 75% was taken from patented land.

For complete details of the kinds and quantities cut see Appendix No. 8, pages 36 and 37.

THE IMPERIAL CONFERENCE AND LUMBER INDUSTRY

Among the items presented for discussion and consideration at Ottawa for the Imperial Conference held in Ottawa in July last was the brief of the Canadian Lumberman's Association indicating the position of the Canadian Lumber Industry and possible benefits to be derived from preferential entry of Canadian lumber and timber products into the markets of the United Kingdom. Therein it was urged that ordinary foreign competition could be met by a preference of 20% but the only suggestion that could be offered to offset the favourable geographical location of Russian production and her radical production and marketing methods was by embargo. It was indicated that Ontario exports normally would be made from Quebec and Montreal but that should necessity arise this could be done through the Canadian winter ports. It was further indicated that the available stands and main species of log timber for lumber purposes in Ontario were as follows:

White Pine.....	10,500,000,000 ft. (B.M.)
Red Pine.....	3,250,000,000
Jack Pine.....	14,000,000,000
Spruce.....	14,500,000,000
Yellow Birch.....	2,400,000,000
Maple.....	2,000,000,000
<hr/>	
Total	46,650,000,000 ft. (B.M.)

More or less exhaustive data were submitted which indicate the potentialities of Ontario's forest resources and it is to be hoped that if some effective co-operation can be secured and if the Russian situation can be offset important benefits may accrue to the Ontario industry, although only a 10% preference was obtained through the Conference.

The lumber industry within the last century has had its "ups and downs" throughout the whole of Canada but has invariably emerged from perilous positions. The inveterate buoyancy of the pioneers of this venturesome and romantic business continues to be reflected in their descendants to-day, who, though faced with the keenest problems involving world-wide trade and industrial drawbacks, are nevertheless seriously applying themselves through co-operative and wholehearted efforts to promoting a renewed concern for and increased interest in what should continue to be the second largest and most important industry of the country. Large and valuable stocks are still on hand throughout

the Province, very little reduced from those of last year, though production was practically at a standstill. This condition is due partly to the tariff imposition of \$4.00 per thousand feet by the United States and to the dumping into England of Russian products, the result of State controlled operations. The dealers are thus largely limited, tentatively at any rate, to home markets with the hope of enlarged ones in Great Britain, and pending the revival of building trade in our own country the attention of all is centred in the outcome of the negotiations between Great Britain and Russia as to the limitations that may be placed on State labour lumber imports from Russia following the termination of the existing trade treaty between the two countries.

With some 800 sawmills and over 40 pulp and paper mills and the extensive saw material available the forest products industries are vital to Ontario's progress.

Though drastic reductions in Departmental expenditure have been made, as a forecast last year, revenues continue to fall. Details appear in the appendices following and an accurate forecast is very difficult to make even for the immediate future. The outlook for the present is not encouraging and to protect the immense capital commitments of our forest products industries no effort or sacrifice must be spared in order that these industries may once again, at no distant date, resume a state of healthy operation and continue to contribute their quota towards the fulfilment of Ontario's destiny.

SURVEYS, WATER POWERS, ENGINEERING, MAPS, ETC.

Crown Land Surveys carried out during the year included provincial boundaries, base lines, township outlines and subdivision lake, river, and road traverse. The interprovincial boundaries, run over 30 years ago, were retraced, opened out and clearly defined on the ground.

Township outlines along the Temiskaming and Northern Ontario Railway Extension to James Bay were defined, and two Townships in the vicinity of Moosonee were subdivided.

Control surveys for mapping purposes were continued in the Districts of Thunder Bay and in Algonquin Park.

Surveys of colonization and trunk roads were made in the Districts of Cochrane, Parry Sound, and other miscellaneous surveys were carried on where expedient and necessary.

The total expenditure for surveys during the past year was \$99,984.05, being a decrease of \$25,015.95, as compared with 1931.

Two new Water Power Leases were granted during the year: No. 53 at Michipicoten Falls, District of Algoma; No. 54 on Sturgeon River, District of Thunder Bay.

The power development at Chats Falls on the Ottawa River (Water Power Lease No. 49) has been completed by the Hydro-Electric Power Commission and put into operation.

The revenue under water power leases was \$231,655.67, being an increase of \$15,596.97 over the former year.

Plans of several new concrete dams constructed throughout the Province have been filed and approved under the Lakes and Rivers Improvement Act.

Four plans of townsite subdivisions were filed and approved under The Townsites Act. These were all in the Township of Teck in the District of Timiskaming.

Maps of the Province and Districts were revised and published as required together with a new map (32-A) of the southern part of Algoma and Sudbury Districts, and (32-C) covering the Lake Timagami Area.

FOREST FIRE PROTECTION

During the year a reduction to the extent of one Forest Assistant, two Fire Inspectors, one Chief Ranger, twelve Deputy Chief Rangers and one hundred and sixty-four rangers was made to meet the need of a reduced pay roll.

The fire hazard peak was experienced during the months of May and June and during this period over sixty-eight per cent. of the fires, totalling in all 2,073, the largest number on record occurred.

The light snowfall during the winter of 1931-32 was followed by periods of high temperature, and low humidity accompanied in May and June by high winds after which fire hazard conditions were normal.

The total area burned was 679,021 acres, of which three-fifths was in the Hudson Inspectorate, the north-west part of the Province, and the greater portion of this was spread over six fires.

Settlers caused 15.6 per cent. of the fires, accounting, however, for only 3.9 per cent. of the area burned; campers' carelessness was responsible for 28.4 per cent. of the fires and 30 per cent. of the area burned; lightning produced 10.5 per cent. for 55.6 per cent. of the area burned, and smokers contributed, through their absolute indifference and neglect, 13.5 per cent. for about 1 per cent. of the area burned, while incendiarism is blamed for 16.4 per cent. for 1.6 per cent. of the area burned. The railways, logging operations, mining road construction, etc., are charged with approximately 8 per cent., the balance of the fires 8 per cent., being of unknown origin.

Complete details of the numbers and classification of Forest Fires, of Permits issued and other necessary information bearing upon Fire Protection which includes the Air Service may be found in Part III of this Report.

REFORESTATION

Effective work was continued under somewhat reduced expenditures at the St. Williams, Orono and Midhurst Nurseries, the employment of labour having been so provided as to maintain a steady though somewhat curtailed income for the workers with the least interference with the general efficiency of the operations.

Trees to the number of 8,352,939 were distributed throughout the year to 6,728 people for private planting. Schools to the number of 305 were the recipients of some 144,230. Planting in County Forests accounted for 443,200 and Northern Plantations for 527,500.

The interest manifested all over the province in tree planting and in the gaining of knowledge on all aspects of reforestation remains unabated.

For the intimate details covering the experimental and practical work accomplished under this head see pages 108 to 125 inclusive.

REVENUE

As a direct result of the restricted operations following the collapse of the market and a decided lessening in production, the year's timber revenue was only \$2,110,840.74 as set out in statement under Appendix No. 9. This amount is less than last year by almost one million dollars. Collections from the sale and lease of lands for all purposes, from casual fees and refunds accounted for a further revenue of \$620,028.77, which added to the timber figure above gives a gross revenue of \$2,730,869.51, which for the purposes of the records of the Public Accounts is further reduced to the extent of \$5,332.89 for refunds in connection with Timber Dues, Mill Licenses, Ground and Fire Tax, and of \$270,515.42 for Fire Protection Charges, making a net revenue of \$2,455,021.20 comprising Ordinary \$2,318,922 and Capital \$136,099.02, of which \$20,765.39 is made up of a special fund deposit in connection with "Back to Land" Movement.

Through the inability of certain Licensees to meet their annual Ground Rent and Fire Charges fewer licenses were issued and consequently a less collection under the Fire Protection Charges resulted, there being for this service only \$270,521.82 as against \$304,843.76 for the previous year. Provincial Land Taxes were less by over \$12,000 and returns from the Provincial Parks by over \$8,000 than last year.

EXPENDITURES

The gross expenditures of the entire Department amounted to \$2,424,452.75, reduced, however, by the Fire Tax collections of \$270,515.42 which is treated as a credit against expenditures under the Fire Ranging Service. Salary assessments to the amount of \$13,726.76 further reduced expenditures for the year so that the net total is \$2,410,725.99. Of this the sum of \$576,540.91 is charged to Capital, the balance, \$1,834,185.08, to Ordinary Account. This outlay for the year is less than last year by \$826,593.30, the Ordinary being cut by \$296,240.75 and the Capital by \$530,352.55. These reductions were largely in Forest Ranging, Fire Protection and Reforestation. As indicated in last year's report the above mentioned reductions were carried out and the prospects for the coming year are for a further reduction on certain of the more important larger items of expenditures both Ordinary and Capital.

APPENDICES

PART I

Appendix No. 1

Return of Officers and Clerks of the Department of Lands and Forests, for the year ending October 31st, 1932.

Branch	Name	Designation	When Appointed	Salary per Annum	Remarks
Main Office.	Finlayson, Hon. Wm.	Minister	1926, Oct. 18	\$10,000 00	
	Cain, W. C.	Deputy Minister	1903, Mar. 1	6,000 00

REPORT
OF THE
MINISTER OF LANDS AND FORESTS
ONTARIO
1932
PART II — SURVEYS BRANCH

Appendix No. 16

REPORT OF SURVEYOR-GENERAL

The following surveys were carried out under instructions from this Department during the past year:—

PROVINCIAL BOUNDARIES

The Ontario-Quebec boundary from the head of Lake Timiskaming to Lake Abitibi, which was run in 1874 by Messrs. O'Hanley and O'Dwyer from Lake Timiskaming to Lake Abitibi, and in 1905 by Messrs. Patten and LaBerge from Mile 42 north to Mile 87, was retraced and remonumented where necessary under instructions of the Boundary Commissioners by Ontario Land Surveyor Shirley King and Quebec Land Surveyor J. M. Roy.

The Ontario-Manitoba boundary from Lake-of-the-Woods to Winnipeg River, which was run in 1898 by Messrs. Stewart and Saunders, was retraced and remonumented, where necessary, under instructions of the Boundary Commissioners, by Ontario and Manitoba Land Surveyor, J. W. Pierce.

BASE AND MERIDIAN LINES

A Base Line extending from the district boundary between Thunder Bay and Kenora, south of Sturgeon Lake, to the northeast angle of the Township of Hartman, was run by Ontario Land Surveyors Phillips & Benner of Port Arthur, a total distance of 58.7 miles.

A meridian line, being an extension of what is known as Niven's Meridian Line, run in 1898, in the District of Cochrane to the shores of James Bay, for a distance of 71½ miles was run by Ontario Land Surveyors Beatty & Beatty of Pembroke.

TOWNSHIP OUTLINES

Nine-mile township outlines in the District of Cochrane, including the Townships of Parr, Winnington, Horden, Greer, Caron and Moose, in the vicinity of the Moose River, were performed by Ontario Land Surveyor H. W. Sutcliffe of New Liskeard.

The township outlines comprising the Townships of Canfield, Sanderson, Syer, Ebbitt, Maher, and Gaby, were performed by Ontario Land Surveyors Speight & vanNostrand, Toronto.

Township outlines and traverse of certain waters north of Lake Huron, in the District of Algoma, were run by Ontario Land Surveyor T. J. Patten, of Little Current.

TOWNSHIP SUBDIVISION

The Township of Horden, in the District of Cochrane, at Moosonee was subdivided into farm lots by Ontario Land Surveyor E. L. Moore of North Bay and part of the Townships of Moose and Caron, in the District of Cochrane, in the vicinity of Moosonee, was subdivided into farm lots by Ontario Land Surveyor G. P. Angus, of North Bay.

Subdivision of the north part of the Township of McKay, County of Renfrew, by Ontario Land Surveyor J. T. Coltham of Parry Sound.

LAKE AND RIVER TRAVERSES

The traverse of shore line and islands in the north part of Lake Superior, were continued this year by Ontario Land Surveyor J. S. Dobie of Thessalon, completing the same as far east as Pic Township, District of Thunder Bay.

Traverse survey of the islands and shores at the mouth of the Moose River, in the District of Cochrane, performed by Ontario Land Surveyor C. R. Kenny of Sault Ste. Marie.

ROAD SURVEYS

The surveys of constructed roads in the District of Cochrane, were carried out by Ontario Land Surveyors J. Lanning of Cochrane and C. E. Bush of Toronto. Road surveys were also carried out in the District of Parry Sound by Ontario Land Surveyor E. L. Cavana of Orillia and similar surveys of roads in the District of Thunder Bay were also carried out by Ontario Land Surveyor R. S. Kirkup of Fort William.

The miscellaneous surveys may be enumerated as follows:—

A tie line traverse, Clearwater Bay, Lake-of-the-Woods District, Kenora, by Ontario Land Surveyor Albert McMeekin of Kenora.

Remonumenting of township corners along the Canadian Pacific Railway from Missanabie to Nipigon River, in the Districts of Thunder Bay and Algoma by Ontario Land Surveyor E. Stewart, Collingwood.

Resurvey of part of the town plot of Inverhuron, County of Bruce, by Ontario Land Surveyor E. D. Bolton of Listowel.

The defining of certain lots in the Townships of Dryden and Cleland, in the District of Sudbury, by Ontario Land Surveyors R. W. DeMorest and Lincoln Mooney of Sudbury, Ont.

MUNICIPAL SURVEYS

Municipal surveys performed under instructions and authority of the Lieutenant-Governor in Council, were completed and confirmed as follows:

No. 758—Part of the road allowance between Concessions 10 and 11, Township of North Walsingham, County of Norfolk.

No. 784—The defining of the lot angles and street lines in part of the Town of Simcoe, County of Norfolk.

TOWNSITES

The following townsites laid out on lands patented subsequent to the 19th day of March, 1910, were submitted and approved as required under *The Townsites Act*—M-109, Kirkland Lake, Township of Teck

M-110,	"	"	"	"
M-111,	"	"	"	"
M-112,	"	"	"	"

MAPS

During the year a new map (32-A), parts of the Districts of Algoma and Sudbury, on a scale of four miles to the inch, was completed and published also a new map (32-C) of the area around Lake Timagami, in addition to the district maps already published, new editions when required, were revised and kept up-to-date. The three revised during the year comprised Maps 20-A; 24-A and 24-B.

Extracts from the reports of the several surveyors employed will be found in Appendices 21 to 25.

Appendix No. 21

Report of G. P. Angus, Survey of the Township of Caron, District of Cochrane.

North Bay, Ontario,

October 4th, 1932.

SIR:

I have the honour to submit the following report on the survey of the subdivision of the southeasterly part of the Township of Caron, District of Cochrane, performed by me, under instructions from your Department, dated April 11th, 1932.

This township is situated on the coastal plain of the James Bay area and is a level tract of land drained mainly by Store Creek and Butler Creek which flow in a southeasterly direction two miles apart and are about twenty feet in width and two feet deep, and being ten to fifteen feet below the level of the surrounding country through which they flow.

The soil is clay covered with about a foot of black muck and heavy moss, and except for a strip of about ten chains in width on each side of the creeks, which is dry and well drained, the balance is wet and boggy, but if drained should have agricultural possibilities.

The timber is mostly small tamarac two inches to four inches in diameter, except for the strip of about ten chains on each side of the creeks which is timbered with spruce up to fourteen inches in diameter and a few balsams up to six inches in diameter.

No rock outcroppings were encountered, but there are some boulders and gravel in the bed of the creeks.

Spruce partridges were plentiful, and some fine speckled trout were caught in Butler Creek. No moose or large game were seen.

Appendix No. 22

Report of G. P. Angus, Survey of the Township of Moose, District of Cochrane.

North Bay, Ontario,

October 20th, 1932.

SIR:

I have the honour to submit the following report on the survey of the subdivision of the southwesterly part of the Township of Moose, District of Cochrane, performed by me, under instructions from your Department, dated April 11th, 1932, and supplementary instructions, dated June 29th, 1932.

The country is level, with moss and black muck about one foot in depth with a clay subsoil, and except for a strip of land extending about ten chains on each side of the creeks which is well drained, the balance of the country is wet, but if drained should have agricultural possibilities.

The timber adjacent to the creeks and extending for about ten chains on each side of the creeks is mostly spruce from four to fourteen inches in diameter. Along the Moose River from Lot 16, Concession 4, to Lot 21, Concession 2, a distance of two miles, there is a strip of about ten chains timbered with spruce and poplar up to twelve inches in diameter. Also along the Moose River from Lot 9, Concession 5 to Lot 15, Concession 4, about two miles in length and ten to twelve chains in width, this area appears to have been washed by the ice in

spring in some years, when the water was exceptionally high, as the willows and alders are a tangle lying horizontally in places two feet thick, with the new growth growing upright. The most of the country, probably seventy per cent., is timbered with small tamarac.

No rock outcroppings were encountered on the survey.

Spruce partridges were plentiful and speckled trout are to be found in the creeks.

Appendix No. 23

Extract from Report of Survey of Meridian Line from northeast angle of the Township of Ebbitt in the District of Cochrane to the shore of James Bay, by Messrs. Beatty & Beatty, O.L.S., 1932.

SOIL

Up to Mile 341 the soil is clay. From 341 to 348 there is clay soil with occasional boulders. At Mile 348 plus 30 chains and at Mile 349 plus 30 chains our line crossed narrow sand ridges about ten feet high. These had probably been old shore lines of the ocean. The later one ran in a northwesterly direction. From this ridge north to the bay the soil is sandy clay.

The whole of the country passed over is nearly level, sloping to the east and northeast with some creeks and rivers flowing east and northeast. From Mile 329 to Mile 356 the muskegs are dotted by numerous shallow ponds. These vary in size from mere soft puddles to small lakes of fifty to sixty acres.

TIMBER

The country is covered with muskegs and low ridges of spruce from three to ten inches in diameter along the creeks and rivers. Practically the only merchantable timber was found along the creeks and rivers. The largest stretches being between Miles 298 and 300 and also between 312 and 313. Very little of the country has been burnt over. Between Miles 300 plus 30 chains to Mile 303 plus 30 chains our line crosses an exceptionally wet tamarac and spruce muskeg that had been burnt over recently. Also there are patches of old brule along the Kwataboahegan River.

Naturally with the country so low and wet there is mostly tamarac in the muskegs. Along the edges these are larger but in the centre of the muskegs they are stunted and scrubby. There is a great deal of swamp birch brush. There are islands of spruce to five inches in diameter scattered through the muskegs.

MINERALS

There were no indications of any minerals in the district.

STREAMS AND LAKES

Our line did not cross any large lakes.

We crossed the Cheepash River with our 300th mile, the Kwataboahegan with our 313th mile and the Hancock Creek with our 315th mile. These rivers all flow into the Moose River. We crossed the Wabiskaw with our 336th mile and the Little Wabiskaw with our 348th mile. These flow into James Bay. The Wabiskaw River is locally called the Halfway River owing to where it

empties into James Bay being about halfway between Albany Post and Moose Factory. We crossed several small creeks.

CANOE ROUTES

We took supplies down the Cheepash River from the railroad to the Moose River and from the Moose we put some supplies up the Kwataboahegan River and also up the Hancock Creek. There were no rapids on the Cheepash River between the railroad and the Moose River. There was only one small rapids between our line and the Moose River on the Kwataboahegan and as the water was high when we used it we did not have to portage.

Between the Moose River and our line on the Hancock Creek there are two short portages, caused by log jams. This creek is only used by trappers in the spring during the high water and is by no means a good route. We took supplies up James Bay to the Wabiskaw or Halfway River and tried to use it to bring supplies into our line. The water was too low and we had to carry them across country to the line. The Indians told us that trappers use this river in the early spring. All these rivers are shallow and swift. We had our canoes meet us where our line finished and the party returned down the coast to Moosonee.

WATER POWERS

There are no falls or rapids in this district that could be developed.

GAME

There is very little game in the country. We did not see any moose or caribou. We were unable to catch any trout in the creeks or rivers. We saw very few signs of fresh beaver work.

The small ponds and lakes in the muskegs are the breeding grounds for geese and duck which are very plentiful. There are also partridge and prairie chicken in the district.

We commenced our work as early as possible to enable other surveyors to run township outlines from the Meridian. We had an exceptionally cool summer and the usual summer frosts.

We did not see any permanent Indian camps except at Moose Factory. The Indians use this as headquarters and from there trap over the district.

Appendix No. 24

Report and Fields Notes of the Survey of the Boundaries of the Townships of Parr, Winnington, Horden, Greer, Caron and Moose, District of Cochrane, by H. W. Sutcliffe, O.L.S., July 3rd, 1932.

New Liskeard, Ontario,

September 6th, 1932.

The Honourable, the Minister of Lands and Forests,
Parliament Buildings, Toronto, Ontario.

HONOURABLE SIR:

In compliance with instructions issued under date of April 11th, 1932, by the Surveyor-General, to survey certain township outlines in the District of

Cochrane, I proceeded with and carried out the same during the months of June and July. I left the James Bay extension of the T. & N. O. Railway at Mileage 162 and proceeded to the northwest corner of the Township of Parr at Mile Post 306 on a meridian line run by Messrs. Beatty & Beatty during this year.

The order in which the various township boundaries were run was in conformity with that set out in the instructions, and on the whole very satisfactory connections were made with prior surveys.

Instrument Work.

A Gurley transit, which had previously been sent to Ottawa for magnetic needle correction, was used. Long, clear sights were obtained throughout the whole work; sky lines were opened at all stream crossings, and generally speaking, owing to the nature of the timber, 75 per cent. of the line we cut could be classified as sky line. Star observations were taken at points indicated in the field notes.

Chainage.

A four-chain tape and a 200-foot tape were used, the four-chain tape being used for taking topography and the 200-foot tape for check measurements. The check measurements are noted in the field notes for each mile.

Blazing and Posts.

Blazing was done in the prescribed manner. Durable timber was used in all cases for posts, tamarac and spruce predominating.

Timber and Soil.

With the exception of narrow strips along the various streams, very little commercial timber was encountered on this survey. The area traversed, distant more than four or five miles from the Moose River, was very flat and wet, and would be difficult to drain owing to the fact that the majority of the creeks are but a few feet below the surface of the adjoining country and are very sluggish in their flow. Large areas of second growth tamarac were crossed, as well as considerable spruce to five inches or six inches in diameter.

The average depth of muck over a gritty clay would not be more than three feet. No rock or hills were observed during the course of the survey, and in running the north boundary of the Township of Moose to intersect the west shore of James Bay, the country was found to slope very gently towards the bay. There is no bank at this point, and the difference between extreme high and low tide being about two miles.

Game.

We did not see any game, either large or small, although along the creeks a few moose tracks were seen. A great many of the streams were teeming with speckled trout. It would appear that the area adjacent to the fur trading posts on the Moose River is pretty well trapped out. The amount of fur being brought in by the Indians apparently is very small compared to what it used to be.

Appendix No. 25

Extract of Report by Phillips & Benner of the Survey of the Base Line east and west from south limit of Grand Trunk Pacific, Block 6, District of Kenora, 1932.

Survey Lines.

Ties were made at the intersection of the base line with the west limit of Grand Trunk Pacific Railway, Block Number Seven, and east boundary of the District of Kenora, the Fifth Meridian and the east boundary of the Township of Hartman. No particular difficulty was experienced in locating these old lines or the nearest mile post on them.

On the crossing of Sandybeach Lake ties were made to two points of the traverse of the lake. We were not able to find any of the traverse stations on the easterly shore of the lake and as no trees had been marked and no posts planted on this portion of the traverse, the nearest point to which the intersection of the base line with the easterly shore of the lake could be tied in was the tree marked R.K. 336 on the island of the same number.

Geology.

On the easterly end of the base line there were very few outcrops of rock of any kind but most of these were of granite.

On the westerly end, though granite and rocks of the same general classification predominate, there were various intrusions of greenstones and some of this country, particularly between Keikewabik Lake and Sandybeach Lake, would be favourable country for prospecting, though no minerals of any importance were noticed. The declination of the magnetic needle was in a fairly uniform progression from east to west and no very marked deviations which might denote deposits of magnetic iron ore, were noticed.

Topography.

On the easterly end of the base line the country is fairly level for the first fourteen miles. The easterly nine miles is of a more rolling nature with several hills over fifty feet in height.

The greater part of the westerly end of the base line is of a rolling nature with hills frequently over fifty feet in height with particularly rugged country south of Amik Lake and between the 13th and 15th miles. This condition also prevailed between the 22nd and 27th miles and along the easterly side of Sandybeach Lake.

There are some very fine lakes in the country covered, most of which have clear water and well timbered shore lines. Particular mention might be given to Bell Lake, Kukukus Lake, Keikewabik Lake and Sandybeach Lake.

Canoe Routes and Roads.

From Watcomb Station the route through Watcomb Lake, Whiterock Lake and Young Lake gives access to Sturgeon Lake and the gold mining areas surrounding the lake. The route south from Sturgeon Lake through Darkwater Lake to Bell Lake and the lakes to the south of the latter is not used to any extent now though at one time there was a heavy traffic over the portages. A set of portages were cut west from Bell Lake to connect up with the lake at the 16th mile point on the easterly end of the base line.

On the westerly portion of the base line supplies were taken into the line from Umfreville Station by way of Jarvis Lake, Flying Loon Lake and Kukukus Lake and the connecting rivers. There are only two short portages on this route. From Kukukus Lake westerly to Keikewabik Lake we cut out many portages so as give a complete route between these lakes apart from the line. Supplies were also moved westerly through Mit Lake, Abamategwia Lake and Basket Lake. The route north from Keikewabik Lake through Kabikwabik Lake and Minnitaki Lake to Sandybeach Lake was used and the portages were found to be in good condition.

With the Forestry Department now using airplanes for patrol work in place of the old system of patrol by rangers with canoes it is now generally found that the old portage routes are used infrequently and these nearly always need considerable work done upon them before any freighting can be done.

On the easterly portion of the base line there is a good graded road crossing the line in the 13th mile. This was originally a railroad and was used in the construction of the north line of the Canadian National Railway. It runs from the Sioux Lookout Branch of the Canadian National Railway to Sturgeon Lake and is now used by commercial fishermen to ship fish by truck from the lake to the railroad. There is also a graded road running south from Sandybeach Lake to Dinorwic Station on the Canadian Pacific Railway. There is very little traffic over this road at present but it will eventually form a part of the road connecting the Sioux Lookout and Dryden areas.

Timber.

On the Timber Plan accompanying this report the forested areas have been divided into three age classifications. The areas shown in green will indicate timber over sixty years old while the portions shown in red indicate timber between thirty and sixty years old and the areas shown in brown indicate brule and timber under thirty years of age.

On the easterly portion of the base line there is a good stand of mixed growth in the first four miles. Coniferous types predominate in this area and the trees are of merchantable size. In the burned areas between the 5th and 14th miles these are several large swamp areas in which are good stands of spruce ranging up to fourteen inches in diameter. There is also a good stand of spruce on the 15th mile. East of here there is not much timber of value at present save in smaller areas.

On the westerly portion of the line, from the point of commencement to the 19th Mile Post there is one of the most uniform and valuable stands of timber we have seen in many years. Jackpine and spruce of good commercial size compose about 65 per cent. of this stand. There is a similiar stand between the 23rd Mile Post and Keikewabik Lake and also between the small lake at the intersection of the line with the Fifth Meridian and Sandybeach Lake. The area between the 19th and 23rd Mile Posts is covered with a dense stand of young growth between twenty-five and thirty years old with Jackpine being the predominating species. Between Keikewabik Lake and the Fifth Meridian the timber is between fifty-five and sixty years old but only averages about seven inches in diameter owing to the small amount of soil in this area.

There were several forest fires observed during the survey of the westerly portion of the line. The main fire appeared to originate near the west shore of Basket Lake about five miles south of the line. This fire must have covered a considerable area and from it several smaller fires were started, one of which

crossed the line in the 15th mile. There was also a large fire about two miles south of Keikewabik Lake.

Soil.

Though there were comparatively few outcroppings of rock on the easterly portion of the line, there are numerous boulders over a greater part of the area and the soil is mostly a light sandy loam. The agricultural lands in this section are limited to small areas. The soil on the westerly part of the line is mostly clay and clay loam with some areas being suitable for farming though it is doubtful if any six-mile portion of the line would contain more than 50 per cent. of good land.

The larger game animals, moose, deer and bear are quite plentiful and there were also indications that the area is fairly well stocked with smaller animals of the fur-bearing type with the exception of beaver and on only one lake did we notice fresh work of the latter. The lakes are well stocked with fish. In Amik Lake we took pickerel ranging up to twelve pounds in weight.

REPORT
OF THE
MINISTER OF LANDS AND FORESTS
ONTARIO
1932
PART III — FORESTRY BRANCH

Appendix No. 26

I—FOREST FIRE PROTECTION

(1) *Legislation*

There were no changes in the Forest Fires Prevention Act.

On the 8th day of April an Order-in-Council was passed withdrawing from the Fire District the townships of Algona South, Wilberforce, Alice, and Concessions 13 to 25 in the township of Grattan.

On the 25th day of May an Order-in-Council was passed requiring that persons obtain a Travel Permit before travelling about in travel permit areas.

(2) *Organization and Personnel*

In the Hudson Inspectorate the Fire Inspector who had also acted as Chief Ranger over the Red Lake District resigned on November 12th. This man was later appointed as Chief Ranger at Sioux Lookout and was assisted there by an Assistant Chief Ranger. An Assistant Chief Ranger was also in charge of the Red Lake District.

The position of Fire Inspector at Armstrong was abolished on November 1st, the former Inspector there carrying on as Chief Ranger.

On January 1st the Forest Assistant at Port Arthur was transferred to Fort Frances as District Forester to fill the vacancy left by the death of the late J. V. Stewart who was killed in an aircraft accident. The Rainy River District is now organized as an Inspectorate independent of Kenora.

On January 15th the services of a junior forester at Kenora and another at Sudbury were temporarily dispensed with. These two men were again placed on the staff on May 27th, the former going to the Algonquin Inspectorate and the latter returning to Sudbury.

On June 13th a Forest Assistant previously engaged on aerial mapping was transferred to the Hudson Inspectorate as Assistant and another to Port Arthur on June 17th.

The total field supervisory staff for the twelve inspectorates was as shown in the following table and consisted of eleven District Foresters, twelve Forest Assistants, one Forest Supervisor, seven Fire Inspectors, one Assistant Fire Inspector, thirty-two Chief Fire Rangers and one hundred and thirteen Deputy Chief Fire Rangers. The forest Supervisor at Macdiarmid, the Fire Inspectors at Port Arthur, Elk Lake, Gogama and Biscotasing and the Assistant Fire Inspector at Longlac also acted as Chief Fire Rangers.

There was direct supervision of one Chief or Deputy Chief Ranger to an average of every six rangers.

Compared with 1931 the staff was reduced by one Forest Assistant, two Fire Inspectors, one Chief Ranger, twelve Deputy Chief Rangers, and one hundred and sixty-four rangers.

(3) Expenditures

The total expenditure for the year was \$1,675,938.96, a reduction of \$471,984.53 from 1931. The amount of fire tax collected for the year was \$270,515.42.

A reduction in staff enabled a decrease in the amount of pay roll. Only such equipment was purchased as was necessary in actual fire fighting and no improvement work carried out which could be avoided. As a result of this there is now much equipment which must be replaced immediately if stock is to be kept up, and improvement work which would increase efficiency and eventually reduce timber losses and fire fighting costs is still further behind.

(4) Fires

A period of very high hazard was experienced during the months of May and June. Of the total number of fires for the year, 2,073, the largest number on record, over sixty-eight per cent. occurred before the end of June and burned ninety-six per cent. of the area.

The snowfall during the winter of 1931-32 was very light in many districts. This condition was followed by periods of high temperature and low humidity with frequently high winds throughout the months of May and June. From the first of July until the end of the season the hazard was normal.

The total area burned over was 679,021 acres. Of this total 454,665 acres or sixty-six per cent. were in the Hudson Inspectorate. The greater portion of this area of 454,665 acres was burned in six fires. A considerable amount of the area is a direct result of the reduction in staff. Of the six fires responsible for most of the area burned it was not possible to place men and equipment on three of these until some days after they were discovered and no men at all were placed on another. Under ordinary conditions of staff these fires could have been controlled when they were first discovered. While the reduction in staff enabled a saving in ordinary pay roll the extra cost of fighting these fires more than equalled this saving.

Settlers were responsible for 15.6 per cent. of the total number of fires but only 3.9 per cent. of the area burned, campers for 28.4 per cent. of the fires and

CLASSIFICATION OF EXPENDITURES

Item	1932	1931	1930	1929	1928	1927	1926

(5) *Permits*

A total of 23,187 burning permits were issued covering 54,619 acres. This is a considerable reduction from 1931 and is accounted for by the very dry weather in May and June when it was not safe to burn in some localities and the fairly wet weather in most districts during the balance of the season when it was too wet to get a good burn. There was also considerable burning done which ordinarily would have been covered by permits but this season due to the reduction in staff it was impossible to enforce the regulations in all areas.

(6) *Equipment*

No major equipment was purchased other than that actually for use during the high hazard in May and June. It will therefore be necessary to make considerable replacements during the next year, particularly in the case of hose and trucks.

(7) *Locomotive Inspection*

Two men were as usual employed throughout the season on the inspection of the fire protective appliances on railway locomotives and engines of all descriptions operating within the Fire District.

A total of 2,710 inspections were made covering 955 individual locomotives and engines.

(8) *Improvements*

Due to the necessity of curtailing expenditures little or no improvement work was carried out.

Radio stations were again in use at Kapikik Lake, Swain's Lake, Red Lake, Goose Island, Lake St. Joseph, Savant Lake, Caribou Lake, Sioux Lookout, (2 stations), Otter Lake, Armstrong, Kenora, Upper Manitou Lake, Nestor's Falls, Sphene Lake, Jackfish Island, Obonga Lake, Garden Lake, Macdiarmid, Port Arthur, Pakashkan Lake, Puckaskwa, Sault Ste. Marie, Little Abitibi Lake, Adair Tower, Stimson, Latchford Tower, North Bay, Delhi Tower, Maple Mountain Tower, Mount Collins Tower, and Elk Lake. The stations at Gold Pines and Fort Hope were discontinued and new stations opened at Sphene Lake and Pakashkan Lake.

II—REPORT OF DIRECTOR OF AIR SERVICE

INTRODUCTION

Development and Promotion Work:

The work of the Ontario Provincial Air Service during the year 1932 has been directed, as in the past, toward further development of its aircraft, and further promotion of aircraft in the work of the Department.

Satisfactory progress has been made in the application of aircraft to the needs of the Department, even though its needs are widely varied, and even though it was necessary to curtail expenditures for additional flying equipment. Only such commitments were made therefore, as would meet the absolute necessities of the Air Service to enable it to carry out the requirements of the Department under normal conditions of fire hazard. Included in the above-mentioned commitments was the purchase on a flying-hour basis, of two Canadian built transport machines.

New Flying Equipment:

It is gratifying to note, that since these two machines have been added to the transport section, they have done very good work, and have given the minimum of trouble. Much of this good result has been due to the fact that the machines were properly adapted to the needs of the Air Service while they were being built. It is with keen satisfaction that special attention is drawn to the fact that since the machines were produced in Canadian factories, it has been possible to spread the payments over a comparatively long period, and on an hourly flying basis. In this way, all parties to the contract are well served, in that the machines are brought into operation much earlier than otherwise could

have been possible. The completion of the deal on a basis permitting immediate delivery was a welcome arrangement in that it added a much needed 900 horsepower to the transport section of the fleet at a time when the freighting needs of the Department were at their height.

New Ground Equipment:

A further saving has been effected in the purchase of the Northern Aerial Minerals Exploration air harbour, complete with buildings, shop equipment, living quarters and property. The whole layout is ideal in every respect as a central operating and repair base for the Western District. Since complete overhauls may be adequately carried on at this new base, which has an excellent machine and wing shop, with a full complement of power and hand tools to take care of all repair and overhaul requirements for the machines allocated to the District, a considerable saving in ferrying, freight and express charges will be realized each year. The new base is of particular value from an operating point of view in that it has a well protected harbour which has excellent sand beaches. These advantages cannot easily be over-rated in that the maximum of safety and facility in the handling of machines on floats is assured.

General Improvement in Position:

The enforced retirement from service of the flying-boat equipment during the winter of 1932-1933, in accordance with Federal regulations pertaining to obsolescent flying machines, will make it very difficult to meet all the demands which will most certainly be imposed on the Air Service during the periods of abnormal fire hazard. This situation has been greatly relieved through the acquirement of two new transport machines during the summer of 1932. It is significant however, that the Air Service enters upon the 1933 season with four less machines than it had at the end of the 1932 season.

It is confidently expected that good results will accrue during the next operating season, arising from the most recent purchases of both flying equipment, and of the Northern Aerial Minerals Exploration air harbour at Sioux Lookout. The new flying equipment has already effected an important reduction in the purchase of flying from commercial concerns. The new air harbour as previously intimated, will considerably reduce the expense of administering the Western District. The acquirement of this well equipped air harbour will also make an effective contribution toward the reduction in the purchase of outside flying, since adequate facilities are now available at the centre of the Western District to maintain all machines in first class condition, major repairs not excepted.

FEATURES OF THE OPERATING SEASON

Regional and Time Distribution of the Fire Hazard:

On examination of the records for total flying hours done each month of the flying season by the Air Service since 1924, it is found that the greatest number of hours was performed in the month of August for the six years, 1925 to 1930 inclusive. In 1924 the peak occurred in May, and in 1931 it came in July. During 1932, June yielded the greatest number of flying hours, reaching an aggregate of 2,800 hours. From our records to date, it would appear as though August were the normal month for peak load, and since fire hazard is the greatest factor in variation of the hours performed each month, it would seem correct to assume that fire hazard and fighting operations are at the

maximum during the months which yield the most flying. It might also be sound logic to carry the assumption still further, and say that the district which offers the greatest number of hours flying during the normal hazard can be considered as suffering the greatest hazard.

Winter Flying Operations:

During the winter of 1931-1932, there were approximately 310 hours performed in sundry inspection and transportation duties at five different stations. Most of the flying hours were used in provisioning and keeping contact with outlying posts where rangers were stationed all winter. At Kenora and at Algonquin Park stations, however, the flying time was used in the inspection and control of the game preserves under the jurisdiction of the District Forester. The twenty-seven odd hours used at Port Arthur, mostly in the month of April, were transport operations in the movement of structural steel for the erection of ranger towers in remote locations in the Port Arthur District.

Not all of the winter flying done is for the Forestry Department, since an important duty of the transport section in winter is to replenish remote gas caches that cannot be economically supplied by ground transport. The reason for our own air transport being more economical under special circumstances, is that the amount of gas placed in remote caches is not sufficient to warrant the making and breaking of winter trails into the remote though strategic locations. The placing of such small caches is a very important factor in the swift and successful concentration of men and fighting equipment when ingoing

transport machines must be loaded to capacity, and they can be refuelled at a nearby gas cache for the return trip.

Headquarters Flight:

The Flexibility Gained.—The Headquarters Flight during most of 1932 consisted of two DeHavilland 61 machines of five hundred horsepower, and one Fairchild 71-C, of four hundred and twenty-five horsepower. These machines were ordinarily allocated to the Port Arthur District, but were requisitioned to other stations as needed, by order of the Deputy Minister. Since all of these machines are in the transport section, they were necessarily moved to the focal point of greatest suppression activity during the hazard season, and when the hazard had subsided at the end of the summer, the machines were employed on transportation of supplies to the various winter bases, and in moving equipment from ranger stations that are usually shut down each winter.

As a result of this specialization, a greater flexibility is obtained, while the programme of those stations where the remaining transport machines are regularly placed, does not suffer interruptions that detract seriously from the efficiency of the district concerned. During the past year it was only necessary to place the two DeHavilland 61's actually on a roving commission, and their movement was confined to four stations for the most, namely, Port Arthur, Pays Plat, Sioux Lookout and Goose Island. These two machines performed, jointly, some 845 hours, of which 800 were used in actual suppression and transportation work.

The value of a more or less fixed location for all other machines cannot be too highly stressed, since, when suitable machines are allocated to a given district, and the District Forester in charge becomes familiar with its capabilities, a definite programme of work can be laid out by the District Forester, and the operations properly planned to meet his requirements. Also, where the same piloting and engineering staffs return to the same district year after year, such personnel become thoroughly familiar with the plans and requirements of the District Forester, but more important still from an operational standpoint, the pilots become thoroughly familiar with the eccentricities of the district over which they have to work. This condition makes for cumulative safety and efficiency of personnel and equipment all through the fire-fighting organization.

RECONDITIONING AND MAINTENANCE

Alterations to Equipment:

During 1932 operations, no major alterations were required in the design or actual structure of the aircraft. After some experience with cracking exhaust manifolds on the Hornet Engines, however, the exhaust manifolds on the Hornet Engines were scrapped and new ones were made up on a different principle, in the Air Service Sheet Metal Section, which proved much more durable and satisfactory. The Sheet Metal Section also made up and inserted strengthening tubular struts inside the hollow stream-lined struts of the latest DeHavilland 61, as the original float undercarriage struts had evidenced weakness under rough water conditions.

Repairs:

No major repairs were performed on any of the flying equipment during 1932. In the case of the Flying Boat H.S.2.L., G-CAPF, which sustained a badly punctured bottom during a normal take-off, it was considered that the

equipment was obsolete, and that a major repair to the hull would be false economy. The machine was therefore dismantled and destroyed at the station from which she had been working, namely, Twin Lakes. No other serious mishaps were sustained by the flying equipment during the year.

In future the requirements for major repairs in the field or at headquarters during the operating season should become a diminishing necessity, since all flying boat equipment of wooden construction has become completely obsolete, and under Federal regulations, has been written off and destroyed. The remaining equipment on the strength is of an up-to-date type and structure exactly suited to the work it has to perform. A very large factor in the reduction of the Air Service repair bill will be found in the fact that all the power plants in use are of modern design, and have the latest improvements to enhance reliability and low maintenance costs.

New Work:

The only work other than maintenance performed at headquarters base in Sault Ste. Marie during the year 1932, consisted of the building of six small service boats, suitable for the attachment of outboard motors, and some twelve special canoes for the Forestry Branch. The latter are built to a special design, permitting the canoe to be easily carried in our transport aircraft.

During the year, a lookout tower was constructed on top of the hangar. This tower is a great convenience in making accurate weather observations for the information of incoming and outgoing planes.

A pigeon loft was also erected on top of the hangar, and a flock of trained homing pigeons can be maintained for the quick dispatch of information from planes operating in remote parts of their districts. During periods of intense fire hazard when the pilot has discovered a fire during his patrol, it will be convenient for him to dispatch a pigeon from his plane with information, thus permitting him to carry on with his patrol uninterrupted.

Certain minor changes were made within the hangar proper, to promote efficiency in the carrying out of the reconditioning programme. Outside of the hangar, northern shrubs and trees were planted for the general beautification of the grounds. In front of the hangar the road was taken out and grass plots laid down, in order to eliminate the dust nuisance. This change was very important, in that cars passing in front of the hangar raised quantities of abrasive cinder dust, which blew in through the engine shop windows and settled on delicate parts of engines which were necessarily exposed during the process of overhaul.

It was also necessary to relay and extend the drainage system for the hangar as the original system had become clogged.

As weather records are an important factor in the operation of aircraft, it was deemed advisable to install certain weather recording instruments in order to build up a reliable daily record of local conditions. Such instruments as have been installed have aided materially in the control and protection of aircraft in periods of very unsettled weather conditions.

FEATURES FROM THE STATISTICAL RECORDS FOR THE SEASON

Machine Days:

The Machine Day as a time unit is considered as being one machine for one day between sunrise and sunset. The machine days available for any given machine is taken to mean the total number of days that the machine was on its operating base. The machine days possible is the total number of days that the

machine was on its base and the weather was fit for flying. The machine days used is the total number of days that the machine was requisitioned and used. Since a detailed table is printed herewith, it is deemed sufficient to only mention here the interpretation given the terms, and to make note that there is very little variation in the averages for the fleet operations in the Eastern and Western Districts.

Machine Days	Eastern District	Western District
Average available.....	182	188
Average possible.....	156	157
Average used.....	97	103
Number of machines.....	12	14

It will be noticed from the above table that even though the Western District had two more machines on its strength, its averages were well maintained in comparison to the Eastern District.

The table herewith sets out in detail the operation by days for each machine of the fleet, without reference to station or district. It will be noticed in the totals of the columns, that the fleet aggregates reveal some significant points. For instance, the percentage of machine days clear but not requisitioned, in relation to total machine days weather fit, amounts to 34.5 per cent.

TABLE I—OPERATIONS STATISTICS, 1932
MACHINE DAYS

MACHINES	Requisitions	Number of days machine available during season	Weather unfit	Weather fit	Number of days unserviceable	Clear days—machine available but not required	Machine days, machine employed	Gross efficiency	Net efficiency

Requisitions and Flights Performed:

Table II following deals fully with this phase of the 1932 operations. It is self explanatory, but it might be well to draw attention to the high percentages of efficiency attained, in spite of the fact that each of the 9,728 flights recorded were examined in detail and given an exact classification.

TABLE II—EFFICIENCY—PROVINCIAL AIR SERVICE OPERATIONS, 1932

Transport Section and Comparative Loadings:

The transport section for 1932 consisted of the following machines, allocated as listed below:

Registration	Name	Type	Power	Station
G-CAPG.....	"Goose".....	D.H. 61.....	500 H.P.	Headquarters Flight
CF-OAH.....	"Heron".....	Hamilton.....	525 H.P.	Fort Frances
CF-OAJ.....	"Jay".....	Hamilton.....	525 H.P.	Kenora
CF-OAM.....	"Martin".....	Fairchild.....	425 H.P.	Port Arthur
CF-OAK.....	"Kite".....	D.H. 61.....	500 H.P.	Headquarters Flight
CF-OAL.....	"Lark".....	Fairchild.....	425 H.P.	*Special

*Worked on two transport requisitions only.

Table III shows the detail of load classifications for the season of 1932. A comparison of the average operating rate for each machine may be seen in an examination of the average load moved per hour. Since these machines are definitely classified as "Transport," it is considered that a low loading rate per hour does not necessarily mean that the machine concerned was used more than the average for purely detection flying.

TABLE III—TRANSPORT AIRCRAFT—LOADS CARRIED
OPERATING SEASON, 1932

Machine	Month	Operating Load	Effective Load	Total
D.H. 61.....	November...	14,170 lbs.	6,160 lbs.	20,330 lbs.
G-CAPG.....	April.....	2,670 lbs.	2,670 lbs.
	May.....	66,180 lbs.	24,130 lbs.	90,940 lbs.
Flying time, 607.35 hours	June.....	209,201 lbs.	138,319 lbs.	347,520 lbs.
	July.....	137,960 lbs.	66,438 lbs.	204,398 lbs.
	August.....	100,650 lbs.	53,180 lbs.	153,830 lbs.
	September.....	130,125 lbs.	85,402 lbs.	215,527 lbs.
	October.....	43,550 lbs.	20,817 lbs.	64,367 lbs.
		705,136 lbs. (352 tons, 1,136 lbs.)	394,446 lbs. (197 tons, 446 lbs.)	1,099,582 lbs. (549 tons, 1,582 lbs.)
D.H. 61.....	June.....	39,032 lbs.	31,880 lbs.	70,912 lbs.
CF-OAK.....	July.....	63,151 lbs.	51,250 lbs.	114,401 lbs.
	August.....	26,182 lbs.	7,973 lbs.	34,155 lbs.
Flying time, 237.43 hours	September.....	81,825 lbs.	56,005 lbs.	137,830 lbs.
	October.....	13,905 lbs.	7,360 lbs.	21,265 lbs.
		224,095 lbs. (112 tons, 95 lbs.)	154,468 lbs. (77 tons, 468 lbs.)	378,563 lbs. (189 tons, 563 lbs.)
Fairchild 71-C.....	June.....	70,470 lbs.	41,226 lbs.	111,696 lbs.
CF-OAM.....	July.....	87,960 lbs.	61,750 lbs.	149,710 lbs.
	August.....	42,640 lbs.	23,730 lbs.	66,370 lbs.
Flying time, 284.45 hours	September.....	37,685 lbs.	18,890 lbs.	56,575 lbs.
	October.....	14,935 lbs.	8,645 lbs.	23,580 lbs.
		253,690 lbs. (126 tons, 1,690 lbs.)	154,241 lbs. (77 tons, 241 lbs.)	407,931 lbs. (203 tons, 1,931 lbs.)
Fairchild 71-C.....	August.....	34,736 lbs.	20,875 lbs.	55,611 lbs.
CF-OAL.....	September.....	72,118 lbs.	34,064 lbs.	106,182 lbs.
	October.....	11,745 lbs.	4,121 lbs.	15,866 lbs.
Flying time, 92.25 hours.		118,599 lbs. (59 tons, 599 lbs.)	59,060 lbs. (29 tons, 1,060 lbs.)	177,659 lbs. (88 tons, 1,659 lbs.)
Hamilton.....	November...	14,775 lbs.	3,170 lbs.	17,945 lbs.
CF-OAH.....	January.....	3,545 lbs.	1,220 lbs.	4,765 lbs.
	February.....	14,917 lbs.	5,085 lbs.	20,002 lbs.
Flying time, 371.55 hours	March.....	17,895 lbs.	10,200 lbs.	28,095 lbs.
	April.....	25,250 lbs.	13,255 lbs.	38,505 lbs.
	May.....	75,167 lbs.	32,805 lbs.	107,972 lbs.
	June.....	221,105 lbs.	93,140 lbs.	314,245 lbs.
	July.....	15,990 lbs.	5,200 lbs.	21,190 lbs.
	August.....	24,320 lbs.	9,600 lbs.	33,920 lbs.
	September.....	41,541 lbs.	10,885 lbs.	52,426 lbs.
	October.....	11,273 lbs.	9,578 lbs.	20,851 lbs.
		465,778 lbs. (232 tons, 1,778 lbs.)	194,138 lbs. (97 tons, 138 lbs.)	659,916 lbs. (329 tons, 1,916 lbs.)
Hamilton.....	November...	6,542 lbs.	2,255 lbs.	8,797 lbs.
CF-OAJ.....	February.....	17,345 lbs.	7,230 lbs.	24,575 lbs.
	March.....	21,801 lbs.	9,695 lbs.	31,496 lbs.
Flying time, 382.50 hours	April.....	10,993 lbs.	5,940 lbs.	16,933 lbs.
	May.....	92,890 lbs.	36,895 lbs.	129,785 lbs.
	June.....	199,702 lbs.	98,030 lbs.	297,732 lbs.
	July.....	62,362 lbs.	26,325 lbs.	88,687 lbs.
	August.....	48,550 lbs.	15,965 lbs.	64,515 lbs.
	September.....	78,673 lbs.	26,205 lbs.	104,878 lbs.
	October.....	15,949 lbs.	1,785 lbs.	17,734 lbs.
		554,807 lbs. (277 tons, 807 lbs.)	230,325 lbs. (115 tons, 325 lbs.)	785,132 lbs. (392 tons, 1,132 lbs.)
TRANSPORT SECTION— Total Flying Time 1,977.13 hours.				
Total loading in pounds.....		2,322,105	1,186,678	3,508,783
Total loading in tons.....		1,161—105 lbs.	593—678 lbs.	1,754—783 lbs.
Loading average per machine....		387,018 lbs.	197,779 lbs.	292,464 lbs.
Loading average per flying hour..		1,175 lbs.	600 lbs.	1,775 lbs.
Loading average per flight.....		1,009 lbs.	515 lbs.	1,524 lbs.

Loading of Moth Aircraft:

It is noteworthy that although the Moth is a comparatively small machine, and of low horsepower as a type, it gave an excellent account of itself during the season's operations.

The following percentages would seem to support this opinion:

Proportion of fleet consisting of Moths.....	54 per cent.
Proportion of fleet horsepower in Moths.....	23 per cent.
Proportion of fleet total load in Moths.....	25 per cent.
Proportion of fleet total mileage in Moths.....	59 per cent.

Under Table IV will be found detail of all flying done under the various classifications, both for the current season, and also for the past eight years. This gives an excellent means of comparing various types of flying season by season. It will be seen that 1932 might well be considered an average season, in that no abnormal hours have been concentrated in classifications other than where they should be. The percentage column therefore gives a sound idea of the relation each type of flying has to the total.

TABLE IV—HOURS FLOWN ON VARIOUS PHASES OF FLYING OPERATIONS

	1925	1926	1927	1928	1929	1930	1931	1932	Per cent.

Comparative Overhaul Periods Averaged for Engine Types:

The records for the past eight years pertaining to the Liberty engines show that the average period between overhauls for each year made an appreciable increase, as the experience of the personnel with this type of engine increased. The average overhaul period for the eight years stands at 95 hours between overhauls. Since 1932 is the last season that Liberties will be operated, the average life of the engines owned by the Service stands at 815 hours.

The large static radials which are now replacing the Liberty engines, have come on the strength too recently to be able to estimate what the average length of life will be. The experience to date regarding overhauls, however, may be briefly listed as follows:

Hornet.....	500-	25 H.P.—	285 hours per overhaul
Wasp.....	400-	25 H.P.—	255 “ “ “
Wright.....	300	H.P.—	270 “ “ “

The records for the small in-line air colled engines are complete, and may be rather closer since the various types of this particular power style have been on the strength since 1927.

The Gipsy II are the most recent to come on the strength, and so far have shown a decided improvement over all types. The comparison in this power class is as follows:

Cirrus II.....	65-	85 H.P.—	205 hours per overhaul
Gipsy I.....	85-100	H.P.—	325 “ “ “
Gipsy II.....	100-115	H.P.—	330 “ “ “

This would indicate that a steady improvement in durability and reliability may be expected from year to year, as new engines are brought on the strength of the Service. Such factors have a strong influence in giving a downward trend to the cost of operating and maintaining up-to-date equipment, in comparison to older types.

CONCLUSION

Survey of the Year's Operations:

The operations for the year 1932, looked at as a whole, show significant improvements in nearly every department of the work of the Air Service.

Alterations in the structure of the equipment in order to adapt it to the specialized needs of the Service were held to an absolute minimum. Major repairs to both flying and ground equipment were negligible, while forced landings on account of mechanical failure reduced to the vanishing point.

The records for both mechanical and service efficiency reached almost 100 per cent. in both cases, and the uncontrollable factors such as very bad weather curtailing necessary flying, were not abnormal.

Maintenance figures were reduced this year, due to the increased proficiency of the personnel, and the general increase in experience throughout the staff. Another helpful factor in this regard is found in the fact that machines, both individually and by types have been better fitted to the needs of the Service.

General Position Regarding the Preparedness for the Coming Year:

Due to the fact that the fleet now consists of up-to-date machines and engines, it is held that at no time has the Air Service been better able to handle the work for the coming year at practically every station. This position is not entirely secure however, in that four obsolete machines have been written off the strength, and as yet no additional equipment has been procured to do the work at the stations they occupied in the past. When these machines have been replaced with suitable modern flying equipment, however, it can be considered that the Service will be better able to handle the present areas under ranger supervision during periods of normal fire hazard.

Obsolescent Flying Equipment:

At the end of the 1932 season, the remaining H.S.2.L's.—G-CAOA, G-CAOK and G-CAOQ were written off the strength. Machine G-CAPF was written off during the summer, as was mentioned in a previous paragraph. Considering the fact that these machines are of an early type and construction, and the fact that they were built of wood and fabric, it is a remarkable tribute to the skill of the Air Service staff, both in the air and on the ground, that they have been maintained in service for over eight seasons.

The Need for Building Up the Transport Section of the Service:

Past experience makes it an obvious necessity that the number of machines in the transport section should be such that in seasons of normal hazard, it will not be necessary for any ranger district to purchase flying from commercial flying concerns.

The Importance of Winter Transport Flying:

Such flying as is done by the transport division during the winter is of a highly organized nature, concentrating upon work that cannot readily be performed by ground transport, either because of lack of trails or lack of large quantities to any one base. The transport section performs an important service under such conditions, especially in the placing of gas caches at strategic positions in remote parts of the large ranger districts. This work is done on the best days during the winter so that the machines may be operated at the greatest possible standard of efficiency, thus cutting to a minimum the cost of gas at remote locations. In most instances, such caches cannot be placed except at prohibitive expense, if only ground transport had to be relied on.

The Value of Specialized Equipment:

The present fleet of the Air Service is comprised of special types of machines which are as nearly suited to the two main divisions of work to be done, as is practical, namely, detection and suppression of fires. This has been brought about by the careful application of the general administration of the Service, according to a well considered policy. Many elements enter into the acquirement of an ideal fleet in the Air Service, not the least of which is the necessity of using up old types of equipment to the fullest extent, before replacement can be made. Nor has it always been possible to get a replacement machine which would exactly suit the needs of the Service in years past, which, of course, resulted in certain expense in adapting such equipment to the requirements of the Air Service.

The present situation is much happier in this regard than it has ever been, in that specialized machines may be readily procured which need very little alteration to suit the work that the Service is called upon to perform. Specialization, in so far as the Air Service is concerned, is the one avenue toward economical operation. This has been attained as a result of years of careful examination of flying statistics and sound application of the lessons learned therefrom.

Tables and Graphs:

A further table follows, giving a comparison of certain operational features for the past five years of the Service. Since this table is more or less self-explanatory, it is only necessary to point out that the column of figures under the year 1932 indicates that the demands for 1932 were subnormal. An idea of the intensity of the demand may be easily seen from a comparison of the flights requisitioned for each of the past three years. A fair opinion of the work accomplished may also be had by comparing the loadings for the same period. A survey of the whole column shows that all equipment was kept busy, and that an intense fire hazard would have extended our equipment and personnel to the utmost to give adequate service.

Personnel and Special Operations:

I would consider this report incomplete were no mention made of meritorious service performed by the staff which operates and maintains the equipment in constant airworthy condition through times of intense operation. Without the least discounting the continuous care and supervision exercised by the ground staff, I would draw attention to certain outstanding work done by certain members of the staff who were able to take advantage of situations which offered opportunity to perform spectacular service.

In this connection, I am specially gratified to report that The Honourable, the Minister of National Defence, who is Trustee for the McKee Trophy, has awarded the trophy to our District Superintendent, Mr. G. H. R. Phillips, for meritorious flying during the year 1931. It is considered that the award for 1931 is especially valuable, in that it does not represent a single brilliant exploit only, but rather long hours of hard flying through months of service. It represents useful flying of a commercial character during periods of intense fire hazard, when the utmost was demanded of personnel and equipment.

To give concrete illustration to the above remarks, it might be in order to show the work done by Mr. Phillips in terms of flying hours, before and during the year 1931:

1929.....	559 hours	
1930.....	555	"
1931.....	770	"
Month of June, 1931.....	126.15 hours	
" " July, 1931.....	202.25	" (flew 31 days in July)
" " August, 1931.....	160.50	"

Thus it can be seen that the trophy was well awarded, since Mr. Phillips proved that given a good pilot and machine, the ideal combination, it can be expected to fly long hours every day without mishap. This very point was badly in need of proving, and its practical demonstration has done much, not only for the Ontario Provincial Air Service, but for commercial aviation throughout Canada. Furthermore, it should be noted that Mr. Phillips learned to fly in 1927, as a member of the Provincial Air Service. This adds further proof that commercial flying of a sane character in suitable machines, is not necessarily a vocation confined to young and inexperienced men. Outstanding performances of this nature demand as much inherent stability in the character of the pilot as is found in the aircraft that shared the honours of the award.

I am glad to report, that as a result of cool and courageous action on the part of George A. Doan, Air Engineer at Kenora Station, six people were saved from drowning.

On the evening of August 21st, 1932, Mr. Doan was standing on the town dock at Kenora, preparatory to getting into his speed boat to return to our Kenora base, when he heard a frantic shout for help. He immediately jumped into his speed boat, and in a matter of seconds, arrived at the spot where a large power canoe carrying seven persons, had been rammed and cut in two by a big power boat. The rescue was possible because of the cool skill and excellent judgment displayed under conditions of extreme emergency. The seventh

victim was struck on the head by the power boat that rammed the canoe and sank before Mr. Doan arrived on the spot.

It is gratifying to report that Mr. Doan received the Royal Humane Society Life Saving Medal for his swift and gallant action.

During the year 1932 certain of the machines were required to perform a number of mercy flights by way of bringing wounded or sick persons from isolated places in the bushland, out to hospitals and expert medical attention. Not only were the demands of mercy met, but in several cases these benevolent flights were the means of saving life and limb of the unfortunate ones.

The versatility and flexibility of aircraft in the efficient service of the various Government departments is not wanting for frequent and adequate proof.

In several instances the ends of justice were served, in that careless natives and campers were discovered and brought to trial. In some cases the court of justice was actually flown to the culprit and just punishment meted out.

III.—REFORESTATION

ST. WILLIAMS

Employment was given the temporary staff from October 31st until Christmas when all hands were laid off until the 17th of January, 1932. All hands were reinstated on this latter date and given half time work for the months of January, February and March with the understanding that each employee would have to lose a similar period of time during the summer months.

This arrangement worked out to the mutual advantage of the men and the Department, since it gave a steady, if somewhat curtailed, income each month in the year to the men and permitted them to pick up the odd job during their period of suspension in the summer. At the same time there was no increase in the total of wages paid by the Department. Moreover, since the men were almost entirely employed during the winter on cleaning up and improving the natural woodland sections of the Forestry Station, a considerable cordage of wood was prepared for sale. Returns from wood disposition just about covered wages paid for last winter's labour expenditure.

The permanent staff was steadily employed during the dormant months on woods work, and when weather conditions prevented outside activities the usual winter work of painting and repairing tools and machinery, crate construction and manufacturing Carolina poplar cuttings was resorted to.

Exceptionally mild weather prevailed during the late fall 1931, and succeeding months of 1932.

Repeated experiments having proven that certain conifers can be lifted and heeled in during the fall and carried through the winter in excellent condition for spring delivery, permits the lifting of practically all of Norway and white spruce trees available for shipping.

In addition, therefore, to 1,413,000 deciduous species which were heeled in during the fall of 1931, there were lifted 250,000 Norway spruce and 200,000 white spruce.

Nursery operations in the spring 1932 commenced on March 30th, exceptionally late in spite of a very mild winter. The balance of available nursery stock for permanent disposal was then lifted and heeled in, in the vicinity of the packing shed.

In order to fill heavy demands for planting stock it was necessary to have transferred to this station, 472,000 conifers and hardwood from the Orono and Midhurst nurseries, making a total of 5,304,000 trees available for shipping.

The actual number of trees distributed during 1932 was 4,566,900.

Lining out of transplants started early in April, and by the middle of May all seedlings and trees for reline were transferred to the nursery line sections.

With the necessary exception of soft maple seed, sowing was entirely carried out during late fall 1932.

CONIFEROUS SEED SOWN

Species	Date Sown	Beds Sown	Total Sown
White Pine.....	November	100	200 lbs.
Red Pine.....	Nov., Dec.	342	438 lbs.
Scotch Pine.....	November	90	56 lbs.
Jack Pine.....	November	80	53½ lbs.
White Spruce.....	November	123½	127 lbs.
Norway Spruce.....	November	125	148 lbs.
White Cedar.....	Nov., Dec.	124	124 lbs.
Hemlock.....	Nov., Dec.	27	33 lbs.
Sitka Spruce.....	November	6	7 lbs.
European Larch.....	November	32	48 lbs.
Red Cedar.....	November	16	100 lbs.
Alder.....	November	2	1 lb.

Walnuts.....	517
Soft Maple.....	June	25

FERTILIZERS

Thirty-six acres of soy beans at Station No. 1, and twenty-four acres of rye and vetch at Station No. 2, were plowed under for the purpose of soil maintenance.

Thirty tons of barnyard manure was applied on light land at Station No. 2, land that is being gradually brought into a state of fertility suitable for the production of nursery stock.

At Station No. 1, manure and commercial fertilizer was applied.

TREE SEED

Local collections of tree seed were very small. Some 200 bushels of Scotch pine cones were gathered from property plantations. Six bushels of Austrian pine cones, 140 bushels of Norway spruce cones and 517 bushels of black walnuts were purchased, while all other seed of coniferous and deciduous species were procured through the Provincial Seed Plant at Angus, Ont.

TREE SEED ON HAND—DECEMBER 15TH, 1932

Species	Total
Red Pine.....	21½ lbs.
White Pine.....	30½ lbs.
Scotch Pine.....	18 lbs.
Jack Pine.....	422 lbs.
White Spruce.....	537 lbs.
White Cedar.....	128¾ lbs.
Larch (Siberian).....	100 lbs.
Austrian Pine.....	12 lbs.
Black Locust.....	18 lbs.
Total amount of seed.....	1,287¾ lbs.

The above quantity of seed represents that which will be available for sowing in 1933.

ADDITIONS TO PROPERTY

No new buildings were erected during 1932. Maintenance costs were at a minimum, fifty-eight per cent under those of 1931.

PLANTATIONS

During 1932 all plantations put on exceptional growth. Although rainfall was not above normal, it came at the right time.

Several new plantations were established at Station No. 1, and all failures in older plantations at both stations were replanted.

PERMANENT PLANTING RECORD

During the year up to October 31st a total of 147,700 trees of all species were planted.

EXPERIMENTAL PLANTATIONS

Experimental plantations at Station No. 2 were extended this year and part of what shall be known as the White Pine experimental group was established:

1.	White Pine, origin Simcoe County.....	1,260
	Scotch Pine, origin Scotland, Granton-on-Spey.....	1,210
	Planted in alternate rows, spaced six by six feet.	
2.	White Pine, origin Simcoe County.....	1,276
	Korean Larch, origin North-eastern Corea.....	1,276
	Planted in alternate rows, trees spaced six by six feet.	
3.	White Pine, origin Simcoe County.....	1,320
	Korean Larch, origin North-eastern Corea.....	1,320
	Planted in alternate clumps, trees spaced six by six feet.	
4.	White Pine, origin Simcoe County.....	1,210
	Norway Spruce, origin Norfolk County.....	1,210
	Planted in alternate rows, trees spaced six by six feet.	
5.	White Pine, origin Simcoe County.....	1,815
	Rooted Caroline Poplar, origin Norfolk County.....	605
	Three rows of White Pine to every one of Poplar. Trees spaced 6' x 6'.	
6.	White Pine, origin Simcoe County.....	1,386
	Planted pure. Trees spaced eight by eight feet.	
7.	White Pine, origin Simcoe County.....	1,815
	Jack Pine, origin Norfolk County.....	605
	Three rows of White Pine to every one row of Jack Pine.	
	Trees spaced six by six feet.	
8.	White Pine, origin Simcoe County.....	1,815
	Black Locust, origin Norfolk County.....	605
	Three rows of White Pine to every one row of Black Locust.	
	Trees spaced six by six feet.	
9.	White Pine, origin Simcoe County.....	818
	Planted pure. Trees spaced ten by ten feet.	
10.	White Pine, origin Simcoe County.....	1,200
	Rooted Caroline Poplar, origin Norfolk County.....	1,320
	Planted in alternate clumps, trees spaced six by six feet.	
11.	White Pine, origin Simcoe County.....	1,815
	Pitch Pine, origin Rafn.....	605
	Three rows of White Pine to every one row of Pitch Pine.	
	Trees spaced six by six feet.	
12.	White Pine, origin Simcoe County.....	1,210
	Alnus glutinosa, origin Spree River, Germany.....	1,210
	Three rows of White Pine to one row of Alder.	
	Trees spaced six by six feet.	
13.	White Pine, origin Simcoe County.....	1,210
	Red Oak, origin Norfolk County.....	1,210
	Planted in alternate rows, trees spaced six by six feet.	
14.	White Pine, origin Simcoe County.....	1,210
	Austrian Pine, origin Norfolk County.....	1,210
	Planted in alternate rows, trees spaced six by six feet.	

Preparation is now under way to extend this White Pine group in the spring of 1933, and shall result in the addition of twenty-nine two-acre plantations.

In addition to activities in connection with the experimental White Pine group, there were several plantations in the Scotch Pine group, which, on account of non-available stock, were not completed until the spring of 1932

SCOTCH PINE GROUP

4.	Scotch Pine, origin Jutland Islands.....	1,210
	European Larch, origin Swiss Alps (planted 1931).	
	Planted in alternate rows, trees spaced six by six feet.	
6.	Scotch Pine, origin Jutland Islands.....	2,400
	Planted pure, trees spaced six by six feet.	
7.	Scotch Pine, origin Jutland Islands.....	1,850
	Rooted Carolina Poplar, origin Norfolk County.	
	Planted 1931. Three rows Scotch Pine to every one row of Carolina Poplar. Trees spaced six by six feet.	

PLANTATION THINNINGS

Plantation thinnings were not heavy, and would have been nil had it not been for an ice storm which occurred on March 22nd, 1932. A number of trees in practically all of the older plantations were so damaged that their removal was necessary.

PLANTATION YIELDS

Species and Number Trees Removed	Cords	Stakes 16" Long	Short	Acreage

Scotch Pine, 1,363.....				
Jack Pine, 145.....				
Larch, 97.....				
Totals	136¼	9,075	5,360	165.25

WOODLOT IMPROVEMENT

The exceptionally mild late fall and winter months facilitated woods operations and considerable extension was effected in connection with woodlot improvement.

One-half of Lot No. 59, all of Lot No. 60 and part of Lot No. 69 were cut over. All diseased, ill-formed and suppressed trees were removed and converted into the most dispensable product.

Yields accruing from this operation are herewith recorded.

YIELD FROM WOODLOT IMPROVEMENT

2,066	625	56	49,991 F.B.M.

PROTECTION

It is a pleasure to report that injury to property forest growth was very small, whether from insect, disease or mechanical agencies.

Intensive inspection and protection of previous years was rigorously adhered to during 1932.

Activities in this connection were divided into two sections:

1. Protection of nursery.
2. Protection of plantations and woodlots.

Insects:

PROTECTION OF NURSERY

Repeating applications of poisoned bait was efficacious in preventing serious damage from larvae of the common cut worm. Loss caused by "white grub" *Lachnosterna* was about normal. This is one of the most difficult root-eating insects to combat, but late fall plowing and crop rotation materially assist in restraining severe depredations.

It was necessary to apply one spray of lead arsenate to our Willow and Carolina Poplar production areas, to kill a very heavy infestation of the poplar leaf beetle, *Haltica bimarginata*. This single spray was sufficient to entirely eliminate the pest.

ANIMALS

All hedge rows, shelterbelts and windbreaks were thoroughly raked clean, thereby destroying excellent nesting sports for rodents.

No damage from mice or rabbits was observed.

All deciduous species left in nursery lines over winter were protected from rabbits by means of wire screening.

As in other years, the practice of patrolling seed-beds subsequent to fall and early spring seeding was carried out. Early morning and evening patrol with a shot gun, shooting only sparrows, appears to be the cheapest and most efficient method of keeping all birds from scratching in the beds and eating the seed.

DISEASE

Damping off was confined almost entirely to Red Pine. This species germinated well, but due to a ten-day period of wet weather during late May, very heavy losses were sustained. No root rot was observed.

PROTECTION

Protection in connection with woodlot and plantation areas involved control of injury from:

1. Fire.
2. Insects.
3. Disease.

One fire occurred Sunday, May 15th, on woodlot No. 22. This fire originated on private property from causes unknown, jumped the seventh concession and burned over eight acres of second growth Poplar, White and Black Oak. It was necessary to bring the station forest fire pump into action with the result that the fire was speedily put out.

More work than usual was done on fire lines and roads, and at time of report these are in A1 condition. All fire roads were thoroughly worked at Station No. 2, while all dead grass along township roads running through the property was burned.

INSECTS

The severe attack of *Ips pini* and *Ips scaligrophus* of 1930, appears to have been brought under control since no evidence of an attack was observed in any of the plantations.

The White Pine weevil *Pissodes strobi* caused less damage during 1932 than for many years. Consistent trapping of the larvae appears to be swinging the balance in favour of complete local eradication of this pest.

COMPARATIVE RECORD OF WEEVIL ERADICATION AT STATION No. 1

NUMBER OF LEADERS REMOVED

Species	1927	1928	1929	1930	1931	1932
White Pine.....	574	2,811	9,554	13,974	5,923	4,357
Red Pine.....	176	37	2
Scotch Pine.....	23	4
Jack Pine.....	59	205
Norway Spruce.....	36	21	93	16	26
Total.....	610	2,832	9,554	14,243	6,058	4,594
Acreage worked.....	46.84	165.46	371.60	295.45	332.83	380.78

Date of inspection commenced July 8th, and was completed August 5th, entailing a labour expenditure of 850 hours.

RIBES

Ribes eradication in connection with the control of White Pine blister rust was carried out at both Stations Nos. 1 and 2.

RIBES ERADICATION STATION No. 1

Area Inspected	Year	Plants Destroyed	
		Gooseberries	Wild Currant
400 (acres).....	1929	3,774	1,494
800 (acres).....	1930	1,768	1,374
800 (acres).....	1931	2,415	2,246
800 (acres).....	1932	2,027	1,260

Inspection commenced August 8th and was completed October 3rd. Five men were constantly employed on this work which entailed a labour expenditure of 1,540 hours.

RIBES ERADICATION STATION No. 2

Area Inspected	Year	Plants Destroyed	
		Gooseberries	Wild Currant
200 (acres).....	1931	752	2,347
250 (acres).....	1932	420	3,234

Inspection at Station No. 2 commenced August 24th and work was completed by September 23rd, 1932, entailing a total labour expenditure of 595 hours.

Chestnut blight has killed the majority of Sweet Chestnuts. One can scarcely find a tree of this species that is not affected.

PUBLICITY

Only one exhibit was set up during the year, and that at the Norfolk County Fair in Simcoe. A dozen or so large centres requested our exhibit, and were promised consideration as soon as conditions would permit expenditure along this line.

There was, however, no visible decrease in the number of people who visited the Forestry Station. These were given every opportunity to inspect the nursery and plantations.

Experienced guides were very efficient in describing the work which is being done, and a large number of orders for 1933 planting material have already been filed.

ORONO

During the past nursery season, growth conditions have been favourable. While the very open winter of 1931-32, with little snow and high winds, caused a certain amount of damage in the transplant lines and seed beds, almost all species wintered well. The drouth, which was experienced during the past two years, extended through the winter and, as a result, when spring opened the soil was exceptionally dry. Well distributed rains, with a moderate temperature, remedied this condition during the spring and early summer, however, so that tree survival has been good and nursery stock is in excellent condition for the approaching winter.

(1) NURSERY OPERATIONS

(a) Fertilizers:

Green manure crops of sweet clover and field peas were plowed under during the summer. Sweet clover has been used with success on these areas which could be left idle for a full year, both tilth conditions and nitrogen content being markedly improved. Field peas were used in the seed bed areas, however, as an early maturing crop is essential in these sections since it is necessary to re-seed in the fall those areas cleared of seed beds in the spring. A light top dressing of

manure was applied throughout. Commercial fertilizers were used sparingly on the seed beds at the time of sowing. In addition a weak solution of nitrate of soda was used as a spray during the early growing season.

Quantities of fertilizers used were as follows:

ANIMAL		MINERAL			
Manure	Dried Blood	Acid Phosphate	Muriate of Potash	Sulphate of Ammonia	Nitrate of Soda
255 tons	900 lbs.	1,400 lbs.	350 lbs.	250 lbs.	400 lbs.

(b) *Seed:*

All seed used during the year was obtained from the Seed Extracting Plant at Angus, with the exception of 475 bushels of walnut and sixteen bushels of butternut obtained locally. As all seeds are returned to Angus for storage except those which require stratification over winter for early germination in the spring, the only seeds on hand are the following which are stored in shallow screened pits.

Seed on Hand.	
Cedar, red.....	$1\frac{1}{2}$ bushel
Cherry, black.....	2 bushels
Walnuts, black.....	475 bushels
Total.....	477 $\frac{1}{2}$ bushels

With reference to walnuts it has been found that under our conditions it is necessary to hull and stratify the seed and plant in the spring if satisfactory results are to be expected.

(c) *Seed Beds:*

During the year a total of 806 coniferous seed beds were sown—thirty-two beds in the spring and 774 beds in the fall. In addition to the above coniferous seed, 838 bushels of hardwood seed were sown. The early freeze-up on November 16th, 1932, brought seed bed operations to an abrupt close.

SPRING SOWING OF CONIFEROUS BEDS

Cedar, red.....	9
Pine, red.....	23
Total.....	32

Red pine beds sown in the spring, June 20th and 21st, were entirely experimental. It has been our experience at this nursery that results from spring sown red pine beds are invariably much inferior to those from fall sown beds. This year experiments were continued and, in an endeavour to avoid damping-off, the seeds were sown after the main danger from this source had passed. In order to hasten germination and in some measure offset the late sowing certain of the beds were sown with seed which had been soaked for twenty-four hours, and equal number with seed soaked for forty-eight hours, while the remainder

of the red pine beds were sown with untreated seed. Germination throughout was poor and the results of the experiment were negative in so far as obtaining a better germination for spring sown beds.

FALL SOWING OF CONIFEROUS BEDS

Cedar, white.....	53
Pine, jack.....	42
Pine, Scotch.....	69
Pine, red.....	442
Spruce, Norway.....	56
Spruce, white.....	112
Total.....	774

In addition two bushels of red cedar was sown in bands. As a blister rust control measure no white pine seed was sown during the year.

HARDWOOD SEED SOWN

Species	Total Amount of Seed Sown in Bushels
Ash, white.....	8
Birch, white.....	$\frac{1}{8}$
Birch, yellow.....	$\frac{1}{8}$
Butternut.....	7
Butternut.....	48
Cucumber Tree.....	1 lb.
Elm, white.....	10
Hickory, shagbark.....	1
Locust, black.....	2
Maple, hard.....	15
Maple, silver.....	20
Oak, red.....	2
Walnut.....	725
	<hr/>
	838 $\frac{1}{4}$

(d) *Transplanting:*

Transplanting of nursery stock started on May 2nd and was completed on June 1st.

Spring Transplanting of Coniferous Stock.....	4,125,000
Spring Transplanting of Deciduous Stock.....	242,000

(e) *Trees for Distribution in 1933:*

CONIFERS		DECIDUOUS	
Red Pine.....	910,000	Ash, green.....	1,600
Jack Pine.....	475,000	Ash, white.....	42,000
Scotch Pine.....	400,000	Basswood.....	1,500
White Spruce.....	980,000	Butternut.....	10,000
Norway Spruce.....	590,000	Cherry, black.....	150
White Cedar.....	670,000	Elm, white.....	49,000
Total.....	4,025,000	Locust, black.....	2,250
		Maple, hard.....	140,000
		Maple, red.....	8,000
		Maple, silver.....	64,000
		Oak, red.....	1,100
		Walnut, black.....	139,000
		CUTTINGS	
		Poplar, Carolina.....	100,000
		Willow, white.....	50,000
		Total.....	608,600
Grand Total.....		4,633,600	

(f) *Nursery Stock in Other Stages of Development:*

Conifers.....	12,070,000
Deciduous.....	288,350
Total.....	12,358,350

(2) IMPROVEMENTS

(a) *Buildings:*

No new buildings were constructed on the nursery during the year, all work being confined to routine maintenance. On the Durham County Forest a house was constructed for the caretaker and a stable built. Both of these buildings are in use and are proving entirely satisfactory.

(b) *Roads and Bridges.*

All roads on the nursery were graded and gravelled, as well as those sections of the township roads which abut on the nursery. A total of 990 yards of gravel was applied.

(c) *Fences and Windbreaks.*

A total of about 200 rods of cedar hedge was planted during the spring and fall. This species makes excellent growth and provides efficient wind protection. The loss is also very low being less than 0.5 per cent.

(d) *Surveys:*

A detailed stadia survey of the northern section of the nursery was made during the summer and a map prepared on a scale of 200 feet to the inch. All buildings, roads, windbreaks, etc., are shown.

A permanent plan of the seed bed areas, scale thirty feet to one inch, was also prepared. This plan shows all seed beds, water lines, etc., and is laid out on a three-year rotation.

(3) PERMANENT PLANTATIONS

All permanent plantations are in a healthy condition. A careful inspection for failures was carried out in all plantations and all gaps filled. No new plantations were set out.

(4) PROTECTION

(a) *Animal and Bird:*

Little damage was caused by mice or rabbits during the past year but black squirrels are becoming a nuisance. The latter confine their depredations to the butternut and walnut seed lines where they dig up and eat the nuts in the spring.

Crows are also a pest in the germinating walnut and butternut areas. An occasional patrol with a shot gun at dawn and just before dusk keeps these birds under fair control.

(b) *Insects:*

White Pine Weevil.—Control measures were continued in the Durham County Forest and the 200-acre block in Manvers Township. The attacks were much less severe this year.

Leconte's Sawfly.—Depredations from Leconte's Sawfly continued, but to a lesser extent than formerly. Two private plantations were inspected and sprayed. For the first time a very slight outbreak was noted in the nursery. All jack and Scotch pine plantations were immediately given a thorough inspection but, aside from the original branch attacked, no further evidences of infestation were discovered.

(c) *Fungi*:

Damping-off.—A very severe attack of damping-off occurred in the red pine seed beds during the warm, wet weather of June 1st, to 3rd. Severe loss was experienced during the three days mentioned. No later attacks of any severity occurred. Red pine was the only species which suffered unduly.

White Pine Blister Rust.—Ribes eradication was continued this year over the area which was cleared during 1931. A close check-up showed that satisfactory results were obtained from last year's work and that wild ribes are well under control. Unfortunately the cultivated black currants in the village are a very serious source of infection. Every black currant bush which was inspected was severely infected and, unless some degree of control can be established over these cultivated bushes, infection is bound to persist.

As a result of this situation no white pine were transplanted on the nursery nor were any white pine seed beds set out.

(5) WOODLOT IMPROVEMENT

In the effort to curtail expenditures very little work was done in the way of woodlot improvement. The hardwood bush on the nursery was severely thinned, elm and cherry being removed and maple and basswood given preferential treatment.

On the two hundred acre block in Manvers Township, sufficient over-mature, crooked and damaged hardwoods were cut to supply fuel for the nursery for the next two seasons, a total of about sixty cords being cut and hauled.

(6) PUBLICITY

The removal of the restriction on the number of trees made available to the individual planter for reforestation purposes resulted in a very marked increase in orders of from 10,000 to 100,000 trees. In almost all instances these large orders were placed by previous planters. In all cases there were sufficient experienced men available to ensure the proper handling of the trees.

The Corporation of Bowmanville planted out some 25,000 trees on municipally owned land as a method of unemployment relief. The municipality thus obtained material results from an expenditure which was a necessity in any event.

Exhibits were placed at only five fairs this year—three at school fairs and two at agricultural fairs. The school fairs visited were at Welcome, Garden Hill and Millbrook. Results obtained from these were not good. The agricultural fairs visited were the combined West Durham and Clarke Township Fair at Orono and Norwood Fair in Peterborough County. As products from local plantations and transparencies of these plantations were main features of the exhibit the results were very marked.

Two floats were prepared and exhibited in the Orono Centennial and Home Coming Week parade in July and during the following week they were also placed by request in the Bowmanville Board of Trade and Labour Parade.

On invitation, talks on reforestation and related matters were delivered before the Rotary Clubs in Lindsay, Port Hope, Bowmanville and Cobourg during the early winter.

Visitors are coming in increasing numbers each year. Considerably more than twice as many visitors viewed the nursery this year as in any previous season. The route of the Durham County Apple Blossom Week Tour now includes a visit to the nursery and this season large numbers of people availed themselves of this opportunity.

NURSERY STOCK ON HAND AS AT NOVEMBER 31ST, 1932

Nursery stock on hand in various stages of development: Conifers, 16,095,000; Deciduous, 900,900.

MIDHURST

The fall of 1931 was an excellent one for seed bed work and it continued quite mild until Christmas. The winter of 1931-32 was quite open although the spring was rather late. Nursery work did not start until about April 20th. All nursery stock wintered in first-class shape.

The weather in the spring was excellent for transplanting. Later on in the growing season we had an abundant rainfall, and growth of nursery stock was very good.

(1) NURSERY OPERATIONS

(a) *Fertilizers:*

The amount of natural barnyard manure used at this station was greatly reduced. All manure was purchased locally giving preference to those who needed the cash.

Owing to the lack of frost in the swamp we did not take out any humus in the winter months as the roads were not frozen sufficiently to carry horses.

Sweet clover is used exclusively now, as our green manure crop. The sweet clover is plowed down the second year in June after seeding. It is proving very successful here as a fallow crop. A crop of oats is sown with the clover the first year to keep the weeds down.

The following artificial fertilizers were used on the seed beds:

Blood Meal.....	508 lbs.
Muriate of Potash.....	96 lbs.
Bone Meal.....	71 lbs.
Sulphate of Ammonia.....	9 lbs.
O-12-15.....	12 lbs.
Acid Phosphate.....	148 lbs.
4-8-10.....	72 lbs.
2-8-10.....	76 lbs.
Sheep Manure.....	20 lbs.
The lawns received 500 lbs. of blood meal.	

(b) *Seed:*

All seed, with the exception of a few experimental seeds, was received from the Extraction Plant at Angus.

(c) Seed Beds:

As usual most of the sowing of coniferous seed was undertaken in the fall. The actual seeding was started on November 2nd and finished on November 14th. Some red pine beds and experimental beds were sown in the spring as soon as the frost was out of the ground.

Germination was excellent in all fall sown beds except the white cedar. The spring beds were rather poor especially the 1929 red pine seed. Damping-off was not very troublesome this year.

The following charts will give the amount of coniferous and hardwood seed sown in the fall and spring:

CONIFERS			HARDWOODS		
Fall	Species	Beds	Species	Bushels	
	Red Pine.....	442	Walnut.....	918	
	Scotch Pine.....	71	Butternut.....	7	
	Jack Pine.....	49	Red Oak.....	12 $\frac{3}{8}$	
	White Pine.....	194	Hard Maple.....	10 $\frac{1}{4}$	
	Norway Spruce.....	67	White Ash.....	$\frac{3}{8}$	
	White Spruce.....	65	Green Ash.....	1 $\frac{1}{2}$	
	White Cedar.....	115	Red Ash.....	$\frac{3}{4}$	
	Red Cedar.....	5	Bitternut Hickory.....	$\frac{3}{8}$	
	Experimental.....	7	Shagbark Hickory.....	$\frac{3}{4}$	
	Total.....	1,015	Total.....	950 $\frac{3}{8}$	
Spring	Species	Beds	Species	Bushels	
	Red Pine.....	128	Soft Maple.....	5	
	Scotch Pine.....	19	White Elm.....	7	
	Experimental.....	41			
	Total.....	188	Total.....	12	

(d) Transplanting:

The weather during the transplanting season was excellent. We had plenty of rain to keep the ground moist, and except for a few odd days the weather was not windy.

Trees of all species lined out in the spring of 1932 were 4,578,095.

(e) Trees Ready for Distribution in 1933:

CONIFERS	HARDWOODS
Red Pine.....2,534,042	Walnut.....134,775
White Pine.....679,038	Butternut.....21,750
Jack Pine.....252,220	Basswood.....10,075
Scotch Pine.....158,327	American Elm.....23,825
White Spruce.....724,746	Red Oak.....40,200
Norway Spruce.....968,716	Soft Maple.....43,750
White Cedar.....290,238	Sugar Maple.....13,125
Red Cedar.....12,036	White Ash.....13,750
European Larch.....39,591	Black Cherry.....1,400
Total.....5,658,954	Yellow Birch.....10,600
	Black Locust.....1,000
	Rooted Poplar.....200
	Poplar Cuttings.....40,000
	Willow Cuttings.....25,000
	Total.....379,450

Grand Total.....6,038,404

(f) Nursery Stock in Other Stages of Development:

CONIFERS		HARDWOODS	
2 year olds.....	4,800,000	Soft Maple.....	30,000
1 year olds.....	10,800,000	American Elm.....	30,000
		Walnut.....	40,000
Total.....	15,600,000	Hard Maple.....	30,000
		White Ash.....	5,000
		Total.....	135,000

(2) IMPROVEMENTS

Numerous hedges were laid out in the fall and spring. These hedges were mainly compartment boundaries. About a mile of our network of roads were resurfaced with gravel.

The park was greatly improved and a lily pond and rock garden were constructed. A cairn was erected as a memorial to the Vespra boys who fell in the Great War.

The park was also enlarged and an athletic field started.

The reservoirs were again stocked with 5,000 trout fingerlings.

The shipping shed was enlarged in order to facilitate the handling of trees for distribution in the spring.

Costly permanent improvements were not undertaken this year owing to economic conditions.

(3) PERMANENT PLANTING

The permanent planting programme at the nursery was limited this year as the land so far acquired is nearly all planted. The following trees were planted:

White Spruce.....	23,500
Norway Spruce.....	20,000
Red Pine.....	21,750
Scotch Pine.....	8,000
White Pine.....	1,500
European Larch.....	200
Mixed Hardwoods.....	3,000
Willow and Poplar Cuttings.....	5,000
Total.....	82,950

(4) PROTECTION

(a) Insects:

During July the white pine plantations were patrolled for weevil and the infected leaders destroyed.

The Leconte's pine needle sawfly (*Neodiprion lecontei*) was less prevalent this season.

This season we were bothered with the Nantucket pine shoot moth. This moth worked mostly in white pine. The larvae hollow out the pith of the leaders and the damage is not noticeable until late July or August. It affects the side leaders as well as the main leader. It infected about twenty-five per cent. of the white pine planted in pure stands. Its work was not noticed in plantations of white pine mixed with poplar. Control is difficult because by the time the damage is noticeable the larvae in the majority of cases have emerged. We are anxious to see if this pest is with us again next year or whether it works periodically.

(b) Fungus Diseases:

Poplar canker (*Hypoxylon pruniatum*) is still prevalent. The infected trees are cut out when noticed.

The ribes eradication programme started last season was continued this season. The whole area was again intensively gone over and all species of ribes were eradicated when noticed.

A fungus destroyed a number of walnuts that were heeled in over winter. It is similar in action to the snow fungus which attacked the spruce at the Canada Power and Paper Corporation nursery in Quebec. This coming season we are going to treat our soil and walnuts as we heel them in with a fungicide.

(c) Birds:

Sparrows which cause considerable damage to the young germinating seed were trapped or shot in an effort to control the damage.

(d) Fire:

Only one small fire occurred at this nursery this year.

All fire guards were kept free from weeds and other inflammable material.

(5) WOODLOT IMPROVEMENTS

During the winter of 1931-32 considerable hardwood and swamp coniferous bush was treated silviculturally. These operations yielded a supply of fire wood, posts and logs for lumber.

(6) PUBLICITY

The nursery and park are still a growing centre of interest and numerous picnics and celebrations are being held on the property at this station. Great interest is shown in all phases of the work.

The fall fairs as usual were visited and the interest shown, measured by the number of requests for application forms, was greater than in former years.

COUNTY FORESTS

The following trees were planted:

ORR LAKE (Simcoe County)

Red Pine.....	221,400
Norway Spruce.....	70,000
White Pine.....	300
Scotch Pine.....	300
White Spruce.....	300
White Cedar.....	300
Red Cedar.....	300
Larch.....	300
	<hr/>

	<hr/>
	27,500

DIRECT SEEDING

The seeding of an area between Ardbeg and Boakview in the Townships of Burpee and Burton to jack pine, white pine and white spruce was continued this year. The area sown consisted of 433.24 acres of which 102.56 acres were sown to jack pine, 103 pounds of seed being used, and 330.68 acres were sown to a mixture of white pine and white spruce, 550 pounds of white pine seed and 1,100 pounds of white spruce seed being used.

MOSS GATHERING

An area of moss was located in a spruce swamp twenty-five miles north of Havelock in Peterborough County. A total of 1,438 bales was obtained at an average dry weight of 22½ pounds giving a total of 32,355 pounds.

PRIVATE PLANTING

In the spring of 1932, 6,728 people secured trees from the Ontario Forestry Branch, totalling in all 8,352,939.

SCHOOL PLANTING

In the spring of 1932, 305 schools secured trees from the Ontario Forestry Branch, totalling in all 144,230.

LETTER OF TRANSMISSION

TO THE HONOURABLE HERBERT ALEXANDER BRUCE,
Lieutenant-Governor of the Province of Ontario.

SIR, —I have the honour to transmit to you herewith, for presentation to the Legislative Assembly of the Province of Ontario, the Forty-second Annual Report of the Department over which I have the honour to preside.

I have the honour to be, Sir,

Your obedient servant,

CHAS. MCCREA,
Minister of Mines.

DEPARTMENT OF MINES,
Toronto, 1933.

INTRODUCTORY LETTER

TO THE HONOURABLE CHAS. MCCREA,
Minister of Mines.

SIR, The undersigned has the honour to submit the Forty-second Annual Report of the Department of Mines, issued in six parts, as follows:

PART I

Statistical Review of Ontario's Mineral Industry in 1932, by W. R. Rogers and A. C. Young.
Mines of Ontario in 1932, by D. G. Sinclair, R. H. Cleland, E. C. Keeley, D. F. Cooper, and
A. R. Webster.
Mining Accidents in 1932, by D. G. Sinclair, R. H. Cleland, E. C. Keeley, D. F. Cooper, and
A. R. Webster.
Classes for Prospectors, 1932-33, by E. M. Burwash.

PART II

Erosion and Sedimentation at Point Pelee, with Map No. 42*a*, by E. M. Kindle.

PART III

A Technical and Economic Investigation of Northern Ontario Lignite, by the Ontario Research
Foundation.
Lignite and Refractory Clay Deposits of the Onakawana Lignite Field, by W. S. Dyer and
A. R. Crozier.
Appendix: Laboratory Classification of Refractory Clays, by R. J. Montgomery.
Refractory Clay Deposits on the Missinaibi River, by A. R. Crozier.

PART IV

Kakagi Lake Area, with Map No. 42*b*, by E. M. Burwash.
Manitou-Stormy Lakes Area, with Map No. 42*c*, by Jas. E. Thomson.

PART V

Natural Gas in 1932, by R. B. Harkness.
Petroleum in 1932, by R. B. Harkness.

PART VI

Shabumeni-Birch Lakes Area, with Map No. 42*d*, by Geo. D. Furse.
Paskokogan-Mischkow Area, with Map No. 42*e*, by W. S. Dyer.

Only Part I is bound with the Sessional Papers of the Legislature. All parts, together with accompanying geological maps as indicated above by number and letter, are available on application to the Department.

Respectfully submitted,

THOS. W. GIBSON,
Deputy Minister of Mines.

DEPARTMENT OF MINES,
Toronto, 1933.

PROVINCE OF ONTARIO
DEPARTMENT OF MINES

HON. CHAS. MCCREA, *Minister of Mines*

THOS. W. GIBSON, *Deputy Minister*

The gold mines of the Province are worked both day and night.

STATISTICAL REVIEW OF ONTARIO'S MINERAL INDUSTRY IN 1932

By W. R. Rogers and A. C. Young

General Remarks

A close relation between commodity prices and gold mining has been noted by many economists. The rise and fall of these prices has synchronized in many cases with gold output throughout the past hundred years. A century ago the world was attempting a recovery from the Napoleonic wars, and it has been observed that the general trend of commodity prices from the end of that war until about 1850 was largely downward. From 1830 to 1850 the decline was about 25 per cent. History records that the tide then turned and with the discoveries of gold in California in 1848, and Australia in 1851 and later, commodity prices, with brief interruptions, rose until 1873, and at that period were 45 per cent. above the quotations of 1850. Prices again fell, to recover once more in the nineties as a result of the South Africa (Rand) discoveries coupled with the new metallurgical treatment by cyanide which made large quantities of new gold available. From the nineties until 1914 or the beginning of the Great War commodity prices on the whole were higher than formerly. The war period witnessed higher levels, culminating in October, 1920, in another slump in prices which by 1922 had decreased by one-third. The recovery was rapid, and remained remarkably stable until the financial crash in 1929, followed by a steady fall in prices which was accentuated by Great Britain going off the gold standard in September, 1931.

If history is to repeat itself, the discovery of a large field from which gold could be rapidly recovered, would again turn the tide of commodity prices. It has always been noted that when commodity prices are low, gold becomes relatively more valuable and every effort is strained to find new mines, push production in old mines, and operate other deposits which in normal times could not be worked at a profit. This must be one of the reasons back of the struggle for gold and as this search intensifies, gold mining in the northern portions of Ontario will continue to thrive while the number of men engaged in the search for gold will increase. Capital in looking for safety and reward cannot fail to be attracted to those countries with lands open to prospect where formations are favourable to gold occurrences. In consequence the immense pre-Cambrian shield of Ontario will undoubtedly experience an increasingly intensive search.

An examination of tables Nos. I and II, which follow, shows that during 1932 the total mineral output declined by \$15,297,871 or 16.0 per cent., divided among the main groups as follows: metallics, \$8,455,527 or 11.7 per cent.; non-metallics, \$280,411 or 3.6 per cent.; structural materials, \$4,699,639 or 39.2 per cent., and clay products, \$1,862,294 or 52.4 per cent.

The total value of the mineral industry of the Province from all sources to the end of 1932 (Table III) closely approached two billions of dollars.

TABLE I.—SUMMARY OF MINERAL STATISTICS OF ONTARIO FOR 1932

Product (tons of 2,000 lb.)	Quantity	Value	Employees	Wages

(a) Copper in matte valued at 3½ cents per pound, and nickel at 18 cents.

(b) Employees and wages for nickel-copper mines, smelters and refineries include statistics of the Ontario Refining Company.

(c) Employees and wages for silver-cobalt smelters and refineries.

(d) Employees and wages included with (c).

(e) Tonnage given is sulphur content of sulphuric acid, no iron pyrites sold in 1932.

(f) No deduction made for lime consumed in manufacturing.

TABLE II.—COMPARATIVE VALUE OF MINERAL PRODUCTION, 1928-1932

Product	1928	1929	1930	1931	1932
METALLIC:	\$	\$	\$	\$	\$

(a) Cobalt in oxide, metallic cobalt, and cobalt content of residues marketed.

(b) Nickel in matte, oxide, and metallic nickel.

(c) Exports and shipments to points other than Ontario blast furnaces.

(d) Product from Ontario ore only.

(e) Includes value of sulphuric acid produced.

(f) Not included in the total of non-metallics or grand total.

(g) No deduction made for lime consumed in manufacturing.

Table III shows the aggregate value of metals from the time production began in Ontario and of other minerals since the year 1891. As regards pig iron it should be pointed out that since 1914 the statistics of annual production credit the Province only with the value of the product made from Ontario ore. This is but a small part of the total output, since the great bulk of the iron ore charged to the blast furnaces of the Province is "lake" ore from the mines of Minnesota and Wisconsin. In the production tables credit is taken only for the ore exported or shipped to points other than Ontario blast furnaces, since to include the value of the domestic ore converted into pig iron in Ontario furnaces would involve a duplication of this item. The table follows:—

TABLE III.—TOTAL MINERAL PRODUCTION OF ONTARIO

Year	Value of mineral production				
	Metallic	Non-metallic	Structural materials	Clay products	Total
	\$	\$	\$	\$	\$
Before 1891....	(a) 9,520,269		(a)		9,520,269

*The amount for 1932 was paid on preferred stock of the International Nickel Company of Canada, Limited.

Gold

Gold mining, the world over, has received of late increasing attention in every gold-producing country, and gold output figures for 1932 are the greatest on record. Outstanding among these developments has been the rising tide of gold production in Canada and more particularly Ontario, which now contributes 75 per cent. of the total Canadian output.

The popularity of gold and the increasing activity to produce the metal arises from the fact that it is the only international medium of exchange. Since nations must meet their foreign obligations in gold, it becomes necessary for them either to buy the metal in foreign markets or to produce it within their own boundaries. Canada is therefore in the favourable position of being able to pay the market price of gold to domestic producers and the exchange compensation paid or the difference in value as between the Canadian and United States dollar in a large measure remains within the country. The gold producer always has a ready market for his product, and profits are greater in times of depression owing to lower production costs.

During 1932, production came from 29 properties operated in Ontario, 10 in the Porcupine belt, eight in the Kirkland Lake belt, seven in the north-western section of the Province, and four under the Miscellaneous heading. The gains in gold output over 1931 by fields were: Porcupine 7.7 per cent. or \$1,532,889, Kirkland Lake 9.4 per cent. or \$2,046,318, and Northwestern Ontario 60.6 per cent or \$613,729.

Apart from the steadily increasing output by the well-established mines of Porcupine and Kirkland Lake, the outstanding features of the year have been the development of smaller mines in other parts of the Province, and prospecting activity. The poor market conditions for base metals such as copper, lead and zinc has tended to turn the prospector's attention almost entirely to gold, with the result that several deposits have been uncovered, and prospectors have spread their activities into new fields where favourable rock formations occur.

During the past year the Ashley mine in Bannockburn was brought into production, the Croesus mine in Munro township was reopened and efforts made to pick up the extension of that fabulously rich vein. Operations in the Swayze area were actively carried on, and good surface showings opened up on the Kenty, Derragh, and other properties. Farther to the west in the Michipicoten area the Parkhill and Minto produced throughout the year, while the New Goudreau made a small shipment of gold bullion. Mill enlargement to 100 tons has been made at the Parkhill. Diamond-drilling was carried on at Little Long Lac in Thunder Bay district with encouraging results by the Sudbury Diamond Drilling Company. At the turn of the year freighting was being done by airplane to the Central Patricia mine, which lies some 20 miles north of Lake St. Joseph in the Crow River area. A small mill is being erected on this property.

Much investigational work was carried on at several former gold producers in Kenora district, including Caribou, Mikado, and at Cedar Island on Lake of the Woods. This phase of the search for gold was perhaps unique in 1932 inasmuch as the interest in properties worked some years ago was more pronounced than formerly.

Events of interest in the producing gold camps are summarized as follows:—

PORCUPINE BELT:—The *Hollinger* operated at a daily milling rate of 4,834 tons with an average recovery of \$5.83 per ton, as against a recovery of \$6.15 per ton in 1931. The physical condition of the mine remained unchanged.

A. F. Brigham, retired as General Manager, to become Consulting Engineer. He was succeeded by John Knox. Dr. L. C. Graton completed the underground geological survey. *McIntyre*: The average milling rate was 1,976 tons for the year and \$7.50 per ton was recovered. The new mill is now operating smoothly. Preparations are under way to sink a winze from the 3,750-foot level on the Platt Vet section of the mine with an objective of 6,750 feet. Daily capacity of *Dome* mill is 1,466 tons, and recovery \$7.47 per ton. The installation of the blanket equipment in the mill has improved the extraction. *Coniaurum* and *Vipond* operated for the whole period. The *March* mine closed July 19. The *Buffalo Ankerite* resumed operations in May, and has now increased the mill capacity to 325 tons daily. The *Hayden* mine operated its test mill in May and June. Some rich ore was recovered from the *John Spence* property at Triple Lake about 20 miles south of the Porcupine camp. The *Munro-Croesus* was also operated and a small recovery of gold was made in September, October and November from the mine ore dumps.

KIRKLAND LAKE BELT:—The daily rate of milling at *Lake Shore* was 2,243 tons with an average of \$15.45 per ton recovered. The company is preparing to treat tailings deposited in Kirkland lake independently of the Wright-Hargreaves Mines, Ltd. To this end the Consolidated Tailings, Ltd., was incorporated in April, 1932. The average mill rate at *Teck-Hughes* was 1,300 tons per day showing a recovery of \$12.31 per ton. The annual report of Nov. 22, 1932, stated that a block of ten levels below the thirtieth was opened up, and that the total ore length amounted to 3,388 feet having an estimated average grade of \$9.32 per ton. Mill capacity at the *Wright-Hargreaves* is 807 tons per day and average grade \$13.48. The No. 4 shaft was completed to 4,000 feet in depth early in 1933, and it is planned to deepen No. 3 shaft to the same depth. The present mill capacity is to be increased to 1,000 tons using the flotation process developed by the company's engineers. Other mines in the camp, *Sylvanite* and *Kirkland Lake Gold*, operated throughout the year with daily mill tonnages of 265 and 155 tons, averaging \$8.46 and \$9.28 per ton, respectively. The *Tough-Oakes* mine, renamed the *Toburn*, resumed operations in August after an idleness of 31½ years. The rate of milling was 105 tons per day with ore averaging \$13.87 per ton. Development on the *Macassa* to the west and on the *King Kirkland* to the east of the producers was continued during the period, and at the former ore is being opened up on the 2,200- and 2,325-foot levels. The *Barry-Hollinger*, about six miles south of the Kirkland Lake area, operated at 96 tons daily capacity with an average recovery of \$4.59 per ton. The *Ashley* gold mine, operated by Mining Corporation of Canada, Ltd., in Bannockburn about 40 miles west of the main area, commenced milling August 25, 1932, and the average milling rate per day for the period was 75 tons, with a recovery of \$9.00 per ton. Considerable absorption took place in the new mill which has recently been stepped up to 115 tons daily.

NORTHWESTERN ONTARIO:—This portion of Ontario may be regarded as extending from the Algoma Central railway to the western boundary of the Province, and while the gold mines of this area with the exception of the *Howey* are not large, yet the developments recently have been important. In the extreme northwest at Red lake in the Patricia portion of Kenora district the *Howey* is operating profitably on an ore averaging \$3.94 per ton. The average rate of milling was 780 tons in 1932, and costs of \$2.47 per ton before depreciation are the lowest of any gold mine in the Province. This mine which is 100 miles from the railway affords a striking example of what may be accomplished to-day

in developing gold deposits remote from railway transportation. The *Moss* mine near Kashabowie was operated in 1932 at an average rate of 82 tons per day and \$6.85 per ton recovery. The *Minto* and *Parkhill* in Michipicoten, while smaller in mill equipment, each treated ores of \$8.72 grade. At Schreiber, several properties were being worked including the *McKellar-Longworth* by Schreiber Gold Mines, Limited, and the *Harkness-Hays*. From the former, gold ore was shipped by R. N. Palmer to the International Nickel Company at Copper Cliff and to the Noranda smelter.

¹In addition to the values given, exchange compensation amounted to \$2,815,381.21 at Porcupine; \$3,137,847.59 at Kirkland Lake, and \$211,630.04 in Northwestern Ontario. In addition \$329.66 was paid as premium on material shipped to the Ontario Refining Company, or a grand total of \$6,165,188.50.

²Includes Hayden, and recoveries from scrap machinery, etc.

³Includes C. T. Young (Three Duck Lakes), O'Brien Mine (Cobalt), R. Downey (Long Lake mine, located in T. B. 69).

(a) On April 22, 1922, the capital of Dome Mines Co., Ltd., was reduced from \$5,000,000 to \$4,500,000, and \$476,667 (repayment of capital not included in above table) distributed to shareholders in addition to dividends paid to September 30, 1923, when the new company, Dome Mines, Limited, issued 1,000,000 N.P.V. shares at \$7.00 per share. Of these 46,666 shares are transferred to a Trustee and held in trust for the company.

(b) Hollinger Consolidated Gold Mines, Limited, is an amalgamation of the Acme Gold Mines, Ltd.; Millerton Gold Mines, Ltd.; and Hollinger Gold Mines, Ltd. Dividends include \$160,000 paid in 1915 by Acme, also \$4,170,000 paid by Hollinger to May 25, 1916, the date of consolidation.

(c) The Schumacher mine was sold to the Hollinger in 1922 and a total of \$1,591,000 or 86 per cent. of the assets distributed to shareholders, the final payment being made July 30, 1923.

(d) The authorized and issued capital was changed in May, 1927, from 2,750,000 shares of \$1.00 par value to 5,500,000 shares of "no par" value.

*Includes \$160,000 paid by the Acme in 1915, before amalgamation with the Hollinger. †Does not include repayment of capital of \$476,667 in 1922.

‡Includes \$12,000 paid by Rea in 1915.

Gold from all sources in Ontario in 1932 totalled 2,287,394 fine ounces or an increase of 9.7 per cent. over the 1931 production. Of this total 2,264,543 ounces were recovered by the gold mines, 22,675 ounces from the refining of nickel-copper mattes, and 175.74 ounces were contained in miscellaneous ores and concentrates.

RECEIPTS OF CRUDE GOLD BULLION FROM ONTARIO MINES AT THE ROYAL CANADIAN MINT, OTTAWA, 1928-1932

Year	Crude ounces	Precious metals			Buying rate in Canada for New York funds*	Exchange compensation†
		Gold, fine oz.	Silver, fine oz.	Total value		
				\$		\$
1928	1,537,295	1,217,622	199,470	25,285,865	100 0817	2,811
1929	412,058	328,556	54,068	6,821,876	100 747	157,456
1930	908,209	713,527	86,419	4,760,111	100 147	36,702
1931	1,762,481	1,441,602	171,408	29,850,774	104 272	1,786,175
1932	2,865,271	2,248,106	300,927	46,554,898	113 520	6,164,271

*The average rate of premium on New York funds is based on the day to day record of current quotations.

†The Federal Department of Finance pays for gold in Canadian funds and reimburses producers by an amount equivalent to the exchange premium on New York funds. Export of gold is prohibited except under license.

Graph showing fluctuations of the buying rate in Canada for New York funds from 1918 to 1932, inclusive. The average yearly premium or discount rate is noted in percentage figures at the base of the chart. During 1932 exchange compensation paid to Ontario gold producers amounted to \$6,164,271. Further details will be found in the footnotes of the historical production tables for Porcupine and Kirkland Lake, and also in the table showing crude bullion receipts at the Ottawa mint.

World Output.—The following statement of output by the leading gold-producing countries, for 1915 (year of maximum U.S. production), also for 1923 and subsequent years, has been abstracted chiefly from reports of the Director of the United States Mint and the American Bureau of Metal Statistics. Russian figures since 1927 are from Soviet Press Agency sources. Canada attained second place among the gold-producing countries of the world in 1930, having overtaken the United States (exclusive of the Philippine Islands). The Province of Ontario, as deduced from the table, produced 75 per cent. of Canada's gold in 1932. For the first time output exceeded that of the United States.

OUTPUT BY LEADING GOLD-PRODUCING COUNTRIES AND STATES

(Millions of dollars - standard basis of \$20.671834 per fine ounce)

Silver-Cobalt

The extremely low price of silver and a depressed market for cobalt has lowered Ontario's sales of silver to 6,216,490 fine ounces, and until the price of the metal improves, and a more active consumption of cobalt materializes, the production of silver in Ontario cannot be expected to increase. However, with better conditions obtaining, there are a number of properties in the Cobalt camp which could be brought into production again, and considerable silver and cobalt recovered. On December 29, spot silver on the New York market was quoted at 24¼ cents per fine ounce, the lowest level in history.

Operations are now practically reduced to the O'Brien mines at Cobalt and Cross Lake and the Miller Lake O'Brien at Gowganda. These properties feed the Deloro smelter operated by the same ownership. The Mining Corporation has practically worked out its mines at Cobalt and during the past year removed the remaining backs of stopes underlying the dry bed of Cobalt lake. The Nipissing mine output was just a fraction of its former large production. Activities in this old camp were maintained in part by a number of lessees who operated some of the mines. The difficulty in marketing cobalt ore, however, has retarded operations very considerably.

The following table shows statistics based on the metal contents of shipments of ore and concentrates and should not be confused with the figures in the main table on page 4, or with those found in Table XI. Silver shown as shipped in Table X has been compiled for each mining area and is mainly the silver contents of ore or concentrates shipped to the reduction works at Cobalt or to the silver smelters. Of necessity there is a lag and it does not follow that all the ores, etc., shipped have received treatment during the year by smelters, although over a period of years, these figures will agree closely with those for silver bullion sold, as given in Table I on page 4.

Since the discovery of silver at Cobalt in 1903 silver shipments from this and outlying silver camps, as reported by the operators, have been as follows:—

TABLE X.—SILVER SHIPMENTS BY CAMPS, 1904-1932

Year	Average price, cents per ounce (New York)	Silver content in troy ounces					Montreal R. and Maple Mountain, etc.

Total		417,937,757	371,944,124	2,799,740	22,773,993	20,371,342	48,558

(a) Includes 885 ounces from Silver Islet, Lake Superior.

(b) Silver Islet, Lake Superior.

(c) Nickel Hill Syndicate in the Sudbury area shipped silver-cobalt ore.

According to the records of the Temiskaming and Northern Ontario Railway, total shipments of ore and concentrates during the calendar year were 3,539.84 tons, of which 2,461.03 tons were consigned to the Deloro Smelting and Refining Company; 616.31 tons to Europe; 461.33 tons to Trail, B.C.; and 1.17 tons to the United States. Total shipments were 2,839.03 tons of silver ore and concentrate, and 700.81 tons in which cobalt was the chief constituent.

The statement as given in Molatta & Goldsmid's Annual Circular, London, England, dated Jan. 20, 1933, outlines the statistical position of silver in the world as follows:—

The outlook for the future is particularly obscure at this juncture. The price of silver and other commodities is closely allied to the course of exchanges, which in turn are acutely influenced by the changing International political conditions, of which the question of War Debts is the key note. On its own merits there appears to be little to raise the price of silver; stocks are plentiful in all markets, the offtake is extremely small and production, although estimated at about 160 million ounces, compared with about 192 million ounces last year, is still more than can be absorbed. At the same time a solution of the various problems which beset the world at the present time might easily bring about a rise in world prices, including that of silver.

It may be pointed out that figures of output are based as far as possible on actual sales of bullion and silver contained in concentrate and residues exported, with the gross values as reported by the producers before deducting treatment and shipping charges. The figures for any one year do not agree with those in Tables X and XII but average up over a period of years:—

SILVER PRODUCTION, 1931 AND 1932

Source	1931		1932	
	Fine ounces	Value	Fine ounces	Value
Sales of bullion by the reduction companies, smelters and mines.....	4,901,860	\$ 1,391,949	4,662,059	\$ 1,455,822
Contained in silver-cobalt concentrates and residues exported.....	513,795	154,939	162,708	50,126
Estimated as recovered from concentrates treated outside of Ontario.....			282,121	86,945
In crude gold bullion.....	364,401	103,270	445,763	117,951
Recovered by nickel-copper refineries..	822,971	230,702	663,839	200,093
Total.....	6,603,027	1,880,860	6,216,490	1,910,937

Shipments of silver mines by camps during 1931 and 1932 were as follows:—

Camp	1931			1932		
	Silver	Cobalt *		Silver	Cobalt *	
	fine oz.	lb.	\$	fine oz.	lb.	\$
Cobalt.....	3,706,880	1,106,285	511,941	3,262,380	191,067	48,217
Gowganda.....	1,697,242	104,223	11,356	1,374,780	72,081	10,469
South Lorrain..	594,360	764,989	426,077	22,144	6,517	2,737
Total.....	5,998,482	1,975,497	949,374	4,659,304	*291,923	71,447

*Figures represent the quantities paid for by the smelters, and values received by the mines.

With regard to the gradual cessation of mining at Cobalt it is of interest to quote from the last annual report of the Nipissing Mining Company, Ltd., one of the most important silver producers at Cobalt. This company to the end of 1931 has paid \$29,940,000 in dividends.

Active stoping operations at the Cobalt property ended in March (1932) by which time all the high-grade ore had been extracted from the lower levels and the workings at the various shafts were allowed to fill. The mills and refinery completed the clean-up by the end of April.

The property at Cobalt, so far as immediate profitable operations are concerned, can be considered as finished. There remains some tonnage of unmined cobalt ore and unimportant occurrences of silver. It is highly probable that the last silver vein is still to be discovered, but until there is a material increase in the price of silver, there is no incentive or justification for undertaking further detailed exploration to discover new veins or to eliminate the few remaining possibilities.

Another famous producer was the Mining Corporation of Canada, Ltd., a consolidation of the Cobalt Lake Mining Co., Ltd., the Cobalt Townsite, and City of Cobalt properties. It also closed down mining operations in 1932, and the Annual Report states:

Since the termination of the cobalt ore contract in 1931 mining operations in 1932 were confined to the extraction of silver ore at Cobalt. Low silver prices prohibited any exploration work, though normal prices may eventually justify such work in certain sections of the Cobalt Lake property.

At the beginning of the year, the bulk of the remaining silver ore was contained in old stope backs in proximity to the bottom of Cobalt lake, such ore being overlain with accumulated mill tailings. To make this ore available for extraction, an opening was blasted through from the underground workings and 400,000 tons of the overlying tailings flowed by gravity into the worked-out sections of the mine. This operation permitted the safe and easy extraction of the ore at an unusually low cost per ounce of silver. All available tonnage was completely removed by the end of the year and the long productive record of the Corporation at Cobalt came to an end.

TABLE XI.—TOTAL SHIPMENTS FROM SILVER MINES, SMELTERS AND REFINERIES, 1904-1932

Year	Bismuth		Copper(a)		Lead(a)		Nickel(b)		Cobalt(c)		Arsenic		Silver		Total value

(a) Copper and lead are recovered from certain silver ores and concentrates shipped to United States refineries. (b) Nickel metal and metallic contents of all nickel compounds. (c) Cobalt metal and metallic contents of all cobalt compounds, also cobalt contained in ores and speiss residues exported. In 1932, it includes 22,258 lb. worth \$10,024 from Northwestern Ontario. (d) Prior to 1914 an estimate based on assays was made of the nickel, cobalt and arsenic in the ores. Since that date recoveries have been reported. (e) Recoveries of bismuth from base bullion were not reported prior to 1923. (f) Includes 460 tons of speiss residues worth \$153,116.

TABLE XII.—DIVIDENDS AND BONUSES PAID BY SILVER MINING COMPANIES TO DECEMBER 31, 1932

Total (f).....	97,576,281.16	10,000.00	97,586,281.16

(a) In 1917 the capital stock of the company was reduced from \$1,000,000 to \$750,000; in 1918 from \$750,000 to \$500,000; and on December 21, 1919, from \$500,000 to \$150,000, but returning to shareholders amounts equal to the reduction in capital, leaving 300,000 shares issued of 50 cents each. The mine was sold to the Mining Corporation of Canada, and operated by it in 1920 and subsequently.

(b) 200,000 preferred shares, par \$1.00, redeemed April, 1925, and capital reduced from \$2,200,000 to \$2,000,000.

(c) Cash assets amounting to \$50,000 paid on April 27, 1917.

(d) Name of company changed from Temiskaming and Hudson Bay in 1909.

(e) In addition a return of capital amounting to \$600,000 was made on July 3, 1919, to stockholders of the Kerr Lake Mines, Ltd.

(f) Mining Corporation of Canada, Limited, now owns and operates the City of Cobalt, Cobalt Lake and Cobalt Townsite mines.

(g) Includes \$16,288,297.25 paid in dividends by the Nipissing Mines Co. (the holding company) to the end of 1916.

(h) Paid out of capital \$10,491.15 on September 10, 1917, and an equal amount on April 24, 1918.

(i) Does not include dividends by private companies such as M. J. O'Brien, Ltd.

Nickel, Copper and Platinum Metals

Statistics of production from the nickel-copper industry are indicative of the general decline in business activity. Throughout the American continent the consumption of nickel, now dependent on industrial manufacturing rather than for armament purposes, will in the future act as a measure of business conditions. The gradual recovery of business coupled with the replacements of machinery which become ever more pressing will be reflected by an increased consumption of nickel.

Robt. C. Stanley, President of the International Nickel Company of Canada Limited, reviewed the nickel industry in *Metal and Mineral Markets*, issue of Dec. 29, 1932, as follows:—

The nickel business has become one of the basic industries of the world, which rise and fall with the tide of general business. This is demonstrated by the low point that nickel consumption reached last spring, and by the slow but persistent recovery which it has experienced in the last few months. Whether it will continue this advance in 1933 thus depends on what fate has in store for world business as a whole. . . . World consumption of nickel for the first nine months of 1932 slightly exceeded 40,000,000 pounds, compared with slightly more than 36,000,000 pounds for the same period in the previous year. Despite this decrease, four alloys increased in use over 1931.

During 1932 the quantity of ore smelted was only 46 per cent. of that treated in 1931, the figures being 793,552 tons as against 1,689,874 tons. The decrease was due to the slowing down of International Nickel operations. Falconbridge, the other producer which supplies the European trade from its refinery in Norway and is very much smaller in capacity, was able to increase its smelting unit to meet the requirements of that market, and while this trade improved greatly in 1932, the increase was relatively so small as to have little effect on the total decline. At present Falconbridge has a 250-ton concentrator under construction, planned for operation in April, 1933. The 325-ton smelter completed in February, 1930, was lengthened in December, 1932, increasing the capacity to 450 tons daily.

Copper Refining.—The Ontario Refining Company, Ltd., the only electrolytic refining plant in the province, operated steadily throughout the year. Commencing in July 1930, the capacity maintained during its first year of operation was around 5,000 tons per month. For the calendar year 1931 the total output of electrolytically refined copper was 120,078,611 pounds, of which more than 80 per cent. originated in Ontario. The production included wire bars, ingot bars, small ingots, vertical cast cakes, cathodes, slabs, and billets. Blister copper received for treatment totalled 99,045,950 pounds from Ontario, 12,609,298 pounds from Manitoba, and 9,222,112 pounds from British Columbia.

In 1932 blister received for treatment totalled 83,078,293 pounds of which 70,685,237 was of Ontario origin and 12,393,056 from Manitoba. The total treated was 83,480,193 pounds from which 75,157,299 pounds of electrolytic copper in the usual forms was recovered. Until June 24 Canadian electrolytic copper entered the United States free of duty. A tariff of 4 cents a pound which was then imposed, made it imperative for Canadian producers to find other buyers and the European market was then entered. During the period England, France, Germany, Belgium, Holland, Sweden, Italy, and Denmark bought Ontario copper, in the order named.

Precious Metals.—The most important precious metals recovered in the electrolytic refining operations of the nickel-copper industry are platinum, palladium, osmium, iridium and ruthenium. Silver is recovered in much greater quantity than the platinum metals, but the value is much lower. Gold is recovered in appreciable amounts.

In 1932, the total platinum metals was 64,897 fine ounces valued at \$1,998,911, gold 22,675 fine ounces worth \$468,727 and silver 663,795 ounces valued at \$200,080, or a total of \$2,667,718 for all precious metals. As compared with 1931, platinum metals are seen to have decreased by about 30 per cent. while silver and gold fell off by much smaller percentages. Falconbridge Mines, Limited, reported a recovery of platinum metals for the first time, residues having accumulated since the opening of the refinery at Kristiansand South, Norway, in April, 1930.

In a quarterly letter to International stockholders, R. C. Stanley, President of the company, described the platinum metals industry as follows:—

The so-called "platinum group" comprises six metals—platinum, palladium, iridium, rhodium, ruthenium and osmium. All these metals with the exception of osmium, are refined to high purity (99 per cent.) by your company. In the process of extracting nickel from our ores the platinum metals are recovered as a by-product. To separate and refine the platinum metals the company has developed at Acton, England, the world's largest and most modern platinum metals refinery, having a capacity of 300,000 ounces a year.

(a) Port Colborne plant, and Ontario Refining Company plant at Copper Cliff.

(b) The capital invested is exclusive of value of mineral lands. In the Report for 1929, Vol. XXXIX, Part 1, the capital shown includes the book value for mineral lands, or a total of \$74,077,808 for the lands.

(c) On preferred shares only in 1932. (d) Figures do not include the output of the Ontario Refining Company.

Dividends.—Total dividends paid to the end of 1931 and payments in 1932 are given in the table which follows. For convenience of comparison Mond figures have been converted to dollars on the basis of £1=\$4.8665.

TABLE XV.—TOTAL DIVIDENDS PAID BY NICKEL COMPANIES

Company	Period (inclusive)	Total to end of 1931	Paid in 1932
Canadian Copper Company.....	1894-1901	\$1,975,000
*International Nickel Company { Preferred... 1906-1928	1906-1928	12,299,273

Grand Total.....		\$145,043,210.08	\$1,933,909.26

*Successors to the Canadian Copper Company. The International Nickel Company paid dividends on the common stock from 1909 to 1919, inclusive, and again from 1925 to 1928, inclusive. Common stock outstanding was \$41,834,600, and preferred stock \$8,912,600, or a total of \$50,747,200 at the beginning of 1928. On December 19, 1928, the authorized capital stock of \$62,000,000 of the New Jersey company was reduced by changing the par value of the shares from \$25 to \$1 each, and at the same time the name of the company was changed to "Nickel Holdings Corporation." On December 31, 1928, the authorized capital was further reduced to \$993,425 fully issued or subscribed for stock consisting of \$843,700 preferred stock and \$149,725 common stock, par value in each case.

†Dividends paid by the International Nickel Company of Canada, Limited, on the common stock in 1929 were 90c. per share, and \$1.00 per share in 1930. Common stock was increased to 15,000,000 shares of no par value on July 25, 1930; and as a result shares issued were increased from 13,758,208 to 14,584,025. Seven per cent. preferred stock (cumulative) now stands at \$27,627,825. Dividends on common stock aggregated 45 cents a share in 1931.

‡Upon completion of the exchange of stock under the amalgamation of the Mond and International companies, effective, December 31, 1928, stock issued or issuable was as follows: \$27,627,825 of 7 per cent. cumulative preferred, and 13,758,208 common shares without par value. Dividends paid on February 16, 1929, by the Mond company cover the 8 months' period ending December 31, 1928.

Iron Ore, Pig Iron, Steel, Ferro-Alloys, and Coke

Not for many years has the production of pig iron in Ontario fallen so low. The year opened with one 550-ton furnace in blast at Hamilton, which operated steadily until October. During the months of March, April, May and June one furnace also operated at Sault Ste. Marie, while in November no production of pig iron from any company was reported. The year closed with one active furnace at Sault Ste. Marie. Thus of seven blast furnaces available with a total capacity of 2,775 long tons, only two having a capacity of 990 tons were in blast. The Canadian Furnace Company at Port Colborne was idle throughout the entire year.

As shown in the following table, foreign iron ore charged amounted to 198,063 long tons, the average price of which was \$4.65 at lower lake ports. From this ore 113,665 long tons of pig iron were produced, including 74,593 of basic, 25,246 foundry, and 13,826 of malleable. The average selling prices of these grades were \$18.00 per long ton for basic, and \$23.80 for foundry and malleable. Steel billets were quoted at \$34.00. Figures for five years follow:—

TABLE XVI.—IRON AND STEEL STATISTICS, 1928-1932

Unit	1928	1929	1930	1931	1932
Ontario ore smelted..... long tons					
Foreign ore smelted..... " "	1,242,937	1,331,498	935,005	568,886	198,063
Limestone for flux..... short tons	324,550	342,776	234,309	149,454	56,880
Coke..... " "	736,746	767,420	542,094	320,133	119,064

Steel Company of Canada, Ltd., (a), (b).....	Hamilton
Superior Alloys, Ltd. (c).....	Sault Ste. Marie

(a) Pig iron; (b) steel; (c) ferro-alloys.

Ferro-Alloys.—Of the fourteen plants listed in the 1931 Report only four reported production which with an additional plant, namely, the Canadian Carborundum Company, Ltd. not listed in 1931, produced a total of 15,595 long tons of various kinds of ferro-alloys as against 46,440 tons in the previous year. The production of these materials during the past five years in Ontario was as follows:—

STATISTICS OF FERRO-ALLOYS PRODUCTION IN ONTARIO, 1928-1932

Year	No. of producing companies	No. of long tons	Kind of material
1928.....	3	44,842	Ferro-silicon, ferro-manganese, silicon speigel, spiegeleisen, calcium manganese silicon, zirconium manganese silicon.
1929.....	4	81,137

1931.....	8	46,140	
1932.....	5	15,595	

Coke.—The coking industry in Ontario is carried on by the large iron and steel metallurgical works, and by chartered companies operating in the cities supplying artificial gas to the householders and to industries. The statistics shown in the following table are combined and show the raw materials used in manufacturing with products made. The table is more complete than those published in these reports hitherto inasmuch as the consumption of coke and gas in the plants of the reporting companies is shown as well as the quantities marketed or sold to consumers. Statistics are given in Table XVII which follows:—

TABLE XVII.—THE COKING INDUSTRY IN ONTARIO, 1932

MATERIALS USED:	Quantity	Cost at works
Coal.....tons	1,436,069	\$6,337,605

Lead and Zinc

The production of refined pig lead in Ontario dates from 1917 when a smelter having a capacity of 18 tons a day was built near Galetta in Carleton

county by the Estate of James Robertson of Montreal. This company later became the Kingdon Mining, Smelting and Manufacturing Company, and over a period of 15 years a high grade pig lead was produced and consumed mainly in the manufacture of lead pipe and other plumbing supplies by the Robertson firm. The mine closed down on May 8, 1931. In 1932 the Galetta smelter did not produce any pig lead and the Ontario production came entirely from the silver-cobalt ores.

For some years a small quantity of lead has been recovered in the concentrating and smelting of silver-cobalt ores, and more recently the Treadwell Yukon mine at Bradley, Sudbury area, recovered lead concentrates from a lead-zinc-copper ore. The depressed markets for base metals, however, has not permitted production from this property which was idle during the period.

Uraninite

There was no production of radium-bearing ore from the Ontario deposits in 1932, but two companies operated in the township of Cardiff, Haliburton county. International Radium and Resources, Limited, employed a force of men sinking and drifting on its property near Wilberforce. Small test runs were put through the mill in March, April and May. The Canada Radium Mines, Limited, near Cheddar, sank a shaft to the 125-foot level, crosscutting from that point 200 feet to the vein and drifting about 200 feet along it. The shaft was being sunk to 250 feet, commencing March, 1933. About 22 men were employed.

The Eldorado Gold Mines, Limited, commenced operating its radium extraction plant at Port Hope on January 10, 1933, and was getting into production at the time of writing. A few months will be necessary to test the strength of the various compounds of radium to be produced. The capacity of the Port Hope plant, which is expected to be in full production in the autumn of 1933, is not known at present. In the meantime production of radium compounds on a small scale will be continuous. The grade of ore from the Great Bear Lake property which was tested at the Mines Branch Laboratory, Ottawa, was 45 per cent. U_3O_8 .

NON-METALLIC MINERALS

During 1932 the value of the output of non-metallic minerals totalled \$7,361,897 as against \$7,642,308 in 1931, or a decrease of 3.6 per cent. The principal items with values, in order of importance, were as follows: Natural gas, \$4,719,297; salt, \$1,789,752; petroleum, \$247,468; gypsum, \$186,176; and talc, \$111,585. Beryl, feldspar, fluorspar, graphite, iron pyrites, quartz and quartzite, sulphuric acid (i.e. sulphur content), mica, mineral water, peat, and silica brick were represented, but were each under \$100,000 in value, as may be seen in Tables I and II in the list of non-metallics.

Actinolite

This mineral, which is a variety of asbestos, has been mined in Hastings county in a small way since 1883. It is mainly exported to the United States in ground form mixed with mica, where it is used as an ingredient in the manufacture of roofing material. In 1931, the output was 35 tons valued at \$456 as against 34 tons worth \$437 in 1930, and in 1932 the plant did not produce.

Arsenic

Arsenic in the native state is a metallic mineral, but since it is produced in Ontario in the oxide form, called in the trade "white arsenic," it has been customary to include it with non-metallics. The whole production is recovered in the smelting of the silver-cobalt arsenides of Northern Ontario by the Deloro Smelting and Refining Company. Including the arsenic produced as insecticides and also contained in speiss residues exported to the United States for treatment, the production in 1932 was 2,424,342 pounds valued at \$98,914 as against 3,575,936 pounds worth \$135,170 in the previous year.

Barite

This mineral has not appeared in the production table since the year 1923. Several deposits are known to exist; and one in the Porcupine gold area, owned by Canada Nighthawk Mines, Limited, is equipped with milling facilities. The main difficulty, however, for domestic producers is the limited home market and the high duty to be met on entry into the United States. During the last half of 1932 a force of 15 men was employed in remodelling the milling equipment of the above-mentioned company and preparing to produce a marketable product.

Beryl

This mineral occurs in fine green crystals on lot 23, concession XV, Lyndoch township, in the county of Renfrew. No production apart from hand specimens was reported from this property for a number of years, but in 1927 some 4,456 pounds of beryl were shipped to Germany, the c.i.f. value of which at Hamburg was \$175. This production was not reported until the year 1929. Exploratory work on this and other deposits in Lyndoch was under way during 1931 by the Madawaska Syndicate. A company known as Madawaska Minerals, Ltd., was incorporated in Ontario, February 17, 1932, to supersede the syndicate.

Calcite

No pure calcite has been produced recently in Ontario, although important deposits are available. Lack of markets has discouraged any development work. The position of this mineral is described in Volume XLI, Part 1, Report of Ontario Department of Mines.

Diatomite

Diatomite is a hydrous type of silica in the form of countless microscopic siliceous remains of aquatic plants called algae, and may be of either fresh water or marine origin. In addition to its use as an insulator, diatomite is employed as a filtering material, as a filler, as a fine abrasive polish, and for many other uses. Ontario deposits are all of fresh water origin. Two companies were preparing to enter the Canadian market in 1932, namely, Diatomite Products, Limited, at Martin's Siding south of Huntsville, and Dominion Diatomite, Limited, four miles west of Novar. The latter reported sales of small lots totalling 11 tons valued at \$309 in 1932.

Feldspar

This industry which reaches its highest production when the foreign market is open, had a poor year in 1932 owing to the extraordinary business slump in the United States with the consequent lessened demand. The only domestic grinding plant in the Province, that of Frontenac Floor and Wall Tile Co. at

Kingston, continued to supply the home demand. The grade of spar mined in Ontario compares favourably with that of any other country, being particularly rich in potash and alumina so desirable in glazing pottery and enamel-ware, and in the porcelain insulator trade. During the period the total shipments were 3,657 tons worth \$42,920 as against 7,962 tons valued at \$100,119 in 1931. The main producer was T. H. Craig of Perth. The Bathurst Feldspar Mines which formerly shipped large quantities to the United States did no quarrying in 1932 but sold a few carloads from stock.

Fluorspar

The output of fluorspar from Ontario deposits has been practically negligible during the past decade. A few tons, however, have been recovered from the old ore dumps on lot 3, concession I, Madoc township. During 1930 and 1931 the production was 80 tons worth \$1,240 and 40 tons valued at \$620 respectively. Output in 1932 was 32 tons worth \$464. This property was operated under lease from W. N. Ponton, Belleville, Ont.

Graphite

In 1932 the only producer in this mineral in Ontario was the Black Donald Graphite Company, Limited, of Calabogie from its property on lots 16, 17 and 18, concession III of Brougham township, Renfrew county. During the year 1931 sales totalled 548 tons valued at \$32,149 as against 1,338 tons worth \$86,543 in 1930. Crude ore mined in 1932 was 1,002 tons and ore milled totalled 1,424 tons. Shipments were 346 tons valued at \$18,483.

Gypsum

Despite the entrance of another producer into the gypsum products business in Ontario, the Ontario production of this mineral again showed a decline owing to the greatly restricted demand in the building trades. Gypsum, Lime and Alabastine Canada, Ltd. at Caledonia and Lythmore, and the Canadian Gypsum Company at Hagersville which commenced operating in October, 1931, together produced 35,655 tons in 1932 as against 53,358 tons in 1931. The Lythmore plant of Gypsum, Lime and Alabastine Canada, Ltd., closed down in November and will not be reopened.

As will be noted in the table which follows, sales in 1932 were much below those of the past four years:—

GYPSUM SALES, 1928-1932

Grade	1928	1929	1930	1931	1932
Crushed.....tons	20,675	23,533	25,130	10,263	5,656
Fine ground.....“	1,134	497	1,190	451	364
Calcined sold.....“	4,133	5,269	3,515	1,606	217
Calcined used in products.....“	59,869	71,048	65,111	41,038	29,418
Total sold or used.....tons	85,811	100,347	94,946	53,358	35,655

Number of workers.....	248	257	*92	155	*98
Wages paid.....\$	289,292	311,609	92,918	87,263	85,036

*Exclusive of wage earners employed in the manufacturing division of the Caledonia plant.

In 1928 and 1929 considerable research work was carried on in Nova Scotia on anhydrite plasters and cements. This was fully described in a paper by A. E. Flynn given before the Mining Society of Nova Scotia in June, 1930, and published in The Bulletin of the Canadian Institute of Mining and Metallurgy, June, 1930. While gypsum, a hydrous sulphate of calcium ($\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$), has always been used for the manufacture of wall plasters, the associated mineral anhydrite ($\text{CaO} \cdot \text{SO}_3$) which lacks water of crystallization, does not lend itself to this use. The results of the research indicated that by artificial hydration this heretofore useless anhydrite could also be utilized along with lime finishing plaster or gypsum hardwall plaster. Recently a process for utilizing anhydrite as a plaster was patented in England by Major Victor Lefebure under the trade name "Pioneer Plaster". This process has been investigated by the Mines Branch, Ottawa.

Iron Pyrites and Sulphuric Acid

No pyrite ore was shipped, while the estimated content of the sulphuric acid manufactured at Copper Cliff by Canadian Industries Ltd. from sulphur fumes derived from nickel-copper smelting was 3,332 tons worth \$33,320.

Mica

This industry which is principally in the hands of small producers is dependent almost entirely on the electrical manufacturing business. The decline in consumption was particularly marked in 1932 and there were fewer producers than during the past two decades. By grades the shipments in 1930, 1931 and 1932 were as follows:—

Grade	1930		1931		1932	
	Quantity	Value	Quantity	Value	Quantity	Value
	lb.	\$	lb.	\$	lb.	\$
Rough cobbled.....	2,130	85				
Thumb-trimmed.....	1,375	1,168	5,593	1,876	232	224
Splitting.....	60,180	24,788	30,015	10,505		
Scrap.....	1,417,662	8,234	2,062,300	10,902	536,980	2,528
	1,481,347	34,275	2,097,908	23,283	537,212	2,752

The prices for the various sizes and grades as reported by the producers, covered the following:—

Size	Cents, per lb.	Size	Cents, per lb.
Scrap.....	.0045 to .0057	2- by 3 inches.....	30
*Splittings.....	.35	2- by 4 ".....	53
*1- by 1 inch.....	5 to 10	3- by 5 ".....	1.00
*1- by 2 inches.....	10 to 14	4- by 6 ".....	1.75
*1- by 3 ".....	30	*5- by 8 ".....	2.50 to 3.00

*None produced in 1932—prices shown are 1931 quotations.

Mineral Waters

The production in Ontario while not extensive is sufficient to supply all domestic consumption. The output from five or six springs during the past decade has ranged from 61,000 to 309,000 Imperial gallons. During 1931 six wells, all in eastern Ontario, produced 197,540 Imperial gallons worth \$8,578 at the shipping point, and in 1932 four wells produced 61,208 gallons. The record for the past ten years follows:—

Sales	1923	1924	1925	1926	1927	1928	1929	1930	1931	1932
Imp. gals..	227,030	201,670	183,012	208,400	293,200	253,630	309,700	214,200	197,540	61,208
Value, ...\$	14,047	13,133	25,452	27,277	12,811	27,890	13,651	20,754	8,578	2,473

In addition to the above there are springs near Wilberforce in Haliburton county close to the uraninite deposits which are radio-active and which possibly may have therapeutic value. Another mineral water is calcium chloride which has been found in saline waters near Concord in York county, Burlington in Halton county, and elsewhere. These waters have had some use for medicinal purposes. It has also been tried as a dust allayer on the highways, but the ratio of calcium chloride to water was found to be too low and it could not compete with the calcium chloride in crystal form as now used. Sanatoria at St. Catharines and Preston have long been using the mineral waters at those points both for baths and drinking purposes. This consumption has not been included with the figures of output.

Natural Gas and Petroleum

The Natural Gas Commissioner of Ontario, R. B. Harkness, has supplied the following notes:—

Production of natural gas in 1932 was 7,386,154 M. cu. ft. valued at \$4,719,297 which is about the same as for the years 1924, 1925, 1927 and 1931. However, the number of consumers has increased each year and hence the consumption per consumer shows a corresponding decrease. The year 1932 is, therefore, below normal production. The quantity of gas used by industries has shown an increase. Exploration activities have been at a minimum; the normal drilling continued within the known gas fields.

The production of petroleum has shown an increase over 1931 of 7,979 barrels. The major portion of this increase is from Dawn township, where the Union Gas Company drilled three very good oil wells. A small increase is noted in the Petrolia, Oil Springs and Bothwell fields. A test is being made in the old Petrolia field of cleaning out wells by washing them with acid. Early reports are that production is increased, but sufficient time has not yet elapsed to determine to what extent or how long the effect will last. Following are details of output for the past five years, given in barrels of 35 Imperial gallons:—

CRUDE PETROLEUM PRODUCTION,* 1928-1932

Field	1928	1929	1930	1931	1932
	Barrels	Barrels	Barrels	Barrels	Barrels

*Information furnished by the Imperial Oil Refiners, Limited, of Sarnia, and others.

Peat

Shipments in 1932 from the Albert bog, in Prescott county east of Ottawa, totalled 86 tons valued at \$387, f.o.b. plant. This material was bought by the Ontario Department of Public Works for consumption in the Normal Schools at North Bay, Peterborough, and Ottawa. Other shipments from bogs in Dundas county were reported as 2,400 tons worth \$3,920, which with other miscellaneous lots made a total 4,886 tons having a value of \$10,107.

Quartz, Quartzite, and Silica Brick

The production of quartz showed a considerable decrease in 1931. The volume decreased from 167,487 tons in 1930 to 97,888 tons in the following year. In 1932, the production fell to 66,135 tons valued at \$93,574, or a decline of 32.4 per cent. The total output of silica brick in 1931 was 459,000, of which 279,053 worth \$13,702 were sold or used. In 1932, only 93,050 brick valued at \$4,303 were consumed. Production figures for the past five years follow:—

QUARTZ, QUARTZITE, AND SILICA BRICK, 1928-1932

Schedule	1928	1929	1930	1931	1932
Rock sold or used.....tons	194,503	187,973	167,487	97,888	66,135

Total, Value.....\$	394,931	396,424	293,794	162,344	97,877

Salt

During 1932 six companies produced salt, or brine, which is used in the manufacture of chemicals by Canadian Industries, Ltd., and Brunner Mond Canada, Ltd. This industry which is located in the southwestern part of the Province is well organized and the fluctuations shown in the figures of production reflect fairly closely the general progress of industry in the Province. Production figures covering a 5-year period follow:—

SALT STATISTICS, 1928-1932

Schedule	1928	1929	1930	1931	1932

Talc

This industry ran a uniform course during the five years up to and including 1929. Production from the two operating companies near Madoc, namely, the Geo. H. Gillespie Co. and Canada Talc, Ltd., ranged from \$174,000 to \$180,000 per annum. In 1930 and 1931 the value was lower and amounted to \$133,213 for 11,664 tons and \$122,044 for 11,806 tons, respectively, and in 1932 the value declined although the quantity sold showed an improvement. The product in the ground state ranges in price from \$9.00 to \$18.00 per ton, depending on grade, and is marketed in Canada and the United States. No soapstone has been mined since 1927 from the Eagle Lake deposit in Kenora district, or elsewhere.

Following are statistics of talc and soapstone for the past five years:—

TALC AND SOAPSTONE STATISTICS, 1928-1932

Schedule	1928	1929	1930	1931	1932
Ground talc shipped.....tons	14,925	15,463	11,664	11,806	12,064

Employees, mine and mill.....No.	45	42	36	36	38
Wages paid.....\$	44,858	40,055	32,718	29,419	30,587

STRUCTURAL MATERIALS

Building Permits In 61 Canadian cities building permits in 1932 were valued at \$42,319,397. Of this total thirty Ontario cities accounted for \$16,887,761, as noted in the following table abstracted from *Annual Review of Building Permits in Canada in 1932*, issued by the Dominion Bureau of Statistics, Department of Trade and Commerce, Ottawa.

BUILDING PERMITS IN ONTARIO, 1920-1932

Year	30 Ontario cities, value	Wholesale prices index number (a)	Toronto metropolitan area, value (b)	Wages index number (c)
	\$		\$	
1920.....	58,636,365	144.0 (d)	30,049,413	180.9
1921.....	59,315,845	122.8	31,979,346	170.5
1922.....	84,396,259	108.7	36,405,625	162.5
1923.....	74,673,080	111.9	39,530,877	166.4
1924.....	57,330,141	106.6	29,636,428	169.1
1925.....	59,888,867	102.9	32,408,636	170.4
1926.....	65,373,757	100.0	31,588,124	172.1

1929.....	95,055,827	99.0	57,522,927	197.5
1930.....	69,042,946	90.9	38,371,587	203.2
1931.....	44,371,578	82.6	27,950,136	195.7
1932.....	16,887,761	77.5	9,461,050	178.2

(a) Applies to average index numbers for Canadian wholesale prices of building materials on the basis of 1926 = 100, as compiled by the Dominion Bureau of Statistics. In 1913 the index was 67.0, dropping to a low of 60.5 in 1915.

(b) Includes York and East York municipalities.

(c) Average index numbers of wages in Canadian building trades as compiled by the Federal Department of Labour on the basis of 1913 = 100. (d) Peak year.

Construction Contracts.—The value of Canadian construction contracts awarded for 1932, reported by *McLean Building Review*, was \$132,872,400 as compared with \$315,482,000 in 1931. Ontario contracts in 1932 amounted to \$49,291,800 or 37.1 per cent. of the total. Prices of materials were considerably below the peak of 1920, and decided drops were recorded in 1930 and 1931, and in 1932. Figures by class follow for a five-year period:

VALUE OF ONTARIO CONSTRUCTION CONTRACTS, 1928-1932

Classification	1928	1929	1930	1931	1932
	\$	\$	\$	\$	\$
Residential.....	64,628,600	59,211,000	44,427,000	39,274,300	14,143,200

Cement

During 1932 the plants in operation were those of the Canada Cement Company, Limited, located at Belleville, Port Colborne, and Lakenfield; and that of the St. Marys Cement Company, Limited, at St. Marys. Stocks on hand December 31, 1931 and 1932, were 814,418 and 1,099,530 barrels, respectively. Production during the past decade is given in the following table:

PORTLAND CEMENT STATISTICS, 1923-1932

Year	No. of operating plants	Sales		
		Barrels (350 lbs.)	Total value	Average price per bbl.
			\$	\$
1923.....	4	3,296,428	5,855,590	1.77

Cement Products. In recent years the industry of cement products manufacture in Ontario has assumed considerable importance. Since 1924 no data have been included in the tables of mineral production, as the raw materials entering into the manufacture of these products have all been accounted for. Cement products being so closely allied to the building industry, statistics are included so that complete information covering all structural materials is available under one cover. Monolithic construction is not included. The following tables give the record of materials used and products made during the past two years, also general statistics for a five-year period:—

Lime

During 1932 twenty-two lime establishments were active, but at greatly reduced capacity. Six of these plants are equipped for the production of hydrated lime. Of the 22 active plants 3 were operated by Gypsum, Lime and Alabastine, Canada, Ltd. Figures of production for the past five years are given in the table which follows:—

LIME STATISTICS, 1928-1932

Year	Lime marketed or used						Fuel costs	Em- ployees	Wages
	Hydrated			Quicklime					
	Tons	Value		Tons	Value				
		Total	Per ton		Total	Per ton			
		\$	\$		\$	\$	\$		\$
1928..	49,085	597,367	12.17	228,101	1,870,476	8.20	388,152	414	390,611
1929..	55,916	740,127	13.24	314,246	2,624,285	8.35	513,741	577	398,266

Agriculture.....	715	6,005	625	6,138
Chemical and metallurgical				
Industries: Smelters.....	259	1,716	30	315
Iron and steel.....	7,844	52,972	3	32
Gold milling.....	18,490	126,045		
Pulp and paper.....	534	3,672	56	588
Glass.....	5,483	40,747		
Sugar.....	8,909	75,875		
Tanneries.....	1,736	12,065	42	441
*Other chemicals.....	87,324	612,184	1,077	11,728
Total.....	143,185	1,018,007	23,518	255,223

*Uses for lime under this heading include the manufacture of alkali, acetate of lime, and calcium carbide, the last mentioned being used largely for making cyanamide.

Sand-Lime Brick

In sympathy with other building and construction materials the output of sand-lime brick fell off again in 1931. The average price per thousand declined from \$11.50 in 1929 to \$9.25 in 1931, and rose to \$11.49 in 1932. As the industry is mainly centered in and around Toronto and is dependent on the building activity, the figures of output strikingly reflect the depression in the building industry during 1932.

The following table shows statistics for the past five years, also the comparative average values of common clay brick:—

SAND-LIME BRICK STATISTICS, 1928-1932

Year	No. of operating plants	No. of wage-earners	Wages	Sales				Average value per M. of common clay brick
				M.	Total selling value	Average value per M.	Value with lime cost deducted	
			\$		\$	\$	\$	\$
1928.....	7	183	205,497	61,506	745,719	12.12	624,228	15.83

1931.....	5	93	72,762	27,378	253,228	9.25	197,470	15.00
1932.....	3	47	32,067	6,823	78,398	11.49	58,586	16.63

Sand and Gravel

The sand and gravel industry suffered severely in Ontario during 1931 and 1932. A decreased building and construction programme and smaller mileage of new highway construction accounts for the drop in production. While the production figures for 1932 were again lower, the decline in output seems to have spent itself, and this section is now probably at its lowest ebb. As indicated in the table below the total output from all sources, exclusive of the material produced by the railways and used by them for ballast, was 6,590,808 tons worth \$2,000,298 in 1932 as against 6,663,972 tons worth \$2,317,015 in the previous year.

The railways in Ontario produced 413,919 tons valued at \$45,498, which was all consumed as ballast on their own railway systems. As this material does not enter into active competition with other producers it has been omitted from the totals shown, in agreement with the statistical practice of other years.

The table which follows shows the quantity and value of output from each source. All sources reported decreases except that of Northern Development and in this case the unemployment relief measures of the Ontario and Federal Governments accounted for the improvement.

OUTPUT OF SAND AND GRAVEL, 1931-1932

Source	1931		1932	
	Tons	Value	Tons	Value
		\$		\$
Private pit operators.....	1,880,750	902,377	1,737,065	615,452

(a) The figures for marble production are included with those for limestone.

(b) Value included with cement.

(c) Stone used for making lime accounted for in statistics for lime.

The production value of stone decreased from \$3,197,297 in 1931 to \$1,655,016 in the year under review, due entirely to a greatly depressed building industry and a reduced road-building programme. In the table showing values for the past five-year period, the output of granite indicates an improvement in 1932, but such is not the case, as the excess includes large shipments of building granite produced in 1931 and not reported until 1932.

The limestone statistics include the figures for marble which recently has shown signs of activity. In 1932 three operators produced 2,065 tons valued at \$40,175 which included 501 tons of rough monumental stone worth \$32,560; 745 tons of poultry grit at \$3,825 and 819 tons of stucco and terrazzo material valued at \$3,790.

The following table shows the valuation of the several kinds of stone used or marketed during the past five years:—

VALUE OF STONE PRODUCTION, 1928-1932

Year	Limestone	Sandstone	Trap	Granite	Total
	\$	\$	\$	\$	\$
1928.....	3,440,858	53,903	456,351	73,877	4,024,989
1929.....	3,759,357	69,898	367,590	574,771	4,771,616
1930.....	3,722,196	32,664	184,191	691,919	4,630,970
1931.....	2,929,885	26,186	128,258	112,968	3,197,297
1932.....	1,459,224	9,435	52,659	133,698	1,655,016

Clay Products

Comparing the 1932 statistics with those of the former year, the total value of all clay products has dropped by more than 50 per cent., and as compared with 1929, the maximum year, the decline in value was almost 76 per cent. As the average prices of brick do not show very wide fluctuation, it would appear that the percentage decreases in quantity production would be very much the same. These decreases bear a close relation to the declines in total value of building permits and construction contracts in Ontario as shown elsewhere.

In 1932 the total number of paid workers was 769 who received \$437,595 in wages as against 1,404 workers in 1931 who were paid \$1,159,701.

The clay products group has suffered more than others of the mineral industry during the depression. With a view to promoting the use of brick in all kinds of construction work some fourteen of the more important brick manufacturers of the Toronto and Hamilton areas, in March, 1932, formed the Brick Manufacturers Association with headquarters at 44 Victoria Street, Toronto. Officers are: Secretary, H. A. Badden, and Engineer, W. R. McCaffrey.

The price trends for brick and tile for the past three years are noted below:—

	{common....."	12 80	14 65	15 80
Drain tile (average of all sizes)....."		26 07	23 93	22 69

As the above items have been marketed in large quantities the averages given will therefore be representative. These averages, it will be seen, have moved both up and down but on the whole have not varied greatly.

The following table shows in detail the quantities and values of the several kinds of clay products made and sold in Ontario:—

HEAVY CLAY PRODUCTS MARKETED, 1932

Kind	Number or quantity	Value
		\$
Brick—Soft-mud process {face.....	5,715,520	103,391
{common.....	6,520,070	98,747
Stiff-mud (wire cut) process {face.....	15,211,838	331,441
{common.....	9,210,135	164,081
Dry-press {face.....	4,666,935	97,896
{common.....	1,525,472	24,100
Fancy or ornamental brick (including special shapes, embossed and enamelled brick).....	36,134	1,790
Sewer.....	666,294	18,638
Tile, structural: Hollow blocks (including fireproofing and load-bearing tile)..... tons	21,787	144,422
Roofing tile..... no.	48,939	3,900
Floor tile (quarries)..... sq. feet	94,316	21,502
Tile, drain..... no.	6,364,338	144,579
Sewer pipe (including copings, flue linings, etc.).....		451,786
Pottery (flower pots) from domestic clay..... no.	4,500,000	67,866
Haydite.....		16,366
Total value..... \$		1,690,505

Values of clay products marketed for the last pre-war year (1913), for the year of maximum value (1922), and for the past five years, are given below:—

VALUE OF CLAY PRODUCTS SOLD OR USED, 1913, 1922, AND 1928-1932

Year	Brick		Pottery	Drain tile	Sewer pipe	Haydite	Total
	Common	Pressed, fancy, building tile, etc.					
	\$	\$	\$	\$	\$	\$	\$
1913.....	3,283,894	1,162,860	52,875	292,767	600,297		5,392,693
1922.....	2,614,120	2,899,205	88,889	368,180	973,824		6,944,218
1928.....	1,154,763	3,377,648	*98,519	572,577	974,157		6,177,664

Northern Empire Mines Co., Ltd.	Beardmore Siding	July 28	100,000
Radium Group Syndicate, Ltd (Private)	Toronto.	Aug. 30	90,000
Silica Supplies, Ltd.	Toronto.	June 2	250,000
Sun Bear Mines, Ltd.	Toronto.	June 6	2,500,000
Tashota Goldfields, Ltd.	Tashota.	Nov. 15	3,000,000
Total (33 companies)	\$58,766,000

*"No par" shares issued in addition. See list of "No par" companies.

Mining Revenue and Expenditures

The following is a comparative statement of Mining Licenses and Renewals issued, and Mining Claims recorded in Ontario, also Profit Tax and total Mining Revenue, during the past ten years, 1923-1932 inclusive:—

PROSPECTING ACTIVITY, PROFIT TAX, AND TOTAL REVENUE, 1923-1932

Year	New mining licenses issued	Mining licenses renewed	Total licenses and renewals	Mining claims recorded	Profit tax	Total mining revenue
					\$	\$
1923	2,844	3,704	6,548	6,092	253,126.18	562,872.25
1924	2,676	4,466	7,142	5,222	191,982.36	593,215.14
1925	2,391	4,439	6,830	4,751	287,186.88	613,411.96
1926	6,631	5,521	12,152	13,486	410,974.17	838,415.81
1927	6,923	7,221	14,144	15,564	340,890.08	839,793.43
1928	6,059	8,688	14,747	15,046	356,033.83	968,243.84
1929	3,271	8,049	11,320	8,207	397,004.41	882,026.05
1930	1,554	5,885	7,439	3,886	502,525.38	1,017,030.67
1931	2,174	4,808	6,982	5,779	480,300.69	799,240.06
1932	2,035	3,670	5,705	4,945	515,153.59	793,759.20

The revenue of the Department of Mines for the fiscal year ending October 31, 1932, was \$793,759.20 as compared with \$799,240.06 in the previous year. Expenditures were \$339,233.92. Details of revenue follow:—

ORDINARY:

Sand and Gravel—

Royalties.....	\$ 551,060.06

†Joined with Timiskaming since 1911. ‡Office at Parry Sound closed in 1921, and records are now kept at the Department of Mines, Toronto.

Under *The Mining Tax Act*, a graduated tax is levied on the net profits of mining companies in excess of \$10,000 per annum. The basic rate is 3 per cent. on profits up to \$1,000,000. On profits over \$1,000,000 and up to \$5,000,000 the tax is 5 per cent., and on profits in excess of the latter amount the rate is 6 per cent. A portion of this money is returned to organized municipalities for municipal government purposes.

The following statement, prepared by the Accounts Branch of the Department, gives details of the Profit Tax collected under the supervision of G. R. Mickle, Mine Assessor, for the fiscal year ending October 31, 1932:—

DETAILS OF PROFIT TAX

GOLD:—

Dome Mines, Limited.....	\$ 35,219.78	
Hollinger Consolidated Gold Mines, Ltd.....	70,037.95	
Kirkland Lake Gold Mining Co., Ltd.....	1,757.74	
Lake Shore Mines, Ltd.....	222,166.03	
McIntyre Porcupine Mines, Ltd.....	24,091.29	
Sylvanite Gold Mines, Ltd.....	1,507.96	
Teck-Hughes Gold Mines, Ltd.....	102,786.44	
Wright-Hargreaves Mines, Ltd.....	13,835.66	
		\$471,402.85

SILVER:—

Keeley Silver Mines, Ltd.....	\$ 1,100.36	
Mining Corporation of Canada, Ltd. (Cobalt Lake, \$564.49, South Lorrain \$1,246.58).....	1,811.07	
O'Brien, M. J., Ltd. (O'Brien mine).....	1,990.27	
“ “ “ (Miller Lake O'Brien mine).....	2,658.23	
		7,559.93

NICKEL-COPPER:—

International Nickel Company of Canada, Ltd.....	\$ 35,909.03	
Falconbridge Nickel Mines, Ltd.....	281.78	
		36,190.81

Total.....\$ 515,153.59

Temiskaming Testing Laboratories

This plant, located at Cobalt and equipped for sampling and assaying, has been operated by the Ontario Department of Mines since July, 1921, under the management of A. A. Cole, Mining Engineer of the T. & N. O. Railway Commission, and George Dickson, Superintendent.

The following is a comparative financial report for the years 1922 to 1932, inclusive:—

COMPARATIVE FINANCIAL STATEMENT OF THE TEMISKAMING TESTING LABORATORIES, 1922-1932

Year	Cash receipts	Earnings	Expenditures	Operating profit	Operating loss
	\$	\$	\$	\$	\$
1922.....	18,096.19	17,749.51	19,173.19		1,424.68
1923.....	18,699.22	20,117.81	19,781.25	336.56	
1924.....	26,032.20	25,417.61	23,206.66	2,200.95	
1925.....	19,922.37	20,041.08	20,043.31		2.23
1926.....	20,302.51	21,119.98	20,658.19	461.79	
1927.....	19,387.66	19,400.55	20,012.09		611.54
1928.....	14,875.58	14,369.66	18,181.68		3,812.02
1929.....	19,604.70	21,690.60	18,088.41	3,602.19	
1930.....	25,070.27	24,316.82	24,153.03	163.79	
1931.....	18,522.88	20,770.06	23,553.61		2,783.55
1932.....	13,323.28	11,150.42	15,219.64		4,069.22
Gross operating profit and loss.....				6,765.64	12,703.24

Following is a brief summary of operations for the year 1932:—

Assaying.—Gold, 1,528 samples; silver, 1,343; copper, 12; silver bullion, 227; cobalt, 113; nickel, 74; zinc, 7; silica, 3; arsenic, 26; iron, 19; lead, 7; sulphur, 8; barium, 4; moisture, 13; specific gravity, 4; one each of lime, mercury, platinum, volatile, and amalgamation test.

Silver Ore Milled and Sampled.—Weight, 307.14 tons; silver content, 416,775 ounces.

Cobalt Ore Milled and Sampled.—133.35 tons.

Base Bullion Melted.—69 bars containing 65,400 gross ounces of silver.

Gold Ore Purchased and Sampled.—Two lots, for one of which \$52.19 was paid.

Copper Melted and Sampled.—One lot of 21 bars or 896 pounds.

Coal Milled.—Three lots or 7.10 tons.

Provincial Assay Office

As an aid in the development of the mineral resources of Ontario an Assay Office was established at Belleville in July, 1898, by the Bureau (now Department) of Mines. For convenience the office was moved to 5 Queen's Park, Toronto, in November, 1911, and again in the spring of 1927 to the new East Block, Queen's Park. The Provincial Assayer, W. K. McNeill, reports as follows for 1932:—

The Assay Office has been in operation during the entire year and the usual variety of work carried on with the assistance of T. E. Rothwell and W. F. Green, Chemists and Assayers, also Robert Stewart and William Ley, Laboratory Assistants.

The schedule of charges, effective Jan. 1, 1930, for the Provincial Assay Office and Chemical Laboratory, may be obtained on application. Minerals and rocks not requiring chemical analysis are identified free of charge. Tests for radio-activity are free.

Total free assays, under the provisions of *The Mining Act* of Ontario, numbered 1,316 in 1928, 649 in 1929, 427 in 1930, and 953 in 1931. Out of a total of 1,415 free assays in 1932 there were 1,270 for gold.

The following is a statement of the samples submitted by the general public for which the regulation fee was charged, and also those submitted by geologists and officers of the Department of Mines:—

CUSTOMS ASSAYING AND GENERAL WORK, 1932

Assay and No. of samples		Assay and No. of samples	
Gold.....	631	Limestone.....	1
Silver.....	40	Clay.....	2
Copper.....	28	Radium.....	42
Lead.....	5	Antimony.....	1
Zinc.....	1	Barite.....	1
Nickel.....	19	Magnesia.....	1
Iron.....	6	Phosphorus.....	1
Platinum.....	5	Chlorine.....	1
Manganese.....	2	Soda.....	1
Sulphur.....	3	Potash.....	1
Molybdenite.....	1	Oil.....	2
Cobalt.....	5	Insoluble.....	2
Arsenic.....	2	Water.....	3
Uranium.....	13		
Identification—samples received by mail and reports issued. A large number were brought directly to the Laboratory; of these no record was kept.....			185
Rocks—samples submitted by geologists of the Department for complete analysis.....			20
Total.....			1,028

DIRECTIONS AND TERMS

Samples will be dealt with in the order of their arrival. In every instance specimens and samples should be accompanied by statement specifying the precise locality whence they were taken.

Money in payment of fees, sent in by registered letter, post office order, postal note, or express order, and made payable to the Provincial Assayer, must invariably accompany sample to ensure prompt return of certificate, as no examination is commenced until the regulation fee is paid.

Crushed samples representing large quantities, or samples less than one pound weight, may be sent by mail as third-class matter. Write your name and address plainly on each parcel. Send instructions, with money in payment of fees, in a separate letter. Samples may be sent by express, charges prepaid.

Sample bags addressed to this laboratory for sending ore pulp by mail may be obtained free on application; also canvas bags for shipping. Samples should be addressed as follows:—

PROVINCIAL ASSAY OFFICE,
East Block, Queen's Park,
TORONTO, ONT.

Draughting Office, North Bay

As mining claims are recorded in each Mining Division, sketches and recording notices are forwarded by the Recorders to the Draughting Office, and the same practice applies when surveys are filed. Tracings are prepared from the data furnished and blue-prints supplied to the Recorders and to the general public at a nominal charge. North Bay is a convenient centre and considerable time for northern Ontario residents is saved through the mails compared with former practice when blue-prints were prepared at Toronto. The office was established in February, 1920. It is now in charge of A. D. Williams.

During the calendar year 1932, there were 984 blue-prints distributed from the North Bay office. Total receipts from this source were \$261.75, and in addition \$16.05 was received for outside blueprinting work. In addition maps were supplied by this office to Mining Recorders, who sold 3,160 blue-prints during the calendar year 1932.

MINES OF ONTARIO IN 1932

By

Chief Inspector of Mines, D. G. Sinclair, Toronto; Inspectors, R. H. Cleland, Timmins;
E. C. Keeley, Kirkland Lake; D. F. Cooper, Sudbury; A. R. Webster, Toronto.

BARITE

Canada Night Hawk Mines, Limited

This property consists of 34 claims in one group lying along the centre of the south boundary of Langmuir township, district of Timiskaming. In summer the property is easily reached by water starting at Connaught, a distance of about 30 miles through Night Hawk lake and river.

Operations on the barite vein first started fifteen years or more ago, at which time a small plant for mining and milling was in operation, although the operations were not successful.

Canada Night Hawk Mines, Limited, opened up the property in July and employed about 20 men in building and renovating as well as on surface and underground work. The previous operators had driven a tunnel some 150 feet in length on a 5-foot vein of barite, and this company took up the floor of this as a sample of the ore and sent it out for testing. Some surface work was still in progress early in 1933 under the direction of H. S. Bowler.

The following are the officers of the company: A. D. F. McIntosh, Rochester, N.Y., president; G. W. Forrest, Toronto, secretary-treasurer. Thomas Bland, Toronto; G. J. Chantler, London, Ont., and T. C. Forrester, Rochester, N.Y., are directors. The head office is at 305 Sterling Tower, Toronto.

COBALT

Kenora Prospectors and Miners, Limited

The company's cobalt property consists of 10 claims situated at the north-west end of Werner lake, which is located about 10 miles east of the Ontario-Manitoba border and 40 miles north of Minaki, in the district of Kenora.

A contact replacement zone was uncovered, which contained small lenses of cobaltite in a chloritic matrix. An open cut was made by hand along this zone for about a 100 feet, and a small tonnage of high-grade cobalt ore obtained by sorting and cobbing. A total of 69 tons, averaging, it is understood, from 18 to 20 per cent. cobalt, was transported to Minaki by airplane, thence by rail to Norwood, Ohio.

An average of 5 men was employed for eight months of the year under the direction of Hugh Smith.

Details of the capitalization and directorate of the company will be found on page 75, where a report on its gold properties is given.

GOLD

Ashley Gold Mining Corporation, Limited

The report on this company's property in Bannockburn township, district of Timiskaming, will be found on pages 107 and 108 of this report. The Mining Corporation is the operating company.

Barry-Hollinger Gold Mines, Limited

The Barry-Hollinger mine is located in the township of Pacaud, district of Timiskaming. It was operated throughout the year with a force of 60 men. The capitalization of the company is \$4,000,000, in shares of \$1 par value. The officers and directors are: Dr. E. H. Greene, president; E. M. Tice, secretary; M. J. Conkey, vice-president; P. A. Barry and Robert Fennell, directors. Jas. A. Houston, Boston Creek, is mine manager.

The following is taken from the mine manager's report for 1932:—

Development

Owing to lack of development funds during the year, sinking of the main 3-compartment winze was postponed. The ore shoot in No. 7 vein on the 2,000-foot level was opened up during the early part of the year. This work disclosed an ore length of 125 feet.

The crosscut to No. 9 vein, on the 1,875-foot level, was completed and the vein drifted on for a distance of nearly 600 feet. No values of any consequence were secured from the sampling of this drift (No. 1,809 east drift) and, in order to curtail expenses, exploration work on this vein was suspended during the latter part of August. At the first opportunity we plan on continuing this drift to the east for another 200 feet, as there is a good possibility of opening up an ore shoot in this area. At a point in this drift a diamond-drill station is at present being cut. It is proposed to diamond-drill No. 7 vein from this diamond-drill station, and holes will be put down to cut this vein at the 2,125-, 2,250-, and 2,375-foot levels.

Summary of Underground Operations.—During the year ending December 31, 1932, the following development work was completed:—

	Feet
Crosscutting and drifting.....	1,404.8
Raising.....	517.5

Some 35,000 tons of ore were hoisted, of which 34,730 tons were taken from the stopes, the balance being taken from development drifts.

Mill

During the year under review the mill has been operating continuously, except for minor delays, on an average daily tonnage of 96 tons. The average mill recovery for the year was 93.6 per cent.

The following is a summary of mill returns based on government quarterly returns for the year:—

	Production (Mill returns)	Premium on exchange	Dry tons milled	Recovery per ton milled
January, February, March.....	\$40,165.24	\$5,260.50	8,817	\$4.55
April, May, June.....	36,859.90	4,891.51	8,811	4.18
July, August, September.....	38,865.99	4,846.75	8,870	4.38
October, November, December.....	44,637.51	6,057.12	8,479	5.26

Production

Bullion produced for the year amounted to \$160,528.64 from 34,977 dry tons milled, making an average recovery of \$4.59 per ton. To this was added \$21,055.88, premium on exchange, making a total production for the year of \$181,584.52, or a total value of \$5.19 per ton milled. This shows a drop in total production from the previous year of \$52,751.36. The lowering of mill grade was due to encountering a lean section of ore between the 1,750- and 1,875-foot levels and also to mining lower-grade sections of ore which were left from previous work. This was necessary in order to secure ore for the mill. Hanging-wall dilution was also a big factor in lowering the grade of ore going to the mill.

During the early part of October, coarse sorting of the ore at the crusher bin was tried out with success. This sorting was mainly responsible for raising the mill grade, during the last quarter, approximately 20 per cent. With better sorting arrangements, grade could be raised considerably higher.

Costs

The costs per ton milled for the year 1932 are as follows:—

Mining.....	\$2.774
Development.....	.976
Milling and refining.....	1.337
Marketing bullion.....	.032
Head office and administration.....	.285
Insurance and taxes.....	.088
Workmen's compensation.....	.167
Operating cost.....	\$5.659

The recovery per ton milled was \$4.59, and the premium on exchange was 60 cents, making the total value per ton milled \$5.19—a loss of \$0.469 per ton milled.

Future Development

Funds are now available for exploration work, and a number of the lower levels will be opened up for a considerable distance both to the east and west of the ore zone with the hope of locating other ore bodies. A diamond-drilling campaign is also being planned to explore other sections of the property.

It is expected that the sinking of the main 3-compartment winze will be undertaken in the near future. Forty per cent. of all the ore handled during the year came from below the 1,875-foot level, which necessitated triple hoisting of this ore. This added materially to the mining costs during the year. With the deepening of the main winze this extra handling charge will be eliminated.

Broken and unbroken ore above the 2,000-foot level at the end of the year will approximate 10,000 tons.

Bathurst Mines, Limited

The authorized capital of this company is 4,000,000 shares of no par value, of which 2,225,006 were issued at the end of 1927. Of these shares, 950,000 were held by T. H. Bathurst, Limited, and 500,000 by the Price-Logan Gold Mines, Limited.

The officers of the company are: T. W. Bathurst, president; Dr. F. P. Quinn, secretary; M. Pollex, acting treasurer. T. H. Rea, R. H. New, and E. P. Gleeson are directors. The head office is at 51 Sparks Street, Ottawa, and the mine office address is Narrow Lake, Ont.

The company's holdings include 30 claims of the Price-Logan, Daimpre, Bathurst, and Colburn groups, located about Car and Bathurst lakes, Skinner township, district of Kenora (Patricia portion).

The following buildings have been constructed of logs: two sleep camps, 20 by 20 feet; cookery, 36 by 36 feet; office, 24 by 18 feet; power-house, 40 by 37 feet; dry-house, 18 by 12 feet; blacksmith shop, 18 by 12 feet; residence, 18 by 12 feet; headframe, 43 feet in height; and staff-house, 16 by 16 feet.

The following plant has been installed: two 60 h.p. locomotive-type boilers; one Canadian Ingersoll-Rand air compressor, straight-line type FR-2, with a capacity of 528 cubic feet per minute; one 11- by 8-inch Canadian Ingersoll-Rand hoist. The blacksmith shop is equipped with a Rand sharpener and furnace.

The shaft is 225 feet deep with one level at the 200-foot horizon, on which 1,741 feet of drifting and 1,291 feet of crosscutting had been done.

About \$2,500 had been recovered from a small mill, being production from a rich pocket on the surface and some underground ore. Mill equipment and practice is as follows: A 9- by 7-inch jaw crusher feeds direct to two steam stamps discharging to two copper plates, 7 by 3 feet, which overflow to a canvas table, 8 by 12 feet, where some fine gold and concentrates are caught.

The property was closed down late in 1929 and only reopened again in the fall of 1932, when a Jack Nutt mill was flown to the property and put in operation. A production of \$1,500 was recorded before the end of the year.

Buffalo Ankerite Gold Mines, Limited

This company was formerly known as the Ankerite Gold Mines Syndicate, and before that as Ankerite Gold Mines, Limited. The officers and directors are as follows: Geo. R. Feine, president, Buffalo, N.Y.; Gustave R. Loesch, vice-president, Buffalo; Edward G. Kinkel, managing director and secretary, Buffalo; Henry Kobler, treasurer, Buffalo; Henry J. Tiedt and Jacob Betz, Buffalo, and Alphonse J. Baldeck, Mumford, N.Y., directors. The head office of the company is at 902 Lumsden Building, Toronto, and an office is also maintained at 1005 Stock Exchange Building, Buffalo. The mine office is at South Porcupine. Martin O. Knutson is mine manager.

The company is capitalized at 1,000,000 shares of \$1 par value, of which 500,000 are issued.

The mine, which is in Deloro township, district of Cochrane, has been developed on four levels through two shafts; the main shaft has 4 compartments and is about 660 feet in depth, and the No. 1 shaft is about 385 feet in depth. Over 14,000 feet of lateral work has been done, as well as considerable raising and diamond-drilling.

Since operations first started, under the syndicate, the following work has been accomplished: crosscutting, 122 feet; drifting, 1,132 feet; and diamond-drilling, 2,421 feet. Some 55,267 tons have been milled. The production value from May 1, 1932, to December 31, 1932, has been \$219,482, with \$28,053 in premium added. An average of 135 men has been employed on the property.

Casey Summit Gold Mines, Limited

This company operates a property at Summit lake, district of Kenora, Patricia portion, about a hundred miles due north of Sioux Lookout on the main line of the C.N.R. The property can best be reached by airplane from Sioux Lookout. The water route by way of Lac Seul, Weman lake, and Birch lake is about 200 miles long and has many portages.

The company was formed from a parent company known as the Casey Mountain Operating Syndicate, Limited, to operate some 800 acres of a 2,000-acre group at Summit lake. The directorate is as follows: R. J. Williamson, president and general manager; Andrew Cunningham, Dr. H. C. Hall, Dr. E. M. Carefoot, J. F. Brown, Wm. C. Vancise, George Speers, and Robt. S. Banberry, directors.

The company was organized under a Dominion charter and has an authorized capital of 5,000,000 shares of no par value. The head office is at 411 McCallum-Hill Building, Regina, Sask.

The mine closed down in the fall of 1931, at which time the shaft had been sunk 85 feet and about 140 feet of lateral work had been done on the 75-foot level.

Early in 1932 the property was again operated for a time under the direction of H. F. Fancy.

J. Y. Cole, Jr.

In the Pipestone bay section of Red Lake, some 30 miles west of the Howey gold mine, in the district of Kenora (Patricia portion), a private venture has been conducting work on claims Nos. 1,628 to 1,636, township of Ball. The shaft, put down 30 feet by hand during the year, is located on claim No. 1,629.

A small steam plant, put in operation in January, 1933, consists of the following equipment: 70 h.p. boiler, 8- by 10-inch hoist, and a 12- by 12-inch NF-1 compressor. This equipment is housed in a log structure, approximately 70 by 30 by 35 feet.

J. Y. Cole, Jr., is in charge of operations, and during the summer from 6 to 10 men were regularly employed.

Coniaurum Mines, Limited

This company has an authorized capitalization of 6,000,000 shares of no par value. The mine is in the township of Tisdale, district of Cochrane, and adjoins the property of the McIntyre-Porcupine Mines on its east boundary.

The officers and directors of the new company organized under Ventures, Limited, are as follows: Thayer Lindsley, president; A. L. Bishop, vice-president; H. Whittingham, secretary; J. Gordon Hardy, D. M. Hogarth, Alex. Longwell; and T. H. Rea, directors. The head office is at 100 Adelaide Street West, Toronto.

The following statement is taken from the report of the general manager, John Redington, for the year 1932:—

Development

The greater part of the development work has been confined to virgin ground with the expectation of locating new ore bodies. A main drive has been driven from No. 5 vein on the 400-foot level westward far enough to explore No. 12 system. That which is thought to be No. 12 vein has been drifted on for over 400 feet. The values encountered in this vein are below mill grade.

It will be seen from the above that this work has not responded to development as kindly as was anticipated and, as a whole, has been somewhat disappointing. Some of the other work has met with more encouraging results.

SUMMARY OF DEVELOPMENT

	Feet
Drifting.....	3,391
Crosscutting.....	2,403
Raising.....	1,452
Diamond-drilling.....	7,096

Footage driven in ore is 1,120 feet with an average value of \$5.69 over a stoping width of 4.7 feet. Veins Nos. 5, 9, and 15 were drifted on. Development of these three veins was confined mostly to levels above the 1,000-foot. A very limited amount of work was done below the 2,000-foot level.

Milling

During the year the mill treated 144,654 tons of ore with an average recovery of \$5.818 and extraction of 95.70 per cent. of the gold content, operating 363.85 days, or 99.68 per cent. of the possible running time.

Ore Reserves

The broken ore reserves have been increased during the year. Stopping added 176,879 tons of broken ore, and development a further 9,503 tons. Milling drew 144,654 tons of ore, leaving a carry-forward of 160,927 tons of broken ore available at the end of the year. The grade of this broken ore is \$5.01, which is considerably lower than the previous year.

New Equipment

During the year the mining plant has been increased by the installation of a new 2,354-cubic-foot Ingersoll-Rand air compressor to better the pressure to existing drilling equipment and provide for additional drills when required. With this increased power the mine can be operated at much larger capacity as soon as developments warrant such. The hoisting plant has also been enlarged and strengthened to increase the hoisting depth to 3,000 feet. The transformer capacity has been increased sufficiently to operate the new equipment at full load. All the above equipment has been installed without loss in milling time and is operating satisfactorily.

Dome Mines, Limited

The authorized capital stock of Dome Mines, Limited, consists of 1,000,000 shares of no nominal or par value, of which 46,666 are held under an agreement in trust for the company; the dividends on these shares are returned to the treasury of the company. The mine is in the township of Tisdale, district of Cochrane.

The officers of the company are: Jules S. Bache, president and treasurer; H. P. De Pencier, first vice-president; G. C. Miller, second vice-president; Morton F. Stern, third vice-president; Alex. Fasken, secretary; E. P. Goetz, assistant treasurer and assistant secretary; C. C. Calvin, assistant secretary; John B. Robinson, assistant secretary.

The directors are: Jules S. Bache, Morton F. Stern, New York; G. C. Miller, Buffalo; Dwight B. Lee, Detroit; G. H. Harris, Innis P. Allen, Rochester; Alex. Fasken, Frank E. Maulson, Frederick Burnett (who fills the vacancy caused by the death of R. F. Segsworth), Toronto.

H. P. De Pencier is the general manager of the company, and J. H. Stovel is general superintendent.

The office of the executive and financial department is at 42 Broadway, New York. The Toronto office is at 36 Toronto Street.

The following statements are taken from the report of the directors to the shareholders on January 20, 1933:—

The net profit or income for the year was \$2,196,267.15. Your directors are pleased to report that the net excess of current assets (bonds and shares at cost) over current liabilities (including dividends payable January 20, 1933, \$333,666.90) is the sum of \$6,349,999.87, which includes the sum of \$3,080,822.01, set apart as a dividend assurance fund. Dividends, however, were paid for the year out of the general fund and not out of the dividend assurance fund.

East Geduld Mines, Limited, declared an initial dividend of one shilling per share in June and in December a further dividend for the year of one shilling and nine pence per share, payable to shareholders of record December 31, 1932. The operation and developments throughout the year have fully met our expectations and are very satisfactory.

The following is taken from the report of the general manager:—

During the year 576,850 tons was hoisted; of this 536,450 tons was ore which was sent to the mill and treated and 40,400 tons was waste which was dumped on the surface. In addition 13,700 tons of waste was disposed of in old stopes. The 536,450 tons milled yielded bullion worth \$4,040,317.50; the yield per ton being \$7.532.

The following statement gives particulars of revenue and expenditures for the year under review:—

EARNINGS STATEMENT

for the year ended December 31, 1932

EARNINGS:

Bullion production.....	\$4,040,317.50
Non-operating revenue.....	527,232.00
	<hr/> \$4,567,549.50

OPERATING AND MAINTENANCE EXPENDITURE:

Development and exploration.....	\$444,268.25
Mining, including hoisting.....	709,004.48
Crushing and conveying.....	96,186.53
Milling.....	608,445.97
Bullion expense.....	21,890.01
Fire protection.....	7,146.57
Warehouse expense.....	9,782.52
Auditors' expense.....	2,643.01
Administrative expense:

Development

The following table gives details of the development accomplished during the year:—

SUMMARY OF DEVELOPMENT WORK FOR YEAR 1932

Level	Drifts	Cross-cuts	Drifts and crosscut slash	Raises	Winzes	Box-holes	Raises, winzes, and box-hole slash	Total	Diamond-drilling
	feet	feet	feet	feet	feet	feet	feet	feet	feet
1st.....			7					7	
3rd.....				249		123	123	495	312
6th.....	198		9	12		45		264	544
7th.....	105	61	14		6	229		415	946
8th.....		192	24	71		106	35	428	696
9th.....	351	315	89	46	49	86	2	938	1,534.5
10th.....	345	98	32	311		361	45	1,192	1,392
11th.....	776	488	146	106	82	265	86	1,949	1,796
12th.....	673	407	133	340	49	643	81	2,326	1,687
13th.....	1,411	275	256	288	90	504	47	2,871	1,635
14th.....	478	119	36	271		252	5	1,161	1,848.5
15th.....	478	83	58	59		223	18	919	1,121.5
16th.....	228	13	74	145	132	55	5	652	1,975.5
17th.....	414	13	8	179		104	6	724	1,369
18th.....	75		157		93	36	6	367	4,543
19th.....	608	28	24	86		97	4	847	584
23rd.....	1,133	331	97	10			3	1,574	4,965.5
Total.....	7,273	2,423	1,164	2,173	501	3,129	466	17,129	26,949.5

Most of the development was done in the greenstone areas. Some development was done in the sediments lying to the east of the upper greenstone ore zones and also in the sediments on the 23rd level. Approximately 15,500 feet of drifting, crosscutting, raising, winzing, and box-holing has been done in the course of searching for and opening up the various ore shoots. Above the 11th level, practically all the work done was in connection with known ore bodies.

It must be borne in mind that to mine any ore on the 23rd level, or below it, will entail heavy capital expenditure, and sufficient evidence is not yet disclosed to warrant any definite plans regarding this discovery. Much development work and diamond-drilling will be necessitated before we will be able to decide whether it will add materially to our ore reserves or not.

During the year, 26,949.5 feet of diamond-drilling was done. Apart from the work done on the 23rd level, the major part of the drilling was done in the vicinity of known ore bodies, and much information of immediate value was obtained.

Of the tonnage milled, the stopes yielded 483,550 tons, averaging \$8.2618 per ton, and development work yielded 52,900 tons, averaging \$4.8113, a total of 536,450 tons, averaging \$7.9215 per ton.

The ore drawn from the Dome Extension ground during the year was 110,812 tons, containing \$691,695.41, or \$6.2421 per ton.

Ore from stopes wholly in the sedimentary area yielded 165,973 tons, containing \$1,631,644.98, an average of \$9.8307 per ton. Ore from stopes wholly in the greenstones and partially in greenstones yielded 317,577 tons, containing \$2,363,337.39, an average of \$7.4418 per ton.

The expenditure on mining was \$709,004.48, or \$1.322 per ton.

The expenditure on development and exploration work charged to operation was \$444,268.25, or \$0.828 per ton milled. This includes \$37,749.63 for outside exploration work carried on during the year.

Ore Reserves

The ore reserves are estimated at 2,000,000 tons. This includes 723,960 tons of broken ore. Ore in the sediments is estimated at 285,000 tons and ore in the greenstones at 1,715,000 tons.

Exploration

Your engineers have been active in considering and examining properties and in the case of one property in Quebec, considerable trenching and diamond-drilling were done. The results, however, did not justify our proceeding further with the option. At the close of the year we are working on a group of claims held under option in the Swayze district of Ontario. The work, however, has not yet disclosed anything of economic interest.

Prospecting rights on certain areas in South Africa were obtained, but the results of our examination were unsatisfactory and we abandoned operations.

Mill

The following are the results of the mill operations during the year:—

	Total value	Value per ton	Extraction per cent.
Heads.		\$7.9215	
Bullion.	\$4,040,317.50	7.5316	95.08

The blanket plant, put into operation late in December, 1931, gave very satisfactory results, the over-all extraction being increased from 92.5806 to 95.08 per cent.

General

Operating costs for the year were \$3.882 per ton milled, as against \$3.482 in the year 1931; the increase is due to charges for silicosis, expenditures on tailings dams, increased tonnage broken in stopes, and increased expenditure on exploration.

Golden Summit Mines, Limited

Golden Summit Mines, Limited, have a capital of 2,500,000 shares of \$1 par value, of which 1,100,000 are issued. The officers and directors of the company are: Thos. A. Wilson, president; W. J. Simpson, secretary-treasurer. The directors are John A. Gunn, Henry A. Marsh, Benjamin Kerr, J. M. Calder, and Charles Ling. The head office of the company is at 594 Bloor Street West, Toronto. In 1932 an average of 6 men was employed. The company owns 460 acres in Grenfell and Maisonsville townships, district of Timiskaming. The shaft and plant are about 2 miles southeast of Sesekinika station.

Up to July, 1933, two shafts had been sunk on the property, one 42 feet and the other 140 feet, and a total of 480 feet of crosscutting had been done on the 125-foot level.

Grenfell Kirkland Gold Mines, Limited

Grenfell Kirkland Gold Mines, Limited, has a capital of 2,500,000 shares of \$1 par value, of which 1,397,547 are issued. The property consists of 200 acres in Grenfell township, district of Timiskaming. The officers and directors are Alex. McNiven, president; Fred A. Day, secretary-treasurer; David Hill and James A. Dunn, directors. David Hill is mine manager. The head office is at 4 Excelsior Life Building, Toronto.

The mine operated for three months, closing in October, 1932, with an average force of 9 men. During that time a shaft was sunk 70 feet, and 50 feet of drifting was done on the 70-foot level.

Hayden Gold Mines Company, Limited

This company is capitalized at \$5,000,000, in shares of \$1 par value. There are approximately 4,000,000 shares issued.

The following are the officers of the company: Jas. S. Pierce, Rochester, president and managing director; A. E. Davis, Rochester, vice-president; O. W. Summer, Rochester, secretary-treasurer; B. J. Fryatt, East Rochester; J. Montgomery, Toronto. T. W. Heberle and R. N. Clark, Rochester, are directors. The executive offices are at 421 Temple Building, Rochester, N.Y., and 611 Federal Building, Toronto.

The company's holdings are in the townships of Ogden and Deloro, district of Cochrane, and consist of 8 claims, with an option on 5 more directly west of the original group.

Early in 1932 a small mill, using flotation and amalgamation methods, was put in operation.

The mine and mill operated from April 23 to June 30, and about 30 tons per day were treated. In the late fall a cyanide unit was added to the mill. The capacity is now 40 tons per day and this new mill started up along with the mine about the first of the new year. Operations were carried on for about two months, when the mill was stopped. Underground operations were curtailed, and in April there were two machines working. About 100 feet of raising was done during the year, and 2,580 tons of ore were milled. During the year an average of about 18 men was employed.

Hollinger Consolidated Gold Mines, Limited

The authorized capital of this company is \$25,000,000, in 5,000,000 shares of \$5 par value; 4,920,000 shares were outstanding on December 31, 1929. The head office is at Timmins, Ont.

The officers of the company are: Noah A. Timmins, president; Jules R. Timmins, vice-president; John B. Holden, secretary-treasurer; A. F. Brigham, consulting engineer; John Knox, general manager. The directors are: Noah A. Timmins, John B. Holden, Jules R. Timmins, Wilson Bell, Senator W. L. McDougald, Leo H. Timmins, and Allen A. McMartin.

The following information is taken from the twenty-first annual report of the directors for the year ending December 31, 1931:—

Net profit from operations amounted to \$3,962,885.34 (about \$450,000.00 in excess of the previous year), out of which the usual thirteen regular dividends and two extra dividends were paid, leaving the sum of \$272,885.34 to be added to surplus.

In the latter part of the year, Mr. A. F. Brigham, who filled the position of general manager so acceptably over a period of about fifteen years, retired to become consulting engineer; and Mr. John Knox, formerly assistant general manager, became general manager in Mr. Brigham's place.

Your company has taken an option on the Young-Davidson property in the Matachewan district, as well as an option on the Woods claims in Tiblemont township, Quebec.

At the close of the year 1932, the net assets of your subsidiary, International Bond and Share Corporation, had a market value of \$2,687,279.14, compared with a market value of \$3,104,440.43 as of December 31, 1931. A large proportion of the decrease in the net asset value of your company shown at the end of 1932 is due to the fact that the premium on American funds on December 31, 1932, was 13 1/16 per cent., while it was 18 1/2 per cent. on December 31, 1931.

Your company's portfolio, as in the past, consists chiefly of listed securities, which are readily marketable.

The following is taken from the report of the general manager for the year 1932:—

Average value of pregnant solution.....	\$5.67

Ore Reserves

Our ore reserves on the 31st of December, 1932, consisted of 6,049,548 tons of a total value of \$45,492,076.00, having an average value of \$7.52 per ton. These figures compare with 6,236,887 tons, of a total value of \$46,241,688.00, having an average value of \$7.41 per ton at the 31st of December, 1931.

The Mill

While investigations looking to improved metallurgy and reduced operating costs have been vigorously prosecuted throughout the past year, no alternative process would seem to indicate better results on Hollinger ore.

Present practice gives a \$0.24 residue at a milling cost of \$0.6122, a combined cost of \$0.8522. While operating charges could be reduced at the expense of extraction, or extraction improved by ignoring increased operating charges, no alternative process so far investigated gives promise of improving upon the only significant figure—that of cost plus tails.

The Mine

During the year operations have been carried on on all levels from surface to the 3,950-foot level. However, no stoping is being carried on below the 2,750-foot level. We are gradually reducing the number of shrinkage stopes in the mine, and recovering ore from shrinkage stopes which have been standing for some time.

The completion of the backfilling at certain points has given us the opportunity to explore areas adjacent to existing stopes. The results of these explorations have been most gratifying, as a considerable tonnage of ore is being developed. This exploration of necessity delays the recovery of sill floors, but to date has been most profitable. Forty-two per cent. of the ore milled came from above the 800-foot level; 975,000 tons of backfill was placed during the year.

Development.—Development has been conducted on all levels during the year, a considerable portion of it being in the area above the 900-foot level. As noted above, the operations in the block from the 2,750-foot to the 3,950-foot level are confined to development only, and results for the year have been satisfactory. Ore put in sight below the 2,750-foot level amounts to over \$3,200,000, the grade being approximately \$9.00.

Ore conditions on the lower levels are most interesting. The apparent extension of the ore zone to the west continues, and while still too early to speak definitely, it opens up possibilities in an area which has heretofore been considered unfavourable at depth.

While it is the intention to sink below the 3,950-foot level, the new developments have reopened the question of the shaft location, and the work is delayed pending further information.

Costs.—There was no material change in costs for the year.

The following is taken from the report of the consulting engineer:—

YOUNG-DAVIDSON MINES, LIMITED

During December, 1932, a proposal was discussed at a special meeting to consider the matter of the company's investigation of the possibilities of the Young-Davidson. It was agreed to do this, subject to a satisfactory agreement and the right to rigidly sample the ore body.

The ore body covers an area of about $2\frac{3}{4}$ acres, mainly on claim No. 5,372 with a small portion on claim No. 5,374 in the Matachewan gold area. The agreement was signed on or about the 9th of February, 1933, and work was started at once on the property. This type of ore occurrence is rare in Northern Ontario because, owing to the average low grade, it will have to be mined by quarry methods.

Former work was done on this mine by the Porcupine Gold Fields Development and Finance Company, Limited. This consisted of an extensive diamond-drilling campaign and about 2,000 feet of underground tunnelling. The mine was abandoned as the work proved that the grade of the ore was too low for profitable exploitation by underground methods.

The Hollinger problem is to reveal the actual minimum value of the ore body and aside from the cost of sampling have no other financial commitments. From an investigation of the records of the Porcupine Gold Fields and from careful sampling of the dump rock, which is the average of the rock encountered during the underground work, the value appears to be around \$2.50. This data is being supplemented by an elaborate series of cross-trenches, which will be sampled thoroughly by channel and bulk samples, and then the whole problem reviewed for a decision. It is thought that the grade can be materially improved by sorting out as much as possible of the poor rock before milling as may be recognized by inspection and where possible. The tests in the ore so far show good extraction both by cyanidation and flotation. Work now in progress will decide this matter.

Horseshoe Mines, Limited

This company was incorporated in 1929 with a capitalization of 4,500,000 shares of \$1 par value. The officers are: W. A. Lamport, president; Lt.-Col. Kelly Evans, vice-president; C. M. Chandler, secretary-treasurer; J. H. Lumbers, director. The head office is at 301 Royal Bank Building, Toronto.

The properties held by this company include 310 acres on the south shore of Regina bay, Lake of the Woods, about 40 miles by water southeast of Kenora. This covers the old Regina mine, which began production in 1895, and was operated continuously until October, 1899, and again for short periods in 1902 and 1905. The total production is estimated to have been about \$500,000. The mine was involved in litigation from 1908 to 1923 and remained dormant. It was dewatered and examined in 1924, 1929, and 1931.

The underground workings consist of a 560-foot two-compartment shaft, with 9 levels opened up at intervals of 40 to 60 feet. A total of 3,560 feet of drifting has been done on these levels. The main ore body has been practically all stoped out between the 8th level and surface.

Between June and December, 1932, the mine was again dewatered in anticipation of active development, which did not materialize. However, repairs were made to the surface plant, and an air compressor was installed to replace obsolete equipment.

The mining plant consists of two 100 h.p. return tubular boilers, a 12- by 16-inch Jenckes steam hoist, and the compressor referred to above. The last mill used on the property is equipped with 30 gravity stamps, 6 amalgam plates, 5 Wilfley tables, and an obsolete 4-vat cyanide leaching plant.

An average of 5 men was employed under the direction of George Miller.

Howey Gold Mines, Limited

The company is capitalized at 5,000,000 shares of \$1 par value. They are all issued. The head and mine offices of the company are at Red Lake. The executive office is at 802 Federal Building, Toronto. The following are the executive officers and directors: R. T. Birks, president; W. S. Cherry, vice-president;

H. C. McCloskey, secretary-treasurer; J. E. Hammell and John A. Northway, directors. Fraser D. Reid is general manager.

The company's holdings lie at the southeastern corner of the lower part of Red lake and include the following claims situated in Dome and Heyson townships, district of Kenora (Patricia portion): K. 740-43, 1,400-406, 1,364-72, 1,397-99, and 867. These claims lie directly north of Favel on the Canadian National railway.

The following is an extract from the president's report to the shareholders for the year 1932:—

During the year you will note that the recovery of gold amounted to \$1,268,780.07, from which an operating profit (before depreciation, pre-production charges, and taxation) of \$470,411.96 was realized. The cost per ton of ore treated during 1932 was \$2.471, as compared with a corresponding cost of \$3.126 during the preceding year. While it is true that the average recovery is the lowest of any mine operating profitably in Ontario, it will be observed that the cost per ton is proportionately low.

Since the end of the calendar year the general manager has recommended, and the directors have approved, a plant extension which will increase the capacity of the mill to approximately 1,300 tons per day. This will not only insure a larger profit on the ore reserves indicated in the general manager's report, but will also open up, as a commercial possibility, a large block of ore above the 1,000-foot level lying west of the shaft.

The following is the general manager's report for the year 1932:—

SUMMARY OF WORK ACCOMPLISHED

	1932	1931
Drifts, crosscuts, raises, etc. feet	3,562.5	3,117
Shafts and winzes. feet	430.5
Shaft stations, slashing, etc. cu. yds.	1,550	2,225
Diamond-drilling (underground) feet	1,856.6	2,030.9
Diamond-drilling (outside exploration) feet	701
Box-holes. feet	830.5	1,560
Ore broken mining. tons	339,675	323,289
Low-grade material discarded by sorting tons	44,585	15,324
Milled after sorting. tons	284,664	211,522
Broken reserve in stopes (Jan. 1, 1933) tons	206,150	195,724

EARNINGS STATEMENT

	1932	1931
Total receipts from sale of gold and silver (including exchange)	\$1,268,780.07	\$914,290.58
Total operating cost (including Toronto office), expenses, and taxes.	813,368.11	709,111.29
Operating profit.	\$455,411.96	\$205,179.29

Ore Reserves

The broken reserve above the 1,000-foot level on the 31st day of December amounted to 206,150 tons. The reserve of unbroken ore of a similar grade above the same level amounted to approximately 500,000 tons. In addition to these reserves, there is a body of ore lying to the west of the shaft and above the 1,000-foot level. This section has not as yet been explored sufficiently to permit including it in the reserves. We do feel, however, that it will give a substantial tonnage of a relatively lower grade ore.

Limited work done below the 1,000-foot level and above the 1,315-foot haulage level disclosed a reserve of approximately 500,000 tons, estimated from diamond-drilling results to have a gold content of \$2.45 a ton. This lower grade ore we believe can be mined and milled at a cost of at least \$1.85 a ton, including head office expenses, provided the capacity of the plant is increased to approximately 1,300 tons a day.

Exploration

During the past year, the mine was developed to the 1,315-foot level by a winze from the 1,000-foot level. From this winze, the 1,315-foot haulage level was extended westward to the position of the present shaft, and also to a point 373 feet east of the winze; also from the winze the 1,175-foot service drift was driven to the position of the shaft, and the shaft connected by raising from this level. This service drift was also extended to a point 97 feet east of the winze for exploratory purposes. Both the 1,175-foot service level and the 1,315-foot haulage level were thoroughly explored by diamond-drilling as far as development extended, with the result as previously stated.

A longitudinal section of the mine is attached showing the location of the ore reserves with respect to the shaft. It will be seen from a study of this that there is still a large section to be explored, both above and below the 1,000-foot level, before the possibilities of the mine are fully determined.

An average of 193 men was employed throughout the year. Edward Futterer is superintendent.

Kenora Prospectors and Miners, Limited

This company has an authorized capital of 500,000 shares of \$1 par value. The officers and directors are: Thayer Lindsley, president; Mrs. Ida A. Lindsley, vice-president; Geo. H. Ince, secretary-treasurer; Mrs. Ida Machin and G. H. Marsh, directors. The head office is at 100 Adelaide Street West, Toronto.

Cedar Island

This property is located on Cedar island, in Bag bay, Shoal lake, in the Lake of the Woods area, district of Kenora. It is about 45 miles by water from Kenora.

During 1932 a small two-compartment inclined shaft was sunk to a depth of 165 feet, and a level established at 150 feet. A total of 385 feet of drifting and 163 feet of crosscutting was accomplished at this horizon. A shipment of 44 tons of high-grade ore was made to the Ontario refinery at Copper Cliff.

The plant used consisted of a 25 h.p. vertical boiler, 6- by 8-inch Jenckes hoist, and a 310-cubic-foot gasoline air compressor.

An average of 8 men was employed under the direction of F. L. Smith from February until work was suspended in October, 1932.

Mikado

The old Mikado gold mine, also situated in Bag bay, Shoal lake, was acquired, and work commenced in November, 1932.

After the mine was dewatered, the old No. 1 shaft, a vertical two-compartment shaft to the 4th level, was cleaned out and retimbered. A new headframe was erected, and a small single-drum steam hoist and bucket installed.

At the 4th level, 240 feet vertically, an old 87-foot inclined winze located near No. 1 shaft was cleaned out and prepared for sinking. The hoist used at Cedar island was transferred and installed underground. Sinking was started in the winze in January, 1933, with the 9th or bottom level horizon 522 feet vertically from surface, as an objective.

The old Mikado plant consisting of two 150 h.p. boilers and a 500-cubic-foot steam-driven compressor were used.

About 25 men were employed. R. C. Brehaut is in charge.

Kirkland Consolidated Gold Mines, Limited

The officers and directors of the company are: James M. Ryan, president; J. W. Rudhard, vice-president; Andrew James, secretary-treasurer; R. W. Langford, Kelvin Killeen, N. R. Davis, directors; and E. B. Wood, director and mine manager. The capitalization is 7,000,000 shares at \$1 par value; 3,500,000 shares are issued. The head office of the company is at 1717 Metropolitan Building, Toronto.

The company owns 4 claims in McVittie township, 12 claims in Grenfell township, and 14 claims in Gauthier township, all in the district of Timiskaming. A shaft was sunk in 1932 on the claims in Grenfell township about 3 miles south-east of Sese kinika. The shaft is down 60 feet, and 50 feet of drifting was done. A narrow high-grade vein was opened up for a short distance. Three camps, a blacksmith shop, and a cookery were constructed early in 1933.

Kirkland Gold Belt Mines, Limited

The Kirkland Gold Belt Mines, Limited, own 293 acres in the township of Teck, district of Timiskaming, east of Kirkland Lake. The officers and directors of the company are: John R. Bookser, president; Jas. E. Day, vice-president; G. W. Morris, treasurer. Dr. W. H. Bennett, M. C. Smith, J. J. Byrne, F. W. Alderman are directors. Roy Weldon is secretary. The head office is at 504 Kent Building, Toronto. The capitalization is 3,000 000 shares of no par value.

During the year the following work was done: on the 125-foot level, 202 feet of drifting and 80 feet of crosscutting; and on the 250-foot level, 90 feet of drifting and 180 feet of crosscutting. On the 125-foot level, approximately 200 feet of \$10 ore, 5 feet wide, was opened up; and on the 250-foot level, 100 feet of \$8 ore. Up to the end of May, 1933, the shaft had been sunk to the 500-foot level,

and stations had been cut at the 375- and the 500-foot levels. A new steam hoist and electric compressor are being installed. During the year 20 men were employed.

Kirkland Lake Gold Mining Company, Limited

The officers and directors of this company are: J. B. Tyrrell, president and managing director; R. Graham, secretary; R. G. O. Thomson, vice-president; Wm. M. Sixt, mine manager; A. C. Matthews, J. A. Dalton, A. M. McQueen, W. S. Walton, and J. C. Haight, directors. The company owns 465 acres in the township of Teck, district of Timiskaming, and is capitalized at 5,500,000 shares of \$1 par value.

Production for 1932 amounted to \$592,451.17, plus exchange of \$14,509.79, making a total of \$606,960.96.

On an average, 147 men were employed at the mine.

The following is taken from the mine manager's report for 1932:—

During the year we had a very heavy shaft-sinking and equipment cost. After paying for this we were able to show a very favourable profit.

Shaft-sinking from the 4,750- to the 4,900-foot level was started at the beginning of the year. At the 4,900-foot a main haulage level was driven 1,000 feet south to No. 2 winze. The No. 2 winze was sunk 543 feet. This provides four new levels that will be worked during the coming year. A new hoist and all necessary equipment was installed at No. 2 winze. This work had to be done before development could be started on new levels at No. 2 winze. For this reason the development of new ore was small as compared with the previous year.

The main development of new ore was on the 4,900-foot level. To the east a wide zone was opened up. While this did not produce ore, the formation and structure were very good. This section below the 4,900-foot level will be developed during the coming year.

To the west we developed a fair length of good grade ore, and at the end of the year the face was still assaying high-grade ore. The ore zone on the 4,900-foot west drift was considerably longer than on the 4,750-foot level. If this condition continues down below the 4,900-foot, with this formation and structure, we should find ore below 4,900 feet during the coming year. During the coming year we will be carrying on development of ore, as shaft-sinking is completed for a period.

A fairly large expenditure was made on the plant and addition of new equipment to keep up the working standard generally. During the next year this expenditure will be considerably less.

During the year the major work was done on the following levels: 500-, 700-, 2,725-, 2,850-, 3,875-, 4,000-, 4,150-, 4,300-, 4,750-, and 4,900-foot levels and No. 2 winze. The ventilation raise has been constructed so that at the end of the year it is connected from the 4,900-foot level to surface, which provides taking down air from surface to improve working conditions on lower levels.

Due to the unemployment situation, we have shortened the hours of some of our men so as to keep as many men at work as possible.

La Roche Mines, Limited

The capitalization of La Roche Mines, Limited, is \$3,000,000, in shares of \$1 par value. The officers and directors of the company are: James E. McMahon, Timmins, president; J. C. Roche, Buffalo, N.Y., secretary-treasurer; John J. Stack and John Hanover, Buffalo, N.Y., directors. R. R. Brown is general manager. The head office is at 116 Federal Building, Toronto.

The property, consisting of two claims about 2 miles southeast of Timmins, in the township of Tisdale, district of Cochrane, was operated during the latter part of 1931 and the early part of 1932. During this period a small plant was erected and a shaft was sunk to a depth of 140 feet. A level was cut at the 125-foot horizon, and about 500 feet of drifting and crosscutting was done.

George Gray was in charge of operations, and about 20 men were employed.

Lake Shore Mines, Limited

Lake Shore Mines, Limited, has a capital of 2,000,000 shares of \$1 par value. The officers of the company are: Harry Oakes, president and managing director;

W. H. Wright, vice-president; Dr. W. P. St. Charles, treasurer; Kirkland Lake Securities, Limited, secretary. The directors are: Harry Oakes, Albert Wende, Louis Oakes, Wm. H. Wright and Ernest Martin. E. W. Todd is mine superintendent. The mine and works are at Kirkland Lake, township of Teck, district of Timiskaming. During the year an average of 1,420 men was employed.

The following information is taken from the seventeenth annual report of the company for the year ending June 30, 1932:—

During the year 834,434 tons of ore were treated, yielding bullion to the amount of \$12,356,759. This shows an increase of 135,810 tons of ore milled over last year, with a corresponding increase in bullion of \$3,203,823.92.

Total.....			\$47,393,367.46	\$19,020,000

Mining and Development

The total tonnage milled during the year was made up of 83,668 tons of ore from development and 750,766 tons from mining. The broken ore reserves now amount to 258,914 tons, valued at \$4,490,000. The mine is now practically all changed over to cut-and-fill stoping or various applications of this method, and, as pointed out last year, the broken ore reserves are being gradually reduced.

Work accomplished on the new upper levels between the 2,000- and 2,950-foot horizons has given very satisfactory results as regards lengths, widths, and grade of ore developed.

SUMMARY OF ORE DEVELOPMENT ON NO. 2 VEIN

Level	Lengths	Average width	Average grade
	feet	inches	
2,200-foot.....	2,519	71	\$20.70
2,325-foot.....	2,378	65	17.80
2,450-foot.....	2,285	77	20.80
2,575-foot.....	1,738	78	18.10
2,700-foot.....	1,620	70	19.60
2,825-foot.....	2,129	65	16.83
2,950-foot.....	1,363	69	18.40

The above summary includes only the widths of ore found in the drifts down to the 2,950-foot level. The vein has been intersected by crosscuts on five levels below the 2,950-foot with satisfactory results.

Three new levels on No. 1 vein show the following results to date:—

Level	Lengths	Average width	Average grade
	feet	inches	
2,575-foot.....	209	79	\$16.90
2,700-foot.....	920	60	16.50
2,825-foot.....	629	73	11.40

During the year No. 1 shaft was carried to a depth of 3,725 feet, and at the same time raising on No. 3 shaft from the 3,075-foot and 3,200-foot levels was in progress. The main crosscuts connecting the two shafts were completed to the 3,200-foot level and ore and waste passes completed.

DEVELOPMENT FOOTAGE FOR YEAR

Milling

The new equipment, which was installed at the conclusion of the experiment work on our new method of tailings treatment carried out so successfully last year, is at present working very satisfactorily, effecting an increase in extraction of approximately 5 per cent. over previous practice.

Lakeland Gold Mines, Limited

This company operated its property, about 4 miles southeast of Bourkes station in the township of Maisonneville, district of Timiskaming, from April to the end of the year with a force of 28 men. The property consists of 800 acres.

The officers and directors are: F. A. Pollard, president; Robert Johnston, vice-president; A. W. Morris, secretary-treasurer; Gideon Grant, Luther Davison, Wm. Brittain, and R. A. Tresidder, directors. Oscar Knutson is mine superintendent. The head office is at 19 Sun Life Building, Hamilton, Ont. The company is capitalized at 4,000,000 shares of \$1 par value, of which 2,300,000 shares are issued.

The following work was done in 1932: shaft-sinking, 277 feet to the 500-foot level; crosscutting, 353 feet; drifting, 832 feet; diamond-drilling, 5,354 feet.

Macassa Mines, Limited

The Macassa Mines, Limited, has a capitalization of 5,000,000 shares of \$1 par value. The officers and directors are: Robert A. Bryce, president; L. Soliague, secretary-treasurer; Arthur G. Slaght, James Cowan, Joseph Caldwell, and Thomas Riggs, directors. The head office is at 85 Richmond Street West, Toronto. G. A. Howes is superintendent at the mine. An average of 31 men were employed in 1932.

A start has been made on the construction of a 200-ton mill, together with an assay office, refinery, machine shop, and other essential buildings for the operation of a complete 200-ton mill. The work is well under way, and it is expected that both the mine and mill will reach production by October, 1933.

The following is an extract from the report of the president to the shareholders on June 5, 1933:—

When the previous annual report was issued in April, 1932, the major development operation, upon which the company had commenced work in the early part of 1931, was still in progress. The new central shaft, sunk to a depth of 2,500 feet, was connected in August last with the 2,475-foot drift, which had been driven from the workings on that level of the Kirkland Lake Gold Mining Company, Limited.

The completing of the initial programme of work and the subsequent exploration and development covered by this report have involved an expenditure of \$10,100.89, in addition to plant and equipment, and \$191,685.73 in exploration, development, and general expenditure.

The amount of development completed at the end of June, 1933, was as follows: 5,350 feet of drifting, and 1,500 feet of raising.

The following is taken from the annual report of the superintendent for the year ending April 30, 1933:—

Following the completion of the central shaft and its connection with the 2,475-foot level drift, a development programme was inaugurated, designed to open up the sections of ore encountered in this drift. This work has comprised the putting up of three raises from this drift and the establishing of three new levels at 2,325, 2,175, and 2,000 feet; and in addition thereto, a drift is being driven westward on the 750-foot level to explore the western section of the property. These operations have entailed the following work: raising, 615 feet; drifting, 3,170.5 feet; crosscutting, 717.5 feet; diamond-drilling, 941 feet.

In the report of September last it was stated that sections of ore had been encountered on the 2,475-foot level having a combined length of 310 feet, assaying \$11.20 over a width of 4.6 feet. During the progress of the above work these sections have been further developed, and at April 30 the results were as given below. I believe that when these ore sections have been fully developed their true widths will be much greater.

Level	Length	Width	Value
	feet	feet	
2,475-foot.....	500	4.6	\$11.00
2,325-foot.....	536	4.8	15.05
2,175-foot.....	50	4	9.07
No. 3 raise.....	190	6	16.60

On the 2,475-foot level, where raises Nos. 1 and 2 were started, values were low, but some ore was encountered during their progress. The main object of these two raises was to reach the new levels, 2,325- and 2,175-foot, as quickly as possible and develop them. No. 3 raise, however, was started on ore at the 2,475-foot level, was driven at an angle of 45 degrees and continued in ore up to the 2,325-foot level. While it showed an average width of 6 feet there still remains some ore in part of the south wall, so that the ore on each side of it may stope wider than 6 feet.

Horizontal diamond-drilling from these levels indicates that considerable crosscutting must be done with the strong possibility of finding parallel ore or the extensions of some of the known ore bodies. Two diamond-drill holes drilled below the 2,475-foot level intersected the main break at 90 and 200 feet below this horizon, proving its continuity to greater depths than now explored.

Several additions have been made to the mining plant and equipment both above and below ground in order to facilitate the carrying on of the more extended programme which has been in progress since September, 1932.

McIntyre-Porcupine Mines, Limited

The authorized capital of this company is \$4,000,000, divided into 800,000 shares of a par value of \$5, of which 798,000 are issued.

The officers of the company are: J. P. Bickell, president; W. J. Sheppard, vice-president; E. D. Fox, secretary; Balmer Neilly, treasurer. The directors are: J. P. Bickell, W. J. Sheppard, J. B. Tudhope, D. H. McDougall, Strachan Johnston. R. J. Ennis is general manager.

The mines and plant are at Schumacher, in the township of Tisdale, district of Cochrane. The head office of the company is at Schumacher, and the executive offices are at 15 King Street West, Toronto.

The following information is taken from the twentieth annual report of the general manager for the year ending March 31, 1933:—

PRODUCTION	
(from 736,300 tons treated)	
Value per ton	\$7.70
Gross value	5,669,510.00
Bullion recovered, valued at \$20.67 per ounce	5,427,211.15
Bullion recovered per ton	7.37
Bullion contained (gold, 261,784.62 fine ounces; silver, 60,787.84 fine ounces)	5,981,967.06
Bullion marketing costs	24,751.37
Net value of bullion recovered	\$5,957,215.69

General

Veins Nos. 16, 19, and 20, located in the quartz porphyry on the 3,750- and 3,875-foot levels, will pass into the underlying basic schist at a depth of approximately 4,700 feet. From the interpretation of geological data accumulated over a period of years, we believe that these veins will become important producers below this horizon. To develop this area, an internal vertical shaft was started from the 3,875-foot level. It is located 1,500 feet south and 1,000 feet east of No. 11 shaft. The permanent hoisting equipment will be placed on the 3,750-foot level, with dumping and storage facilities above the 3,875-foot level. The plant is laid out to afford necessary ventilation, and provide a hoisting capacity of 1,500 tons in 16 hours from a depth of 3,500 feet below the 3,875-foot level. Sinking operations are well under way, and the second station is just being completed.

Development work in the north contact zone, from the west to the east end of the property, and to a depth of approximately 1,000 feet, is proving up a large number of short lenses of ore that are of good width and grade and give promise of very considerable tonnage.

March Gold, Limited

This company owns and operates five claims in Deloro township, district of Cochrane. The officers and directors of the company are as follows: Henry Kobler, Buffalo, president; B. C. Conderman, Hornell, vice-president; Edward G. Kinkel, Buffalo, secretary; F. J. C. Bull, Buffalo, treasurer; Geo. R. Feine, Chas. J. Schmidt, Henry Tiedt, Gustave Loesch, Jacob Schwingel, all of Buffalo, directors. Martin O. Knutson, South Porcupine, is mine manager.

The mine operated during the early part of the year at a reduced tonnage and finally ceased operations. The pumps and all equipment were taken to surface and the mine allowed to fill with water.

Metals Development, Limited

This company is capitalized at \$2,500,000 in shares of \$1 par value. There are 1,896,818 shares issued.

The following is a list of officers and directors of the company: Dr. M. H. Lebel, Montreal, president; W. R. Salter, vice-president; M. F. Blue, secretary-treasurer; C. H. Ackerman, Peterborough; W. J. Scarrow, Sarnia; J. L. Tetreault, P. E. Lalaune, P. E. Lavallée, and B. M. Maase, Montreal, directors. J. W. Morrison is consulting engineer.

The company is interested in several claims in the North Clearwater lake section, district of Kenora (Patricia portion). The property is best reached from Woman lake. A fair road, about a mile in length, has been built to the camp location on claim No. 5,603.

Surface work has been done on 25 claims and has shown up several long breaks and many different geological conditions. Two systems of veins have been located.

The veins first located had a strike almost due north, but the most promising occurrence of gold is in a vein of banded quartz on claim No. 5,603, which strikes N. 47° E. and dips 50° S. Minerals found in this vein are galena, sphalerite, pyrite, some chalcopyrite, and gold.

During the winter of 1931-32 the complete mining plant of the nearby Dunkin mine was placed on the property, and on April 6, 1932, a 12- by 7-foot

two-compartment shaft was started and sunk 239 feet. A station was cut at 211 feet, but no lateral work was done at this time. This work was completed in June and was under the direction of J. C. Nelson.

Minto Gold Mines, Limited

The officers and directors of this company are: John Knox, Jr., president; M. E. Knox, secretary-treasurer; John Knox, Sr., and M. K. Knox, directors. The authorized capital is 8,000 shares of no par value.

This company holds a working option on the Minto, Jubilee, and Cooper properties, situated near Wawa in the Michipicoten area, district of Algoma.

Production from the Minto property was continued without interruption throughout 1932. During the first four months mining operations were confined to stoping on the 1st level, during which period 6,229 tons were mined and treated in the 75-ton cyanide mill. For the balance of the year operations were confined to stoping on the 2nd level, during which period 12,537 tons of ore were mined and milled. Thus a total of 18,766 tons of ore was mined and milled during 1932.

All stoping was done by open-stope methods. No development work was done, as these levels had been opened up by previous operators.

The only addition to the plant was a Link-Belt vibrating screen, which was installed to by-pass fines around the crusher.

The company employed an average of 42 men, of whom 18 were underground. All work was in charge of John Knox, Jr., with William Hocking as mill superintendent, and Frank McLennan as mine captain.

Moss Gold Mines, Limited

The property of this company is situated in Moss township, district of Thunder Bay. It is connected by an 18½-mile road to Tip Top siding on the Fort Frances branch of the Canadian National railway, about 82 miles west of Port Arthur.

The officers and directors during 1932 were: N. R. Fisher, president and managing director; Alistair Fraser, vice-president; James Cooper, secretary-treasurer; R. Blackburn, S. C. Gzowski, J. D. Paterson, C. G. Greenshields, and R. W. Steele, directors. The authorized capital is 4,000,000 shares of \$1 par value. The executive offices are at 132 St. James Street Montreal.

Underground development work accomplished during 1932 consisted of 2,047 feet of drifting, 125 feet of crosscutting, and 647 feet of raising. The drifting was distributed as follows:—

Level	Feet
500-foot.....	785
625-foot.....	632
750-foot.....	630
Total.....	2,047

Twenty-one stopes in all six levels of the mine were operated during the year. They were first worked by shrinkage methods, but there was heavy dilution because of the weak nature of the walls. This led to the adoption of cut-and-fill and stulted-shrinkage methods. A total of 28,477 tons of ore was hoisted in 1932.

Production was started upon completion of the 200-ton cyanide mill in February, 1932, and a total of 25,363 tons of ore was milled in 1932. The mill is operated by electricity generated by four Diesel engines, three of which are rated

at 250 b.h.p., and one at 125 b.h.p. Electricity is also used to operate a 325-cubic-foot compressor and the mine pumps.

Steam is used to operate four compressors, having a total rated capacity of about 1,400 cubic feet, and the 10- by 12-inch double-drum hoist. The steam plant was enlarged during the year to five boilers having a total rating of about 435 h.p.

An average of 115 men was employed during the year, of whom 19 were employed on construction and 51 underground. N. J. Everard, D. J. Russell, H. J. Darling, and J. D. Tolman, successively, were in general charge of operations. Robert Miller was mill superintendent until December, when he was succeeded by J. E. Sullivan. Alec Hattie was succeeded as mine captain by G. R. MacLaren.

Northern Empire Mines Company, Limited

This company was incorporated in 1932 with a capital of 10,000 shares of \$10 par value. It is a subsidiary of the Empire Star Mines Company of California, which in turn is controlled by Newmont Mining Corporation of New York.

The officers are: Fred Searls, Jr., president; Geo. B. Agnew and David E. Thomas, vice-presidents; H. E. Dodge, secretary-treasurer; and Carroll Searls, assistant secretary-treasurer. The directors are Fred Searls, Jr., H. E. Dodge, Geo. B. Agnew, Carroll Searls, and Walter Douglas. The executive address is 14 Wall Street, New York.

This company took over the holdings of Beardmore Gold Mines, Limited, situated near Beardmore station on the Port Arthur-Long Lac branch of the Canadian National railway. To these they added several adjoining groups of claims.

Work was commenced on the property in June, 1932, and consisted of surface trenching and plant renovation until October, when underground work was started on the 150-foot level. Drifting was undertaken in both directions on this level on a three-shift schedule, and by the end of the year a total footage of 1,200 feet had been accomplished.

The renovated plant consists of two small vertical boilers, with a total rating of 35 h.p., an 8- by 10-inch Jenckes single-drum steam hoist, and two 260-cubic-foot gasoline compressors. A warehouse, gasoline supply building, powder magazine, and a bunk-house were erected to augment the old Beardmore buildings.

During the last three months of 1932 an average of 47 men was employed, of whom 30 were underground. Robert J. Hendricks is in charge of the work.

R. N. Palmer

In March, 1932 R. N. Palmer and associates obtained an operating contract with Schreiber Gold Mines, Limited, and commenced work on the property, which is located about $3\frac{1}{2}$ miles south of Schreiber. It consists of mining locations B.J. 122 and 123 and was formerly known as the McKellar-Longworth property.

An old 180-foot adit was cleaned out and driven 50 feet farther, and stoping commenced on a narrow high-grade vein. The high-grade ore was picked out and bagged in the stopes, then transported to Schreiber for shipment.

During 1932 five shipments of high-grade ore were made, totalling 180 tons. Of this amount 150 tons was shipped to the Ontario Refining Company at Copper Cliff, and the balance to the Noranda smelter in Quebec.

The mining plant used consisted of a 310-cubic-foot gasoline compressor and a Rand steel sharpener. A power-house, dry-house, bunk-house, and cook camp were erected.

Ten men were employed under the direction of R. N. Palmer, of whom six worked underground.

Parkhill Gold Mines, Limited

The officers and directors of this company are: Sir Thomas Tait, president; C. F. Elderkin, vice-president; G. S. Andrews, secretary-treasurer; Geo. M. McKee, Lt.-Col. Chas. Adams, and Geo. Glendenning, directors. The authorized capital is 3,000,000 shares of \$1 par value.

The property is located near Wawa in the Michipicoten area district of Algoma.

During 1932, the two-compartment, 40-degree shaft was sunk an additional 200 feet, and levels were established at 480 feet and 600 feet on the incline.

Development footages and tonnages of ore removed by open stoping on the various levels were as follows:—

Level	Drifting	Crosscutting	Stoping
	feet	feet	tons
120-foot	nil	nil	516
240-foot	23	50	4,766
360-foot	256	nil	6,943
480-foot	1,313	15	9,826
600-foot	310	70	886
Total	1,902	135	22,937

The 60-ton cyanide mill operated throughout the year and treated a total of 16,822 tons of picked ore. A single-drum electric hoist was installed to replace the small air hoist formerly used.

The company employed an average of 68 men during 1932, of whom 44 were underground. A. R. Lawrence, J. A. S. Roussac, and Wm. T. May were successively in charge of operations under the general direction of E. S. Turner.

Rich Rock Gold Mines, Limited

This company has a capitalization of \$4,000,000. The officers and directors are: Noah Dymont, Beamsville, president; Charles G. Henderson, Toronto, vice-president; D. H. Fletcher, Toronto, secretary-treasurer; George Millen, Stoney Creek, S. G. Hodgson, Frank Austin, and N. E. Odell, all of Toronto, directors. The company maintains an office at 806 Central Building, 45 Richmond Street West, Toronto.

In June, 1932, an option on the old Golden Fleece mine near Flinton, in Frontenac county, was granted to C. N. Thompson, of Toronto, by which a controlling interest might be obtained on a working basis. Under the auspices of Goodrich Gold Syndicate, sampling operations were conducted over a period of four months during the year. The mill was operated in a small way with steam power and about 150 tons of ore were hoisted and sampled in the mill, giving an average of \$6.00 per ton. From one section assays as high as \$17.30 average were procured from run of mine ore. No attempt was made to operate the cyanide section, which has a capacity of 250 tons per day. It was the purpose of the

syndicate to demonstrate the commercial possibilities of the property, and having done so, to incorporate a three-million-share company, acquire the controlling interest, and resume operations. It is hoped that this will be accomplished during 1933.

An average of 20 men was employed during the 4-month period of operation. C. N. Thompson was in charge of the work.

Sylvanite Gold Mines, Limited

Sylvanite Gold Mines, Limited, has an authorized capital of 3,300,000 shares of \$1 par value. The officers and directors are: Edward L. Koons, president; William L. Marcy, vice-president; W. S. Walton, secretary; Clark L. Ingham, treasurer; Welles V. Moot, managing director; and C. E. Rodgers, general manager; Alfred H. Sharpe and Harry Yates, directors. The head office is at Kirkland Lake, and the Buffalo office is at 300 Erie Building. An average of 228 men were employed during the year.

The general manager's report for the fiscal year ending March 31, 1933, is as follows:—

Production

Some 96,140 tons were milled, or an average of 263.4 tons per day. This resulted in an increase of 1,864 tons over the previous year. The mill operated 97.2 per cent. of possible time and produced bullion amounting to \$912,377.15, including exchange premium, but before deduction of \$12,830.08 premium paid in purchasing U.S. funds for dividend purposes.

A slight decrease occurred, for a short period, in mill tonnage and operating time. This was caused through some difficulty being experienced at first with settlement of ore from the newly encountered sedimentary formation as compared with porphyry.

The following table shows production and tons milled for a 5-year period:—

TONS MILLED AND YEARLY PRODUCTION FOR FISCAL YEARS
ENDING MARCH 31

Year	Tons	Production	Average recovery
1929.....	70,833	\$737,573.12	\$10.41
1930.....	75,408	690,400.14	9.16
1931.....	83,034	837,013.97	10.08
1932.....	94,276	948,926.13	10.07
1933.....	96,140	912,377.15	9.49

Mining

Some 66,130 tons were broken in stopes, with a further 37,467 coming from development; the total being 103,597 tons. Waste broken totalled 27,121 tons, of which 21,774 were hoisted to surface and 5,347 used for backfill. The combined total of ore and waste broken for the year was 130,718 tons.

Ore Reserves.—Broken ore was estimated March 31, 1933, at a total of 95,529 tons. This was an increase of 7,457 tons over the figure for 1932, and consisted of 89,001 tons in stopes and 6,528 tons on the ore dump at surface.

Following the practice of past yearly reports, no estimate of unbroken ore has been shown. This is due to the extreme difficulty of making such an estimate with any degree of accuracy, where ore occurrences are of the nature found to date in your mine.

Development and Exploration

A 3-year comparative statement, including total from beginning of operations, follows:—

Class of work	Year ending March 31, 1933	Year ending March 31, 1932	Year ending March 31, 1931	Total from beginning of operations to March 31, 1933
	feet	feet	feet	feet
Drifting.....	6,681	4,225.5	5,911.5	35,006
Crosscutting.....	4,201	1,638	2,506.5	19,790.5
Raising.....	3,029	1,128	1,232.5	9,368.5
Sublevel drifting.....	1,436	712.5	325.5	4,623
Box-hole raising.....	1,179	1,163	702.5	5,863.5
Box-hole pillar drifting.....	(1)	192	591.5	1,925.5
Shaft-sinking.....		695.5	586	5,042
Total.....	16,526	9,744.5	11,856	81,619
Per cent. of crosscutting to total of crosscutting and drifting.....	38.7	27.8	29.8	36.1
Shaft stations and sump excavations	cu. ft. 5,610	cu. ft. 37,359	cu. ft. 22,768	cu. ft. 185,878
Diamond-drilling.....	feet 11,945	feet 4,674	feet 5,910	feet 54,361

¹Included with sublevel drifting for 1933.

No. 2 Shaft Section.—Approximately 1,200 linear feet of ore of an estimated grade slightly below mill average was developed in several sections by drifting. The location was from 200 feet to and on the 3,000-foot horizon. About 71.8 per cent. of this ore was either in the sediments or on the contact with porphyry intrusions encountered north of the shaft. Ore at this point was first indicated by diamond-drilling. Later, crosscuts were driven on certain levels, followed by drifting and some stoping.

Work already completed has shown a fair tonnage, on and above the lowest level, of what is considered as a new source of ore, and it is reasonable to expect that extensions of these ore bodies will be found by further prospecting of this favourable area.

South of No. 2 shaft, on the main south vein, drifting and stoping at 2,250 and 2,500 feet proved a substantial amount of ore. An important volume, averaging about \$6.00, was also indicated by diamond-drilling and developed by drifting on four levels between 400 and 1,500 feet. In addition, and within the same vertical limits, ore of \$9.00 grade and about 300 feet in total length was broken during the period.

Exploration at 3,000 feet disclosed the vein as being low in grade but having continuity, favourable structure, and persistence of mineralization. More, a study of ore occurrences along this south vein system, over the extent thus far explored at Sylvanite and elsewhere in the camp, leads to the assumption that good ore possibilities exist in this part of your property below present workings.

No. 4 Shaft.—A number of branch and parallel veins were found during the year, and in several instances fairly large sections of high grade were developed. As a whole, mining operations were fully up to expectations. Broken reserves here were decreased only 16 per cent. yet 54 per cent. of the tonnage milled came from this part of the mine. Certain sections of the area still remain to be explored, and it is felt that conditions are encouraging for adding materially to known ore reserves.

COMPARISON OF WORK AT NO. 2 AND NO. 4 SHAFTS
IN RELATION TO TOTAL FOR THE YEAR

Shaft	Drifting	Crosscutting	Raising
	feet	feet	feet
No. 2.....	5,938	4,055	1,574
No. 4.....	743	146	1,455
Total.....	6,681	4,201	3,029

The extent over which mining operations were carried on was from 200 to 3,000 feet, and 86.2 per cent. of the ore treated for the year came from above 1,750 feet. At No. 2 shaft, mining was done on and between the 400- and 3,000-foot levels; and from 200 to 1,700 feet at shaft No. 4.

No sinking was done in 1932. It is now planned, however, to extend No. 2 shaft to about 3,500 feet. This will make available for intensive exploration a further and favourable block of ground about 500 feet in vertical extent.

Diamond-Drilling.—Work of this nature, amounting to 11,945 feet, greatly assisted in development and exploration carried on during the period under review.

Operating Costs

Below is shown data covering the past four years:—

	Total cost	Cost per ton		
		Ore milled	Ore broken	Total ore and waste
1930:				
Development and exploration.....	\$206,426.48	\$2.738	\$2.412	\$1.789
Mining.....	236,501.18	3.136	2.763	2.049
Milling.....	100,570.17	1.334	1.175	.872
General charges.....	50,176.06	.665	.586	.435
Administrative charges.....	19,756.45	.262	.231	.171
Total.....	\$613,430.34	\$8.135	\$7.167	\$5.316
1931:				
Development and exploration.....	\$212,792.08	\$2.563	\$2.293	\$1.793
Mining.....	267,376.14	3.220	2.882	2.253
Milling.....	106,575.54	1.283	1.149	.898
General charges.....	34,187.94	.412	.368	.288
Administrative charges.....	21,213.75	.255	.229	.179
Total.....	\$642,145.45	\$7.733	\$6.921	\$5.411
1932:				
Development and exploration.....	\$184,936.28	\$1.962	\$1.711	\$1.411
Mining.....	285,365.41	3.026	2.640	2.178
Milling.....	112,630.68	1.194	1.042	.859
General charges.....	49,478.61	.525	.458	.378
Administrative charges.....	24,594.16	.261	.227	.188
Total.....	\$657,005.14	\$6.968	\$6.078	\$5.014
1933:				
Development and exploration.....	\$227,278.95	\$2.364	\$2.194	\$1.735
Mining.....	249,907.58	2.599	2.412	1.907
Milling.....	105,168.81	1.094	1.015	.803
General charges.....	48,907.65	.509	.472	.374
Administrative charges.....	23,437.97	.244	.226	.189
Total.....	\$654,700.96	\$6.810	\$6.319	\$5.008

New Construction

Orders were placed approximately at the fiscal year-end for a new steel headframe, ore and waste bins of steel, combined skips and cages, and a larger hoist motor and suitable control. This equipment is expected to be placed in operation at No. 2 shaft not later than July, 1933. When installed, it will permit deepening the shaft to below 3,000 feet. It will also provide a substantial increase in hoisting and greater ore and waste bin capacity.

Summary

Mining and milling costs per ton treated were \$0.527 below those of last year, while development and exploration expense was \$0.402 above 1932. This resulted in total operating costs for the two years being about equal.

The past profitable basis of operation was maintained. Dividend requirements (slightly increased) were met, and a substantial amount was added to surplus. Further, the situation regarding deep-level development in the sediments, hitherto unproductive, was much improved. This tends toward additional confidence in future ore possibilities at your property.

Tashota Gold Mines, Limited

The authorized capital of this company is 4,000,000 shares of \$1 par value. The officers of the company are as follows: H. H. Vaughan, president; F. C. Shorey, vice-president; P. W. Ogden, secretary-treasurer. The directors are: Thos. Arnold, R. M. Davy, and J. Bonsall Porter, Montreal; E. R. Read and L. Soliague, Toronto.

The property held by the Tashota Gold Mines, Limited, consists of 8 claims in the Tashota area, district of Thunder Bay, and 21 claims in the Boston Creek area, McElroy township, district of Timiskaming.

The mine in the Tashota area was idle from March, 1930, to September, 1931, when work was again resumed. Some 140 feet of drifting was done up to the end of the year. Work ceased on March 5, 1932. An average of 10 men was employed during the period of operation.

A total of 1,700 feet of lateral work has been done on two levels, and about 5,000 feet of diamond-drilling from surface and underground. W. A. Coughlin was manager.

Teck-Hughes Gold Mines, Limited

Teck-Hughes Gold Mines, Limited, has an authorized capital of 5,000,000 shares of \$1 par value, of which 4,467,144 shares are issued. The officers and directors are: Albert W. Johnston, chairman of the board; D. L. H. Forbes, president; George C. Miller, vice-president; Conrad E. Wettlaufer, secretary; K. P. Emmons, treasurer; P. Nugent Tapley, assistant treasurer. The operating officials are D. L. H. Forbes, general manager; R. J. Henry, general superintendent; George Gill, mine superintendent; H. N. Read, mill superintendent, and J. G. McMillan, exploration superintendent. Some 690 men are employed at the mine in the township of Teck, district of Timiskaming.

The report of the general superintendent for the fiscal year ending August 31, 1932, is as follows:—

During this period, 475,700 tons of ore were treated. Bullion amounting to \$5,953,687.37, or \$12.52 per ton, was recovered. The value of this bullion is the equivalent of 288,009.69 fine ounces of gold. The gross revenue was \$6,824,238.98, or \$14.35 per ton. Including the sum of \$303,658.51 charged for depreciation on buildings and fixed plant, the total operating cost was \$2,663,067.05, or \$5.60 per ton. After making provision of \$437,880.62 for taxes, the surplus was \$3,723,291.31. From this surplus was paid extra federal income tax and extra Ontario corporation tax, due to a retroactive increase in rate for 1931, totalling in all \$45,296.53, and dividends amounting to \$3,122,643.60.

Following is an analysis of operating costs:—

	Total cost	Cost per ton of ore treated	Cost per ounce of gold produced
Development and exploration.....	\$593,952.22	\$1.25	\$2.062
Mining.....	1,054,386.01	2.22	3.661
Milling.....	472,489.89	.99	1.641
General expense.....	237,310.50	.50	.824
Examination of new properties.....	1,269.92004
Depreciation.....	303,658.51	.64	1.054
Total.....	\$2,663,067.05	\$5.60	\$9.246

New construction charged to capital account absorbed \$16,726.27. Most of this was spent underground on the completion of the south shaft extension hoist on the 29th level and the drill-steel sharpening shop on the 30th level.

Results from further development on levels from the 25th to the 30th permitted an addition to the ore reserves of an important tonnage of ore of higher grade than was estimated a year ago in this part of the mine. Besides the elaboration of development details above the 30th level, eight new levels below the 30th were started from No. 2 winze.

At the end of the fiscal year, south shaft extension had been sunk to a depth of 4,864 feet, and station-cutting for the 40th level had been commenced, while No. 2 winze had reached a depth of 4,611 feet.

Classified under the usual headings, the year's development work was as follows:—

	Feet
Drifting.....	10,301.8
Crosscutting.....	1,902
Raising.....	3,241
Winzing.....	1,193.5
Shaft-sinking.....	1,303.3
Total development.....	17,941.6

Diamond-drill exploration amounted to 9,371.3 feet. Ore produced from development amounted to 24,774 tons.

Milling costs were 15 cents a ton lower than for 1930-31, due, in part, to the larger tonnage milled and, in part, to an increase in general efficiency and many small improvements.

The technical estimate of "positive ore" reserve at September 1 is as follows:—

	Tons	Gross value	Average grade
Broken ore.....	335,135	\$4,032,254	\$12.03
Blocked ore.....	291,354	3,899,084	13.38
Total.....	626,489	\$7,931,338	\$12.66

The estimated average stoping grade of blocked ore, below the 30th level is \$9.68.

Toburn Gold Mines, Limited

The Toburn Gold Mines, Limited, which has a capital of 2,000,000 shares of \$1 par value, was formed as a subsidiary to the Premier Gold Mining Company, Limited, to acquire the option from the Bunker Hill Extension Mines, Limited, to purchase the Tough-Oakes Burnside mine in the township of Teck, district of Timiskaming, from the bondholders of the bankrupt Tough-Oakes Burnside Mines, Limited. The officers and directors are: H. A. Guess, president; J. C. Emison, vice-president; G. A. Brockington, secretary; R. F. Goodwin, M. P. Van Der Voort and W. J. Boland, directors. M. W. Hotchkin is superintendent of the mine in Kirkland Lake. The office in New York is at 120 Broadway, and in Toronto at 217 Bay Street, in care of W. J. Boland. The property consists of 343 acres adjoining the Sylvanite mine on the east. The average number of men employed in 1932 was 82, and 11 men were employed on construction.

The development work underground consisted of the following:—

	Feet
Raising.....	716
Drifting.....	1,176
Crosscutting.....	939
Diamond-drilling.....	2,442

The mill started on August 4, 1932, and to the end of the year milled 14,689 tons at an average value of 0.819 ounces to the ton. The production was \$203,641.93, and a premium of \$24,314.48 was received.

Triple Lake Mines, Limited

This property consists of four claims, Nos. 11,209, 11,210, 11,742 and 12,112 in McArthur township, district of Timiskaming, about 20 miles due south of South Porcupine. The property has been operated by John Spence and E. W. Ahr, of South Porcupine, during the year. The company has a capitalization of 500 shares of \$100 par value. John Spence, E. W. Ahr, and L. E. Ahr are directors.

The property can be reached by winter road from Timmins and in summer by canoe up the east branch of Mountjoy creek. It is best reached by air from South Porcupine, being only about a 15-minute flight.

The vein, upon which a small shaft has been sunk some 10 feet, outcrops on the east shore of Triple lake on claim No. 11,209 and strikes a little north of east. To the south of this along the shore some quartz stringers occur showing some mineralization. The enclosing rocks are greenstones, which are quite schistose. The rocks are little exposed on account of very heavy overburden.

During the winter of 1932 some small milling equipment was placed on the property, and in July operations were commenced, putting through about 100 tons of ore taken from the shaft and pit. A fair recovery was made considering the equipment, and plans are under way to operate on a larger scale.

In the fall, about 500 feet of diamond-drilling was done, and the vein was tapped about 100 feet below surface. It is understood that the values shown were encouraging.

Vipond Consolidated Mines, Limited

The authorized capital of this company is \$2,500,000, divided into shares of \$1 par value, of which 2,250,000 are issued.

The officers of the company are: R. Home Smith, president; John H. Black, vice-president; J. Ingram, secretary. The directors are: John H. Black, R. Home Smith, A. Dorfman, Toronto; W. H. Stafford, Almonte, Ont.; R. T. Shillington, Haileybury, Ont.; F. H. Hamilton, E. Turk, London, Eng. Robert E. Dye is manager.

The head office of the company is located at Suite 1206, Star Building, 80 King Street West, Toronto. The mine office is at Timmins.

The company owns 320 acres in mining claims and controls 889,612 shares of the 1,150,000 issued in the Inspiration property (3 claims), both this and the Vipond holdings proper lying in the southwest portion of the township of Tisdale, district of Cochrane. Together with these, the Vipond company has a three-quarter interest in the Ridgeley claims (6 in number), lying immediately east of the Coniaurum.

The following summary of company operations is taken from the report of the directors in the tenth annual report for the year ending July 31, 1932:—

The mine and mill were in continuous operation during the year and produced bullion to the value of \$478,021.52, representing a recovery of \$4.69 per ton from 102,000 tons milled. The cost of production amounted to \$593,248.06, or \$5.82 per ton milled, as against \$5.77 per ton in the previous year.

The operating loss for the year under review (before allowing for depreciation and writing off other charges) amounted to \$6,417.97. The net current assets of the company, not including the shares of Huronian Mining and Finance Company, Limited, amounted to \$827,084.91, as against \$821,404.10 in the previous year.

The following is taken from the report of the manager for the year ending July 31, 1932:—

Results of Development

Development work done during the year was directed mainly to a further search for extensions of the Porcupine Crown vein and associated bodies at and below the 1,000-foot level, and to a

vigorous investigation at the 1,450-foot level of No. 9 vein, especially in those parts below the Central system and below the southeastern nose. In addition to these items, considerable work was done in a search for extensions of the 5-8 system south of former workings from the 500-foot level down to the 733-foot level. Considerable work was done also in the older parts of the mine in making an intensive search for any deposits which might have been overlooked in the course of former work. Each of these items yielded some ore, but on the whole results of development work have been disappointing, both as regards this year's work and as regards the expanded development programme as a whole, which programme was undertaken in the fall of 1930.

While a total of 1,713 feet of drifting has been done in the Crown area at various horizons from the 1,000-foot level down to the 1,450-foot level, less than 20 per cent. of the ground opened up represents minable ore of even marginal grade. The work at the 1,450-foot level on No. 9 vein at the southeastern nose gave negative results. Drifting on the northern part of No. 9 vein in the region below the Central system exposed a section showing average values of \$3.97 over a width of 55 inches and for a length of 55 feet. A prospect stope was put through on this showing, which was found to represent a restricted lens of ore of medium grade extending from the 1,450-foot level up to about 100 feet above the 1,000-foot level.

The work done in the southern part of the 5-8 system from the 500-foot level down to the 733-foot level disclosed no lenses comparable with those previously found in the region of the shaft. Work done in the older parts of the mine has resulted in the recovery of some salvage ore and a few fragmentary parts of formerly mined veins, but has not contributed in a big way to current ore resources.

Summary of Underground Operations

During the fiscal year ended July 31, 1932, the following development work was done:—

Operation	Feet	Total cost	Cost per foot
Drifting and crosscutting	8,151.5	\$86,351.54	\$10.59
Raising	1,172	17,550.14	14.98
Diamond-drilling	25,610	32,618.14	1.27

The Mill

The mill operated continuously during the year, and the following data will indicate the results obtained:—

Tons milled.....	102,000
Average value per ton.....	\$5.13
Gross value.....	\$523,233.24
Bullion recovered.....	\$478,021.52
Average running time..... per cent.	95.42

PRODUCTION

From bullion produced during the year.....	\$478,021.52
From bullion produced during former years	6,094,584.75
Total.....	\$6,572,606.27

The above figures do not include bullion produced by the Porcupine Crown (approximately \$2,871,816) before the property was acquired by this company.

COST OF PRODUCTION

	Total cost	Cost per ton
Development	\$136,519.82	\$1.34
Ore extraction	258,537.06	2.53
Crushing, conveying, milling, and refining	111,989.35	1.10
Shipping and marketing bullion	3,507.30	.04
Administration and general expenses	58,175.93	.57
Taxes, municipal	2,847.36	.03
Insurance, including compensation	21,671.24	.21
Total.....	\$593,248.06	\$5.82

Conclusion

Ore resulting from the development work done during the past two years has fallen far short of meeting mill requirements. Formal reserves have been depleted to such an extent that the bulk of the present ore supply is coming from prospect stopes, raises, salvage operations, etc., all of which are becoming increasingly expensive.

Wright-Hargreaves Mines, Limited

The Wright-Hargreaves mine has an authorized capital of 5,500,000 shares of no par value. The officers and directors of the company are: Oliver Cabana, Jr., president; W. H. Wright, vice-president; Gerard F. Miller, treasurer; E. L. Miller, secretary and managing director; James Y. Murdoch and Oliver G. Donaldson, directors.

M. W. Summerhayes is general manager, and 780 men were employed during the year. The report of the general manager for the year is as follows:—

During this period 295,525 tons of ore, having an average grade of \$12.85 per ton, were treated in the mill, producing bullion to the value of \$3,546,902.85.

ANALYSIS OF OPERATING COSTS

	Total	Cost per ton milled
Development and exploration.....	\$455,880.65	\$1.542
Less: Excess of tons developed to tons milled.....	183,130.12	.619
Development cost.....	272,750.53	.923
Stoping.....	612,646.27	2.073
Transporting ore (hoisting, etc.).....	250,981.53	.849
Milling charges.....	321,023.85	1.086
Marketing bullion.....	18,783.68	.064
New road construction and general surface.....	29,706.69	.101
Stock transfer and registrar charges.....	4,828.11	.016
Rents, cottage operation, etc.....	1,834.60	.006
General and undistributed charges (storehouse, maintain. misc. mine buildings, administration and management, property taxes, insurance, interest and exchange, legal expenses, miscellaneous).....	172,427.49	.583
Depreciation plant and equipment.....	176,303.17	.597
Total.....	\$1,861,285.92	\$6.298

Total.....	\$238,929.64

Development

The programme of development work during the period under review has given most satisfactory results; some 493,954 tons of ore were developed, having an average grade of \$16.00 per ton. After deducting 295,525 tons milled, there were 198,429 tons added to ore reserves. Due to the higher average grade of ore developed, the average of the total present reserves has been increased to \$13.54 per ton, as against \$11.65 per ton last year. Some 16,508 feet of drifting was done. Of this, 8,019 feet, or 48.6 per cent., was on ore.

The outstanding feature of this year's developments was the continuous character of the North vein ore body on the two lowest levels, the 2,850-foot and the 3,000-foot. Approximately 1,500 feet of ore on each of these levels has been opened up with ore still to be developed at each end. The grade of ore on these two levels and on this vein is over \$20 per ton for the lengths so far opened up. Developments on the 2,400- and 2,550-foot levels were also eminently satisfactory.

As reported in our last annual report, the 2,700-foot level coincided with a roll in the vein, so that not much development has been done at this horizon. It is interesting to note that 523 feet of ore were opened up between the 400- and 1,375-foot levels. Also, 685 feet were developed between the 1,500- and 2,125-foot levels, while on the five lower levels 6,811 feet of ore were opened up; 2,329 feet on the 2,850-foot level and 1,606 feet on the 3,000-foot level.

It may be remarked that there is prospectively good virgin territory on all levels above the 3,000-foot level, which is the present lowest development level. As opportunity offers, these areas are being thoroughly explored.

Shaft-Sinking

No. 4 shaft was deepened to 3,710 feet, or 3,409 feet for the 12 months, at a cost at this date of less than \$100 per foot. This shaft will be finished early in February and put into operation this summer. No. 3 shaft was deepened to 3,889 feet, or 766 feet during the year. The sinking programme should be finished by the first week in February.

Milling

During 1932 the full benefits of the changes made in 1930 and 1931 were felt, allowing over 800 tons per day to be milled without seriously affecting the extraction; in fact, a slightly higher extraction was made. As a result of the work done in the pilot mill, it was demonstrated that a change in the flow-sheet would have material benefits. A further increase in extraction is made possible, also a great saving in floor space may be made, allowing an increase of tonnage to be planned within the present mill building. Our plans for increasing the capacity of the mill from 800 tons to 1,000 tons per day are well under way. Construction should start in the spring and will be completed in the fall.

Costs

So as to preserve more accurate and comparative operating cost figures, it has been thought advisable to defer the expenditures for sinking No. 4 shaft, and we expect to write the deferred amount off during the following four years. Inasmuch as the shaft will only be completed and put into operation this year, the first amount to write into operating costs will come at the end of this year. As in past years and for the same reasons, the difference between ore developed and ore milled is written off surplus.

Young-Davidson Mines, Limited

This company is a subsidiary of Hollinger Consolidated Gold Mines, Limited, which has an option on the property in the Matachewan area, district of Timiskaming. An account of the operations will be found on page 72 of this report.

GRAPHITE

Black Donald Graphite Company, Limited

Owing to adverse market conditions this company only operated the mine and mill intermittently during 1932, the total period of operation amounting to nine weeks.

Considerable stocks of the various grades of graphite have been accumulated, and from these 346 tons were shipped to Canadian, English, and American users.

During the period of operation 6 men were employed in the mine and 10 in the mill.

R. F. Bunting, Calabogie, is manager. R. A. Telfer, Calabogie, is secretary of the company.

GYPSUM

Canadian Gypsum Company, Limited

The Canadian Gypsum Company, Limited, has a capitalization of \$300,000, in shares of \$1 par value. The officers and directors of the company are: S. L. Avery, president; R. G. Bear, secretary-treasurer; O. M. Knode, C. F. Henning, and J. E. MacLeish, all of Chicago, directors. The head office is at 1221 Bay Street, Toronto. The head office officials are: B. S. Barns, agent and comptroller, and F. B. Gibbs, manager. Otis Wack, Windsor, N.S., is director of operations.

The company operates a gypsum mine and plant near Hagersville, in Oneida township, Haldimand county. All commercial gypsum products are produced at the plant, which includes a mill, wall board and block manufacturing buildings. During 1932 an average of 25 men was employed. W. E. Allen, Hagersville, is superintendent.

The company also operates a quarry and lime plant at Guelph, a large gypsum quarry at Windsor, N.S., a gypsum mill at Hillsborough, N.B., a gypsum calcining mill at Iona, Cape Breton, and a winter gypsum storage depot at Deep Brook, N.S.

Associated with the company is the Gypsum Packet Company, Limited, operating four 7,000-ton freight and passenger steamers between Nova Scotia and United States ports.

Gypsum, Lime and Alabastine, Canada, Limited

The Gypsum, Lime and Alabastine, Canada, Limited, operated the mines and mills at Caledonia, Seneca township, and Lythmore, Oneida township, Haldimand county, during the entire year. L. V. Robinson is general superintendent. The head office is at Paris, Ont.

At Caledonia 20,195 tons of rock were hoisted. J. D. Kerr was superintendent, employing an average of 54 men.

At Lythmore the three-entry room-and-pillar system was continued. There were mined 4,208 tons of rock. Joseph Mark was superintendent, employing an average of 28 men. The Lythmore property shut down at the end of the year.

In addition to the Caledonia and Lythmore mines, the company operates gypsum plants at Montreal, Winnipeg, Vancouver, and Calgary.

Lime plants are situated at Beachville, Elora, Hespeler, Milton, Limehouse, and Puslinch, Ont., and at St. Mark and Joliette, Que.

Quarries are operated at Mabou, N.S., Gypsumville, Man., and Salmon River, B.C. The alabastine plant is at Paris, Ont.

NICKEL AND COPPER

Falconbridge Nickel Mines, Limited

The officers and directors of this company are: Thayer Lindsley, president; Halstead Lindsley and J. Gordon Hardy, vice-presidents; N. F. Parkinson, secretary-treasurer; W. S. Morlock, director. The authorized capital is 5,000,000 shares of no par value. The head office is at 100 Adelaide Street West, Toronto.

The following information is extracted from the annual report of the company covering the year ending December 31, 1932:—

Production during the year was affected by several interruptions to operation. The principal of these consisted of delays occasioned through the necessity of relining the furnace and settler, and an 11-day period in December when the blast furnace was extended from 10 to 15 feet, along with the necessary changes and added equipment to increase the scale of production approximately 50 per cent. The smelter was operated on the increased basis very successfully for the remaining twenty days in December.

Mine Development

Combined development footages on all levels during the period under review are distributed as follows:—

Drifting and crosscutting, including slashing.....	feet	2,585
Raising.....	feet	748
Box-holes.....		44
Diamond-drilling.....	feet	603

Of the total of 2,585 feet of drifting and crosscutting recorded, 526 feet was driven west along the ore zone on the 350-foot level. This drive revealed an average ore width of 7 feet for the total distance of average mine run. On the 500-foot horizon a station was cut and a main crosscut driven 140 feet north to the ore body. Drives were then made east and west along the ore zone, the former being opened up for a distance of 134 feet in ore. The west drift was extended 924 feet. Although this drift was in ore for the total distance, the first 624 feet was for the greater part low grade over widths of from 20 to 30 feet, while the last 300 feet of the drift showed an average width of 30 feet of ore better than mine run. This ore continues in the present face. A station was opened up on the 750-foot level and connected by a main drive to the ore body. Not a great deal of work was accomplished on this level during the year; however, the ore appears to be of good grade, with an approximate width of 23 feet. No extensions were made on the 1,000-foot, or bottom, level during the period under review.

Development was preferably kept away from the east end of the mine, owing to a strong fault zone crossing the ore-bearing contact in that direction, and acting as a water-course, which we are not desirous of draining at this time. The western section responded kindly to the work done, and may be said to have replaced all the ore smelted during the year, plus some 200,000 tons more.

A two-compartment shaft was put down vertically from surface, 100 feet north of the main shaft, to connect with a series of raises from the 1,000-foot level. This shaft will be equipped for back-filling as well as a permanent mine exit.

Ore Reserves

Following is a tabulation of ore reserves computed to December 31, 1932:—

	Tons
Ore reserves as at December 31, 1931.....	2,725,382
Plus new ore added, 1932.....	314,648
Total.....	3,040,030
Less: hoisted during 1932.....	159,573
Balance.....	2,880,457
Plus disseminated ore on surface dump.....	40,000
Total ore reserves (averaging 2.25 per cent. nickel, 0.93 per cent. copper), December 31, 1932.....	2,920,457

Of this tonnage over two million lies above the present bottom of the mine (1,000 feet) and promises, say, eleven years' life at the rate of 200,000 tons per year, which is present maximum expectancy of production. The rest of the reserve tonnage lies beneath the 1,000-foot level, and was intersected by diamond-drilling.

Mining

The following table sets forth the result of mining activities during the year:—

	Tons
Balance broken ore in stopes, December 31, 1931.....	124,407
Broken during 1932	247,004
Total	371,411
Less: hoisted from stopes during 1932.....	144,090
Broken ore reserves, December 31, 1932.....	227,321

From the total ore hoisted, amounting to 159,573 tons (144,090 tons from stopes and 15,483 tons from development), 22.2 per cent, or 35,427 tons, of combined waste and disseminated ore was eliminated during the various stages of crushing. The balance of 124,146 tons was transported by the aerial tram to the smelter bins.

Smelting

The average grade of ore smelted in 1932, 2.50 per cent. nickel and 1.04 per cent. copper, is somewhat above the average of our reserves. This was determined by the exigencies of our one-unit direct-smelting plant, requiring as it does a relatively low-silica ore to function economically, and thereby necessitating hand-sorting of the ore as mined. The smelter was in operation a total of 341 days during the year. Results tabulate as follows:—

Tons of ore smelted: 123,306		Nickel	Copper
Metals recovered.....	tons	2,908 17	1,196.63
Metals per ton in ore.....	lbs.	50 17	20.91
Metals recovered per ton ore.....	lbs.	47 17	19.41
Metallurgical losses.....	lbs.	3	1.5

Construction

On September 1, 1932, authorization was granted to commence work on foundations for a 250-ton concentrator, sintering plant, smelter extension, and the necessary additions to the crushing plant and ore bins that would be required to synchronize with these units to effect increased capacity. Early in October further permission was granted to make preparations for the purchase of machinery and equipment essential to the completion of the plant during the winter months. Satisfactory progress has been made on this work, and barring unforeseen delays, the new plant will be in operation some time during the month of April.

Refinery

The refinery situated at Kristiansand, Norway, operated satisfactorily without any close-down during the year, with a somewhat increased production, which during the last months reached 9 metric tons daily. Several times during the year the production was slightly slowed down on account of lack of matte. Almost the normal amount of custom matte was received during the year.

At the end of the year, construction work was going on for increasing the capacity of the refinery by 1,000 metric tons annually.

Sales

The production of refined nickel in 1932 totalled 5,408,373 pounds. Our sales, on the other hand, aggregated 7,844,648 pounds, thereby permitting us to move the stock carried forward from 1931 and end the year with only a modest surplus. Copper was sold practically as produced, our cathodes having met with acceptance in Scandinavia particularly.

During 1932 an average of 289 men was employed, exclusive of construction work, in Ontario, of whom 96 were employed underground. In addition, an average of 137 men was engaged in construction work during the last four months of the year.

Ernest Craig is superintendent; J. R. Gill, smelter superintendent; and R. Oliver, mine engineer.

International Nickel Company of Canada, Limited

The officers of this company are: Charles Hayden, chairman of the board; Robert C. Stanley, president; John F. Thompson, vice-president; Paul D. Merica and John C. Nicholls, assistants to the president; James L. Ashley, secretary-treasurer.

The directors whose term expires in 1933 are: James L. Ashley, John F. Dulles, Wm. T. Graham, Reg. Halladay, Charles Hayden, J. W. McConnell, Britton Osler, J. A. Richardson, Robert C. Stanley, Andrew V. Stout, John F. Thompson, and the Rt. Hon. Lord Weir.

The directors whose term expires in 1934 are: John P. Bickell, Hon. H. Cockshutt, Wm. E. Cory, Wm. N. Cromwell, D. Owen Evans, Wm. J. Hutchinson, Sir Harry McGowan, Wm. W. Mein, Rt. Hon. Lord Melchett, Sir Robert L. Mond, Thomas Morrison, Seward Prosser, and Grant B. Shipley.

The executive office is at 67 Wall Street, New York City, and the general offices of the mining and smelting division are at Copper Cliff, Ont.

This company and subsidiary companies operate hydro-electric power plants at High Falls, Big Eddy, Wabageshik, and Nairn Falls, Ont.; nickel-copper mines in Sudbury district, Ont.; smelters at Copper Cliff and Coniston, Ont.; refineries at Port Colborne, Ont., Acton, England, and Clydach, Wales; rolling mills at Birmingham, England, Huntington, W.Va., and Glasgow, Scotland; a colliery at Pontardawe, Wales; and a foundry at Bayonne, N.J.

The authorized capital of this company consists of \$27,679,900 of preferred shares of \$100 and \$5 par value, and 15,000,000 shares of common stock of no par value.

The following information is extracted from the annual report of the company covering the year ending December 31, 1932:—

General

This report for 1932 marks the third year of the current world-trade depression. Your company's volume of sales diminished rapidly, and the price of copper fell to the lowest figure of all time. During the second quarter the nickel business was at its lowest rate, after which there was a slight improvement for the remainder of the year.

In order to maintain a strong financial position drastic retrenchment was effected throughout all branches of your company's activities. With the completion of major construction items, capital expenditures during 1932 were very much less than in former years and should be even less in the current year, as there is little probability of any new construction being required for some time to come.

Sales

Sales of nickel in all forms, including nickel in alloys, amounted to 34,406,953 pounds, compared with 55,739,047 pounds in 1931, a decrease of 38 per cent. The world's consumption of nickel in all forms aggregated 57,000,000 pounds compared with 73,000,000 pounds in 1931 and 88,000,000 pounds in 1930.

Copper sales, inclusive of copper sulphate produced in Wales, decreased from 96,919,677 pounds to 57,662,789 pounds, or 41 per cent.

Gold sales were 23,042 ounces, silver sales 652,638 ounces, and sales of platinum metals 19,300 ounces.

Ore Reserves

Proven ore reserves as at December 31, 1932, were 203,909,973 tons. Because of this adequate tonnage of available ore your management deemed it unnecessary to carry on other than a minimum of development work. During this period of retrenchment no exploratory work can be justified since it is known that large additional tonnages may be added to ore reserves whenever it is considered expedient to incur the necessary expense.

Outlook

Deliveries of nickel, both domestic and foreign, recorded a slight improvement beginning in the third quarter of 1932. Your company's sales policy, including technical development and

research, stood the test of depression, and the relatively satisfactory showing made in the past year may be credited to it more than to any other contributing factor.

The futility of attempting to forecast business conditions has become more and more apparent as the years of trade stagnation continue. Business is now marking time at its lowest ebb in generations. However, your company's market is world-wide and well diversified; its mines and plants are highly efficient, and metal inventories are not excessive. World industry has passed through severe storms in the past, and your company, whose financial condition is strong, should be considered well equipped to weather this particular storm.

ONTARIO OPERATIONS

Hydro-Electric and Metallurgical Plants

Hydro-Electric Plants.—Owing to general curtailment, the Wabageshik station and two units at the Big Eddy station were sufficient to supply power requirements. The High Falls station was shut down May 1, and the Nairn Falls station was idle throughout 1932.

Surplus electrical power was used for heating during the winter, and to effect this economy electric steam boilers were installed at Coniston and Garson mines.

Copper Cliff Concentrator.—Mill operations were greatly curtailed during the year, there being only 579,640 tons milled, or about 20 per cent. of capacity. Notwithstanding restricted operations definite metallurgical advances were made, and experimental work continues to be actively prosecuted.

Copper Cliff Smelter.—Three reverberatory furnaces were operated until the end of March, after which two furnaces were used for the remainder of the year. The smelter treated 336,215 tons of dry concentrates and produced 27,033 tons of bessemer matte and 27,770 tons of blister copper.

The Orford process plant was started in March, 1932, and ran intermittently throughout the year. No difficulties were experienced with any of the equipment and results indicate that with increased tonnage the lower operating costs assured in this plant will fully justify its transfer from Port Colborne to Copper Cliff. This plant treated 11,370 tons of bessemer matte and produced 6,651 tons of matte for refining at Port Colborne and 2,249 tons of blister copper.

Coniston Smelter.—This smelter was operated from January to July and has been shut down since that time. During the period of operation 90,606 tons of ore were smelted and 9,679 tons of bessemer matte produced. There was no construction at this plant during the year, but the smelter has been maintained in first-class condition.

Port Colborne Refinery.—There were two electrolytic units in operation from January 1 until August 1, when operations were suspended. The refinery produced 14,125,388 pounds of nickel in the form of electrolytic cathodes and nickel in oxide. An interesting development was the utilization of electric power for heating. Practically all power purchased was required during the winter, 2,000 k.w. being used for heating electrolytic tank solutions.

Ontario Refining Company, Limited (Associated Company).—In consequence of the reduced rate of world consumption of copper, the Ontario Refinery operated throughout the year at a greatly reduced rate, even as compared with that of 1931. Nevertheless, it was possible to hold the cost of copper refining at a level only slightly above that of 1931. Refined copper was shipped from the refinery to practically all copper-consuming countries and the ORC brand of copper is now well established throughout the world.

Your company's present 42 per cent. stock interest may be increased upon termination of the present copper purchase contract.

Mines

During 1932 there was mined a total of 666,468 tons of ore, of which the Frood mine supplied 513,590 tons; Creighton mine, 96,850 tons; and the Garson mine, 56,028 tons. This is a decrease in total tonnage of ore mined of about 58 per cent. from 1931, when 1,580,355 tons were mined.

Frood Mine.—Frood mine development to date, including shafts, drifts, crosscuts, raises, winzes, and box-holes, aggregates 137,515 feet or approximately 26 miles. During 1932, 10,337 feet of this total were accomplished. There are now 68 stopes prepared in this mine to yield 150 tons per day per stope.

No. 1 ventilating shaft was completed to the 3,100-foot, or bottom, level and has made for pronounced improvement in underground air conditions. The

average temperature underground is now 67° F., as compared with 78° F. prior to the installation of the new ventilating system. The relative humidity has also been decreased by 10 per cent. The fact that ore per man mined in stopes has increased about 36 per cent., and that there has been a decrease of approximately 60 per cent. in lost-time accidents is largely due to improved ventilation.

During the year, work was continued on the return air raise system between the 2,000-foot level and surface. The reconditioning and equipping of No. 4 shaft for high-speed hoisting were completed in July, 1932, since when all ore has been hoisted through this shaft.

Stopes were worked, principally by filled square-set methods, on the 2,400-, 2,600-, 2,800-, 2,950-, and 3,100-foot levels.

H. J. Mutz is mine superintendent; F. J. Eager and A. L. Sharp, assistant mine superintendents; and A. F. Brock, operating engineer.

Creighton and Garson Mines.—These mines were operated at minimum capacity from January 1 to August 1 and were closed for the remainder of the year. Conforming to the policy of curtailment, development work in all mines was restricted and exploratory work entirely suspended.

S. J. Kidder is mine superintendent at Creighton, and W. J. Mumford at Garson.

An average of 1,914 men was employed in the Sudbury area during 1932, distributed as follows: Creighton, 131; Frood, 797; Garson, 74; Levack, 12; Copper Cliff, 780; and Coniston, 120. Of these, an average of 702 men was employed underground.

Donald MacAskill is general manager; E. A. Collins, assistant to the general manager; and R. D. Parker, general superintendent of mines.

RADIUM

Canada Radium Mines, Limited

Canada Radium Mines, Limited, has an authorized capital of 2,500,000 shares of no par value, of which 1,381,475 are issued. The property consists of 750 acres in Cardiff township, Haliburton county. The officers and directors are Kenneth W. Wright, Toronto, president; George F. McCandless, vice-president; Frank Austin, director; E. W. Austin and Jacob Kohler, directors; Chas. G. Henderson, Toronto, secretary-treasurer. The head office is at 9 Adelaide Street East, Toronto. In 1932 and to March, 1933, when the property was closed, the following work was done: shaft-sinking, 125 feet; drifting, 200 feet; crosscutting, 50 feet.

An average of 20 men was employed during the time of operation.

SILVER

Arthur Brocklebank

The Kerr Lake mine in Coleman township, district of Timiskaming, was operated under lease by Arthur Brocklebank throughout 1932.

Shipments of ore amounted to 135.73 tons, which yielded \$53,132 in silver.

Cain and Taylor

The Beaver mine in Coleman township, district of Timiskaming, was operated throughout 1932 by the owners, C. E. Cain and W. D. Taylor.

Ore having values of \$61,430.47 in silver and \$275.66 in cobalt was shipped. An average of 13 men was employed.

Hudson Bay Mines, Limited

The Hudson Bay mine in Coleman township, district of Timiskaming, was leased to the Hudson Bay Mines, Limited, during 1932.

From 7.6 tons of ore hoisted and shipped to Deloro, values of \$3,580.07 in silver and \$47.14 in cobalt were obtained. An average of 3 men was employed.

D. L. Jemmett, Limited

The Agaunico mine in Bucke township, district of Timiskaming, is owned by the Estate of D. L. Jemmett, Limited. No development work was carried on during the year, but several men were employed in hand-picking ore from the dumps.

Values of \$7,706.73 in cobalt and nickel were obtained from 64 tons of ore shipped to Havre, France.

Laurentian Mines, Limited

The Right of Way mine, in Coleman township, district of Timiskaming, was leased to the Laurentian Mines, Limited, during the year. This company's address is 50 Albert Street, Ottawa.

Four tons of ore shipped to Deloro yielded \$2,035 in silver.

McKinley Mines Securities Company, Limited

This company leased the McKinley-Darragh-Savage mine in Coleman township, district of Timiskaming, during 1932. Ore and bullion valued at \$980.33 were shipped to the Deloro smelter.

A clean-up of the tailings dump was made by I. Mosher and yielded a value of \$393.00 in silver, which was sold to M. J. O'Brien, Limited.

Mining Corporation of Canada, Limited

The Mining Corporation of Canada, Limited, has an issued capital of \$8,300,250 in shares of \$5 par value. The officers and directors of the company are: J. P. Watson, president; E. H. Rose and G. M. Clark, vice-presidents; G. C. Ames, secretary-treasurer; A. B. Stodart, J. G. Watson, and C. E. Trafford, directors. M. F. Fairlie is managing engineer. The head office is at 350 Bay Street, Toronto.

The average number of men employed during the year was 140 at Cobalt and 125 at the Ashley in Bannockburn township.

The following is taken from the president's report to the shareholders for the year ending December 31, 1932:—

Cobalt and South Lorrain

The total production of silver in 1932 amounted to 1,177,791 ounces. Despite the high production, the profit was considerably less than in the preceding year due to the very low average price for silver and the expiry of the contract for the sale of cobalt.

Hudson Bay Mining and Smelting Company, Limited

In spite of the low prices which prevailed for metals this company operated at full capacity throughout the year at a satisfactory net profit before depreciation.

Base Metals Mining Corporation, Limited

The properties owned by this company remained closed during the year, pending an improvement in metal prices.

Quemont Mining Corporation, Limited

This company acquired an additional interest in Ashley Gold Mining Corporation, during the year, and now holds 200,000 shares of that company.

Mincor Exploration and Development Company, Limited

There is nothing new to report in connection with this company, except that certain claims, which in the opinion of your engineers are not likely to give profitable results, were dropped.

Normetal Mining Corporation, Limited

No work has been done on the properties of this company during the year.

Ashley Gold Mining Corporation, Limited

Our objectives in connection with this company, namely (1) vigorous exploration and ore development, (2) gradual increase of tonnage to the mill, (3) maintenance of profitable heads, (4) progressive reduction in costs, are being gradually attained. Full details of the operation of this company are given in the managing engineer's report.

The following is from the report of the managing engineer for the year ended December 31, 1931:—

In spite of silver prices, which averaged for the year the lowest recorded in history, production of silver at Cobalt was maintained throughout the year, and resulted in a satisfactory profit in spite of these abnormal conditions.

The smelter contract for cobalt ore, under which a large tonnage of cobalt metal was profitably marketed in the two previous years, terminated in December, 1931, and it proved impossible to find a satisfactory outlet in 1932. As a result, mining operations at Cobalt were confined to the production of silver ore, and no payment was made, as formerly, for the cobalt metal contained therein.

In the year's operations ore of profitable grade at present prices was exhausted, and mining at Cobalt was discontinued at the end of the year. Fortunately, gold production at the Ashley property of the Corporation coincided with the stoppage of silver mining.

Production figures for silver are given in the accompanying table. An increase in silver over that of the previous year will be noted; the production in 1932 being 1,177,791 ounces, as compared with 1,053,727 for 1931.

PRODUCTION OF SILVER

	Ore and concentrates produced		Silver produced	
	1931	1932	1931	1932
	tons	tons	ounces	ounces
Cobalt properties	3,691	1,161	733,425	1,155,647
South Lorrain properties	2,494	61	320,302	22,144
Total	6,185	1,222	1,053,727	1,177,791

The table below gives the production of silver by years from the mines of the corporation. The aggregate amounted to 50,196,941 ounces at December 31, 1932.

TOTAL PRODUCTION IN OUNCES FINE SILVER TO DECEMBER 31, 1932

	Cobalt mines	South Lorrain mines	Total
Prior to 1908	118,616		118,616
Year ended December 31, 1908	633,516		633,516

Total	11,013,102	6,153,833	50,196,941

Mining Operations

Cobalt. As indicated in the last annual report, the cobalt ore contract was terminated. As a result, mining operations during 1932 were confined to the extraction of silver ore at Cobalt. Low silver prices prohibited any exploration work, though normal prices may eventually justify such work in certain sections of the Cobalt Lake property.

At the beginning of the year, the bulk of the remaining silver ore was contained in old stope backs in proximity to the bottom of Cobalt lake, such ore being overlain with accumulated mill tailings. To make this ore available for extraction, an opening was blasted through from the underground workings and 400,000 tons of the overlying tailings flowed by gravity into the worked-out sections of the mine. This operation permitted the safe and easy extraction of the ore at an unusually low cost per ounce of silver. All available tonnage was completely removed by the end of the year, and the long productive record of the corporation at Cobalt came to an end.

South Lorrain. The properties of the corporation in this camp were idle throughout the year and will remain so until silver and cobalt prices justify their reopening and further exploration.

Ashley Gold Mining Corporation, Limited. During 1932, development which had been started in the previous year was continued aggressively on this property. The three-compartment inclined shaft was completed to 570 feet early in the year, and ore and waste passes put through between the three bottom levels, located at 250, 375, and 500 feet. So satisfactory were the early results from drifting on all levels that decision was made to install a mill, and the necessary equipment for a cyanide plant of 150 tons daily capacity was hauled in over 15 miles of snow roads, the only method of transportation at that time. Construction of plant began in May and was completed in August, gold production beginning in September.

Electric power was delivered to the property in March, and this permitted speeding up of development and preparation of stopes for production during the period of mill construction. A road suitable for motor traffic was constructed by the Ontario Government during the late summer, and this also has greatly facilitated operations in a hitherto almost inaccessible area.

The Ashley vein, upon which practically all development has been concentrated to date, has proven down to the 500-foot level to be a narrow high grade vein, the average gold value being approximately \$15.00 over a width of 30 inches. Of the four levels so far developed by drifting, the 4th or 500-foot level has shown the most consistent ore conditions. On the latter level, a length of 950 feet, in practically one continuous ore shoot, has been proven.

To the north, an east-west granite porphyry dike intersects the Ashley vein. Drifting has been carried only a short distance beyond this dike, with grade of ore below mill grade, but diamond-drilling has indicated commercial grade ore several hundred feet beyond the present face. To the south an east-west fault displaced the Ashley vein 85 feet to the west. The southern extension has so far shown a narrower vein than average, though of fair grade. A vein parallel to the Ashley and lying 280 feet to the west was proven by diamond-drilling, and at the date of this report has been reached by crosscutting on the 500-foot level. Though in ground much broken by minor faulting, the drift on this vein has recently shown considerably better grade than the Ashley over a 30-inch width.

An inclined winze was sunk from the 400-foot level on the Ashley vein. This winze was located 350 feet south of the shaft and reached a depth of 125 feet. Its purpose was for use in future stoping operations, but incidentally it proved normal vein conditions to continue for the full depth attained. A vertical winze was also sunk 200 feet from the 500-foot level to open up two new levels, at 625 feet and 750 feet on the inclination of the vein. Crosscuts on these two levels have shown much faulted conditions in their vicinity. This condition is considered local, and coincides in a general way with similar limited sections on the levels above.

When production began in September there was developed on the Ashley vein, above the 500-foot level, approximately one year's supply of ore for the mill, at a rate somewhat over 75 tons daily. This reserve had been increased by the end of the year, and if ore equivalent to that shown on the 500-foot level is developed on the two new levels, two years additional ore supply, at the above rate, will be made available above the 750-foot level. The new west vein will also contribute to production as development proceeds.

Actual gold production to December 31 is not indicative of normal conditions, as tonnage was low while the new plant was being tuned up. Also absorption of gold in the mill circuit has been unusually high, corresponding to that of a 150-ton mill, even though tonnage treated is at a 75-ton rate. Such gold is, of course, eventually retrieved. The head assay of ore going to the mill in October was \$15.57 per ton, in November \$15.72, and in December \$18.76.

Owing to the narrow character of the Ashley vein, special stoping methods and hand-sorting of waste are required to avoid dilution from overbreak of low-grade wall rock. Such methods involve high per ton costs which, however, are being materially reduced by raising mill tonnage. At the date of this report tonnage is being maintained at a daily rate of 110 tons, with grade approximately \$12.00 per ton. When development results justify, tonnage will be raised to the maximum capacity of the mill. Exploration in search of other veins has been limited by present development and production programme. Surface trenching is impossible owing to heavy overburden. The whole area in the vicinity of the Ashley vein remains unexplored and this will require to be done by underground crosscutting and diamond-drilling.

McGill Gold Mines, Limited.—No further work was done during the year under the option held by the corporation. A stock interest has been retained for the money expended in the previous year.

Queмонт Mining Corporation, Limited.—This property, controlled by the corporation, remained idle throughout the year.

Pascalis.—Assessment work in the form of trenching on a previously discovered vein was done. Results were inconclusive, but the claims are being held in good standing.

Base Metals Mining Corporation, Limited.—This property remained idle throughout the year, as prevailing prices of lead, zinc, and silver offered no profit. The mine and mill are in excellent condition for unusually low-cost production of these metals.

Morrison Mines, Limited

No operations were carried on during 1932 at the property in Nicol township, district of Timiskaming. Some 50 pounds of samples sent to the Timiskaming Testing Laboratories yielded 120 fine ounces of silver. Horace F. Strong, Haileybury, is manager for the company.

Nipissing Mining Company, Limited

Nipissing Mines Company, Limited, has a capital of 1,200,000 shares of \$5 par value. The directors of the company are: E. P. Earle, president and treasurer; Alexander Fasken, vice-president and secretary; Richard T. Greene, Dr. F. R. Bennetto, C. W. Nichols, Halstead Lindsley, and Hugh Park, directors. The head office is at the Excelsior Life Building, Toronto, and the New York office is at 165 Broadway.

The operating company is the Nipissing Mining Company, Limited, with a capital of 2,500 shares of \$100 par value. The officers and directors of the company are: Alexander Fasken, president and secretary; E. P. Earle, vice-president and secretary; Richard T. Greene, C. W. Nichols, Dr. F. R. Bennetto, Halstead Lindsley, and Hugh Park, directors. The operating officials are Hugh Park, general manager; E. V. Neelands, manager; and J. M. Carter, mill manager.

The holding company has in storage 2,750,000 ounces of silver.

An average of 83 men was employed from January to April, and an average of 47 from April to October.

The general manager reports as follows for the year 1932:—

Active stoping operations at the Cobalt property ended in March, by which time all known high-grade ore had been extracted from the lower levels, and the workings at the various shafts were allowed to fill. The mills and the refinery completed the clean-up by the end of April. The production during this period was 177,000 ounces, which was added to the silver held in storage. The value of the year's production shows a minus amount in the financial report, due to the difference in the prevailing prices at the end of December in each year. The inventory of 1932 was largely a carry-over from 1931, and the effect of a 6-cent decrease is reflected in the theoretical value of the production for 1932. The average official price per ounce of silver during the year was 27.892 cents, a decrease of one cent from 1931, ten cents from 1930 and twenty-five cents from 1929. The highest quotation for the year was 31 cents at the end of February, and the low record of 24 $\frac{1}{4}$ cents was established on December 29. The year closed at 24 $\frac{3}{8}$ cents, as compared with 30 $\frac{1}{4}$ cents closing in 1931.

The property at Cobalt, so far as immediate profitable operations are concerned, can be considered as finished. There remains some tonnage of unmined cobalt ore and unimportant occurrences of silver. It is highly probable that the last silver vein is still to be discovered, but until there is a material increase in the price of silver, there is no incentive or justification for undertaking further detailed exploration to discover new veins or to eliminate the few remaining possibilities.

Assessment and development work was performed during the summer on a number of groups of claims in Ontario and Quebec, without favourable results. Most of these claims were staked in 1931 or during the winter of 1932. Exploration of the group adjoining the Beattie will be done this summer.

Developments in the Michigan oil field have been favourable during recent months, following the bringing-in of a producer on one of the locations in which the company has a 51 per cent. interest. Considerable offset drilling is now being done by companies owning adjacent properties. There are indications that a new major pool has been found, which will add materially to the value of the company's interest in the immediate vicinity and in other townships along the main axis of the structure.

No active work was done on the Robb-Montbray group of claims in Quebec. Several leasing offers were declined. The Robb-Montbray Company has \$12,000 in cash and \$90,000 in Dominion of Canada bonds, the income from which is sufficient to cover current expenses and engage in moderate field work.

Underground work at the Beattie is progressing rapidly and satisfactorily. Two shafts have recently been completed, and connected, the main operating level being established at 500 feet. Assays from the shaft in the ore body and from development work at three levels are about the same grade as exposed in the 220-foot level crosscut, where 107 feet of ore assayed \$4.41. Definite and reliable averages will not be obtainable until other crosscuts have been driven. The main hoisting shaft, located outside the ore body, encountered ore of average grade at a depth of 600 feet, while sinking for a sump. At a final depth of 627 feet, the ore was exposed over the full width of the shaft. Diamond-drilling had previously indicated ore of irregular widths and assays near the top of a faulted zone at a depth of 750 feet vertically below the collar of the shaft, which is 400 feet south of the shaft in the main ore body. The fault was encountered in the south shaft at 500 feet and will cut the main ore body at a depth of about 900 feet below surface. The age relationship between the fault and the ore is not definitely known at present, but there is some evidence that the fault is post-mineral, in which case there is favourable expectation of finding additional ore at depth through future workings at the main shaft.

Construction of the 600-ton flotation unit has been completed, and it is expected that both mine and mill will be ready for operation about May 1.

M. J. O'Brien, Limited

Miller Lake O'Brien Mine

The Miller Lake O'Brien mine, Nicol township, district of Timiskaming, is owned and operated by M. J. O'Brien, Limited. J. G. Dickenson is general manager, and H. G. Kennedy is manager.

The 1932 report is as follows:—

Drifting and crosscutting.....	feet	982
Sinking.....	feet	11
Raising.....	feet	32
Ore hoisted.....	tons	19,503
Silver shipped.....	ounces	1,376,139

During the year an average of 97 men was employed.

O'Brien Mine

The O'Brien mine in Coleman township, district of Timiskaming, is owned and operated by M. J. O'Brien, Limited. J. G. Dickenson is general manager, and W. A. O'Flynn is manager. One hundred and eleven men are employed.

The development and production for the year is as follows:—

Drifting.....	feet	4,738
Raising.....	feet	629
Diamond-drilling.....	feet	3,360
Ore hoisted.....	tons	30,894
Silver shipped.....	ounces	1,657,952

Out of the total tons of ore hoisted, 1,202 tons were taken from the old mine and the remainder from Cross Lake mine. There were 4 men engaged in diamond-drilling during the year.

R. E. Perry

The Aladdin Cobalt mine, in Coleman township, district of Timiskaming, was leased to R. E. Perry.

From 833 pounds of ore shipped to Deloro, values of \$283.84 in silver and \$10.73 in cobalt were obtained.

C. W. Price

The Foster mine in Coleman township, district of Timiskaming, was leased to C. W. Price.

During the first six months of the year, ore and nuggets having a value of \$557.50 in silver were shipped to Deloro; \$171.38 in cobalt was obtained from 457 pounds of ore.

Sandoe and Moyle

The Temiskaming mine, in Coleman township, district of Timiskaming, was leased to Richard Sandoe and H. Moyle.

About 12 tons of ore shipped to the Temiskaming Testing Laboratories for treatment gave a value of \$19,273 in silver. Fifteen bars of bullion valued at \$8,007 were sold to the Deloro Smelting and Refining Company, Limited.

TALC

Canada Talc Company, Limited

The mine and mill of the Canada Talc Company, Limited, in Hastings county, were operated throughout the year. The officers of the company are: W. S. Morden, president; Roy Taylor, secretary; E. S. James, director.

The ore was mined from the 3rd and 4th levels. A total of 6,584 tons was hoisted and milled.

Roy Taylor, Madoc, is manager, employing an average of 24 men.

Geo. H. Gillespie Company, Limited

The officers of this company are: Geo. H. Gillespie, president; M. H. Ludwig, secretary-treasurer; Alexander Longwell, director.

The Henderson mine in Huntingdon township, Hastings county, was operated throughout the year. Development consisted of driving west on the 400-foot level to the end of the ore body. Some 5,813 tons of ore were hoisted and treated at the Gillespie mill.

Geo. H. Gillespie, Madoc, is manager. Five men were employed at the mine and 10 at the mill.

METALLURGICAL WORKS

Algoma Steel Corporation, Limited

The blast furnaces of the Algoma Steel Corporation, Limited, at Sault Ste. Marie, were operated as follows during the year 1932:—

Furnace	Days in operation	Product
No. 1.....	97	long tons 26,363
No. 2.....	Idle all year.
No. 3.....	Idle all year.
No. 4.....	34	11,441

Jas. H. Bell is blast furnace superintendent.

Canadian Industries, Limited

During 1932, the sulphuric acid plant of this company, located at Copper Cliff, was operated for nine months only.

During the period of operation, only one of the three 50-ton per day acid units was used. These units manufacture acid from the converter gases produced at the smelter of the International Nickel Company. The nitre cake plant was not operated in 1932.

An average of ten men was employed during 1932. G. G. Vincent is works manager.

Deloro Smelting and Refining Company, Limited

The plant at Deloro operated throughout the year. Further improvements in process efficiency and reductions in general costs were secured, but market prices of cobalt products continued to decrease and the output was curtailed. The silver output for the year amounted to approximately 4,800,000 ounces.

The officers of the company are: M. J. O'Brien, president; J. A. O'Brien, vice-president; F. A. Bapty, secretary-treasurer; S. F. Kirkpatrick, managing director. S. B. Wright is general manager, and R. A. Elliott is superintendent.

International Nickel Company of Canada, Limited

The refinery at Port Colborne was operated continuously throughout the year.

Ontario Refining Company, Limited

Operations at this plant, situated at Copper Cliff, were continued throughout the year 1932 on a reduced tonnage basis.

The various processes have already been described in previous departmental reports, but in addition to the production of the usual wire bar shapes, the company supplied a substantial quantity of vertically cast electrolytic copper cakes, billets, and phosphorized copper billets to its customers at home and abroad. These vertical shapes are made in patented water-cooled copper moulds, the company having the exclusive rights to this process in Canada.

Effective June 21, 1932, a 4-cent per pound tariff was placed on foreign copper by the United States. This barred any further shipment of the company's product there; but increased shipments to England tended to offset the loss of the American market.

Refined copper has been shipped from this refinery to practically all copper-consuming countries, and the ORC brand of copper is now well established throughout the world.

In addition to copper, the company produced gold and silver bars from its precious metals refinery. A small amount of high-grade powdered metallic selenium was sold. From its acid recovery plant reclaimed acid was returned for use in the electrolytic department, and the nickel residue turned over to the International Nickel Company.

F. Benard was appointed plant manager, in charge of all operations. An average of 310 men was employed during 1932.

Steel Company of Canada, Limited

The Steel Company of Canada, Limited, operated one furnace for 241 days, with a production of 77,801 gross tons of pig iron.

The average number of men employed was 60. R. A. Gillies is blast furnace superintendent.

The officers of the company are: Charles S. Wilcox, chairman of the board; R. H. McMaster, president; H. M. Jaquays, R. G. Wells, and H. T. Diplock, vice-presidents; H. H. Champ, vice-president and treasurer; H. S. Alexander, secretary; S. E. Le Brocq, comptroller.

MINING ACCIDENTS IN 1932

Chief Inspector of Mines, D. G. Sinclair, Toronto; Inspectors, R. H. Cleland, Timmins;
E. C. Keeley, Kirkland Lake; D. F. Cooper, Sudbury; A. R. Webster, Toronto.

Accidents during 1932

During the year 1932 at the mines, metallurgical works, quarries, and clay, sand, and gravel pits regulated by the Mining Act, there were 1,475 accidents to employees reported to the Department of Mines up to January 16, 1933. Twenty-five fatalities arising out of 23 separate accidents were recorded.

These returns represent a decrease of 374 in the total number of casualties and a decrease of 12 in the number of men killed over the preceding year.

The report shows a fatality rate of 1.69 per thousand men employed, which is 1.26 per thousand lower than the average for the past twenty-five years.

There were 98 non-fatal accidents per thousand men employed, which is a decrease of 2 per thousand from the rate of 1931.

The percentage of non-fatal accidents followed by infection increased from 5.3 per cent. in 1931 to 6.5 per cent. in 1932.

Fatal Accidents

A comparison of fatal accidents for the past five years is given in the following table:—

Distribution	1928	1929	1930	1931	1932
Mines, underground.....	31	33	30	21	17
Mines, surface.....	2	2	3	8	0
Metallurgical works.....	4	2	11	1	1
Quarries.....	2	3	4	2	1
Clay, sand, and gravel pits.....	4	8	6	4	4
Total.....	43	48	54	36	23

By months the fatal accidents occurred as follows:—

Month	No. accidents	No. men killed
January.....	1	1
February.....	1	1
March.....	4	4
April.....	3	5
May.....	2	2
June.....	2	2
July.....	2	2
August.....	2	2
September.....	1	1
October.....	1	1
November.....	2	2
December.....	2	2
Total.....	23	25

Classifying the fatalities according to industries gives the following:—

Gold mines.....	16
Nickel mines.....	2
Silver mines.....	0
Copper-lead-zinc mines.....	0
Talc mines.....	1
Metallurgical works.....	1
Quarries.....	1
Sand, gravel, and clay pits.....	4
Total.....	25

ANALYSIS OF FATALITIES AT MINES, 1928-1932

Cause	1928	1929	1930	1931	1932
	per cent.	per cent.	per cent.	per cent.	per cent.
Fall of ground.....	6.6	14.3	45.6	31	21
Run of ore or rock.....	5.3	11.9	8.6	3.5	5.3
Shaft accidents.....	9.3	14.3	8.6	17.2	15.8
Explosives.....	12	28.6	8.6	6.9	31.6
Miscellaneous, underground.....	64	28.6	20	13.8	26.3
Surface.....	2.6	2.3	8.6	27.6	0

TABLE OF FATAL ACCIDENTS IN MINES, METALLURGICAL WORKS, QUARRIES,
AND GRAVEL, SAND, AND CLAY PITS, 1908-1932

Year	Persons killed at metallurgical works and mines	Persons employed at metallurgical works and producing mines	Persons employed at non-producing mines (estimated)	Total persons employed	Fatal accidents per 1,000 employed
1908.....	47	7,435	1,750	9,185	5.11
1909.....	49	8,505	2,000	10,505	4.66
1910.....	48	10,862	2,000	12,862	3.73
1911.....	49	12,543	2,000	14,543	3.37
1912.....	43	13,108	2,000	15,108	2.84
1913.....	64	14,293	2,000	16,293	3.93
1914.....	58	14,361	1,500	15,861	3.6
1915.....	22	13,114	1,500	14,614	1.51
1916.....	51	14,624	2,000	16,624	3.07
1917.....	36	16,791	1,000	17,791	2.02
1918.....	32	14,726	500	15,226	2.1
1919.....	39	11,926	1,000	12,926	3
1920.....	29	10,486	1,000	11,486	2.61
1921.....	24	8,436	1,000	9,436	2.54
1922.....	30	9,500	1,500	11,000	2.72
1923.....	30	10,500	1,500	12,000	2.5
1924.....	40	11,000	1,500	12,500	3.2
1925.....	42	11,500	1,500	13,000	3.23
1926.....	32	11,500	1,500	13,000	2.46
1927.....	33	13,311	2,000	15,311	2.1
1928.....	85	15,787	2,000	17,787	4.76
1929.....	55	17,145	1,849	18,994	2.89
1930.....	56	18,217	317	18,534	3.02
1931.....	37	17,820	447	18,267	2.03
1932.....	25	14,378	431	14,809	1.69

The comparative fatality rate per thousand men employed at mines, metallurgical works, quarries, and clay, sand, and gravel pits is as follows:—

	Men employed	No. killed	Rate per thousand
Mines.....	11,103	19	1.71
Metallurgical works.....	1,836	1	.54
Quarries.....	1,070	1	.93
Clay, sand, and gravel pits.....	800	4	5.00
Total.....	14,809	25	1.69

The occupation and nationality of the men killed at mines, metallurgical works, quarries, and clay, sand, and gravel pits are set out in the following table:—

Occupation	British	Ukrainian	Jugo-Slav	French	Rumanian	Pole	American	Total
Driller.....	3	1			1	1		6
Drill helper.....	1		1					2
Farm labourer.....	1							1
Fireman.....	1							1
Grizzly man.....				1				1
Labourer.....							1	1
Pit foreman.....	1							1
Scaler.....	1							1
Shaftman.....	2							2
Shift boss.....	1							1
Skiptender.....	1							1
Stope boss.....	1							1
Teamster.....	1							1
Timberman.....	2							2
Train conductor.....	1							1
Trammer.....	1		1					2
Total.....	18	1	2	1	1	1	1	25

The ages of the men killed are as follows:—

17-20	21-25	26-30	31-35	36-40	41-45	46-50	Over 50	Total
1	4	5	6	6	0	2	1	25

Non-Fatal Accidents

The causes of non-fatal accidents at mines are shown in the following table:—

Cause	Surface	Under-ground	Total
Rock or ore at face, scaling, drilling, loading		222	222
Fall of persons	54	108	162
Falling objects	33	98	131
Rock or ore at chute		102	102
Tramming	2	95	97
Crushed between two objects	16	72	88
Fall of rock or ore from face, back, etc.		84	84
Flying objects, sledging, etc.	11	71	82
Hand tools	25	30	55
Drilling machines		50	50
Strain while lifting	15	35	50
Nails or splinters	5	36	41
Running into or striking against objects	5	36	41
Fall down shaft, winze, raise, or stope		31	31
Machinery	24	1	25
Explosives	1	14	15
Cage, skip, or bucket		5	5
Explosion of carbide	3	1	4
Burns	2	1	3
Electricity	3		3
Poisoning from cyanide, mercury, etc.	2		2
Unclassified	2	1	3
Total	203	1,093	1,296

The causes of non-fatal accidents at metallurgical works were:—

Falling objects	15	Transportation	1
Fall of persons	9	Strain while lifting	1
Burned by slag, matte, or scrap	7	Machinery	1
Crushed between two objects	7	Cranes, ladles, hooks	1
Hand tools	3	Nails or splinters	1
Burns	3		
Flying objects, sledging, etc.	2	Total	51

The causes of non-fatal accidents at quarries were:—

Handling material	21	Transportation	3
Fall of persons	14	Falling objects	3
Fall of rock	10	Hoists, derricks, elevators	3
Flying objects, sledging, etc.	7	Nails or splinters	1
Machinery	6	Crushed between two objects	1
Strain while lifting	5	Unclassified	1
Hand tools	3		
		Total	78

The causes of non-fatal accidents at gravel, clay, and sand pits were:—

Fall of persons	7	Crushed between two objects	3
Falling objects	7	Strain while lifting	2
Transportation	4	Hand tools	1
Machinery	3		
		Total	27

Infection

Records show that infection followed in 95 cases out of a total of 1,452 non-fatal accidents.

Location	No. of accidents	Accidents followed by infection	Per cent. infection
Mines, underground.....	1,693	76	6.9
Mines, surface.....	203	12	5.9
Metallurgical works.....	51	4	7.8
Quarries.....	78	2	2.5
Gravel, sand, and clay pits.....	27	1	3.7
Total.....	1,452	95	6.5

Accidents from Explosives

Cause	Non-fatal		Fatal		Total	
	No. of accidents	Men injured	No. of accidents	Men killed	No. of accidents	Men killed or injured
Concussion from blast.....	1	2	1	2
Delayed too long lighting fuse.....	2	2	1	2	3	4
Drilled into explosives.....	3	4	1	2	4	6
Explosion while mucking.....	1	1	1	1
Explosion while sledging.....	1	1	1	1
Premature blast.....	1	1	2	2	3	3
Returned too soon to blast.....	1	1	1	1
Struck by rock from blast.....	3	3	3	3
Total.....	13	15	4	6	17	21

Electric Accidents

The following table shows the fatal accidents due to the use of electricity at mines, metallurgical works, and quarries during the last ten years:—

1923	1924	1925	1926	1927	1928	1929	1930	1931	1932	Total
.....	1	3	2	1	6	13

The following table shows the voltage of the circuits on which the fatal accidents occurred:—

Volts	No. of accidents
110.....	3
220.....	1
550.....	6
2,200.....	3
Total.....	13

Classifying the accidents according to the industry shows the following:—

Mines, surface.....	5
Metallurgical works.....	5
Quarries.....	3
Total.....	13

Electric accidents during 1932 were reduced to 3 non-fatal. A further improvement has been made during the year in the type of disconnecting switches in service and also in the manner of operating. This has, no doubt, to a large extent removed the source of the greater percentage of accidents during the past few years.

During the year two fires originated underground in rubber-covered cables. The resultant damage was negligible in both cases, but it served as a warning against the general use of low-voltage rubber cables, not armoured, in the vicinity of timber or other inflammable material.

An effort is being made to develop a light metal armour which is not solvent in the acids of mine water, and which will not readily corrode. A light metal armour would be sufficient to prevent the spreading of fire, and would not add greatly to the cost or weight of cable. The replacement of open wiring with armoured cable would remove what is probably the greatest hazard of electric fires.

The following table shows the number of non-fatal electric burns during the last ten years.

1923	1924	1925	1926	1927	1928	1929	1930	1931	1932	Total
9	9	6	5	10	4	14	10	7	3	77

The causes of non-fatal electric burns in 1932 were:—

Arc when opening switch under load.....	1
Rupture of fuse box.....	1
Working on generator brushes while running.....	1
Total.....	3

Underground Fires

Hollinger Consolidated Gold Mines, Limited

A fire occurred in No. 11 shaft of the Hollinger mine, shortly before noon, on August 20.

The cage tender, in passing, noticed smoke in the shaft above the 300-foot level. He stopped at the 200-foot level and turned a stream of water down the manway, which extinguished the fire.

Examination of the shaft after the fire showed that a rupture had taken place in a joint on a 250-volt D.C. power cable about 30 feet above the 300-foot level. The arc from this rupture had ignited the rubber covering of 3 three-quarter-inch, 3-conductor, 110-volt, cab-tire cables on light, signal, and telephone circuits installed in the manway.

These cables were burned for a length of about 25 feet, and the lining of the shaft was blackened by smoke but showed no evidence of charring.

A small fire, which caused considerable smoke and slight inconvenience, occurred on the 1,700-foot level of the Hollinger mine shortly after 7 A.M. on December 14.

A contract mucker, going to his working place near No. 18.2 crosscut, took off his jacket and wrapping it about his lunch pail left the bundle beside the track in M-4 crosscut. In some manner, probably through contact with the flame of his carbide lamp, the jacket became ignited and about 200 feet of the workings was filled with dense smoke.

One of the workmen was so affected by the smoke that he collapsed on coming off shift, although his partner did not seem to suffer any ill effects.

International Nickel Company of Canada, Limited

About 11.30 A.M. on March 3, the stope boss in charge of No. 23 stope, 2,800-foot level, Frood mine, wishing to inspect No. 23.8 chute from the stope, lowered a carbide light into the chute from the stope floor.

When the stope crew returned to work after lunch they found smoke issuing from the chute. Water was turned into the chute and the fire extinguished.

Examination later showed charred cribbing, which had probably been set afire by contact with the flame of the carbide light.

A fire was discovered by drill repairman Leach on November 3 in the temporary battery-locomotive charging station on the 3,100-foot level of the Frood mine. Leach summoned shift-boss Shannon, who was near by, and together they returned to the scene of the fire, which they found in the charging cable about 9 feet from the disconnecting switch. They pulled the 100-ampere square D switch and also the plug from the battery receptacle and the fire immediately diminished. They extinguished it by beating it out with a piece of plank. The station was equipped with a fire extinguisher but it was not found necessary to make use of it.

Examination of the cable showed about a foot of insulation burned, and the fire probably resulted from a short circuit due to faulty insulation.

The cable, which was a No. 2 cab-tire in use on a 250-volt D.C. circuit, was in good condition when installed in May but had probably been damaged through being run over by the locomotive while in service.

Summary of Rope Tests, 1932

The following is a summary of the tests made in the Wire Rope Testing Laboratories of the Department of Mines during 1932:—

Tests for Ontario mines under Act.	263
Special informative tests for mines.	18
Tests for wire-rope manufacturers.	17
Tests for other manufacturers.	10
Tests for other Government departments.	5
Tests for mines outside Ontario.	21
Total.	334

Mine Rescue Stations

During the year mine rescue teams representing all the producing mines in the Porcupine, Kirkland Lake, and Sudbury areas received training at the mine rescue stations, or underground in mines of the respective districts.

Kirkland Lake Mine rescue station

An exhibit of mine rescue and first-aid equipment was made at the Canadian National Exhibition, which attracted considerable attention, and was the subject of much favourable comment.

CLASSES FOR PROSPECTORS, 1932-33

By E. M. Burwash

Introduction

The season just closed has developed the largest attendance on record for this work. The total registration of 1,667 for fourteen 8-day sessions, averaging 119 in each class, is 2.7 times the number in attendance last year, and 3.75 times the average for the preceding five years. The average daily attendance at the afternoon classes was 69.13 per cent. of the total registration, a very good average in this kind of work.

The outstanding feature of the season was undoubtedly the very great interest shown in Toronto, where the largest class ever held up to that time met in January. The registration was 460, but on the approach of the field season for prospecting it was found necessary in May to repeat the course, when the registration recorded reached 498. The total enrollment for the two sessions was, therefore, 958, and the average attendance was 71.2 per cent.

Conclusions already arrived at in past years are amply confirmed as to the factors on which public interest in this work depends. It is more evident than ever that the depression with its unemployment, low wages, and low prices, resulting in low mine costs and consequent prosperity of the gold industry is driving many to devote their energies to a field where the prospect of reward seems not too remote. The result cannot fail to be beneficial to the mineral interests of the province, if only by spreading intelligent views with regard to mining among a larger number of the enterprising working population. As to the types of men who now constitute the classes, one can only say that both in physique and intelligence they show improvement, since those who now find themselves without occupation are by no means confined to inferior types. And although it may be freely admitted that many of these men have not had previous experience of life and work in the forest of the north, they may well as time advances make varied and valuable contributions to the northward development of the province and the Dominion, and help to spread a knowledge of the problems and possibilities of the frontier through the more settled parts of the community.

Acknowledgments

As in previous seasons, the success of the classes has been very largely due to the able co-operation of the local officials of the Department of Mines at the different centres of mining activity, and to civic, fraternal, educational, and athletic organizations, who furnished very satisfactory accommodations, helped to secure them, or assisted in advertising. The Thunder Bay Chamber of Mines was especially active in that district. In connection with the second class held in Toronto during May, the newly organized Ontario Prospectors and Developers Association lent very effective co-operation by providing a series of guest speakers for brief addresses at the close of the afternoon sessions. Practical talks by such men as Walter E. Segsworth, J. E. Hammell, Robert Cockeram, Richard Pearce, Robert Gamble, Gilbert La Bine, Robert Jowsey, and W. H. Fairburn, could hardly be exceeded for stimulation and interest in any part of the mining world.

To all of these the writer must acknowledge his great obligations and tender his sincere thanks.

Analysis of Class Attendance

The following table will furnish more detailed information as to the work of the classes for prospectors in the various localities where they were held.

ANALYSIS OF CLASS ATTENDANCE, 1931-32

Place	Dates	Mineralogy (eight 2-hour periods)				Geology (five 1-hour periods)		Total student periods
		No. regis- tered	Student periods	Attendance		Student periods	Average attend- ance

REPORT
OF THE
INSPECTOR OF LEGAL OFFICES
ONTARIO
1932

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 5, 1933

TORONTO
Printed and Published by Herbert H. Ball, Printer to the King's Most Excellent Majesty
1933

TO THE HONOURABLE HERBERT ALEXANDER BRUCE,

*A Colonel in the Royal Army Medical Corps, etc., etc.,
Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

The undersigned begs respectfully to present to Your Honour the Annual Report of the Inspector of Legal Offices for the year ending 31st December, 1932.

WILLIAM H. PRICE,
Attorney-General.

Toronto, March, 1933.

REPORT
OF THE
Inspectors of Legal Offices
Ontario, 1932

Osgoode Hall, Toronto,
March 14th, 1933.

THE HONOURABLE HERBERT ALEXANDER BRUCE,

*A Colonel in the Royal Army Medical Corps, etc., etc.,
Lieutenant-Governor of the Province of Ontario.*

SIR,—

I have the honour to present my report as Inspector of Legal Offices for the year ending December 31st, 1932.

During the year I have visited all the counties and districts of the Province of Ontario, except one. This one, which lies at a distance, will be visited this spring.

Messrs. W. W. Ellis and H. A. Locke, Assistant Inspectors, visited one hundred and sixteen Division Court Offices in the year. This is a much smaller number than last year, but it has been found necessary to curtail somewhat these inspections, owing to lack of funds. It is expected, however, that, by careful selection of the offices to be inspected, the public will not suffer. Very few changes in these offices were made last year.

The claims entered during the year aggregated 80,007. The amount sued by these claims was \$5,172,359.42. The moneys paid out of court totalled in all \$1,617,201.78. These figures do not show the true collecting powers of the court, as a large number of suits are ordinarily settled out of court by solicitors. Of these suits we have no record. The percentages on surplus fees, payable to the Provincial Treasurer, as provided by the Act, amount to \$49,755.79, plus \$568.77 unclaimed moneys, or a total of \$50,324.56.

Mr. H. R. Polson, Assistant Inspector, has spent nearly all his time on the Police Magistrates and their courts, and during the year a number of changes have been put into effect in connection with police courts throughout the Province.

These courts handle a tremendous number of cases for infractions of The Highway Traffic Act, and a certain amount of criticism has been heard in regard to the remuneration of some magistrates by the payment of fees in lieu of salary. It has even been contended by the motoring public that in certain courts minor infractions of the Act were unduly prosecuted for the purpose of enhancing the fees of the officials of the court. In connection with this, it will be interesting for the motorists of Ontario to know that during the year 1932 the Provincial Police issued warnings to 43,356 drivers who violated The Highway Traffic Act, and in each of these cases the name of the driver, together with the record of

the warning, has been placed on file in our Provincial Police Headquarters. Nine thousand seven hundred and fifty-eight were so flagrant that it was necessary to lay an information against the offending driver.

It will be seen, therefore, that in four cases out of five the offenders were let off with a warning, and this was done primarily in view of the stress of the times and with the object of endeavouring to have offenders conform to the law by giving them a warning instead of inflicting a fine to which they would have been subject in any one of these cases. This leniency on the part of the Provincial Police is duly reflected in the lessened revenue from the police courts of the Province during the year. The fines and fees for the year 1932 are \$54,938.64 less than the previous year.

It has not been generally understood that a great number of magistrates throughout the Province are in receipt of a salary from the municipality in which their court is located, and are on the same basis in regard to remuneration as magistrates paid a salary by the Province. In order to correct this wrong impression, we are this year showing the salaries paid by municipalities to the various magistrates. It will be noted that some magistrates receive a Government salary only, some a municipal salary only, while others, where they are required to do both municipal and county work, are in receipt of salaries from both the Government and the municipality.

A reference to the statement respecting Police Magistrates contained in this report will reveal the fact that, owing to the Government's activity in this regard, only nineteen active magistrates out of one hundred and fifty are now on a fee basis. A number of these have so few cases coming before them during the year that it would be impossible to place them on a salary basis, as their total earnings are less than \$100.00 per annum.

A great effort has been made, and will continue to be made until the ultimate goal is reached of standardizing costs to defendants in cases of a similar nature; and to this end all magistrates in the Province have been advised that in no cases must the costs of any "plead guilty" or "non-hearing" case exceed \$3.00.

On page 77 will be found a sample information form which meets with the approval of the Department. When the present supply of forms is exhausted in any magistrate's office, it is suggested that the new supply be drawn up in accordance with the sample shown.

No addition to the number of Juvenile Courts in the Province of Ontario has been made during this year. This is undoubtedly due to the present financial stringency, as municipalities are loath to assume any additional financial burden at this time. In presenting the statistical report, we are repeating the figures of last year, in order to show a comparison with this year, and will continue to do this, in order to give those interested an idea of the work being carried on by the various Juvenile Courts. It is sincerely hoped that if there is an improvement in financial conditions during the year 1933, many municipalities will take advantage of their option to establish a Juvenile Court and proclaim The Juvenile Delinquency Act as in effect in their municipality.

Mr. W. A. James, the Auditor, has audited all the offices in the Province, with the exception of a few in the extreme north-western portion. These will be audited this summer. A few discrepancies have been found, but all have been made up, so that the percentages, etc., due this office for the year 1932, have now all been paid.

The revenue collected by this office for the year 1932 from the public offices under my supervision amounted to \$409,236.50, made up as follows:

	1932
Police Magistrates' Fines.....	\$90,913 90
Police Magistrates' Fees.....	37,957 60
(The above amounts represent moneys for fines and fees actually received by me and do not include fines and fees paid direct to the Inspectors under the L.C.A.)	
Local Registrars, S.C.O., County Court and District Court Clerks and Surrogate Registrars.....	114,461 86
Crown Attorneys and Clerks of the Peace.....	66,806 91
Crown Attorneys' Estreats and Fines.....	1,381 80
Sheriffs' Fees.....	23,469 37
Registrars of Deeds and Local Masters of Title.....	23,891 00
Division Court Clerks and Bailiffs.....	50,324 56
Miscellaneous.....	29 50
Total.....	\$409,236 50

The income of the offices decreased by the sum of \$90,370.99. As explained above, the Police Magistrates Courts take care of \$54,938.64 of this amount, so that the decrease from all the other offices for the year amounts to \$34,432.35.

The officials throughout the Province are maintaining a very high standard of excellence in the work they are doing. I have noticed a real desire to give service to the public and the profession in all offices I inspect. I wish to thank my Assistant Inspectors, Auditor, and staff for the way they have performed their duties throughout the year.

I attach hereto the schedules and statements with reference to the office, which should be of interest:

1. Statements—Osgoode Hall Offices (Surrogate Clerk, Administrative Branch, Appellate Division and Master's Office).
2. Financial statement of judicial offices, namely: Sheriffs, Surrogate Judges, Local Masters, S.C.O., Crown Attorneys, Clerks of the Peace, Local Registrars, County and District Court Clerks, and Surrogate Registrars.
3. Statement respecting Commuted Crown Attorneys.
4. Financial statement respecting Land Titles Offices.
5. Financial statement respecting Division Courts.
6. Financial statement respecting Registrars of Deeds.
7. Financial statement respecting Police Magistrates.
8. Statistical Report of Juvenile Courts.
9. Appointments.
10. Observations by Inspector.

All of which is respectfully submitted.

I have the honour to be, Sir,

Your obedient servant,

W. W. DENISON,

Inspector of Legal Offices.

Appointments

APPOINTMENTS

SHERIFFS

Gazette, January 30th, 1932.—Alexander Marshall Gorrie, of the City of Toronto, Esquire, to be Sheriff in and for the City of Toronto.

Gazette, June 4th, 1932.—Robert Young Angus, of North Bay, Esquire, to be Sheriff in and for the District of Nipissing.

Gazette, October 8th, 1932.—Alexander Thompson, of the Town of Fort Frances, to be Sheriff of the District of Rainy River.

SURROGATE JUDGES AND LOCAL MASTERS, S.C.O.

Gazette, January 30th, 1932.—His Honour Walter T. Robb, Judge of the County Court of the County of Dufferin, to be Judge of the Surrogate Court of the County of Dufferin.

Gazette, February 20th, 1932.—His Honour Albert Brock Currey, Judge of the District Court of the Provisional Judicial District of Manitoulin, to be Judge of the Surrogate Court of the said District of Manitoulin.

Gazette, February 20th, 1932.—His Honour George Whitaker Morley, Judge of the County Court of the County of Grey, to be Judge of the Surrogate Court of the said County of Grey.

Gazette, March 26th, 1932.—His Honour W. T. Robb, Judge of the County Court of the County of Dufferin, to be Local Master of the Supreme Court in and for the County of Dufferin.

Gazette, March 26th, 1932.—His Honour Wesley S. West, Judge of the County Court of the County of Haldimand, to be Judge of the Surrogate Court of the said County of Haldimand, on and from the 1st of March, 1932.

Gazette, May 7th, 1932.—Trevor H. Grout, of Arnprior, to be Judge of the Surrogate Court of the County of Peel on and from the 2nd day of May, 1932.

Gazette, June 18th, 1932.—His Honour George Whitaker Morley, Judge of the Surrogate Court of the County of Grey, to be Local Master of the Supreme Court in and for the County of Grey.

Gazette, December 24th, 1932.—Finley Ewart Perrin, K.C., Judge of the County Court of the County of Oxford, to be Surrogate Judge for the County of Oxford.

CROWN ATTORNEYS AND CLERKS OF THE PEACE

Gazette, September 24th, 1932.—J. C. Makins, K.C., of the City of Stratford, to be Crown Attorney and Clerk of the Peace in and for the County of Perth.

POLICE MAGISTRATES

Gazette, September 3rd, 1932.—Charles Archibald Adams, of the Village of Kemptville, in the County of Grenville, to be Police Magistrate for the County of Grenville, in the room and place of John A. Connell, deceased.

Gazette, September 3rd, 1932.—John Montgomery Bygott, of the Town of Campbellford, to be Police Magistrate for the said Town of Campbellford, with jurisdiction in the Township of Seymour, in the County of Northumberland.

Gazette, September 24th, 1932.—John Hector Davidson, of the Town of Cobourg, to be Police Magistrate *pro tem*, during the absence of Police Magistrate

Floyd, with jurisdiction in the Town of Cobourg and in the United Counties of Northumberland and Durham.

Gazette, September 24th, 1932.—Douglas Webster, of the Town of Weston, to be Deputy Police Magistrate for the County of York.

REGISTRARS OF DEEDS AND LOCAL MASTERS OF TITLES

Gazette, July 9th, 1932.—Alexander Herber Neeb, of Dashwood, to be Registrar of Deeds in and for the County of Huron.

Gazette, September 24th, 1932.—Clarence Hugh Jackson, of the City of Fort William, to be Local Master of Titles in and for the Electoral District of Fort William.

Observations Directions and Decisions

OBSERVATIONS, DIRECTIONS AND DECISIONS

LOCAL REGISTRARS, SUPREME COURT OF ONTARIO, COUNTY AND
DISTRICT COURT CLERKS, AND SURROGATE REGISTRARS
AND LOCAL MASTERS, S.C.O.

RE EMOLUMENTS OF REGISTRARS, ETC.

I have been asked as to whether or not The Judicature Act, Section 91, subsection 2, prohibits a Local Master from carrying on his practice if his gross income as Local Master exceeds \$2,000, and I have ruled that such official may not practice law, if his fees amount to more than the \$2,000 mentioned. I also ruled that if a Local Master contravened that Section, a fine of \$400 was immediately payable, and if a further contravention occurred, a further fine could be levied.

RE NOTIFICATION OF PARTIES REGARDING ORDERS OR JUDGMENTS

I have ruled that the Local Registrars should notify the parties when Orders or Judgments have not been entered, and I ruled that a duty was cast upon them to this effect.

RE VALUATIONS OF ESTATES

I have been asked as to the necessity for independent valuations of estates, and I have ruled that it is not the custom to demand such valuations. I consider that the Surrogate Court Registrar can always accept the valuation of the officials of the Succession Duty Office.

RE INSURANCE POLICIES PAYABLE TO WIFE

I have been asked again if a life insurance policy made payable to the wife can be treated as part of the estate of the deceased, and if a clause in a Will which attempts to deal with this insurance is valid. I have ruled that this life insurance does not become part of the estate of the deceased, and that the clause mentioned must be disregarded.

RE SUCCESSION DUTY BONDS

I have been asked as to the proper duty of the Surrogate Court Registrar when a bond has been cancelled, and I have ruled that such a bond should be sent back on request, and that a receipt should be endorsed, if possible, on the letter of the Succession Duty Office advising the Registrar that the bond may be cancelled.

RE MONEYS IN COURT

A circular was sent out to all Registrars in the Province advising them their duties regarding moneys in court. The circular was as follows:

To all Local Registrars,
Province of Ontario.

Please refer to Consolidated Rules of Practice, Section 735, subsections 1 and 2, which read as follows:

"(1) When money to which an infant or lunatic is entitled is paid into a Surrogate or County Court, the Registrar or Clerk of that Court shall forthwith cause the same to be transmitted to the Accountant with a statement showing when the money was so paid in, and a copy (certified by the Registrar or Clerk) of all judgments or others affecting the same, and the money shall thereupon be placed to the credit of the said infant or lunatic.

"(2) All money paid into a Surrogate or County Court and unclaimed for two years shall be transmitted by the Registrar or Clerk to the Accountant together with a statement showing when the money was paid in and a certified copy of all judgments or orders affecting the same."

RE PERSONALTY LYING OUTSIDE OF ONTARIO

I have been asked as to the proper duty cast upon the Surrogate Registrar in dealing with personal property lying outside the Province of Ontario, belonging to a person domiciled within Ontario. This question has caused a great deal of trouble in this Province for some time, and I have found that some Surrogate Court Registrars are charging a fee upon personal property of the nature of the above, where other Surrogate Registrars are not so charging. This matter has been frequently discussed, and an opinion was given some years ago that Letters Probate or Letters of Administration have operative effect on Ontario estate only. I therefore, have ruled accordingly, and sent out a circular to the Surrogate Registrars in the fall, which ran as follows:

To all Registrars of Surrogate Courts,
Province of Ontario.

"The question has frequently arisen as to whether or not a Surrogate Registrar may charge a fee upon the property of a deceased person, situate out of Ontario, where the domicile of the deceased was in Ontario.

"I have taken the matter up with the Department of the Attorney-General, and the considered opinion of that Department is that law stamps can only be charged on the value of real or personal estate situate in Ontario.

"Having in view the above opinion, in which I concur, and as Letters Probate or Letters of Administration have operative effect on the Ontario estate only, I would, therefore, rule that the Surrogate Registrar may charge a fee upon such estate, that is personalty lying within the boundaries of this Province, and *not* upon personal property lying outside."

SHERIFFS

RE FEE FOR CERTIFICATE OF EXECUTIONS

I have been asked as to what is the proper fee for a Certificate of Executions against the property of one defendant, and I have ruled that the fee is one dollar, even although there may be four Executions against this defendant. The number of names is immaterial, provided only one defendant is mentioned.

RE SHERIFF'S SEIZURE

I have ruled that if a Sheriff actually takes possession of property and makes a formal delivery over to the plaintiff, he is then entitled to a fee of twelve dollars and Bailiff's expenses. If, on the other hand, the Sheriff enters the Writ

of Possession in his office, notifies the defendant, and then notifies the plaintiff, the Sheriff is entitled to only one half the fee, plus the costs of the Bailiff.

RE SHERIFF'S RESPONSIBILITY FOR SEARCHES

I have been asked as to the responsibility of a Sheriff for Searches made in his office, particularly over the telephone, and I have ruled that a Sheriff is not responsible for such information given over the phone, particularly if he places a notice in his office advising the legal profession that he will not accept responsibility for such telephone messages, and I have suggested that the notice read somewhat as follows:

NOTICE TO THE LEGAL PROFESSION

"The Sheriffs cannot admit responsibility for the correctness of information obtained by the *profession over the telephone* as to what, if any, Executions may be in his office affecting the lands of the person named. Such responsibility can only be recognized when *later* a Certificate is *prepared and checked* as to its correctness and taken out by the Solicitor interested.

"The system of checking, adopted in the Sheriff's office, is very complete, but there is no time for such checking when the information is asked and given by telephone; therefore, the paying over of money, or transfer of consideration, should not be done before receiving the Certificate.

SHERIFF."

COUNTY AND DISTRICT CROWN ATTORNEYS AND CLERKS OF THE PEACE

RE ADMINISTRATION OF JUSTICE ACCOUNTS

I have been asked as to the correct procedure in such matters, and I have ruled as follows:

"Following the regular procedure, Administration of Justice accounts should be rendered in duplicate to the County Treasurer, who submits them to the Clerk of the Peace for presentation to the County Board of Audit on or before the first days of January, April, July, and October, after which the Clerk of the Peace certifies on each account (usually on a rubber stamp form) that the account has been passed by the Board of Audit at amount, when the Treasurer enters the account payable by the Province on a Schedule signed by himself and the County Board of Auditors, and forwards Schedule with accounts to this office, and on completion of the Government audit, a statement is sent to the County Treasurer, setting out the deductions and additions made here. The authority for the above procedure would appear to be under R.S.O., Chap. 126, Section 21, subsection 2, and Section 26. The separate certificate heretofore furnished by the Clerk of the Peace does not, in my opinion, comply with the Statutes."

RE FEES CHARGEABLE BY CLERKS OF THE PEACE FOR PREPARING
NATURALIZATION PAPERS, OUTSIDE OF REGULAR FEE

During the year complaints came into the Attorney-General and to this office regarding the fees charged by some Clerks of the Peace for drawing up Naturalization papers, and it was found that the fee varied from nothing at all up to twenty dollars. I, therefore, sent out a circular to all Clerks of the Peace, stating that if an extra fee was charged, it must not exceed five dollars. A copy of the circular is as follows:

To all Clerks of the Peace,
Province of Ontario.

"The returns received in response to my circular of the 30th ultimo show that there is a marked difference in the amount of fee charges by the Clerks of the Peace, when they are acting as solicitor for the applicant.

"It is noted that in many cases the Clerks of the Peace make no charge whatever, but treat the drawing up of the application as part of the duties of their office. In other cases fees running from \$2.00 to as high as \$20.00 have been charged. I am, therefore, instructed to advise all Clerks of the Peace that, in future, if any extra fee is charged, it should not exceed \$5.00."

POLICE MAGISTRATES

RE INFORMATIONS

I have found that the form used for informations varies a great deal throughout the Province. I am, therefore, inserting a copy of such a form which appears to me to be suitable for all occasions.

[illegible]

I have been asked as to where a fine of ten dollars for breach of The Bread Sales Act should be paid, and I ruled that all such fines were properly payable to the Provincial Treasurer, as they are recoverable under The Summary Convictions Act, and that Section 4 of The Fines and Forfeitures Act, R.S.O., Chapter 129 applies.

RE DELAYING REGISTRATION OF DOCUMENTS UNTIL
LAND TRANSFER TAX SETTLED

I have been asked as to whether or not a Registrar should delay the registration of documents until the question of the Land Transfer Tax was settled, and I have ruled that the Registrar should register the documents and collect what the Registrar thought was the proper fee, advising the solicitor that if he was overcharged a refund would be made.

I have been asked as to whether or not a Registrar should file a declaration of partnership signed by one person, on behalf of the absentees, who gives as his

authority for such signature a letter from the absentees. I ruled that Chapter 172, R.S.O., Section 1, subsection 2, applied, and I pointed out that the special authority must be filed with the Registrar.

RE BANKRUPTCY ASSIGNMENT

I have been asked as to whether a Registrar may refuse to register such an assignment because the name of the trustee was not inserted on the front page. I ruled that a Registrar should register such a document, inasmuch as the name of the trustee could not properly be filled in until after the same had been appointed.

RE INTEREST IN LAND OF PERSON FILING AGREEMENT

I have been asked to decide whether or not a person who had obtained certain rights to property under an unregistered agreement was an owner within the meaning of subsection 16, Section 80 of The Registry Act. I decided that although a plan was filed under a Dominion Act, the filing gave no interest in the land that could properly constitute the party filing the same an owner or mortgagee within the meaning of subsection 16. I also decided that such an agreement could not constitute the purchaser an owner or mortgagee within the meaning of the Section.

RE DISCHARGE OF MORTGAGE

I have been asked as to who could discharge a mortgage, and I have ruled that the only person who could do so is the legal representative, and that this does not include a devisee.

RE EXECUTION OF WILL

I have been asked as to whether or not a Will may be registered in the Registry Office, although the witnesses are both dead, and I ruled that Section 39 provided for such registration, and that if a certificate of the County Judge was procured, the Will could be registered.

RE COMPUTING LAND TRANSFER TAX WHERE CONSIDERATION IS AN ANNUITY

I have been asked as to the proper method of computing the Land Transfer Tax, and I advised that recourse should be had to the Government Annuity tables. These tables will show the present value of any annuity, and the tax can be therefore based on the present value.

RE RELEASE BY LEGATEE

I have been asked as to whether a release by a legatee of a specified parcel of land came within the provision requiring the consent of the Provincial Treasurer before registration, and I have ruled that the Section of the Act dealing with such consents only deals with a Deed, Grant, Conveyance, Mortgage, Assignment of Mortgage, Discharge of Mortgage, or other instrument purporting to convey, transfer, or assign, and that, therefore, a release by a legatee did not come within the above.

RE CONSENT BEFORE REGISTRATION OF FINAL ORDER OF FORECLOSURE

I have been asked as to whether or not a consent of the Provincial Treasurer is required before a final Order of Foreclosure could be registered, when the mortgagor is deceased, and I have ruled that the wording of subsection 3 of Section 10 of the Amendment to The Registry Act passed in 1931 does not cover

a final Order, and that the same may, therefore, be registered without the consent.

RE REGISTRATIONS OF AGREEMENTS FOR THE SALE OF FIXTURES ATTACHED TO LAND

I have been asked as to whether or not Agreements of the nature of the above should be treated as mortgages, or not, and I have ruled that such documents come under Section 34 of The Registry Act, and by Section 47, subsection 7, may be registered as mortgages "Not in full."

RE ASSIGNMENT OF BY-LAWS

I have been asked to rule whether or not an assignment of a by-law may be registered, and I have ruled that an assignment was just as important as a by-law, and, accordingly, should be registered.

RE CHARGES FOR REGISTRATION OF CONSENTS

I found that different fees were being charged for the registration of a consent under Section 7, subsection 10, of Chapter 23, 21 George V, and I accordingly sent out a circular to the Registrars, which ran as follows:

To the Registrars of Deeds,
Province of Ontario.

"Complaints have reached the Government regarding the fees for the registration of the general certificate mentioned in Section 10, subsection 7, of Chapter 23, 21 George V. In a former circular Registrars were entitled to charge certain foliage and an additional fee for lots in the same way as they are entitled to charge for a deed. It has now been decided that, in future, a flat fee of \$2.50 will be charged for the registration of this general certificate.

"There will be no charge for the registration of the old short form of consent attached to a document. This is in accordance with a circular sent out on the 3rd of November, 1931."

RE REGISTRATION OF DECLARATION OF PARTNERSHIP

I have been asked as to whether or not a company may be registered as a member of a partnership, and I advised the Registrar that he should demand the production of the Letters Patent and see if there was power in the Letters Patent to have the company become a partnership. I also ruled that until the Letters Patent were sent in, the declaration should not be registered.

MASTERS OF TITLES

RE AFFIDAVITS UNDER THE LAND TRANSFER TAX ACT

I have been asked to rule as to whether or not a Local Master should supply a true copy of an affidavit filed under this Act, and I ruled that an affidavit filed under The Land Transfer Tax Act was not a registered instrument and was filed for departmental purposes only. It was not, therefore, intended for public inspection. I ruled that such a copy need not be provided, and that, further, a copy of an affidavit need not be furnished when the Master was supplying a certified copy of the transfer itself.

Fifty-Fourth
ANNUAL REPORT
OF THE
Superintendent of Insurance
FOR THE PROVINCE OF
ONTARIO
1933
(Business of 1932)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 6, 1933

ONTARIO

TORONTO
Printed and Published by Herbert H. Ball, Printer to the King's Most Excellent Majesty
1933

DEPARTMENT OF INSURANCE

TO THE HONOURABLE W. H. PRICE, K.C., M.P.P.,
Minister in Charge of the Department of Insurance.

I have the honour to submit herewith the Fifty-fourth Annual Report of the Superintendent of Insurance for the year 1933 (business for the year ended December 31st, 1932).

The Report is arranged in five divisions, in addition to an index, including all insurers licensed to carry on business in Ontario, license numbers and classes of insurance for which authorized, as follows:

- I. Annual Statements.
- II. Annual Statement Abstracts.
- III. Movement of Securities.
- IV. Statistical Tables.
- V. Appendices.

The first division, entitled "Annual Statements," contains extracts from the Annual Statements filed with the Department by all licensed insurers arranged alphabetically by class of insurer. Insurers registered under The Canadian and British Insurance Companies Act, 1932, or The Foreign Insurance Companies Act, 1932 (Dominion Acts), have been required to file only Modified Statements summarizing their assets and liabilities and showing their underwriting experience within the Province only with the Department and this skeleton information only has been included in this report.

Division II, entitled "Annual Statement Abstracts," contains tabulated summaries showing the financial condition of all insurers not registered under the above mentioned Dominion insurance acts. In case of any discrepancy between any figures shown in this division and those shown in Division I with respect to any particular insurer, the figures included in Division I should be understood to prevail.

Division III, entitled "Movement of Securities," shows for Ontario companies (except purely mutual fire insurance corporations) the details of stocks, bonds and debentures purchased, sold or matured during 1932.

Division IV, entitled "Statistical Tables," shows in tabular form the premiums and losses of and other information pertaining to all licensed insurers, except mutual benefit societies.

Division V includes, as "Appendices," certain miscellaneous information and a review of insurance legislation enacted at the 1933 session of the Legislative Assembly of this Province.

LIFE INSURANCE

Forty-six companies were licensed at the end of 1932 to transact life insurance. This is a decrease of one during the year, the Mutual Life Insurance Company of New York having discontinued writing new business in Canada as of August 1, 1932. The premium income on Ontario business amounted to \$87,066,731, a decrease of 2.25 per cent. from 1931.

Disbursements to Ontario policyholders amounted to \$68,390,810.12, an increase of 13.4 per cent. over 1931. A comparative summary of premium income and disbursements for 1930, 1931 and 1932 is given below:

	1932	1931	1930
Net Premium Income:			
Assurances { Ordinary	\$64,880,213 06	\$66,865,792 92	\$64,522,646 01
Industrial	17,974,326 71	17,930,437 72	18,220,846 44
Group	2,308,631 05	2,261,038 57	2,237,722 19
Annuities	1,903,560 18	2,017,806 58	966,191 61
Totals	\$87,066,731 00	\$89,075,075 79	\$85,947,406 25
Disbursements to Policyholders:			
Death claims	\$17,360,516 98	\$17,737,880 69	\$17,472,489 40
Matured endowments	4,848,305 54	4,928,129 81	4,809,755 43
Surrender values	29,799,496 32	20,058,392 41	14,605,073 02
Dividends	14,880,879 10	16,199,460 94	15,691,588 83
Other payments	1,561,612 18	1,360,955 94	1,282,989 10
Totals	\$68,390,810 12	\$60,284,819 79	\$53,861,520 74

New business issued in Ontario during the year amounted to \$345,891,872, a decrease of 15.3% from 1931, during which \$408,188,421 was written. Total business in force in Ontario at the end of 1932 was \$2,737,997,914 which represents a decrease of 1.5% from the previous year. Deductions from business in force during the year consisted of \$17,830,733 ceased by death, \$5,118,276 ceased by maturity, and \$437,499,735 by other deductions consisting largely of policies terminated by surrender or lapse. Of the \$2,760,630,153 in force at the beginning of the year augmented by new business and other additions during the year 14.39 per cent had terminated by the end of the year, 0.71 per cent being terminated by death or maturity and 13.68 per cent. by reason of lapse, surrender, etc. As compared with the total amount of new business issued in Ontario during the years 1930, 1931 and 1932, viz., \$1,203,123,891, the terminations in 1932 by reason of surrender, lapse, etc., amount to 36.3 per cent. The prevention of the lapsation and surrender of policies is one of the major problems with which life insurers have been confronted during the past two or three years.

This problem was also a subject of discussion at the 1933 Conference of the Association of Superintendents of Insurance of the Provinces of Canada, at which a Special Committee to consider questions concerning lapsation of life insurance and related problems was appointed to enquire into the matter and make a report to the 1934 Conference.

FRATERNAL SOCIETIES

Thirty-seven fraternal societies held licenses as at the end of the year to transact life insurance in Ontario. This number includes eight municipal pension fund societies, which, although authorized to pay death benefits, do

not issue mortuary certificates. Twenty-three are authorized to grant sick or funeral benefits and one for accident benefits. The premium income and disbursements respecting Ontario business for 1932, according to class of fund, are as follows:

	Premiums (including dues)	Disbursements
Mortuary Fund.....	\$2,278,468 03	\$2,870,150 05
Sick and Funeral Funds.....	179,752 90	168,708 60
General Fund.....	292,126 28	360,392 85
Other Funds.....	404,173 05	252,602 91
Total.....	\$3,154,520 26	\$3,651,854 41

The amount of mortuary certificates in force at the end of 1932 was \$94,226,877, which represents a decrease of approximately five million dollars.

FIRE INSURANCE

The number of companies licensed to transact fire insurance in Ontario at the end of 1932 was 337. Premiums earned and losses incurred for the various classes of insurers defined by the Act are tabulated below, together with comparable figures for 1931. Premiums written are shown for each company in Table X of Division IV of this report.

	1931			1932		
	Net premiums earned	Net Losses incurred	Ratio net losses incurred to net premiums earned	Net premiums earned	Net losses incurred	Ratio net losses incurred to net premiums earned
	\$	\$	%	\$	\$	%

AUTOMOBILE INSURANCE

The number of companies licensed to transact automobile insurance in Ontario stood at 170 at the end of the year and their premiums and losses are shown in Table XI of this Report. Net premiums written during 1932 amounted to \$7,769,765, which is a decrease of 12 per cent. from the previous year. This decrease is no doubt largely accounted for by a reduction in the number of cars insured. Net premiums earned decreased by 10.9 per cent. Losses incurred amounted to \$3,805,268, which is a decrease of 15.1 per cent. from 1931.

	Net premiums written	Net premiums earned	Net losses incurred	Ratio of net losses incurred to net premiums earned	Ratio of net losses incurred to net premiums written
	\$	\$	\$	%	%
1926.....	3,743,532	3,657,994	2,037,903	55.7	54.4
1927.....	4,643,948	4,295,003	2,835,352	66.0	61.0
1928.....	6,280,675	5,670,656	3,603,260	63.5	57.4
1929.....	8,324,146	7,520,896	4,314,383	57.4	51.8
1930.....	9,361,901	8,934,508	4,378,698	49.0	46.8
1931.....	8,830,502	8,968,620	4,601,104	51.30	52.11
1932.....	7,769,765	8,017,672	3,805,268	47.46	48.84

Loss-Cost Experience

The automobile insurance loss-cost experience continues to be filed satisfactorily by insurers monthly with the statistical agency designated pursuant to Section 69a of *The Insurance Act* (the Canadian Automobile Underwriters' Association).

On June 22nd, 1933, the statistical agency was instructed to compile the automobile experience data of all insurers on a combined basis without any segregation as between groups of companies, i.e., to cease the practice of compiling three distinct groups of data (a) bureau, (b) non-bureau, (c) combined (a)+(b). Concerning any compilation desired by an insurer or group of insurers, instructions were given that no such compilation should be made without the approval of the Department, it being understood that such approval, if granted, must be on condition that a copy of the data so compiled would be filed simultaneously with the Department and made available at cost to all insurers. This change in the instructions regarding the compilation of the automobile loss-cost experience was made in order to prevent any insurer or group of insurers from obtaining a competitive advantage through the statutory filing of experience with the statistical agency.

On July 21st, 1933, the tabulation of the automobile insurance loss-cost experience in Ontario was directed concerning the calendar year 1932 transactions in respect of 1931 and 1932 policy years and for the first six months of calendar year 1933 transactions in respect of policy year 1932. In accordance with the instructions furnished on June 22nd, 1933 (referred to in the preceding paragraph) the experience tabulation of all insurers was directed to be combined in one group. Development factors to reduce the 1932 incomplete policy year experience (valued as of June 30th, 1933) to a complete policy year basis were approved by the Department on September 11th, 1933. On August 4th, 1933, experience covering the complete policy year 1931 of all insurers in the province was received from the statistical agency pursuant to instructions and on October 27th, 1933, the 18 months' experience of 1932 policy year of all insurers in the province was also received. On September 22nd, 1933, instructions were issued to the statistical agency to prepare and file with the Department exhibits containing automobile insurance loss-cost indications from the tabulated experience of all insurers in Ontario. These exhibits were received on October 31st, 1933, and are published in part in Appendix IX to this report.

Premium Rates

Reference was made in the 1932 Report to the formation of a special committee of eight insurers and a representative of the Canadian Automobile Under-

writers' Association to co-operate with the Department in the administration and enforcement of the rate filing provisions of the Act. On April 6th, 1933, all insurers licensed to transact automobile insurance in the province were notified by Circular Letter No. 15, that the requirement authorized to be imposed by section 273 with respect to the filing of automobile insurance premium rates and rules applicable thereto, had been formally withdrawn until further notice. A copy of Circular Letter No. 15, giving the reasons therefor is contained in Appendix VI to this report. A tabular digest of automobile insurance premium rates charged in the province by the associated insurers since April 1st, 1928, is contained in Appendix X to this report.

Standard Forms

Reference was made in the 1932 Report to the enactment of The (Automobile) Insurance Act, 1932, which was proclaimed in force on the first day of September, 1932, in the several provinces of British Columbia, Manitoba, Ontario and Nova Scotia, and made effective in the provinces of Saskatchewan, and New Brunswick, under powers conferred upon the Lieutenant-Governor in Council. Section 9 of this Uniform Act (now Section 176 of The Ontario Insurance Act) is an important provision requiring approval by the Superintendent of all forms of automobile policy proposed to be used in the province. Arising out of this legislation certain standard forms of automobile policies and endorsements relating thereto were recommended by a Committee of Underwriters and approved by the Superintendents of Insurance in the several provinces.

A committee report respecting the new Act and the new Standard Forms was presented to and considered by the 15th Annual Conference of the Association of Superintendents of Insurance of the Provinces of Canada held in Winnipeg, Manitoba, on September 6th-9th, 1932. The only substantial amendment to the Act adopted for recommendation by the Association was the insertion of the words "or owned by or in the care, custody or control of the insured" after the word "automobile" in clause (e) of Section 20 (Ontario Section 183*d*). This amendment was enacted in 1933 by the provinces of Manitoba (effective May 4th, 1933), Nova Scotia (effective May 17th, 1933), British Columbia and Ontario (effective June 1st, 1933). In the province of New Brunswick the amendment became effective on July 1st, 1933, by Order-in-Council. The "Automobile Insurance Act," including the amendment recommended at the 1932 Conference was enacted in 1933 by the provinces of Saskatchewan (effective March 27th, 1933), Alberta (effective June 1st, 1933), and Prince Edward Island (effective October 1st, 1933). At the Association Conference held in Winnipeg during September, 1932, a Standing Committee on Automobile Insurance Forms, consisting of the provinces of Ontario, Manitoba and British Columbia, was established by unanimous resolution and granted full power to act in the name of the Association between annual conferences. The province of Ontario was designated convener of this Standing Committee and the Secretary of the Association was empowered to promulgate variations, omissions or additions to the "Standard Forms" approved by the Standing Committee on behalf of all provinces from time to time. At the 16th Annual Conference of the Association held at Toronto, September 5th-7th, 1933, the convener of the Standing Committee on Automobile Insurance Forms presented a report reviewing the new Act and the new Standard Forms and it was resolved that no amendments to the Uniform Automobile Insurance Act be proposed during the ensuing year.

The Committee of Underwriters which recommended the original standard automobile insurance forms for approval by report dated June 24th, 1932, was changed in November, 1932. As the Committee consists of nine insurer members it was decided that one-third of the Committee should retire each year in order to give the various insurance offices an opportunity to participate in the work. The work of the Committee of Underwriters during the past season is referred to in "The Letter of Transmittal and Approval" over the signature of the Secretary of the Association of Superintendents of Insurance and which is printed in Appendix VIII to this Report.

The Committee of Underwriters invited to carry on the work of considering and recommending variations, omissions and additions to the Standard Forms for the 1933-1934 season is composed of the following insurer members:

Union Insurance Society of Canton Limited.
 Toronto General Insurance Company.
 Employers Liability Assurance Corporation Limited.
 American Automobile Insurance Company.
 London Guarantee and Accident Company, Limited.
 Lumbermens Mutual Casualty Company.
 Travelers Insurance Company.
 Zurich General Accident & Liability Insurance Company.
 General Accident Assurance Company of Canada.

CASUALTY AND MISCELLANEOUS INSURANCE (OTHER THAN AUTOMOBILE)

The following table shows the premiums and losses during 1932 for the various casualty and miscellaneous classes of insurance:

Class of Insurance	Net premiums written		Net premiums earned		Net losses incurred		Ratio of net losses incurred to net premiums earned
	\$	c.	\$	c.	\$	c.	%
Accident	1,231,867	80	1,284,231	22	690,549	71	53.77
Accident and Sickness combined.	939,427	87	953,926	46	608,264	87	63.76
Aviation	10,212	77	10,127	50	591	85	5.84
Bond	—1,582	46	4,475	08	16,609	53	371.16

Credit	124,190	53	128,895	70	141,842	88	110.04
Explosion	1,454	93	968	10			
Forgery	33,463	20	21,524	20	12,452	30	57.85
Guarantee	889,825	23	889,086	64	379,196	00	42.65
Hail	72,166	14	72,166	14	28,264	02	39.16
Inland Marine.	126,316	26	123,880	66	114,801	66	92.67
Inland Transportation.	483,424	85	466,746	00	110,048	15	23.58
Liability	847,613	75	796,094	87	326,999	87	41.07
Live Stock.	20,873	27	22,819	77	16,029	73	70.24
Ocean Marine.	250,778	30	255,543	42	93,365	28	36.54
Plate Glass.	240,570	34	242,015	82	87,948	16	36.34
Property	127,153	16	118,779	61	26,719	55	22.49
Sickness.	541,465	96	557,417	95	382,060	59	68.54
Steam Boiler.	195,993	70	231,924	00	9,332	81	4.02
Weather.	116,978	81	104,559	60	43,133	13	41.25
Total.	6,694,342	18	6,756,399	59	3,195,407	26	47.29

As compared with figures for 1931, net premiums written show a decrease of over \$750,000, or 10.2 per cent. The loss ratio on the basis of losses paid to premiums written was 48.62 per cent., as compared with 45.33 per cent. in 1930. On the basis of losses incurred to premiums earned, the ratio was 46.66 per cent. as compared with 47.36 per cent. for the previous year.

GUARANTEE COMPANIES APPROVED FOR COURT PURPOSES, ETC.

Since the date of the last Annual Report the guarantee bonds of the following companies have been approved by Order-in-Council for acceptance in lieu of personal or private suretyship prescribed or required by The Guarantee Companies Securities Act, or The Judicature Act, or The Public Officers Act, or any other similar Act of the Province of Ontario:

Century Insurance Company Limited.

National Surety Corporation.

Union Marine and General Insurance Company Limited.

FARMERS' MUTUAL FIRE INSURANCE

The years 1929 to 1931 constituted a difficult period in the history of purely mutual fire insurers in Ontario, the net amount paid out for fire losses by companies of this type increasing from \$1,209,342.60 in 1928 to \$2,233,922.62 in 1931. While loss-cost continued to be excessive in 1932, the total net amount of \$1,805,753.28 paid for losses by sixty-eight companies represented a decrease of nearly \$275,000 as compared to the net amount paid by the same companies in 1931. Net losses incurred in 1932 (\$1,776,830.38) showed a large decrease of \$458,443.93 as compared to the 1931 figure (\$2,235,274.31). Management cost remained practically unchanged at \$318,974.33. Unfortunately, however, these comparisons indicate, not so much that 1932 was a good year, as that 1931 was a very bad year indeed. The average cost per hundred dollars of insurance for one year which had been 19½¢ in 1920 and had risen to 36½¢ in 1930 and 48¢ in 1931, decreased to 40¢ in 1932.

To meet 1932 loss and management costs, net income from cash payments or instalments thereof, interest on investments, and other miscellaneous sources (except borrowed money and assessments) amounted to about \$1,590,000, as compared to an equivalent figure of about \$1,750,000 in 1931. Earned income was approximately \$1,735,000 in 1932 and approximately \$1,750,000 in 1931, so that total incurred loss and management cost exceeded total earned income (other than from assessments) by about \$360,000 in 1932 and by about \$807,000 in 1931; or, in terms of cents per hundred dollars of insurance in force at the year-end, by 6¢ in 1932 and 13¢ in 1931.

It was accordingly necessary for certain companies low in surplus who had heavy losses to levy assessments, about \$355,000 being levied by 11 companies in 1932 and about \$397,000 by 8 companies in 1931. To date in 1933, the members of 9 companies have been assessed. It will be noted that the total of assessments levied in 1931 was about \$410,000 less than the excess of incurred expense over earned income for that year. The companies' total surplus of assets over liabilities was therefore reduced to that extent in 1931. In 1932, total surplus held steady at about \$660,000. (This figure is a net amount, being the excess of surpluses held by 43 companies over deficits shown in the statements of 25 companies). Total net unassessed residue of premium notes

held at the end of 1932 was \$13,734,582.83. The total net amount held at risk by these 68 companies at the end of 1932, \$576,641,527, showed a decrease of \$24,194,664 as compared to the 1931 figure, this decrease being caused for the most part by reduction of policies to conform with the current shrinkage in farm values.

In view of the difficulties encountered by the companies as a whole in recent years, it is of particular interest to note that of the sixteen companies listed on page ix of the 1931 Report as authorized to write insurance at less than the minimum rates prescribed by Section 106 of The Insurance Act, fourteen remained so authorized when the 1932 Report was made, and the same fourteen companies have still maintained sufficient surpluses to retain this privilege now. These companies are as follows: Caradoc, Culross, Downie, Dunwich, Hay, Hopewell Creek, Lobo, London Township, McGillivray, Nissouri, S. Easthope, Osborne and Hibbert, Walpole, and Westminster. An outstanding feature of these companies is the fact that they operate in restricted territories only, and have average membership of only 1,213 as compared to the average of 2,718 for all companies.

One result of the assessments levied during recent years was a considerable amount of dissatisfaction among non-assessing companies parties to reinsurance agreements with assessing companies. On March 3rd, 1933, a circular letter setting forth proposed changes in existing "Instructions Respecting Reinsurance of Agricultural or Other Non-Hazardous Risks by Ontario Purely Mutual Fire Insurance Companies" and in the "Memorandum of Agreement" form respecting reinsurance which had been prescribed, was issued to all companies. On March 15th, the 1933 Convention of the Mutual Fire Underwriters' Association of Ontario after due consideration passed a resolution by an almost unanimous vote approving of the proposed changes and requesting that steps be taken to amend The Insurance Act in accordance therewith. On April 18th The Insurance Act, 1933, became effective, Section 17 thereof providing for amending Sub-section 2 of Section 113 of The Insurance Act by stating that reinsurance agreements "may provide for reinsurance on the cash plan."

Accordingly, revised "Instructions" and "Agreement" forms were distributed on April 24th to all companies. These forms are printed herewith as Appendix VI on page 411. Certified copies of all reinsurance agreements now effective among companies of this type have since been filed in the Department, and are for the most part strictly in accordance with Appendix VI. Sundry minor variations from the prescribed form were made, but no substantial changes were approved in any instance. The new agreements have not been in effect long enough as yet to produce any indication of the results of the change. So far, however, satisfaction with "reinsurance on the cash plan" appears to be general among the companies.

ANNUAL INSPECTION OF INSURERS

During 1933 the Chief Inspector and his staff have made a larger number of inspections than were made in the previous year. This increase was due to the resumption of a normal programme of inspections of farmers' mutual insurance companies which had been greatly curtailed in the years 1931 and 1932 through lack of staff and was made possible by the transfer of an assistant inspector to replace the late acting inspector, Mr. C. M. Peters. The severe

handicap under which the department has been labouring for a number of years through lack of sufficient inspection staff has prevented any marked increase in inspections of other classes of insurers and as may be expected it has again been impossible to comply fully with Section 16 of The Insurance Act. Although the work of the inspection staff has increased rapidly during recent years and the efforts of the inspectors seriously handicapped through lack of additional help, annual statements and reports of all insurers filed with the department have been audited and examined as usual with a view to providing reasonable assurance that such insurers are continuing to provide sufficient security for Ontario policyholders.

Joint inspections with inspectors of other provincial insurance departments under an arrangement through the Association of Superintendents of Insurance of the Provinces of Canada have not been made to the same extent as in former years. In all such cases, however, where inspections have been made by the province in which the Head Office of the insurer is located, copies of the reports have been forwarded to each of the provinces in which the insurer is licensed.

Early in the year, Inspector J. G. Gibbons, B.A., was transferred to assist Inspector W. A. Cork in the supervision and examination of farmers' mutual insurance companies and Inspector G. N. Sheppard, B.Comm., formerly engaged in the examination of loan and trust corporations joined Inspector H. C. Ness as an inspector of joint stock and miscellaneous classes of insurers.

ANNUAL STATEMENT BLANKS

No important changes have been made in the forms of annual statement blanks in use since my last report dated 15th December, 1932. The Standing Committee on Blanks of the Association of Superintendents of Insurance of the Provinces of Canada, however, at the last conference of the Association which was held in Toronto in September of this year recommended that form No. S-5 modified (other than life) be amended by deleting columns 2, 3 and 4 of schedule 1, columns 2 and 3 of schedule 11, and columns 2, 3, 5, 6, 8 and 9 of schedule III. Accordingly, these amendments will be effective commencing with statements of insurers for the year ending December 31, 1933.

INSURERS' PUBLISHED STATEMENTS

In my 1932 Report, I referred to certain amendments recommended to forms of annual statement prescribed by Order-in-Council dated 29th December, 1931, necessary to such forms by reason of amendments made to annual statement blanks. Recommendation was accordingly made and Order-in-Council issued under date 10th January, 1933, making slight alterations in the forms of statement and explanatory notes formerly prescribed. In addition to this, by the same Order-in-Council, a new form of annual statement was prescribed for use by cash mutual insurance companies transacting other than life insurance and incorporated and licensed by Ontario. The Order-in-Council and amendments as well as the revised forms of statements after amendment as prescribed are published in my Report as Appendix XI.

LICENSING OF INSURANCE AGENTS

During the license term ending September 30th, 1933, approximately 9,500 life insurance agents and 7,300 other than life insurance agents were licensed under the Agents' Qualification Law. These figures approximate those for the preceding license term, as published in the report for 1931.

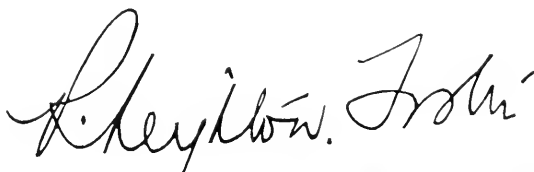

The Advisory Board, which functions under Section 256 (9) of the Act held thirty-six meetings for the purpose of considering other than life applications. Three hundred and thirty cases were heard by the Board, including applications for license and renewal of license and requests for revocation or cancellation of license. Of this number 74 licenses were granted, while 52 applications were withdrawn by the companies which had recommended the said applications and 36 were withdrawn by the applicants; 166 applications were declined by the Superintendent upon the recommendation of the Board.

The Advisory Board held only one meeting during the same period to consider cases relating to life insurance. Eight cases were considered. As pointed out in the report for the year 1932 doubtful applications and complaints respecting life insurance agents and their licenses are first referred to a Joint Committee representing the Canadian Life Insurance Officers Association, the Life Agency Officers Association and the Life Underwriters Association of Canada. This Committee reviews these applications and complaints with the parties and companies interested and in almost every case the matter is satisfactorily disposed of by it without the intervention of the statutory Advisory Board. Only in cases where a doubtful application or complaint cannot be settled "out of court," as it were, by the Joint Committee is referred to the Advisory Board.

There have been some three prosecutions during the period covered by this report, all of which have been for infractions of Section 256 (16) or Section 266 of the Act.

NEW LEGISLATION

A review of insurance legislation enacted at the 1933 Session of the Legislature is included as Appendix I to this Report.

I ANNUAL STATEMENTS

A JOINT STOCK INSURANCE COMPANIES

N.B.—The following is the note referred to at the foot of certain pages pertaining to Joint Stock, Mutual, Cash Mutual, Fraternal, Reciprocal and Miscellaneous Insurers, viz.:

The insurer is also registered pursuant to *The Canadian and British Insurance Companies Act, 1932*, or the *Foreign Insurance Companies Act, 1932*, as the case may be, and its affairs are reported upon in detail in the Annual Report of the Dominion Superintendent of Insurance. Accordingly it has been required to file only a modified statement with the Ontario Department as authorized by Regulations passed under Section 70 (2) of the Act.

Miscellaneous Statement

- I. (1) The policies in force were grouped for valuation purposes according to the year of issue, age nearest birthday and plan, and were then valued by tables of mid-year reserves by the Net Premium method.
- (a) No policies have been issued on lives resident in tropical or sub-tropical countries.
 - (b) Policies issued at a rated-up age were valued as at the rated-up age.
 - (c) The full level reserve was held on lien policies.
 - (d) No extra reserve was held where an extra premium, whether annual or single, was charged.
 - (e) Policies on lives classed as sub-standard were not issued, except as above.
 - (f) (1) For disability benefits including the waiver of premium only, and for benefits including the waiver of premium and the disability annuity without reduction in the sum assured, a reserve was held amounting to 50 % of the gross premiums paid from the date of issue of the policies.
 - (2) After the occurrence of disability for policies including the waiver of premium and annuity benefits without deduction from the sum assured, the amount of additional liability was determined as follows:
In cases where disability was presumed to be permanent the reserve held was the present value of future annuity payments and premiums waived, valued by Hunter's Disability Table with 3 % interest, as follows: 25 %, 50 %, 75 % and 100 % of this value, according as disability has been incurred within one year, two years, three years, four or more years, respectively, with modifications where disability was presumed to be temporary.
 - (g) No Annuities on sub-standard lives have been issued.
 - (h) A reserve was held equal to 50 % of the current premium charged for the Accidental Death benefit.
- (2) Items of Special Reserve:
- (a) No additional reserve was held for prepaid or limited loadings in the case of single or limited payment policies.
 - (b) Where the cash values guaranteed exceed the OM (5) 3 ½ % net value, an addition to the reserve was made, so that the amount held at the end of the premium-paying period would equal the cash guarantee.

Miscellaneous Statement—Continued

- (c) In the case of policies which had lapsed and were not continued under the Automatic Non-forfeiture provision, but were subject to reinstatement, no extra reserve was held.
- (d) No reserve was held to cover option of renewal under term policies.
- (e) No reserve was held to cover option of conversion, where one exists, to a higher premium plan.
- (f) Immediate annuities were valued by the B.O. Annuity Table with interest at 4%.
11. No modifications were made in guaranteed values for the special classes referred to above. In each case the premium, reserve and surrender values were calculated at the same age.
111. The average rate earned was 5.06%.
- IV. The distribution of surplus:
- (a) No distribution of surplus as between shareholders and policyholders has been made.
- (b) No reserve has been maintained on account of accruing profits under participating policies.
- (c) There are no Participating Annuities in force.

Miscellaneous Statement

1. (1) The calculation of the "Reserve" in the "Statement of Actuarial Liabilities" was made according to the OM (5) Table of Mortality for the bulk of the business. Certain new policies first introduced in 1930 were valued according to the AM (5) Table and the business taken over from the Equity Life issued prior to April 1, 1925, was valued according to the HM Table. Interest at 3% was used in computing the reserves on Equity business dated on or after April 1, 1925. On all other business, however, the reserve calculations were based upon 3½% interest. Advantage was taken where possible of the allowances permitted under The Ontario Insurance Act.

Deferred annuities containing cash surrender values prior to maturity and guaranteeing a payment of the premiums paid or the cash value, if greater, in case of death prior to the commencement of annuity payments, were introduced in 1932. On these contracts, the net premium, which, accumulated at 3½% interest, would equal the cash guarantees at the maturity date, were accumulated at 3½% interest to obtain the reserve. The reserve so computed was greater than the reserve on the statutory basis, but, as a small amount of business only was involved, the excess was small.

Policies issued in the same year were grouped according to plan and age nearest birthday. Mid-year reserves for the proper plan, age and duration were entered from prepared tables, the duration being $N + \frac{1}{2}$ years where N is the difference between the calendar year of issue and of valuation.

SPECIAL CLASSES—

(a) The few policies issued on lives resident in tropical or sub-tropical countries were valued on the regular basis.

(b) Policies issued at premiums corresponding to ages higher than the true ages were valued at the rated-up ages.

(c) Policies providing for payment at death during certain periods of an amount less than the full amount of insurance, being policies subject to liens, were valued as if the full amount were payable without any deduction.

(d) There are no policies in force which were issued subject to a single extra premium. For policies subject to an annual extra premium, an extra reserve was held of fifty per cent of one year's extra premium.

(e) Except as above, no policies were issued on substandard lives.

(f) In the case of policies providing for disability benefits:

(1) before occurrence of disability, the reserve held was one-half of the total gross disability premiums received from the date of issue;

(2) After occurrence of disability, the reserve held for the waiver of premium benefit and the waiver of premium, together with a disability annuity without reduction in the sum assured benefit, was the present value of the future premiums and income payments payable according to Hunter's Table of annuities on disabled lives (T.A.S.A. XI, page 44) and 3% interest. On policies under which the sum assured is being paid by instalments, the policy reserve held was the present value of the unpaid instalments according to the same table and the same rate of interest.

(g) No annuities have been issued to lives classed as under-average.

(h) Under all policies providing for additional accidental death benefits, a reserve was held equal to one-half of the extra annual premiums payable for these benefits.

Miscellaneous Statement—Continued

(2) Items of Special Reserve—

(a) No extra reserves are maintained under limited and single premium policies on account of prepaid or limited loadings.

(d) and (e) No reserve is held to cover the option of renewal or conversion under term policies.

(f) Under Equity policies providing a "guaranteed dividend" at the end of a deferred period, usually twenty years from the date of issue, provision is made for the payment of this "dividend" by valuing, as a pure endowment, the amount payable.

II. Modification of Guaranteed Values under Special Class Policies—

(b) Policies issued at premiums corresponding to ages higher than the true ages have the same cash and paid-up values as policies at the rated-up ages.

III. The average rate of interest earned during the year on the mean ledger assets was 5.74 %.

IV. The distribution of surplus—

All policies issued and in force are non-participating except for ten deferred dividend policies taken over from the Equity Life. The dividends on these will approximate to the excess of the participating premiums paid over the non-participating premiums on the same type of policy, accumulated with interest at 3½ %.

Miscellaneous Statement

- I. (1) In the calculation of the Reserve entered in the statement of Actuarial Liabilities, for policies issued before the 8th June, 1929, the OM (5) table of mortality and 4% rate of interest is used. For policies issued since the Company was formed the 8th June, 1929, the basis of reserves is the AM (5) table of mortality and 3½% rate of interest. In the case of policies on the Whole Life plan issued by the Association before the Company was incorporated the sums assured and net premiums were valued separately; all other policies were valued from prepared tables of mean reserves. All policies were grouped for valuation except those of the current year's issue.

Some of the policies being issued provide for, subject to an extra premium, double indemnity and or disability waiver of premium benefits; the income disability provision has been discontinued. All policies issued by the Association before the Company was formed in 1929 provide for payment of a sum equal to half the policy but not to exceed \$500 in certain cases of disability from accident, the policy and premiums to be correspondingly reduced. There has also been granted on these same policies a waiver of premium benefit for total and permanent disability (strictly construed) that has lasted six months or more. A reserve of \$55,000 is maintained to cover all liability under the last two items.

Special Classes:

- (a) No policies have been issued on lives resident in tropical or sub-tropical countries.
- (b) Where policies have been issued at rated up ages, the reserves are taken as of the rated age used for the premium.
- (c) Policies issued subject to lien were valued at the full amount of the insurance.
- (d) Policies are not issued with an extra premium payable in one sum. For policies issued with an annual extra premium the reserve is included in the regular reserve.
- (e) The substandard business issued all comes under the above three clauses, and practically all is on the rated age plan.
- (f) For policies with the disability benefit, waiver of premiums with or without income provision, were valued (1) before occurrence of disability by accumulation of one-half the disability premium on the policies in force; (2) thereafter—no additional reserve carried, on the basis that there is sufficient margin under Part (1) for the single small claim now in force. Provision for disability benefits issued before 8th June, 1929, is outlined above.
- (g) No annuities have been issued on under average lives.
- (h) For policies providing additional accidental death benefit a reserve equal to one-half the premium charged therefor is carried.

(2) Items of Special Reserve:

- (a) No reserve is maintained on account of loadings for limited payment, single premium or annuity policies.
- (b) There are no cases where the guaranteed benefits exceed the net premium reserve held.
- (c) No reserve is held for the excess of regular reserve over the cash surrender value for lapsed policies on business issued since 8th June, 1929. On business issued prior to that, a special reserve of \$15,000 has been set up for lapsed policies liable to reinstatement. In the monthly experience of 1932, the reinstatements arising from lapses of each of the previous months were studied, and ratios obtained, which ratios were used to get this reserve. The reserve item of \$15,000 is carried as a special reserve entered separately under liabilities and is not included in the actuarial reserve.
- (d) No extra reserve is carried to cover the option of renewal under term policies.
- (e) Nor to cover the option of conversion.
- (f) The items of special reserve have all been mentioned above.

II. Where a policy is issued at a rated up age, the guarantees contained in the contract are for the same age as was used in calculating the premium. For other special class policies the values as for the real age at issue were given. The Company does not issue automatic extended insurance.

III. The average rate of interest earned during the year was 5.16%. The method used was to add the due and accrued items of 31st December, 1932, deduct the due and accrued items of 31st December, 1931, from the cash interest income for 1932, to get the interest income on a revenue basis. The premium on coupons payable in New York funds was included in investment income.

IV. The Distribution of Surplus:

- (a) As this is a Mutual Company all dividends declared are distributed only to policy-holders.
- (b) During the early part of 1932, but later discontinued, Mortuary Dividends were paid, computed as 2% excess interest on the 4% reserve held for the last completed policy year in 1929. The profits paid on policies sharing annually were computed as follows:
 Whole Life plan all ages at issue a bonus addition of \$8.00 per M.
 Limited Payment Life plans, all ages at issue a bonus addition of \$9.00 per M.
 On Endowment plans a bonus addition ranging from \$5.00 per M at age at issue 20 to \$10.00 per M at age at issue 60.
 These bonus additions were converted to a cash basis using the AM (5) 3½% table. The first annual dividend is conditional on the second annual premium being paid.
- (c) There are no annuities issued.

SCHEDULE OF ANNUAL DIVIDENDS PAYABLE IN 1932

BASIS \$1,000 POLICIES ONE YEAR IN FORCE

Age at Issue	Whole Life	20-Pay Life	20-Year End.
20	\$1 97	\$2 22	\$3 22
25	2 21	2 48	3 48
30	2 49	2 80	3 78
35	2 82	3 18	4 09
40	3 21	3 61	4 43
45	3 65	4 10	4 86
50	4 12	4 63	5 32
55	4 60	5 18	5 86

For 1933 a schedule of dividends similar to the above, with the exception that the amounts for the Whole Life plan have been decreased by 25%, has been declared.

Miscellaneous

What class or classes of members, if any, are entitled in event of discontinuance of premium payment to benefit thereafter? All members, 60 years of age and over, may discontinue premium payments, and, on surrender of policy, apply for, and receive Paid-up Policy. On all plans of insurance paid-up policies are procurable after five years.

Under what conditions as to membership, etc., are such benefits available? Payment of Capitation Tax.

What is the nature of benefits so granted? Paid-up insurance.

Give particulars of any distribution of surplus during last three years. One monthly premium waived.

Valuation Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Net liability:	
Under Whole Life Certificates.....	\$10,629,200 00
Under Paid-up Certificates.....	1,023,600 00
Under Limited Payment Life Certificates.....	132,000 00
Under Endowment Certificates.....	236,100 00
Under Family Protection Certificates.....	7,200 00
General reserve.....	500,000 00
Investment reserves.....	1,177,300 00
Death claims under adjustment.....	139,700 00
Total.....	<u>\$13,845,100 00</u>

Assets

Value of funds and accrued interest.....	\$14,581,600 00
Liens on certificates.....	25,000 00
	<u>\$14,606,600 00</u>

The ratio of assets to liabilities was 105.50 per cent.

The valuation basis was the AM (5) Table of Mortality with interest at $3\frac{1}{2}$ per cent. per annum.

The amount of Whole Life insurance was \$36,515,200; of Paid-up insurance, \$1,371,270; of Endowment at Age 65, \$2,956,500; of Twenty Year Endowment, \$394,500; of Twenty-Pay Life, \$1,351,000; of Pay to Age 65 Life, \$253,000; of Family Protection, \$126,000.

SICK AND FUNERAL BENEFIT DEPARTMENT

Fund No. 1

Liabilities.....	\$580,200 00
Securities with accrued interest.....	580,200 00
The liability under any certificate may be terminated at any time on notice from the Head Office (Constitution 93).	

Fund No. 2

This Department was opened during 1929. The rates charged are those of the Manchester Unity Whole Society at $3\frac{1}{2}$ per cent. interest.

The funds amounted to \$2,900 on the 31st of December, 1932.

The valuation was made by M. A. Mackenzie, M.A., Fellow of the Institute of Actuaries of Great Britain.

D. W. Donaldson, Principal Officer, Calvin Davis, Im. Past Grand Master; George Sellor, Deputy Grand Master; Jas. Mellor and David T. Cooper, Grand Representatives; Robert Fleming, Secretary; W. H. Shaw, Treasurer.

Auditors.—W. L. Young and W. R. Day.

Actuary.—Sidney H. Pipe.

GOVERNING EXECUTIVE AUTHORITY

(as at date of filing statement)

Grand Master D. W. Donaldson, Toronto, Ont.; Im. Past Grand Master, Calvin Davis, Hamilton, Ont.; Deputy Grand Master, George Sellor, Montreal, Que.; Grand Secretary, Robert Fleming, Toronto, Ont.; Grand Treasurer, W. H. Shaw, Toronto, Ont.; Grand Representatives Jas. Mellor, Brantford, Ont.; David T. Cooper, Hamilton, Ont.

Summary of Funds

Balance of Funds—December 31, 1932:		
Mortuary Fund (including Building, Revenue and Contingent Accounts).....	\$366,956 68	
Sickness Fund.....	4,942 06	
Guarantee Fund.....	500 00	
Child Insurance Fund.....	227 90	
		\$372,626 64
Add Non-Ledger Assets.....		11,730 58
		\$384,357 22
Deduct due and accrued Liabilities (except Reserve).....	\$5,825 00	
Deduct unadmitted Assets.....	1,648 35	
		7,473 35
		\$376,883 87
† Reserve as per Actuary's Report.....		\$327,051 00
† Balance—Surplus of Assets over all Liabilities and Reserve.....		\$49,832 87

Statement for the Year Ending 31st December, 1932

Assets

Ledger Assets

Book value of real estate, office premises (less encumbrances).....	\$19,000 00
Mortgage loans on real estate, first mortgages.....	31,330 00
Loans and liens on policies.....	\$17,140 09
Book value of bonds, debentures and debenture stocks:	
Not in default.....	\$292,087 46
In default.....	12,155 39
	304,242 85
Cash on hand and in banks:	
On hand at Head Office.....	\$567 68
In chartered banks of Canada in Canada.....	53 82
	621 50
Amounts owing by lodges.....	292 29
Total Ledger Assets.....	\$372,626 64

Non-Ledger Assets

Interest due and accrued.....	\$9,533 08
Collections reported, but not received by Head Office.....	2,197 50
Total Non-Ledger Assets.....	\$11,730 58
Total Assets.....	\$384,357 22
Deduct Assets not admitted:	
Deficiency of market under book value of bonds and debentures in default....	\$1,648 35

Miscellaneous

What class or classes of members, if any, are entitled in event of discontinuance of premium payment to benefit thereafter? Paid-up policies.

Under what conditions as to membership, etc., are such benefits available? Death.

What is the nature of benefits so granted? Face value of policy.

Give particulars of any distribution of surplus during last three years. None.

Valuation Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Reserve.....	\$327,051 00
Claims Unpaid.....	5,825 00
	<u>\$332,876 00</u>

Assets

Admitted Assets.....	\$360,353 41
----------------------	--------------

The ratio of assets to liabilities was 108.3 %.

The valuation basis was the Fraternal American Table with interest at 4 per cent. per annum.

The total amount of insurance was \$1,169,364.

No valuation was made of the Sickness department.

The valuation was made by Sidney H. Pipe, Fellow of the Actuarial Society of America.

Surrender.....	10	4,750 00	472 50	10	5,222 50
Lapse.....	2	750 00	Nil	2	750 00
Total ceased.....	20	\$8,650 00	\$759 00	20	\$9,409 00
At end of 1932.....	1,349	\$578,150 00	\$43,744 00	1,349	\$621,894 00

Miscellaneous

What class or classes of members, if any, are entitled in event of discontinuance of premium payment to benefit thereafter? Those who have retired from the Civil Service.

Under what conditions as to membership, etc., are such benefits available? All such members may benefit.

What is the nature of benefits so granted? Cash Surrender value or equivalent paid-up policy.

Give particulars of any distribution of surplus during last three years—Revisionary bonus addition of 1 per cent. per annum.

Valuation Summary, December, 31st, 1932

Attained Ages	Amount of Benefits	Value of Benefits	Monthly Rates Valued	Value of Monthly Rates	Net Liability	Amount of Bonus Additions	Net Liability for Bonus

Miscellaneous

What class or classes of members, if any, are entitled in event of discontinuance of premium payment to benefit thereafter? Active members.

Under what conditions as to membership, etc., are such benefits available? Five years' full membership.

What is the nature of benefits so granted? Paid-up insurance.

Give particulars of any distribution of surplus during last three years: Bonus of 2 per cent. of insurance given to all Active Members, June 23rd, 1925, who were in good standing, June 23rd, 1923. Additional bonuses given 1927, 1929, 1931 to all members in good standing, January 1st, 1925, 1927 and 1929, respectively.

Valuation Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Net reserve re policies and bonuses.....	\$1,159,664 00
Accrued liabilities (death claims).....	8,374 00
Total.....	<u>\$1,168,038 00</u>

Assets

Total Ledger Assets.....	\$1,394,160 00
Non-Ledger Assets.....	29,559 00
Total.....	<u>\$1,423,719 00</u>

The ratio of assets to liabilities is 122 per cent. The valuation basis was the British Office Males Experience (OM) with interest at 4 per cent.

The amount of insurance valued was \$3,929,654, with Bonus Additions of \$189,200.

SICKNESS DEPARTMENT

Liabilities

Net Reserve.....	<u>\$67,103 00</u>
------------------	--------------------

Assets

Ledger Assets.....	\$30,748 00
Non-Ledger Assets.....	522 00
Present value of future premiums.....	36,480 00
	<u>\$67,750 00</u>

The valuation for sickness contracts was the Manchester Unity of Oddfellows with suitable modifications, combined with the mortality table deduced from the same experience. The rate of interest employed was $3\frac{1}{2}$ per cent. The number of certificates valued was 357.

The valuation was made by L. K. File, Fellow of the Institute of Actuaries of Great Britain.

JUVENILE DEPARTMENT

Liabilities

Net Reserve.....	<u>\$657 00</u>
------------------	-----------------

Assets

Ledger Assets.....	\$990 00
Non-Ledger Assets.....	23 00
	<u>\$1,013 00</u>

The net reserve was arrived at by accumulating the gross premiums (excluding those paid in the year of issue), to the end of 1932 with interest compounded at the rate of 4 per cent. per annum.

Miscellaneous

What class or classes of members, if any, are entitled in event of discontinuance of premium payment to benefit thereafter? All classes of members admitted since January, 1924, and previous members with 20 years of membership.

Under what conditions as to membership, etc., are such benefits available? After four, five or six years of membership according to the nature of the policy.

What is the nature of benefits so granted? Paid-up values in all classes with cash surrender values in the Twenty-Year Endowment class.

Give particulars of any distribution of surplus during last three years. In 1929 and 1931 one assessment to the Mortuary Fund was remitted to the entire membership.

Valuation of Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Present value of benefits.....	\$6,943,100 00
Claims payable by instalments.....	4,921 99
Computed value of disability claims.....	3,488 00
Other liabilities.....	7,600 00
	<u>\$6,959,109 99</u>

Assets

Funds applicable to benefits.....	\$3,814,768 58
Present value of future contributions.....	3,381,536 00
Sickness benefits already paid upon certificates in force.....	127,384 35
	<u>\$7,323,688 93</u>

The ratio of assets to liabilities was 105 per cent.

Rate of interest earned by society in 1932 was 4.04 per cent.

The valuation basis was N.F.C. Table, at 4 per cent. interest.

SICKNESS DEPARTMENT

Liabilities

Present value of benefits.....	\$1,334,707 00
--------------------------------	----------------

Assets

Funds applicable to benefits.....	\$254,055 43
Present value of contributions.....	962,031 00
	<u>\$1,216,086 43</u>

Degree of solvency, 91.1 per cent.

The Actuary in his valuation report on the Sickness Fund states in part as follows:

"The deficiency is \$3,500 less than at December 31st, 1931. As this report is for valuation purposes only no proposals for overcoming the deficiency are suggested. The experience of four years past has been favourable and indicates that should the experience continue on the same basis, future valuations may be made on the lower rates sickness experienced. The Actuary's opinion is that the fund is improving rapidly and will shortly become fully solvent.

INFANTILE FUND

Liabilities

Reserve.....	<u>\$8,003 00</u>
--------------	-------------------

Assets

Funds applicable to benefits.....	<u>\$15,713 83</u>
-----------------------------------	--------------------

The valuations were made by J. B. Mabon, Fellow of the Institute of Actuaries of Great Britain, and Fellow of the Actuarial Society of America.

V

APPENDICES

APPENDIX I

REVIEW OF 1933 LEGISLATION, ONTARIO

During the 1933 Session of the Legislature certain amendments were effected to *The Insurance Act*, R.S.O. 1927, Chapter 222, by an amendatory Act cited *The Insurance Act, 1933* (1933, c. 22). This Act except Section 15 came into force on the date of Royal Assent, viz., April 18th, 1933. Section 15 came into force on the first day of June, 1933, pursuant to the proclamation of the Lieutenant-Governor of the Province of Ontario dated May 16th, 1933.

The following is a synopsis of the amendments so effected:

Licensing, deposits, etc.:

Sections 2 to 8 inclusive effect minor amendments to the licensing and deposit provisions of the Act chiefly to eliminate reference to licenses issued under the Insurance Acts of Canada.

Section 16 (1) of the Act is amended by striking out the words "insurer incorporated and licensed by the Dominion of Canada" and inserting in lieu thereof the words "an insurer as to which he adopts the inspection of some other government."

Section 25 (5) is amended by striking out the words "except in the case of an insurer licensed by the Dominion of Canada" at the commencement thereof and by adding at the end thereof the words "unless it maintains separate and distinct accounts, funds, and securities in respect of its business of life insurance, and those funds and securities are available only for the protection of the holders of its policies of life insurance and are not liable for the payment of claims arising from any other class of insurance which the insurer undertakes, and the insurer complies with such other requirements as the Superintendent may impose for the purposes of this provision."

Section 25 (6) is amended by striking out the words "except in the case of an insurer incorporated and licensed by the Dominion of Canada" at the commencement thereof and by adding at the end thereof the words "but the Superintendent may accept as sufficient the fact that such an insurer is licensed by any other government in Canada."

Section 34 (3) is amended by striking out all the words after the word "insurer" in the seventh line.

Section 34 (4) is amended by inserting after the word "Gazette" in the second line the words "and elsewhere as the Minister may direct."

Section 34 (6) is repealed and a new subsection substituted therefor authorizing the Superintendent to suspend or cancel the license of any insurer whose license has been suspended or cancelled by any government in Canada.

Section 37 (2) is amended by striking out the words "carrying on the business of insurance under the license of the Dominion of Canada" and substituting therefor a new subsection to indicate the application of the deposit provisions of the Act.

Section 41 (1) is likewise amended to provide for the withdrawal of deposit in certain cases.

Clause (e) of Section 44 (1) of the Act is repealed.

Section 70 (2) is likewise amended in regard to the application of the provision requiring the filing of modified annual statements.

Penalties:

Section 77 of the Act is amended by adding thereto the following subsection:

(2a) Every insurer undertaking insurance or carrying on business in the province without holding a license to do so, shall incur a penalty of \$50 for each and every day which the default continues.

Consolidation of actions for insurance money:

Section 86 (1) of the Act is amended by inserting after the word "contract" in the second line the words "or contracts." This amendment is intended to facilitate consolidation of actions for insurance money not only where several actions are brought under one contract but also where one or more actions are brought under a number of contracts.

Payment into Court:

The Insurance Act is amended by adding thereto a new Section 92b reading as follows:

92b. (1) Where an insurer cannot obtain a sufficient discharge for insurance money for which it admits liability, the insurer may apply to the court ex parte for an order for the payment thereof into court, and the court may order the payment into court to be made upon such terms as to costs and otherwise as the court directs, and may provide to what fund or name the amount shall be credited.

(2) The receipt of the registrar or other proper officer of the court shall be sufficient discharge to the insurer for the insurance money so paid into court, and the insurance money shall be dealt with according to the orders of the court.

Section 165 of the Act authorizes the insurer to apply to the court for an order for the payment of life insurance money into court. The new section 92b extends this to other than life insurance companies and upon terms comparable to those already granted to insurers transacting life insurance.

Prohibition of certain policies:

The Insurance Act is further amended by adding thereto a new Section 92c authorizing the Superintendent on instructions from the Minister to prohibit the issue of any policy or the use of an application which in the opinion of the Superintendent is unfair, fraudulent or not in the public interest. This section was recommended by the Association of Superintendents of Insurance for the Provinces of Canada for uniform enactment.

Use of Red Ink:

Section 100 of the Act is amended to prohibit the use of red ink not only on the face of the policy but anywhere on the policy except for certain definite and limited purposes, e.g. Section 99.

Premium notes and assessments:

Section 107 (1) of the Act is amended by inserting after the word "directors" in the fifth line the words "with the approval of the Superintendent." The amended provision is intended to empower the Department to control the amount of and the method of collecting assessments of mutual fire insurance companies transacting business on the premium note plan.

Reinsurance:

Section 113 (2) of the Act is amended by adding at the end thereof the words "and may provide for reinsurance on the cash plan." This amendment is intended to make clear the right of mutual fire insurance companies transacting business on the premium note plan to enter into a general reinsurance agreement with each other on the cash plan, i.e., for a fixed predetermined premium.

Automobile Insurance:

Clause (e) of Section 183d of *The Insurance Act* as enacted by Section 2 of *The (Automobile) Insurance Act, 1932*, is amended by inserting after the word "Automobile" the words "or owned by, or in the care, custody or control of the insured."

This amendment restores an exception from liability under the standard form of motor vehicle liability policies formerly contained in policies of most companies and which was overlooked when *The Uniform Automobile Insurance Act* was approved at the 1932 session. In the absence of such exception from liability and by reason of the statutory "omnibus clause" a policyholder would in effect be afforded a modified collision coverage.

This amendment came into force on June 1st, 1933.

The Insurance (Temporary Provisions) Act, 1932:

At page 518 of the 1932 Report of the Superintendent of Insurance reference is made to the Privy Council Judgment in *Attorney General of Quebec vs. Attorney General of Canada* (The Quebec Insurance Reference) on account of which the laws of the province relating to insurance required revision, and that it would be expedient to empower the Lieutenant-Governor in Council pending such revision to make orders and regulations by way of temporary provision. Accordingly, *The Insurance (Temporary Provisions) Act, 1932* (1932, Chapter 26) was enacted. The following is a statement by the Attorney General of Ontario in the Ontario Legislature March 21st, 1932:

STATEMENT BY THE HON. W. H. PRICE, ATTORNEY-GENERAL, IN THE
ONTARIO LEGISLATURE MARCH 21ST, 1932, RESPECTING INSURANCE.

Last October, upon an appeal to His Majesty in his Privy Council, it was declared that the regulation of the business of insurance is a matter of Provincial and not Dominion jurisdiction. Sufficient time has not elapsed since October to prepare a revision of our provincial insurance Statutes made necessary by this decision. Moreover, the policy of the Dominion Government respecting insurance is still uncertain. For these reasons it has seemed necessary and desirable to ask the Legislature to empower the Lieutenant-Governor in Council to make such orders and regulations as may be required between now and the prorogation of the next session of the Legislature with respect to the business of insurance, the licensing of companies, and the amending, repealing or adding to of our Ontario Statutes respecting insurance.

The proposed Act is entitled the "*Insurance (Temporary Provisions) Act, 1932*," It is a "stop-gap" measure, necessitated by extraordinary circumstances, designed to bridge the months between now and next session by which time the constitutional issue with the Dominion will, we hope, be settled and a revision of our insurance statutes can be ready for consideration by the Legislature. In any event the Act will only come into force on proclamation and then have effect only until the prorogation of the next session of the Legislature.

A similar Bill has already been passed in Saskatchewan, is now before the Legislature of Alberta, and will probably be presented to a majority of the provincial Legislatures in Canada at their current sessions.

May I take the opportunity afforded by the introduction and first reading of this Bill to explain to the House the policy of this government with respect to the regulation of insurance and insurance legislation?

The business of insurance—life, fire and casualty insurance—is generally recognized not only as one of our most important businesses but also as one peculiarly impressed with a public interest. Some of its branches, such as Workmen's Compensation insurance, have been considered a proper field for a government monopoly. All other classes of insurance have been subject to close government supervision and regulation, particularly on this continent, for upwards of half a century.

In the United States this government supervision has been exercised by the several states each of which has a Superintendent or Commissioner of Insurance. Reciprocal agreements between States have avoided most of the overlapping and duplication so that most States use the same forms of annual and other returns, co-operate in joint examinations of companies, and generally afford the insurance business something in the nature of a "trial by jury." This system has some obvious advantages for all concerned. There is not and never has been a Federal Department of Insurance in the United States.

In Canada the situation has been different. We have had dual, federal and provincial supervision almost since Confederation. The early records show that, when the British North America Act, 1867, was being drafted at the Québec Conference in 1864, it was proposed to give the power to "regulate the business of life and fire insurance" to the central government but that the proposal was defeated presumably on the ground that the contract of insurance was obviously a matter of "property and civil rights" within the exclusive jurisdiction of the provinces. In any event "insurance" was not expressly named anywhere in the Act. As a result the Dominion and some of the provinces appointed an Inspector or Superintendent of Insurance shortly after the Confederation. The first Ontario Inspector was appointed in 1879. Since that time the Dominion Department has shared with the Insurance Departments established by all the Provinces (other than the Maritime provinces) the responsibility for the regulation of the business of insurance in Canada.

Conflicts of jurisdiction were inevitable. Every company was required to serve two masters. Every company was obliged to procure a federal license and also a license from the Provincial Department in each province where it sought to carry on business. Every company was required to make annual and other returns to both the Dominion and the provincial departments. The Dominion undertook to prescribe the terms and conditions which must be included in contracts of life, accident and sickness and automobile insurance—conditions differing from those prescribed by the provincial statutes. It undertook to say what companies should and what companies should not transact the business of insurance in the province of Ontario. When companies undertook to carry on business in Ontario upon the authority of a license under *The Ontario Insurance Act* but without a Dominion license, the Dominion undertook to impose a prohibitive tax upon their Ontario policyholders.

These conflicts have led to long and expensive litigation. The provinces have stood up for their rights. Ontario has appreciated that there is room for a difference of opinion as to the merits of federal as compared with provincial regulation of insurance. In a young country like Canada, and particularly in hard times, centralization is the panacea often suggested to reduce the cost of government. Possibly if we were back in 1864 we might urge that "insurance" be declared to be an exclusive field of jurisdiction for the central government. But we're not back in 1864! It is now 1932! We can't turn the clock back nearly seventy years! The respective legislative powers of the Dominion and the provinces are set out in the British North America Act, 1867. No informed person has the temerity to suggest seriously that this distribution of powers could be changed. And the Privy Council has now said in so many words that:

"The (1916) decision on this question conclusively and finally settled that regulations as to the carrying on of insurance business were a provincial and not a Dominion matter."

It would be subversive of our federal system of government in Canada if the provinces were to shirk the responsibilities imposed upon them by the law of the constitution.

The Dominion does not accept this view. Ever since 1916 successive Ministers of Finance, belonging to both political parties, have sponsored repeated attempts to maintain the Dominion Insurance Department. Three times the question has been before the Privy Council (not to mention a fourth occasion earlier, in 1881). Each time the validity of Dominion insurance legislation has been at stake. Each time it has been declared invalid.

Provincial insurance legislation has never been challenged since 1881 and then it was challenged unsuccessfully. In the recent case Quebec made the reference to the courts and British Columbia and Ontario intervened. Their Lordships referred to the "domination" and "intermeddling" of the Dominion in insurance matters and concluded that:

"... a Dominion license, so far as authorizing transactions of insurance business in a province is concerned, is an idle piece of paper conferring no rights which the party transacting in accordance with provincial legislation has not already got, if he has complied with provincial requirements."

This observation was made in relation to British and foreign companies.

And so we thought the matter was settled. The "Globe" carried an editorial on October 24th, 1931, expressing satisfaction that the controversy was indeed "finally settled." We prepared to assume the added responsibility which the abolition of the Dominion Insurance Department involved. But then we found the Dominion Insurance Department was still carrying on, issuing licenses, and administering the Dominion statute as though nothing has happened. Moreover, press dispatches from Ottawa reported that another revision of *The Dominion Insurance Act*, "to get over the decision," was being planned. So I wrote Premier Bennett on December 8th outlining the situation and appealing to him to make an early announcement of a decision to abide by the Privy Council judgment and withdraw from the field. Nothing happened. Still the Dominion Department carried on. Then about December 24th we served the Minister of Finance and the Superintendent of Insurance with an order of the Supreme Court of Ontario restraining them from acting under or enforcing the *ultra vires* licensing sections of *The Dominion Insurance Act*. The result was an Order-in-Council dated December 31st, 1931, passed under the extraordinary powers conferred by "*The Unemployment and Farm Relief Act, 1931*," requiring every insurance company carrying on business in Canada to have a "certificate of solvency" issued through the Dominion Superintendent of Insurance. The determination of the Dominion to continue its "domination" of the insurance business in Canada at all costs was thus made apparent.

Shortly after Parliament met the Rt. Hon. Arthur Meighen introduced two government bills (B.1 and C.1) in the Senate. They were substantially the same as the old statute, but different as to form. They provoked a storm of protest and, although already referred to the Banking and Commerce Committee, were subsequently formally withdrawn some ten days ago. Now new bills are in course of preparation. A draft of one was submitted to me last Friday. Unfortunately it appears to be the old bill (B.1) with the sections rearranged and in some cases redrafted. For some reason the advisers of the federal government seem to have shut their eyes deliberately to the true and conclusive significance of the recent Privy Council judgment. I so advised Mr. Meighen. The next step is necessarily uncertain.

The province has not been content with destructive criticism. It has pointed a way out. So long as its rights are recognized and preserved it will co-operate in every possible way. Concrete proposals have actually been submitted. But they do not recognize what the Dominion apparently desires to retain, i.e., the power to regulate the insurance business, to license insurance companies, to say what companies shall and what companies shall not do business in this province. Nevertheless they do show how a central bureau might be established, supported by the authority of provincial statutes, to which all companies carrying on business in the several provinces could be required to submit returns and demonstrate their solvency, and from which reports could be submitted to the provincial insurance departments for their guidance in the issue and renewal of licenses to transact business.

So the matter stands at the moment. I trust I have made the position of the province clear. I have, I believe, shown why it is necessary and advisable to pass this bill.

The Dominion Insurance Statutes were repealed and re-enacted after the 1932 session of the Ontario Legislature and consequently it was necessary to further postpone the revision of the provincial insurance statutes and to continue meanwhile the temporary legislation enacted in 1932. *The Insurance (Temporary Provisions) Act, 1933* (1933, Chapter 23) extended the previous legislation until the next session of the Legislature. The provinces of British Columbia and New Brunswick continued their similar emergency legislation of 1932 to be in force for another year. The province of Quebec passed a similar statute for the first time.

In addition to the amendments effected to *The Insurance Act* heretofore described, certain amendments respecting other laws in Ontario and affecting the business of insurance were enacted as follows:

The Companies Act:

Section 254 of *The Companies Act* is amended by adding after the word "agricultural" in the fifth line thereof the words "and other non-hazardous." The purpose of this amendment is to make it clear that the powers of mutual fire insurance companies transacting business on the premium note plan are wide enough to cover the existing practice of insuring some non-hazardous properties such as rural schools and dwellings which are not strictly "agricultural property."

Section 279 (3) of the Act is amended by striking out the word "person" in the second line and inserting in lieu thereof "member of such board or its Secretary-Treasurer." This section of the Act relates to the representation of a trustee board at the annual meeting of Ontario mutual fire insurance companies. On the recommendation of the associated companies that only a member of the Trustee Board or its Secretary should be so authorized this amendment was enacted.

Section 288 (1) is amended by striking out the word "person" in the fourth line and inserting in lieu thereof the words "director, officer or member." This is for the purpose of defining who may elect directors.

Section 290a (2) as enacted by Section 11 of *The Companies Act, 1929*, is amended by adding thereto the words "and shall consist of the bond of a licensed guarantee insurance or surety company."

This section requires the Treasurer or other officer of a farmers' mutual fire insurance company to give security for not less than \$3,000. The purpose of this amendment is to prohibit personal sureties.

Clause (c) of Section 318a as enacted by Section 11 of *The Companies Act, 1930*, is slightly amended to change the terminology to conform with common usage.

Section 318a is further amended by adding a new subsection for the purpose of giving a more liberal interpretation to the requirement that verification must be procured on all unpaid balances owed by agents.

These amendments came into force on the date of Royal Assent, viz., April 18th, 1933.

The Collection Agencies Act, 1933:

This Act requires all collection agencies carrying on business in the province to be licensed. The definition of "collection agency" expressly provides that "a solicitor collecting or attempting to collect debts for his client, or any insurer, agent or broker licensed under *The Insurance Act* to the extent of the business authorized by such license" are not included.

The Trustee Act:

Section 26 (1) of this Act was repealed and re-enacted. This section relates to the powers of investment of trustees and indirectly to the powers of investment of insurers which are governed thereby by virtue of Section 317 of *The Companies Act*. No material change is effected by the new section.

The Mutual Relief Life Insurance Company:

Section 18 of 1929, Chapter 132, is repealed and re-enacted so as to authorize the company to establish a substandard of policy reserve in respect of business written by the former Odd-fellows Relief Association which was reincorporated in 1929 as the Mutual Relief Life Insurance Company.

APPENDIX II

REPORT OF STANDING COMMITTEE ON VALUATION OF SECURITIES

ASSOCIATION OF SUPERINTENDENTS OF INSURANCE
OF THE PROVINCES OF CANADA

The following resolution was adopted at the 14th Annual Conference of the Association, held in Winnipeg, Manitoba, September 9th to 11th, 1931:

"WHEREAS, it is desirable that all provinces should prescribe the same basis of valuation of securities for use by insurers in completing annual statement blanks;

"BE IT RESOLVED: That the provinces of Quebec and Ontario are hereby constituted the Association 'Standing Committee on Valuation of Securities,' with full power to determine the basis of valuation of securities and with instructions to publish through the Secretary not later than the 15th of January in each year a list of securities held by insurers as at the December 31st next preceding, with valuations thereof, to be used in completing annual statement blanks."

Under date of December 31st, 1931, your Committee submitted a report determining the basis of valuation of bonds, debentures and stocks in respect of annual statements for the year ending December 31st, 1931 (1931 Proceedings, page 101) and subsequently a list of securities held by insurance companies showing the values so determined was published and used to complete the said annual statements for all provinces.

During recent months your Committee has undertaken exhaustive inquiries into the question of valuation of securities in respect of annual statements for the current year. Several joint meetings have been held with the Standing Committee on Valuation of Securities of the National Convention of Insurance Commissioners. Recognizing the peculiarly international character of the insurance business, with Canadian companies doing a large and increasing business throughout the United States, and United States companies carrying on business in every province of Canada, close and continuous co-operation has been maintained between the two Committees in the hope of reaching an agreement upon the basis of valuation of securities in order that such basis might thus become truly international in character, authorized by every province of Canada and every state of the United States.

Yesterday, the resolutions appended hereto were reported by the said Committee of United States Commissioners and unanimously adopted by the National Convention of Insurance Commissioners. Your Committee was a party to the terms of these resolutions and is of opinion that the basis of valuation therein and thereby determined is a sound basis of valuation for the reasons therein set forth. Accordingly, your Committee has unanimously concluded to determine that the values of bonds, debentures and stocks shall be fixed, for the purposes of the provinces of Canada, upon the same basis as the value of such securities has been determined by the said resolution for the states of the United States, subject only to such minor adjustments as are necessary to adapt the said basis to Canadian practice and forms.

On or about January 15th, 1933, a list of securities held by insurance companies, with valuations thereof, to be used in completing annual statement blanks as of December 31st, 1932, will be published and distributed by the Secretary of the Association.

B. A. DUGAL (Quebec).

R. LEIGHTON FOSTER (Ontario).

December 7th, 1932.

RESOLUTION AS TO VALUATION OF SECURITIES ADOPTED BY THE NATIONAL CONVENTION OF
INSURANCE COMMISSIONERS AT NEW YORK, DECEMBER 6, 1932:

WHEREAS since the inquiry conducted last year by the National Convention of Insurance Commissioners as to whether market price quotations of stocks and bonds on any particular day are indicative of the fair value of such securities, exceptional price fluctuations of such securities on the exchanges have continued, and

WHEREAS close study of the range of markets over various periods together with various tests as to the range of markets through times of prosperity and depression alike, up to and including September 30, 1932, leads to the conclusion that the real value cannot be definitely determined and that the Convention values of 1931 are indicative of a fair value of securities for inventory purposes at the present time, and

WHEREAS the trend of the markets indicates a situation that over a period of years normal market conditions may reasonably be anticipated in which there will be willing sellers and willing and able buyers in a free rather than a forced market;

RESOLVED that the Committee on Valuations of the National Convention of Insurance Commissioners is of the opinion that under present conditions the convention values for stocks and bonds adopted for the annual statements due as of December 31st, 1931, reflect fair value for the inventory of such securities in the annual statements due as of December 31st, 1932, except as hereinafter provided, and that the same should be adopted as the "Convention Values" for 1932;

FURTHER RESOLVED that in cases where the condition of companies may require the immediate disposition of securities it is the opinion of this Committee that the discretion of a Commissioner of Insurance should be exercised to vary the general formula herein set forth so as to adopt the prices reflected by the exchanges;

FURTHER RESOLVED that in the opinion of this Committee securities should not be valued at more than the purchase price if purchased since June 30th, 1931, unless such purchase was in effect a bona fide exchange of securities resulting in betterment of a portfolio, in which event the value herein provided should be allowed but not so as to exceed the convention value of the securities disposed of in connection with such purchase, and no such special value should be allowed unless such exchange is separately indicated in Parts 3 and 4, Schedule D, of the annual statement;

FURTHER RESOLVED that inasmuch as a number of worthy industrial and commercial corporations are in emergency receivership and a number of corporate bonds are in default as to interest and/or principal by reason of lack of liquidity rather than by reason of lack of underlying value, stocks of corporations in receivership and bonds in default should be valued on the 1931 Convention basis, less 30% of the difference between such Convention Value and the exchange quotations of December 1, 1932, unless the value underlying such securities has been heavily depleted or has disappeared to such an extent that a lower value is required by reason of such special circumstances, and

FURTHER RESOLVED that in the application of this resolution recognition should be given to the fact that Convention values as herein defined are based upon the range of the market and are subject to revision as the actualities of the market from day to day develop and that it be recommended that companies set up voluntary reserves to be designated in the annual statements "Contingency Reserves"; that at regular periods thereafter the actual market value of securities as reflected by the exchanges from day to day, be averaged in so as to bring the range of the market used into accord with actual future developments or that there be adopted some other method to accomplish such result so that the difference between the Convention values as herein determined and the actual exchange quotations shall be absorbed over a reasonable period.

SUPPLEMENTAL RESOLUTION

RESOLVED that for 1932 this Convention hereby ratifies and confirms the action taken by its Committee on Valuation of Securities pursuant to the recommendation of the financial advisor to the Convention with respect to moderate and reasonable adjustments in the 1931 Convention values for municipal bonds.

This list of securities is published and distributed by the Secretary of the Association in furtherance of the foregoing report.

The securities listed herein (*not printed in this report*) are bonds and debentures in default, stocks of corporations in receivership (see 7th par. App. to Report), and certain other securities which, in the opinion of the financial adviser to the Committee, have intrinsically depreciated since December 31st, 1931.

The values of securities not payable in Canadian currency have been determined by reference to the various British and foreign stock exchanges and allowance made for exchange. Due and accrued interest has also been considered. In other words, the values are "flat" Canadian values not subject to increase directly or indirectly on account of premium on exchange, interest or otherwise, except where indicated.

Where "exchange quotations of December 1, 1932" (see 7th par. App. to Report) were not available or the quoted prices seemed merely nominal, an arbitrary quotation was determined as the facts appeared to the financial adviser to the Committee to warrant and the deduction formula thereupon applied.

There follow some general instructions prepared for the convenience and guidance of insurers:

GENERAL INSTRUCTIONS

1. Schedules of bonds, debentures and stocks owned or held as security for loans by insurers as of December 31st, 1932, required to be filed with the several provincial Departments of Insurance in Canada shall be valued in accordance with the foregoing and with these instructions.

2. Except as hereinafter provided, such securities *not* listed in this publication shall be valued at the values authorized for use at December 31st, 1931.

3. Where permitted, e.g., *Ontario Insurance Act*, s. 70 (8); *Alberta Insurance Act*, s. 91; *Saskatchewan Insurance Act*, s. 100; *Manitoba Insurance Act*, s. 69 (7), and other provinces, insurers may, if they so elect, value their securities having a fixed term and rate of interest and not in default as to principal or interest, in accordance with the rule prescribed in the statutes, i.e., at amortized values.

4. Such securities purchased since June 30th, 1931, shall not be valued at more than their purchase price "unless such purchase was in effect a bona fide exchange of securities resulting in betterment of a portfolio," etc. (see 6th par. App. to Report) in which case the exchange must be separately indicated in the schedule.

Omissions or inaccuracies in this publication or requests for additional information should be drawn to the attention of or made to the Secretary.

R. LEIGHTON FOSTER,
Secretary.

Toronto, January 3rd, 1933.

APPENDIX V—Continued

INDEX TO CLASSIFICATION OF FIRE INSURANCE RISKS

CLASS NO.	NON-HAZARDOUS	CLASS NO.	MERCANTILE
2.	Barns and Stables, Private, other than farm.	140.	Mercantile Stocks—Hardware, Iron and Steel Bars and Piping, Cutlery, Surgical Instruments, Machinery, Belting, Mill Equipment, Supplies, Stoves, Tinware, House Furnishings, Wooden, Willow and Basketware, retail.
4.	Churches and Chapels.	142.	Mercantile Stocks—Hardware, Iron and Steel Bars and Piping, Cutlery, Surgical Instruments, Machinery, Belting, Mill Equipment Supplies, Stoves, Tinware, House Furnishings, Wooden, Willow and Basketware, wholesale.
6.	City and Town Halls, Courthouses, State Capitols, Armories, Fire Department Houses, Libraries (public), Museums of Art, and Natural History.	146.	Household Furniture in Mercantile Buildings.
8.	Colleges, Universities, Boarding Schools, Convents, Schools and Academies, with or without dormitories.	154.	Mercantile Stocks—Liquors and Wines, wholesale.
10.	Dwellings without Barns or with Barns Attached (excluding seasonal and farm risks), Apartment and Flat Houses, Palatial Dwellings (Apartment Houses having one general Dining Room, classify with Hotels, see 620).	156.	Lodge and Society Rooms (Masonic, Oddfellows, etc.), Contents only.
14.	Dwellings and Outbuildings—Summer or Winter only.	160.	Mercantile Stocks—Miscellaneous, wholesale and retail.
16.	Farm Risks (buildings and contents), including Live Stock.	164.	Mercantile Stocks—Millinery, Feathers, Artificial Flowers, wholesale.
22.	Garages (private).	168.	Offices and Banks, Telephone Exchanges, Buildings and Contents.
24.	Hospitals, Sanatoriums, Asylums (Deaf, Dumb, Blind, Orphan), Homes for the Aged.	176.	Restaurants, Contents only.
	MERCANTILE	180.	Saloons (Liquor), Contents only.
101.	Mercantile Buildings (including those with public hall or lodge rooms above), except 103 (see 168, 200, 184 and 186).	184.	Stores, Country (Remote or Cross-road), usually of moderate or small values, Buildings and Contents.
103.	Mercantile Buildings with Wholesale Occupancy exclusively.	186.	Stores, General (village or city), including Department Stores, Contents only.
102.	Mercantile Stocks—Agricultural Implements, Automobile and Carriage Salesrooms.	196.	Mercantile Stocks—Tobacco, Cigars, Smokers' Articles, wholesale.
110.	Mercantile Stocks—Boots and Shoes, retail.	197.	Wharf risks, Ferry Houses, Contents.
112.	Mercantile Stocks—Boots and Shoes, Leather Goods (Hides, Harness and Trunks), Rubber Goods, wholesale.	200.	Mercantile Buildings, Retail Occupancy, with Dwellings only above Grade Floor.
114.	Mercantile Stocks—Clothing, Hats, Caps, Furs and Men's Furnishings, retail, Merchant Tailor, Regalia, Costumer and Dressmaking.		WAREHOUSES
116.	Mercantile Stocks—Clothing, Hats, Caps, Furs and Men's Furnishings, wholesale.	254.	Cold Storage, Contents only.
124.	Mercantile Stocks—Drugs, Chemicals and Medicines, retail.	256.	Cotton (no compressing), Building and Contents.
126.	Mercantile Stocks—Drugs, Chemicals, and Medicines, wholesale.	260.	General storage, not specifically classed, Contents only.
128.	Mercantile Stocks—Dry Goods, Woolens, Carpets and Notions, Chinese and Japanese Goods, retail.	266.	Fibres (other than Cotton and Wool and Tobacco), Contents only.
130.	Mercantile Stocks—Dry Goods, Woolens, Carpets and Notions, Chinese and Japanese Goods, wholesale.	268.	Household Furniture, Contents only.
132.	Mercantile Stocks—Furniture, Musical Instruments, Music, Undertakers' Establishments, Photographers' Supplies, Optical and Scientific Goods, retail.	276.	Tobacco, Building and Contents.
136.	Mercantile Stocks—Groceries, Meat, Fish, Butter, Cheese, Eggs, Fruit and Produce, retail.	278.	Whiskey, Building and Contents.
138.	Mercantile Stocks—Groceries, Meat, Fish, Butter, Cheese, Eggs, Fruit and Produce, wholesale.	280.	Wool, Contents only.
			MANUFACTURING SPECIALS
			WOODWORKERS
			(Building and Contents)
		300.	Agricultural Implement Factories, and other Factories having woodworking (principally hard) in conjunction with ironwork, painting, etc., such as Carriage, Bed Spring, Incubator, Refrigerator, Sewing Machine and Wringer Factories and Car Works.

APPENDIX V—Continued

INDEX TO CLASSIFICATION OF FIRE INSURANCE RISKS—Continued

CLASS NO.		CLASS NO.	
302.	General Woodworking, without power, including Carpenter and Cabinet Shops, Looking Glass and Picture Frame Factories, Cooper Shops.	366.	Celluloid Works—Celluloid and Celluloid Goods Factories.
304.	General Woodworking, with power and without finishing, Chair, Pail, Tub, Tank, Bobbin, Ladder, Wooden Toy Factories, Match Factories, Moulding, Turning, Wheel, Hub, Spoke and Spool Factories—Carpenter Shops with power.	368.	Cement Mills.
306.	Furniture, Organ, Piano, Graphophone, Rattan, Wooden Trunk, Casket and Billiard Table Factories—Clock Factories if with woodworking.	370.	Cereal Mills—Grist and Feed Mills and Rice Mills.
308.	Marine Railways, Shipyards, Boat Building, Dry Docks.	372.	Chemical works of the milder hazards.
316.	Planing Mills, Sash, Door, Blind and Wooden Box Factories—Dry Houses for Lumber.	374.	Chemical works of hazardous nature or with explosive hazard.
318.	Saw Mills.	386.	Clothing, Cap and Overall Factories—Tent, Awning, Sail and Rigging Lofts.
320.	Shingle, Stave, Lath, Veneer and Kindling Wood Mills—Excelsior Factories.	388.	Coal Breakers and Mining Buildings—Anthracite.
METAL WORKERS		390.	Coal Tipples and Top Works—Bituminous.
(Building and Contents)		394.	Collar, Cuff, Shirt, Corset, Waist and other White Goods Factories.
322.	Automobile Factories.	396.	Confectionery, Chocolate and Chewing Gum Factories.
324.	Heavy Metal Workers Generally—Foundries for Iron, Brass, Type Work and Stoves—Furnaces, Rolling Mills, Machine Shops (with Foundries connected)—Boiler Shops, Nut and Bolt Works, Bicycle and Firearms Factories, Locomotive Works, Wireworking and Drawing, Machine Shops without Foundries.	402.	Cotton Gins.
326.	Light Metal Workers generally—Hardware Factories for manufacturing Cutlery, Copper or Brassware, Axes, Tools, Nails, Tacks, Pins and Needles—also Clock Factories if no woodworking, Jewellery, Watch, Dental, Scientific and Surgical Instrument Factories, Miscellaneous Metal Workers, not otherwise specified, Silver, Aluminum and Tableware Factories—Electroplating.	404.	Cotton Mills (Full Process).
338.	Stamping Works—Tin, Hollowware, Iron Bedstead, Gas Fixtures, Lamp and Iron Toy Factories—Japanneries.	406.	Creameries, Powdered and Condensed Milk, Caseine and Cheese Factories.
OTHER OCCUPATIONS		412.	Distilleries and Rectifying Works (Steam).
(Building and Contents)		416.	Electric light and power plants (when separately insured), Water Works and Pumping Stations—Filtration Plants.
346.	Bakeries and Macaroni Factories.	418.	Fertilizer and Phosphate Factories.
350.	Bleacheries, Dye and Print Works.	420.	Flour Mills.
352.	Boot, Shoe, Slipper, Heel and Counter Factories.	424.	Fur Hat, Fur Cutting, Forming and Dressing Mills.
354.	Breweries.	426.	Glass Works.
356.	Brush and Broom Factories.	430.	Grain Elevators and Warehouses—Terminal.
358.	Canneries—Canning and Preserving Works for Fruit, Vegetables and Fish.	432.	Grain Elevators and Warehouses—Country.
		438.	Hemp and Jute Mills—Cordage and Bagging Factories—Waste and Shoddy Mills, Carpet Lining and Batting Factories.
		442.	Ice Factories.
		446.	Laundries (hand or power)—Cleaning Establishments.
		450.	Leather Goods Factories (except Boot and Shoe), such as Harness, Saddlery, Pocketbook, Glove, Bag, Leather Trunk, Whip and Sporting Goods.
		452.	Malt Houses.
		458.	Mining Risks (other than Coal, including Mining dredges).
		460.	Miscellaneous manufacturing establishments not otherwise classified.
		464.	Oil Works—Vegetable.
		466.	Oil—Vegetable in tanks.
		468.	Oil Works—Fish.
		470.	Oil Works—Minerals—Refineries, Oil Derricks, Pipe Lines.
		472.	Oil—Mineral—in Tanks or Sumps.
		474.	Packing Houses, Slaughtering, Rendering, Oleomargarine, Lard, Candle, Crude Glycerine and Glue Works.
		476.	Paint, Varnish, White Lead and Oil Colour Works—Turpentine Refineries, Printing Ink Works.
		480.	Paper, Pulp, Leather Board and Straw Board Mills.

APPENDIX V—Continued

INDEX TO CLASSIFICATION OF FIRE INSURANCE RISKS—Continued

CLASS
NO.

- 484. Potteries, Brick, Tile, Plaster and Crucible Works—China Decorating.
- 486. Printing Establishments, Lithographers, Book Binderies.
- 490. Rubber Mills—Including Manufacture of Rubber Goods and Clothing.
- 492. Salt Works.
- 494. Silk Mills.
- 498. Soap Factories (when insured separately from Packing Houses or other plants).
- 502. Sugar Houses.
- 504. Sugar (Cane and Beet) Refineries.
- 506. Tanneries—(Heavy Leather).
- 508. Tanneries—(Light Leather, Currying Shops, Morocco Works and Leather-making generally without japanning).
- 510. Tanneries—(Light), with Japanning or Enamelling.
- 514. Tobacco, Cigar, Cigarette and Snuff Factories.
- 516. Tobacco Stemmeries, Prizeries and Re-handling Houses.
- 522. Weaving and Knitting Mills (no Preparatory Process), Embroidery and Lace Curtain Factories.
- 526. Wineries.
- 528. Woollen Mills (full process—all Wool or Mixed Stocks), Worsteds, Carpet, Knitting, Felting, Wool Hat Factories.
- 533. Pulpwood in connection with mills.
- 534. Pulpwood, Cordwood, Ties, Bark or Logs, when in bush or beside railway tracks.

NON-MANUFACTURING SPECIALS

(Building and Contents)

- 604. Asylums—Insane and Inebriate, Poor Farms and Alms Houses, Jails, Prisons, Penitentiaries and Reform Schools.
- 606. Barns and Stables (public)—Livery, Sales, Bus, Express, Hotel and Boarding.
- 617. Builders' Risks—Buildings in Process of Construction.
- 620. Club Houses (city), Y.M.C.A., Y.W.C.A.—Gymnasiums and Hotels and Boarding Houses (all the year round).
- 622. Club Houses (country), Boat and Bath Houses, Yacht and Rowing Clubs, Hotels and Boarding Houses (Summer or Winter only).
- 624. Coal and Wood Yards, Coal Trestles.
- 626. Cotton Compresses, with Warehouses with Platforms if communicating therewith.
- 628. Cotton Yards and Platforms, when not communicating with Compress.

APPENDIX VI

CERTAIN MEMORANDA, RULINGS, ETC., ISSUED BY THE
SUPERINTENDENT OF INSURANCE

C.L. 15/1933

April 6th, 1933

MEMORANDUM

To—All insurers licensed to transact automobile insurance in Ontario.

From—The Superintendent of Insurance.

RE SECTION 273—FILING OF AUTOMOBILE INSURANCE PREMIUM RATES

Section 273 of *The Insurance Act*, which has been on the statute books since 1924, empowers the Superintendent to require a return of rates fixed, made or charged by rating bureaus and licensed insurers "in such form and at such times as he may require" and pursuant thereto, under date May 6th, 1932, you were required to file a complete new return showing your automobile insurance premium rates and to complete an affidavit wherein you undertook to file particulars of changes therein from time to time. Sections 274, 275 and 275a of the Act respecting unfair discrimination in rates and empowering the Superintendent to order an adjustment in rates "whenever it is found by him that any such rates are excessive, inadequate, unfairly discriminatory or otherwise unreasonable," are not and have not been in force since April 2nd, 1931.

The next preceding occasion when you were requested to make a return of rates to the Department was in February, 1929, and was made to obtain information for the purposes of the Hodgins Inquiry Commission. It was permitted to lapse in April, 1931, upon the termination of the inquiry. The requirement was only revived last May because a group of prominent company executives assured the Department it would assist to stabilize the business in the province. In other words, the initiative for the requirement imposed eleven months ago came from within the business and not from the Department.

Unfortunately experience since last May has again demonstrated that it is not practical to enforce the requirement and its related prohibition against deviations from filed rates, by reason of the fact that it involves the Department intervening between the insurance company and its policyholder, with the result that a low-premium policy may be cancelled and the policyholder required to pay a premium higher than that offered or charged by the company. This conclusion is in accordance with the experience in Ontario (1924-26) and other jurisdictions and with the views expressed by the late Hon. Mr. Justice Hodgins in his report on this subject (see Interim Report, page 25). So long as the general cost of automobile insurance in the province is not excessive (and complete data as to this is and will continue to be available to the Department under Section 69a of the Act), Department intervention so limited would appear to be unwarranted and unnecessary in the public interest.

It would, therefore, appear that under prevailing conditions in the automobile insurance business in the province no pressing necessity or substantial demand for a continuance of the requirements exists. You are, accordingly, hereby notified that the requirement authorized to be imposed by Section 273 with respect to the filing of automobile insurance premium rates is formally withdrawn until further notice. In so doing, grateful acknowledgment is made of the helpful co-operation extended by the Committee of Underwriters which has been working with the Department during the past year reviewing the returns filed with the Department and endeavouring to find a way in which the Act could be usefully enforced.

R. LEIGHTON FOSTER.

INSTRUCTIONS RESPECTING REINSURANCE OF AGRICULTURAL AND OTHER
NON-HAZARDOUS RISKS BY ONTARIO PURELY MUTUAL
FIRE INSURANCE COMPANIES

1. These instructions supersede and replace all instructions heretofore issued on this subject.
2. A duly executed copy of every Reinsurance Agreement negotiated on or after April 18th, 1933, including rate schedules annexed thereto, must be submitted to and approved by the Superintendent of Insurance before becoming effective, and shall be kept on file in the office of the Superintendent.
3. See that the Reinsurance Agreement is duly executed by the proper officers and under the corporate seals of both companies.
4. A company may negotiate as many separate reinsurance agreements as the Directors deem desirable and as are necessary to provide the company with a sufficient underwriting range.

5. It is to the advantage of the companies to keep reinsurance arrangements reciprocal and to exchange reinsurance with treaty companies.

6. The Managers of the Original and Reinsuring company shall have an understanding as to means of communication with each other by telephone, telegraph or mail.

7. Telephone messages in connection with reinsurance should be confirmed as promptly as possible by notice in writing.

8. The Original company should retain at risk an amount not less than the amount reinsured in any other single company. The same proportion which the total amount of the reinsurance policy bears to the total amount of the original policy must apply to every individual item of the original policy.

9. All reinsurance between companies shall be undertaken on a fixed premium basis. Unless the rates of premiums applicable to reinsurance contracts are specified in the Reinsurance Agreement the general rates of premium of the Reinsuring company shall apply to all reinsurance contracts. The Original company shall not be subject to special assessment made by the Reinsuring company.

10. If the Original company allows an agent's commission or fee on the risk obtained, the Original company may arrange with the Reinsuring company for allowance of a proportionate part of such agent's remuneration in connection with the reinsurance.

11. The Reinsuring company shall, at the end of each calendar month (or at the end of each three months period) send to the Original company a statement of all premiums due, less agency remuneration (if any), and prompt settlement of such account shall be made by the Original company.

12. When the Original company accepts a risk of which it desires to reinsure a part, the Manager of the Original company or other proper officer shall immediately notify the Reinsuring company of the amount and particulars of the reinsurance.

13. The Reinsuring company shall be bound on the risk as soon as the Original company is bound thereon and written notice has been actually mailed to the Reinsuring company giving particulars of the reinsurance.

14. A written application for reinsurance containing a copy of the description and other relevant particulars of the risk as contained in the original application for insurance, must be sent to the Reinsuring company forthwith and in any event not later than fifteen days after the reinsurance becomes effective; otherwise the reinsurance is void.

15. The Reinsuring company may, after consideration of the application, give written notice to the Original company that it declines to accept the reinsurance and such notice shall take effect at the expiration of seven days from the date of mailing of such notice but the Reinsuring company remains bound on the risk until the expiration of the said period of seven days.

16. The Reinsuring company may at any time during the currency of a policy of reinsurance issued by them cancel the same in manner provided by the Ontario Statutory Conditions.

17. If, after consideration of the application, the Reinsuring company accepts the risk as offered, it shall issue to the Original company a policy or certificate of reinsurance in the form supplied herewith or its equivalent.

18. Other reinsurance of any individual risk is permitted without notice until required.

19. In case of expiry of the term of insurance the reinsurance remains effective for thirty days thereafter, during which time the Original company must transmit to the Reinsuring company an application for the renewal of the reinsurance; otherwise the reinsurance liability terminates at the expiration of the thirty days.

20. It is necessary for the Original company to give to the Reinsuring company notice of the removal of the insured property or of an assignment of the policy and of any change in the risk for which an increased premium is to be paid by the insured or for which an additional premium is charged by the Reinsuring company under its general rules, but it is unnecessary for the Original company to give notice to the Reinsuring company of any change or endorsement for which no additional premium is charged by either the Original or the Reinsuring company except as herein mentioned.

21. In the event of claim by the insured for loss under the original policy, the Original company shall, at its own cost, settle and adjust the loss.

22. The Original company shall pay the adjusted claim of the insured and shall send to the Reinsuring company a reinsurance claim setting out the amount due from the Reinsuring company and shall attach to such a copy of the proofs of loss by the insured under the original policy.

23. The Reinsuring company is liable for the same proportion of the loss on every item as determined by the adjustment of the Original company which the amount of the reinsurance by such company bears to the total amount of the original insurance, and this should be paid to the Original company promptly upon receipt of the reinsurance claim.

Parliament Buildings,
Toronto, Ont.,
18th April, 1933.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

MEMORANDUM OF AGREEMENT made in *triplicate* this.....day of
.....one thousand nine hundred and

BETWEEN:

THE.....MUTUAL FIRE INSURANCE COMPANY
(of the First Part)

—and—

THE.....MUTUAL FIRE INSURANCE COMPANY
(of the Second Part)

THIS AGREEMENT WITNESSETH that the parties hereto mutually covenant with each other for themselves, their successors and assigns as follows:

1. That any reinsurance now in force or hereafter to be granted by the parties hereto for each other shall be subject to the following conditions:

2. The policies to be issued from time to time by one party hereto to the other shall be subject to the same risks, conditions, valuations, endorsements, privileges, assignments, transfers and modes of settlement as are or may be adopted by the company applying for the policy of reinsurance (hereinafter called the Original company) and loss, if any, shall be payable *pro rata* and at the same time and in the same manner as by the said Original company.

3. The rates of premium of the Reinsuring company, shown in the schedule to this agreement, shall apply to all reinsurance hereunder, until such time as such rates are changed by notice in writing given by the Reinsuring company to the Original company. Such rates of premium shall be deemed to be fixed premiums and shall not be subject to increase by way of assessment or refund by way of dividend. No premium note shall be given or required in respect of reinsurance contracted under this agreement.

NOTE:
Choose one
of these
alternative
clauses and
strike out
the other.

4. All premiums in respect of reinsurance shall be payable at the office of the Reinsuring company within sixty days from the effective date of the reinsurance.

Alternative form for 4

4. All premiums in respect of reinsurance shall be payable at the office of the Reinsuring company, in advance or in instalments, according to the terms of payment of the original premium by the insured to the Original company; provided that, in any case, the premiums payable in advance under the original policy shall, in respect of reinsurance, be payable within sixty days from the effective date of the reinsurance, and premiums payable in instalments under the original policy shall, in respect of reinsurance, be payable in amounts not less than and at times not later than the following: 40% within sixty days from the effective date of the reinsurance, and the balance in two equal instalments of 30% each on the anniversary dates of the policy during the term thereof.

NOTE:
Choose
monthly or
quarterly
settlement
and strike
out other
clause.

5. The Reinsuring company shall on or before the 15th day of each month (or on or before the 15th days of January, April, July and October in each year) send to the original company a statement of all premiums due and cancellations for the period ended with the previous month and payment of the balance of such account, if any, due by the original company shall accompany the statement.

6. Each of the companies parties hereto does hereby authorize the other company party hereto to bind it upon a risk by way of reinsurance in cases in which the said party retains for itself an amount of insurance not less than that intended to be reinsured, provided that the company (party of the first part), shall not be bound upon a risk for an amount greater than \$.....and the company (party of the second part) shall not be bound upon a risk for an amount greater than \$.....

7. The parties hereto mutually agree that they shall be bound to observe the duties set out in paragraphs 8 to 23 (both inclusive) of the memorandum of instructions respecting reinsurance of farm risks by Ontario purely mutual fire insurance companies issued by the Superintendent of Insurance under date April 18th, 1933, and printed annexed hereto; and they further agree that the respective obligations of the parties hereto shall be determined in the same manner and with like effect as if the said paragraphs were contained in this agreement as an integral part thereof.

8. In the event of any dispute of difference hereafter arising between the contracting parties with reference to any transaction under this contract, or as to the true meaning or intent of the contract, the same shall be referred to two arbitrators who shall hold responsible offices in connection with the Fire insurance profession, one to be chosen by each company and to an umpire chosen by the said arbitrators, who shall interpret the present contract according to the general practice of the insurance business and rather as an honourable engagement than as a merely legal obligation and their award, or the award of a majority of them shall be final and binding on both parties.

9. It is hereby agreed that either of the parties hereto may terminate this agreement by giving three months' notice in writing to the other but all insurance in force at the time of such notice and all insurance placed during the said three months' interval shall continue in force until the expiry thereof unless terminated as otherwise provided herein or as may be mutually agreed upon.

IN WITNESS whereof the parties hereto have hereunto set their corporate seals by the hands of their duly authorized officers.

APPENDIX VII

COURT DECISIONS

Rex vs. Carl Jennings
In the Police Court of the City of Hamilton

October 13th, 1932

Before:

Henry Arnold Burbidge, Esquire, K.C.,

Police Magistrate.

REX vs. CARL JENNINGS

Breach Section 508 of the Criminal Code

Appearances:

For the Crown: Joseph Sedgewick.

For the Defence: C. W. R. Bowlby.

Court Reporter: Douglas L. Ewing.

"Judgment of Magistrate"

In the case of Rex vs. Carl Jennings, I have not been able to prepare any written judgment owing to an enforced absence from the City, but I have been able to give considerable thought to the questions involved, nor do I think that anything is to be gained by an elaborate review of the authorities in this case.

As I intimate I at the trial I think the facts are such as to afford ample evidence to bring the accused within the purview of the Section.

Since that intimation was given, Counsel for the Accused has submitted an argument in reply to an argument by the Counsel for the Attorney-General in which he urges strongly that there is no offence where the alleged rebate objected to is clearly expressed in the contract. I think that must be taken to mean an "honest expression" of the term in question and does not cover cases where an item which in fact would be a rebate is covered up by a fictitious or incorrect statement in the contract. In this case there is an endorsement on the contract which says in effect that a mistake was made as to the special credit rating to be given to the Assured, which mistake is corrected by this endorsement and a further allowance made. That is not a true statement, no mistake had been made and undoubtedly the additional allowance of Sixty-two and some odd dollars was in the nature of a rebate.

There are two questions of law which were raised at the trial and in the argument.

In the first place it was urged by the Counsel for the Attorney-General that the meaning or proper interpretation to be given to the word "inducement" is something that existed in the mind of the Accused person which he thought would be an inducement and would not necessarily mean something that operated on the mind of the Assured or person that receives the advantage. I think that that is the correct view, for this reason, that what operated on the mind of the Assured and induced him to take out this policy was the low premium. It is quite true that he may not have been conscious of the exact method adopted to give him that low premium, but I do not think that is material, he was in fact induced to take out the insurance by the reason of the reduced premium and the reduced premium was arrived at by something in the nature of a rebate. On the part of the Accused there was *mens rea*.

The next question of law that was raised was the question as to whether the section in question (Section 508 of the Criminal Code, Subsection "C") was constitutional and within the power of the Parliament of the Dominion of Canada to pass. On that point I felt at the trial that the argument of the Counsel for the Accused was impressive, and since reading the argument of Counsel and considering the cases referred to, no doubt exists in my mind as a matter of law that the section in question under which the Accused is charged is ultra vires of the Parliament of the Dominion of Canada.

The matter of giving a rebate, whatever may be said of it from the point of view of business ethics is not in any way inherently criminal or even immoral, it is just a discount given by indirection no doubt, it is a method by which consideration in the contract is arrived at, and essentially it is purely a matter of insurance contract, one of the terms of the insurance contract, and that being so all matters relating to contracts of insurance are exclusively within the jurisdiction of the Provinces.

The contention argued by the Attorney-General for the Province of Ontario in this case that Parliament has power to legislate with regard to new crimes is sound in my opinion—I do not think that Counsel for the Accused in this case would dispute that—but Parliament of the Dominion of Canada cannot encroach on the exclusive jurisdiction of the Provinces so as to make something a crime which is in the essence a term of an insurance contract.

For these reasons I find the Accused not guilty of the offence charged.

Certified correct,

DOUGLAS L. EWING,
Court Reporter.

H. A. BURBIDGE,
Police Magistrate.

APPENDIX VIII

RE "THE AUTOMOBILE INSURANCE ACT" AND STANDARD FORMS

ASSOCIATION OF SUPERINTENDENTS OF INSURANCE OF THE PROVINCES OF CANADA

Office of the Secretary, Parliament Buildings,
Toronto, Ont., July 31st, 1933.

C.L. 29, 1933.

LETTER OF TRANSMITTAL AND APPROVAL

To—All Insurers Transacting Automobile Insurance in the Provinces of Canada.*From*—The Secretary of the Association of Superintendents of Insurance of the Provinces of Canada.

RE "THE AUTOMOBILE INSURANCE ACT" AND STANDARD FORMS

The so-called *Uniform Automobile Insurance Act* is now in force in every province of Canada except Quebec. (P.E.I. October 1st, 1933).

Pursuant to the Final Report of the Special Committee on Automobile Insurance Legislation of this Association dated December 1st, 1931, "*The Automobile Insurance Act*" thereby recommended was enacted at the 1932 sessions of the Provincial Legislatures by the Provinces of British Columbia, Manitoba, Ontario and Nova Scotia. The Act also became effective the same year in the two additional provinces of Saskatchewan and New Brunswick as wide powers were conferred upon the Lieutenant-Governor in Council which were used to make the Act effective in these provinces by Order-in-Council. It was agreed among the provinces to recommend that the new Act should be made effective in each province on the 1st day of September, 1932. Consequently, the Proclamations of the Act in the six named provinces were so issued.

The new Act, on and after the date of coming into force applied to all insurers transacting the business of automobile insurance in each province and to all contracts made in the province. Inasmuch as the Act prescribed new forms of contract and involved new forms of policy it became necessary for insurers to obtain new written applications and issue new forms of policy for all automobile insurance transactions (including renewals) on and after the effective date.

Section 9 of the Act (the section numbers differ in each province) reads as follows:

POLICY TO BE APPROVED BY SUPERINTENDENT	9. No insurer shall issue or deliver a policy in the Province until a copy of the form of policy has been on file with the Superintendent for at least thirty days, unless sooner approved in writing by him, nor if within that period the Superintendent notifies the insurer in writing that the said form of policy is not approved. The Superintendent shall, on being so required, specify the reasons for not approving or for disapproving thereof.
---	---

Arising out of the above quoted statutory provision, I transmit to you herewith a copy of a Report of a Committee of Underwriters dated July 31st, 1933, with reference to forms of policy, application and endorsement under the new Act. This Report has been considered by the Superintendent of Insurance or other proper supervising official in all provinces in which the Act became effective and they have authorized me to concur therein on their behalf. On behalf of the several provinces you are hereby advised that I have concurred in the said Report.

A Committee report respecting the new Act and the new Standard Forms was presented to and considered by the 15th Annual Conference of the Association held in Winnipeg, Manitoba, on September 6th-9th, 1932. The only substantial amendment to the Act adopted for recommendation by the Association was the insertion of the words "or owned by or in the care, custody or control of the insured" after the word "automobile" in clause (e) of section 20 (Ontario section 183d). This amendment was enacted in 1933 by the provinces of Manitoba (effective May 4th, 1933), Nova Scotia (effective May 17th, 1933), British Columbia and Ontario (effective June 1st, 1933). In the province of New Brunswick the amendment became effective on July 1st, 1933, by Order-in-Council. The "*Automobile Insurance Act*," including the amendment recommended at the 1932 Conference was enacted in 1933 by the provinces of Saskatchewan (effective March 27th, 1933), Alberta (effective June 1st, 1933) and Prince Edward Island (effective October 1st, 1933).

A Standing Committee on Automobile Insurance Forms, consisting of the provinces of Ontario, Manitoba and British Columbia, was established by unanimous resolution of the Association and granted full power to act in the name of the Association between annual conferences. The province of Ontario was designated convener of this Standing Committee and the Secretary of the Association was empowered to promulgate variations, omissions or additions to the "Standard Forms" approved by the Standing Committee on behalf of all provinces from time to time.

Subsequent to the Winnipeg Conference, the convener of the new Standing Committee invited the following representative insurers to constitute a Committee of Underwriters to succeed the original committee, which recommended the existing Standard Forms for approval by report as of June 24th, 1932, and to carry on the work of considering and recommending variations, omissions and additions to the original Standard Forms from time to time.

Sun Insurance Office Limited
Union Insurance Society of Canton Limited
American Automobile Insurance Company
Zurich General Accident & Liability Insurance Company
Western Assurance Company
London Guarantee & Accident Insurance Company Limited
Portage La Prairie Mutual Insurance Company
Toronto General Insurance Company
Travelers Insurance Company

On November 3rd, 1932, this Committee of Underwriters held its organization meeting. Superintendent Foster consented to act as chairman of the committee on condition that a vice-chairman was also elected to preside during his absence or inability. Mr. Norman Ross, of the Union Insurance Society of Canton Limited was unanimously elected vice-chairman of the committee. Mr. John Edwards, casualty actuary of the Ontario Department of Insurance, was elected secretary.

At this meeting the secretary reviewed the numerous forms of application, endorsement and policy conditionally approved by one or more provinces, subsequent to the issue of the original Standard Forms and the coming into force of the new Act on September 1st, 1932. The original Standard Forms included S.P.F. 1 and 2, owner's and driver's policy forms, S.A.F. 1 and 2, owner's and driver's application forms, and S.E.F. 1 to 15 (excluding 1a), standard endorsement forms. The non-standard forms which had been conditionally approved were classified by the Committee into nine groups and sub-committees were appointed to study each group of forms and report to the committee at subsequent meetings.

A second meeting of the committee was held on November 15th, 1932, when the report of the sub-committee appointed to consider "Winter Storage" forms was received. At the request of the committee a copy of its Draft Report and of the new forms (S.A.F. No. 3 and S.E.F. No. 16) proposed to be recommended therein along with General Instructions were sent on December 22nd, 1932, to all insurers for their comment and criticism. General approval of the proposed standard forms was indicated by the replies. Subsequently, the Committee amended its report to cover a form of reinstatement endorsement (S.E.F. No. 17). The three WINTER STORAGE FORMS (S.A.F. No. 3 and S.E.F. Nos. 16-17) were accepted and approved by the Standing Committee, effective March 1st, 1933, and distributed to all insurers in January, 1933.

On January 31st, 1933, by Association Circular Letter No. 11, a suggested form of Passenger Hazard Endorsement for Commercial Vehicles was sent to all insurers for comment and criticism. At a subsequent meeting of the Committee of Underwriters held February 15th, 1933, the proposed standard Passenger Hazard endorsement for Commercial Vehicles was revised and recommended for use as a standard form. Simultaneously, all insurers by Circular Letter No. 13, dated February 15th, 1933, received a copy of the form and were advised that such form had been approved for use by the Standing Committee and designated S.E.F. No. 1a "RESTRICTED PASSENGER HAZARD ENDORSEMENT", effective February 15th, 1933. On March 10th, 1933, all insurers by Circular Letter No. 14 were issued "General Instructions" with respect to the use of Passenger Hazard Endorsements broad form S.E.F. No. 1 and restricted form S.E.F. No. 1a.

At a subsequent meeting of the Committee of Underwriters the convener of the sub-committee on "Garage and Sales Agency" forms made a preliminary report and desired to obtain further instructions with respect to the drafting of standard forms. Numerous points in doubt were dealt with and it is expected that this sub-committee will present later to the Committee proposed forms for this transaction which will be sent to all insurers for comment and criticism. On May 11th, 1933, by Circular Letter No. 19 all insurers were officially notified of the amendment to clause (e) of section 20 of the Uniform Act, known as the "property damage exclusion" amendment. Insurers were asked to accept the circular as official notification of the fact that STANDARD POLICY FORMS (S.P.F. Nos. 1 and 2) effective September 1st, 1932, were AMENDED effective July 1st, 1933 (permissive June 1st, 1933) by inserting in Clause (a) of subsection 2 of section A of the Insuring Agreements the following after the word "automobile" the words "or owned by, or in the care, custody or control of any person insured by this policy" subject to a later effective date in any province. A Temporary Standard Endorsement Form (not printed) was approved whereby old supplies of Standard Policy Forms (S.P.F. 1 and 2) might be amended to embody this additional exclusion (See C.L. 19 dated May 11th, 1933).

As the Uniform Act originally became effective in six provinces on September 1st, 1932, it was anticipated that on and after September 1st, 1933, a number of insurers would desire

to use renewal certificates. Consequently, by Circular Letter No. 20, dated May 20th, 1933, a draft form of renewal certificate was sent to all insurers for comment and criticism. The communications received were carefully considered by the Committee of Underwriters and on June 27th, 1933, a form was recommended for use, together with instructions. This form was approved by the Standing Committee and became "STANDARD AUTOMOBILE RENEWAL CERTIFICATE" (S.P.F. No. 3) approved June 27th, 1933, effective September 1st, 1933. All insurers were furnished a copy of the standard form by Circular Letter No. 24, dated June 28th, 1933, with the appropriate "General Instructions."

On June 29th, 1933, by Circular Letter No. 28, two endorsements drafted by the Committee of Underwriters covering "\$50 DEDUCTIBLE PROPERTY DAMAGE" (Commercial and Public Automobiles) and "MORE AUTOMOBILES THAN OPERATORS" were sent to all insurers for comment and criticism. The communications subsequently received indicated a substantial difference of opinion as to the substance of both forms. After a prolonged discussion it was concluded to recommend to the Superintendents of Insurance that conditional approval be granted to two endorsement forms covering both transactions referred to, which had been submitted by the Policy Forms Committee of the Canadian Automobile Underwriters Association, and that the question of prescribing standard forms respecting these two transactions be postponed for further consideration at a later date. On behalf of the Standing Committee I have concurred in the recommendation, and all insurers were so advised on July 19th, 1933, by Circular Letter No. 28 and furnished a copy of each of the two endorsements with the provision that applications for conditional approval of forms embodying variations, omissions or additions to the two forms conditionally approved would be accepted. The Committee of Underwriters will welcome further communications from insurers on the general question of the desirability of standardizing the two endorsements covering "\$50 Deductible Property Damage" and "More Automobiles than Operators," i.e., prescribing a form and requiring every insurer to use that form, and as to the merits of any particular form suggested for standardization.

The application, endorsement and policy forms now transmitted to you have been placed on file with the Superintendent of Insurance or other supervising official in every province of Canada and all insurers are hereby advised that it will be unnecessary for them to file forms of policy issued or delivered by them if they are identical with the Standard Forms as interpreted by the "General Instructions" embodied in the said Report unless contrary advice is received from individual provinces. All application, endorsement and policy forms not herein designated as "Standard" and hereby approved, such as the forms used for the classes and kinds of automobile insurance described in the "General Instructions" and any other special forms, must be filed with the Superintendent in each province for approval in strict conformity with the Act.

This Association is holding its Sixteenth Annual Conference in Toronto, Ontario, on September 5th, 6th and 7th, 1933, when a report on this subject will be considered. Any matters arising out of the foregoing may conveniently be raised at that time.

Additional copies of the loose-leaf booklet of "Standard Forms" and of new or reprinted pages, may be obtained at cost direct from the printers, Thompson and Sons, Limited, 384 Adelaide Street West, Toronto.

Insurers are requested to address all communications respecting automobile Standard Forms to Mr. John Edwards, Casualty Actuary, Ontario Insurance Department, Parliament Buildings, Toronto, who is Secretary of the Committee of Underwriters and of the Standing Committee on Automobile Insurance Forms of this Association.

R. LEIGHTON FOSTER,
Secretary.

APPENDIX IX

AUTOMOBILE INSURANCE LOSS-COST EXPERIENCE IN ONTARIO
FOR POLICY YEARS 1929, 1930, 1931 AND 1932

The following statistical tables numbered 1 to 16 inclusive, have been filed by the Canadian Automobile Underwriters' Association, the statistical agency designated to compile the Ontario Automobile Insurance Loss-Cost Experience pursuant to Section 69a of *The Insurance Act*.

TABLE 1.—*Private Passenger Public Liability Experience in Ontario for the complete policy years 1929, 1930 and 1931 and the incomplete policy year 1932 developed as of June 30th, 1933.*

Reference to column 6 of Table 1 will show that the pure premiums for public liability insurance on private passenger cars have risen from \$8.52 in 1929 to \$10.37 in 1932—an increase in loss-cost per car exposed to risk of 22 per cent. for the period. Column 7 of the Table indicates a reduction in the claim frequency from 1929 so that the increase in the pure premiums or loss-cost shown in column 6 is due principally to an increase in the amount of the average claim, which rose from \$334 in 1929 to \$450 in 1932—an increase of 35 per cent. for the period.

TABLE 2.—*Private Passenger Property Damage Experience in Ontario for the complete policy years 1929, 1930, 1931, and the incomplete policy year 1932 developed as of June 30th, 1933.*

Reference to column 6 of Table 2 indicates that pure premiums for property damage insurance on private passenger cars have declined from \$5.55 in 1929 to \$3.50 for 1932—a decrease in loss-cost per car exposed to risk of 37 per cent. for the period. This reduction may be accounted for in two ways, viz., the claim frequency in 1929 was 14.64 per cent. compared with 10.61 per cent. for 1932 and the average claim in 1929 was \$38 compared with \$33 for 1932.

TABLES 3, 4, 5 and 6.—*Private Passenger Collision Experience in Ontario for the complete policy years 1929, 1930, 1931 and the incomplete policy year 1932 developed as of June 30th, 1933.*

Reference to column 6 of Table 3 will show that the pure premiums for collision damage declined from \$18.79 in 1929 to \$10.57 in 1932—a reduction in the average reported loss-cost per car exposed to risk of almost 44 per cent. for the period. This is largely accounted for in the claim frequency reduction which dropped from 19.38 per cent. in 1929 to 9.82 per cent. in 1932. The collision experience, however, continues to be unreliable by reason of the limited volume of business which is transacted by insurers for this class of insurance.

TABLE 7.—*Private Passenger Automobile Fire Experience in Ontario for the complete policy years 1929, 1930, 1931 and the incomplete policy year 1932 developed as of June 30th, 1933.*

Reference to column 6 of Table 7 will show that the automobile fire pure premiums declined from \$2.75 in 1929 to \$1.34 in 1932—a reduction in loss-cost per car exposed to risk of almost 52 per cent. for the period. The average claim in 1929 was \$148 and the comparable figure for 1932 is reported at \$75—a reduction in the average claim of 50 per cent. for the period. The variation in the claim frequency during the four year period referred to is so slight as to require no comment.

TABLE 8.—*Private Passenger Automobile Theft Experience in Ontario for the complete policy years 1929, 1930, 1931 and the incomplete policy year 1932 developed as of June 30th, 1933.*

Reference to column 6 of Table 8 will show that the automobile theft pure premiums declined from \$1.92 in 1929 to 0.89 in 1932—a reduction in loss-cost per car exposed to risk of almost 54 per cent. for the period. During the same period the average claim declined from \$64 to \$24—a reduction in the average claim of 62 per cent. A definite upward trend is also noted in the claim frequency reported for 1932.

TABLES 9-14 inclusive.—*Commercial Automobile Insurance Experience in Ontario for the complete policy years 1929, 1930, 1931 and the incomplete policy year 1932 developed as of June 30th, 1933.*

The experience reported for commercial cars does not cover a sufficient number of exposures to warrant full credibility for the purpose of rate-making. Nevertheless, certain conclusions may be made from the tables upon the experience which has been reported. The average public liability claim rose from \$338 in 1929 to \$452 in 1932—practically the same average amounts as are indicated in the private passenger public liability experience, which is referred to above. On the other hand the loss-cost trend in the property damage, collision, fire and theft is distinctly downward from 1929, which may be seen by reference to the tables.

TABLE 15.—*Experience of fleet-rated cars, all classes of cars so rated by all insurers in Ontario for the complete policy years 1929, 1930, 1931 and the incomplete policy year 1932 developed as of June 30th, 1933.*

The percentage of losses incurred to premiums earned respecting cars fleet-rated has been favourable for the past three years indicating that the various experience rating plans have been justified in the light of the experience reported during this period. Wide fluctuations are shown during the four years 1929 to 1932 inclusive, with respect to the experience on public automobiles and as the volume of business in this class is so limited no conclusions can be arrived at.

TABLE 16.—*Automobile Insurance Experience on Carage, Automobile Dealers and Manufacturers in Ontario for the complete policy years 1929, 1930, 1931 and the incomplete year 1932 developed as of June 30th, 1933.*

This table shows the premiums earned, losses incurred and the resultant percentage of losses incurred to such premiums earned for the four year period 1929 to 1932 inclusive. The premium volume, however, is insufficient to show any reliable loss indications with respect to future business. Such business which was transacted for this class has been favourable to insurers on the whole for the past four years.

‡Col. 2, "Number of Cars Exposed." This title means the number of cars insured for a period of 12 months.

‡Col. 6, "Indicated Pure Premiums." This title means the average loss-cost of cars insured for a period of 12 months.

*1931 and 1932 experience includes fleet-rated cars. The 1932 experience is reduced to an earned basis. The 1932 number of claims has been adjusted by using an earned factor of .96 instead of the pure premium earned factor.

†Deduct from the combined 1933 Public Liability and Property Damage Rates 10 per cent. for "no claims bonus" allowed for 12 months accident free record. After April 15th, 1933, the "no claims bonus" was changed to 10 per cent. discount for 12 months accident free record, 15 per cent. discount for 24 months accident free record and 20 per cent. for 36 months accident free record.

*During 1928, 1929 and 1930 insurers permitted a discount from the above rates of 10 per cent. when all five forms of coverage were insured under one policy, viz.: Public Liability, Property Damage, Collision, Fire and Theft. If three coverages were insured under the one policy, viz.: Public Liability, Property Damage and Collision, a discount of 5 per cent. was allowed.

†In the 1932-1933 premium rates for Public Liability and Property Damage the 6-cylinder Oldsmobile is rated the same as Ford, Chevrolet.

*During 1928, 1929 and 1930 insurers permitted a discount from the above rates of 10 per cent. when all five forms of coverage were insured under one policy, viz.: Public Liability, Property Damage, Collision, Fire and Theft. If three coverages were insured under the one policy, viz.: Public Liability, Property Damage and Collision, a discount of 5 per cent. was allowed

APPENDIX XI

FORMS OF BALANCE SHEET, ETC., PRESCRIBED PURSUANT TO SECTION 71
OF THE INSURANCE ACT

ONTARIO

EXECUTIVE COUNCIL OFFICE

Copy of an Order-in-Council approved by The Honourable the Lieutenant-Governor, dated the 10th day of January, A.D. 1933:

Upon consideration of the report of the Superintendent of Insurance dated the Fourth day of January, 1933, and upon the recommendation of the Honourable the Attorney-General, Minister in charge of the Department of Insurance, the Committee of Council prescribe, pursuant to Section 71 of *The Insurance Act*, R.S.O. 1927, Chap. 222, as amended by Section 4 of *The Insurance Act, 1930*, Chap. 41, of the Statutes of Ontario, 1930.

(1) The amendments set out in Schedule A, Parts 1 and 2 hereto as amendments to the forms prescribed by Order-in-Council under date of December 29th, 1931, in which all joint stock insurance companies and mutual life insurance corporations incorporated and licensed by Ontario may publish or circulate any balance sheet or other statement purporting to show their financial condition, and (2) the forms set out in Schedule B hereto as the forms which cash mutual insurance companies transacting other than life insurance, incorporated and licensed by Ontario may publish or circulate any balance sheet or other statement purporting to show their financial condition.

Certified,

C. F. BULMER,
Clerk, Executive Council.

SCHEDULE A

PART I

The forms of annual statement prescribed in Schedule A, Part 1, of order-in-Council, dated 29th December, 1931, as the forms in which joint stock insurance companies transacting other than life insurance, incorporated and licensed by Ontario may publish or circulate any balance sheet or other statement purporting to show their financial condition are amended as follows:

Form 1, Item 4—Insert after the word "at" the word "amortized." In place of "add—excess of market value over book value" insert "less—deficiency of market value under book value of bonds in default."

Form 1. Explanatory notes—

Strike out the sixth paragraph relating to bonds and debentures and insert the following:

"Bonds and Debentures:

"Companies which amortize their bonds and debentures in accordance with section 70, s.s. 8, of *The Insurance Act* may, in respect of those not in default disregard market values for the purpose of this statement but deficiency of market value under book value of those in default must be shown as a deduction.

"Insurers maintaining on their books an investment reserve specially and solely for bonds and debentures not less than the amount of such deficiency may amend the deduction in item 4 to read 'less reserve for bonds and debentures in default.'

"Insurers which do not amortize their bonds shall omit the word 'amortized' and the words 'in default' and shall make deduction of the full amount of the deficiency of market value under book value of all bonds and debentures whether in default or not in default. In no case may any insurer included bonds and debentures at an amount in excess of the amortized book value."

Any items may be subdivided as desired, providing terminology used above is applied to each such divided item.

Real Estate:—If there are no encumbrances on office premises, the item may be extended at book value as "Real Estate—Office premises."

Mortgages and agreements for sale:—Where a company has no agreements for sale Item 2 may be extended as "Mortgages."

Bonds and Debentures:

Companies which amortize their bonds and debentures in accordance with Section 70, s.s. 8, of *The Insurance Act* may in respect of those not in default disregard market values for the purpose of this statement but deficiency of market value under book value of those in default must be shown as a deduction.

Insurers maintaining on their books an investment reserve specially and solely for bonds and debentures not less than the amount of such deficiency may amend the deduction in item 4 to read "less reserve for bonds and debentures in default."

Insurers which do not amortize their bonds shall omit the word "amortized" and the words "in default" and shall make deduction of the full amount of the deficiency of market value under book value of all bonds and debentures whether in default or not in default. In no case may any insurer include bonds and debentures at an amount in excess of the book value or amortized book value.

Stocks.—In all cases where market value of stocks owned is in excess of book value, Item 5 may be shown as above or if desired, book value may be extended and a foot-note added as follows:—"not in excess of market value" or "(market value \$.....)". Where book value is in excess of market value the item must be shown as above except that the second line shall read "less deficiency of market value under book value." Upon the approval of the Superintendent of Insurance stocks may be extended in one item at market value.

If it is desired to include the reserve of unearned premiums at 100%, item 13 must so indicate.

Where a company has no surplus but an impaired capital, item 23 should be changed to read "deficit" and the amount of the deficit deducted from item 22.

The net total of items 22 and 23 may be extended as "Surplus for protection to Policyholders." Where this is done Item 23 may then be deleted if desired.

The balance sheet shall not show or include any mention whatever of unadmitted assets. See *Insurance Act*, Sec. 70).

Items against which no amounts are applicable may be deleted. Numbers preceding items may be deleted.

If it is desired to publish a statement of operations such statement must be in the following form:

FORM 2

PROFIT AND LOSS ACCOUNT

1.	(a) Net premiums written
	(b) Less increase in reserve of unearned premiums
2.	Net premiums earned
3.	Net losses and claims incurred
4.	Net adjustment expenses
5.	Commissions
6.	Taxes
7.	Salaries, fees and travelling expenses
8.	All other expenses
9.	Total losses and expenses
10.	Underwriting profit
11.	Other revenue
12.	Other expenditure
13.	Net other revenue
14.	Net profit for the year

The profit and loss account must be arranged in the order shown above. Numbers preceding items may be deleted.

Item 1 (a) and 1 (b) need not be shown unless desired.

Items 3 to 8 may be entirely excluded or may be combined as desired or any of them may be divided to give greater detail.

Items 11 and 12 may be divided as desired.

Where any combination or division is made the combined or divided items must be appropriately named to describe such items according to the terminology used above and as shown

in the annual statement to the Department, Form S. 6. Amounts shown against the above items either as combined or divided must be identical with those reported against such items on Form S.6.

If there has been a loss for the year items 10 and 14 should be amended accordingly.

If it is desired to publish a statement showing the change in surplus during the year such statement shall be in the following form:

FORM 3

SURPLUS ACCOUNT

1. Balance of Surplus, December 31, 19.....
2. Net profit for the year.....
3. Premium received on capital stock.....
4.
5. Add decrease in unadmitted assets.....
6. Decrease in unsecured unlicensed reinsurance.....
7. Deduct—Dividends to shareholders.....
Increase in unadmitted assets.....
Increase in unsecured unlicensed reinsurance.....
8. Balance of Surplus, December 31, 19.....

Surplus account must be arranged in the order shown. Items against which no amounts are applicable must be deleted. Items 1 and 8 may be amended to read "Balance at credit" if so desired.

If the capital of the company is impaired the word "surplus" should be amended to read "Deficit." In such case Items 1 and 8 may be changed to read "deficit" or "balance at debit."

SCHEDULE A

PART 2

The forms of annual statement prescribed in Schedule A, Part 2, of Order-in-Council dated 29th December, 1931, as the forms in which joint stock life insurance companies and mutual life insurance corporations, incorporated and licensed by Ontario may publish or circulate any balance sheet or other statement purporting to show their financial condition are amended as follows:

Form 1, Item 6—Insert after the word "at" the word "amortized." In place of "add—excess of market value over book value" insert "less—deficiency of market value under book value of bonds in default."

Form 1. Explanatory notes—

Strike out the fifth paragraph relating to bonds and debentures and insert the following:

"Bonds and Debentures:

"Companies which amortize their bonds and debentures in accordance with Section 70, s.s. 8, of *The Insurance Act* may in respect of those not in default disregard market values for the purpose of this statement but deficiency of market value under book value of those in default must be shown as a deduction.

"Insurers maintaining on their books an investment reserve specially and solely for bonds and debentures not less than the amount of such deficiency may amend the deduction in item 6 to read "less reserve for bonds and debentures in default."

"Insurers which do not amortize their bonds shall omit the word "amortized" and the words "in default" and shall make deduction of the full amount of the deficiency of market value under book value of all bonds and debentures whether in default or not in default. In no case may any insurer include bonds and debentures at an amount in excess of the amortized book value."

Any items may be subdivided as desired, providing terminology used above is applied to each such divided item.

Re "Real Estate"—If there are no encumbrances on office premises, the item may be extended at book value as "Real Estate—Office premises."

Bonds and Debentures:

Companies which amortize their bonds and debentures in accordance with Section 70, s.s. 8, of *The Insurance Act* may in respect of those not in default disregard market values for the purpose of this statement but deficiency of market value under book value of those in default must be shown as a deduction.

Insurers maintaining on their books an investment reserve specially and solely for bonds and debentures not less than the amount of such deficiency may amend the deduction in item 6 to read "less reserve for bonds and debentures in default."

Insurers which do not amortize their bonds shall omit the word "amortized" and the words "in default" and shall make deduction of the full amount of the deficiency of market value under book value of all bonds and debentures whether in default or not in default. In no case may any insurer include bonds and debentures at an amount in excess of the amortized book value."

Stocks.—In all cases where market value of stocks owned is in excess of book value, Item 7 may be shown as above or if desired book value may be extended and a foot note added as follows: "(Not in excess of market value)" or "(market value \$.....)". Where book value is in excess of market value the item must be shown as above except that the second line shall read "less deficiency of market value under book value." Upon the approval of the superintendent of Insurance stocks may be extended in one item at market value.

The balance sheet shall not show or include any mention whatever of unadmitted assets.

Items against which no amounts are applicable may be deleted. Numbers preceding items may be deleted.

If policy reserves (item 15) are set up in excess of statutory requirements the words "according to" may be amended to read "not less than."

Where a company has no surplus but an impaired capital, item 30 should be changed to read "deficit" and the amount of the deficit deducted from item 28.

The net totals of items 28, 29 and 30 may be extended as "surplus for protection of policy-holders." Where this is done items 29 and 30 may then be deleted if desired.

If it is desired to publish a statement showing the year's operations, such statement must be in the following form.

FORM 2

INCOME AND DISBURSEMENTS

Income:

1. (a) Premium Income—First year premiums.....
Renewal premiums.....
Other premium income.....
Annuity considerations.....
.....
b) Less reinsurance.....
(c) Net premium income.....
2. Interest received:	
(a) on mortgages and agreements for sale.....
(b) on bonds and debentures.....
(c) other interest.....
3. Dividends received on stocks.....
4. Rents received.....
5. Profit on sale of investments.....
6. All other income received.....
7. Total income received.....
8. Amounts left with company to accumulate at interest.....
9. Amounts received on capital stock.....
10. Premium received on capital stock.....

(c) Indemnity claims.....		
(d) Surrendered policie		
(e) Matured endowments.....		
(f) Dividends to policyholders.....		
(g) Other payments to policyholders.....		
(h) Annuity payments.....		
15. Taxes, licenses and fees.....		
16. Head office expenses.....		
17. Branch office and agency expenses.....		
18. Loss on sale of investments.....		
19. Other expenses.....		
20. Total expenditure disbursements.....		
21. Amounts left with company to accumulate at interest, withdrawn		
22. Dividends to Shareholders.....		
23. Other disbursements.....		
Total other disbursements.....		
Total disbursements.....		

The statement of income and disbursements must be arranged in the order shown above.
Items 1 (a) and 1 (b) need not be shown unless desired.
Items 1 to 6, and 14 to 19 may be subdivided or combined as desired.
Where any combination or division is made the combined or divided items must be appropriately named to describe such items according to the terminology used above and as shown in the annual statement to the Department, Form S.1.
Numbers preceding Items may be deleted.
Where the above statement is, in the opinion of the Superintendent of Insurance, unsuitable to any particular insurer, the Superintendent may approve a modified form appropriate to the operations of such insurer.

SCHEDULE B

Forms prescribed for Cash Mutual Insurance Companies, transacting other than life insurance.

FORM 1

BALANCE SHEET

<i>Assets:</i>		
1. Real Estate (a) Office premises.....	\$.....	
Less encumbrances.....		\$.....
(b) Held for sale.....		\$.....

Treasurer.

AUDITORS' CERTIFICATE

Note:—The auditors' certificate shall state whether or not the requirements of the auditors have been complied with. The statutory requirements are contained in section 137 of *The Companies Act*, R.S.O. 1927, C. 218.

Items may be rearranged as desired but no change in terminology nor any combination of items may be made except as noted below.

Items entered short may be extended direct into the total column.

Any items may be subdivided as desired, providing terminology used above is applied to each such divided item.

Real Estate:—If there are no encumbrances on office premises, the item may be extended at book value as "Real Estate—Office premises."

Mortgages and agreements for sale:—Where a company has no agreements for sale, Item 2 may be extended as "Mortgages."

Bonds and Debentures: Companies which amortize their bonds and debentures in accordance with section 70, s.s. 8, of *The Insurance Act* may in respect of those not in default disregard market values for the purpose of this statement but deficiency of market value under book value of those in default must be shown as a deduction.

Insurers maintaining on their books an investment reserve specially and solely for bonds and debentures not less than the amount of such deficiency may amend the deduction in item 4 to read "less reserve for bonds and debentures in default."

Insurers which do not amortize their bonds shall omit the word "amortized" and the words "in default" and shall make deduction of the full amount of the deficiency of market value under book value of all bonds and debentures whether in default or not in default. In no case may any insurer include bonds and debentures at an amount in excess of the amortized book value.

Stocks.—In all cases where market value of stocks owned is in excess of book value, Item 5 may be shown as above or if desired, book value may be extended and a foot-note added as follows:—"(Not in excess of market value)" or "(market value \$.....)". Where book value is in excess of market value the item must be shown as above except that the second line shall read "less deficiency of market value under book value." Upon the approval of the Superintendent of Insurance stocks may be extended in one item at market value.

If it is desired to include the reserve of unearned premiums at 100%, item 13 must so indicate.

Where a company has no surplus item 21 should be changed to read "deficit."

The balance sheet shall not show or include any mention whatever of unadmitted assets. (See *Insurance Act*, Sec. 70).

Items against which no amounts are applicable may be deleted. Numbers preceding items may be deleted.

If it is desired to publish a statement of operations such statement must be in the following form:

FORM 2

PROFIT AND LOSS ACCOUNT

1.	(a) Net premiums written.....	
	(b) Less increase in reserve of unearned premiums.....	
2.	Net premiums earned.....	
3.	Net losses and claims incurred.....	
4.	Net adjustment expenses.....	
5.	Commissions.....	
6.	Taxes.....	
7.	Salaries, fees and travelling expenses.....	
8.	All other expenses.....	
9.	Total losses and expenses.....	
10.	Underwriting profit.....	
11.	Other revenue.....	
12.	Other expenditure.....	
13.	Net other revenue.....	
14.	Net profit for the year.....	

The profit and loss account must be arranged in the order shown above. Numbers preceding items may be deleted.

Items 1 (a) and 1 (b) need not be shown unless desired.

Items 3 to 8 may be entirely excluded or may be combined as desired or any of them may be divided to give greater detail.

Items 11 and 12 may be divided as desired.

Where any combination or division is made the combined or divided items must be appropriately named to describe such items according to the terminology used above and as shown in the annual statement to the Department, Form S. 6. Amounts shown against the above items either as combined or divided must be identical with those reported against such items on Form S. 6.

If there has been a loss for the year, items 10 and 14 should be amended accordingly.

If it is desired to publish a statement showing the change in surplus during the year such statement shall be in the following form.

FORM 3

SURPLUS ACCOUNT

1.	Balance of Surplus, December 31, 19.....	
2.	Net profit for the year.....	
3.	
4.	Add—Decrease in unadmitted assets.....	
5.	Decrease in unsecured unlicensed reinsurance.....	
6.	
7.	Deduct—Increase in unadmitted assets.....	
8.	Increase in unsecured unlicensed reinsurance.....	
9.	Balance of Surplus, December 31, 19.....	

Surplus account must be arranged in the order shown. Items against which no amounts are applicable must be deleted. Items 1 and 9 may be amended to read "balance at credit" if so desired.

C.L. 1, 1933

MEMORANDUM

To—All Mutual Fire Insurance Corporations transacting insurance on the Premium Note Plan.
 From—The Superintendent of Insurance.

RE ANNUAL STATEMENTS

This memorandum relates to both (A) the Annual Statement to the Department and (B) the Annual Statement to Members.

With respect to (A)—ANNUAL STATEMENT TO THE DEPARTMENT:

Annual statement blanks for use in reporting business for the year 1932 are being forwarded under separate cover. They differ only slightly in form from those used before.

Note particularly that the total shown under column 8 of "Schedule R" should be carried out under "Liabilities" Item 21, and extended at eighty per cent. thereof. See Section 70 (5) of *The Insurance Act* as amended (21 George V, 1931) by deleting application therein to purely mutual corporations. Former "Schedule SX" now necessary, has been eliminated, and "Exhibit of Surplus" (page 16) has been correspondingly revised and is self-explanatory.

With respect to (B)—ANNUAL STATEMENT TO MEMBERS:

A survey of annual statements by the Department indicates that companies have been reporting to their members on different forms of statement in contravention of the provisions of Section 71 of *The Insurance Act*. Attached hereto you will find a blank form of statement of "Assets," "Liabilities," "Cash Receipts," "Cash Expenditure" and "Movement of Risks." This form of statement follows the Department's statement form closely, and shows the information which the majority of companies submitted to their members, and at the annual meeting. Your 1932 statement to members should be prepared in exactly this form.

For your information, I attach hereto extracts from *The Insurance Act* and *The Companies Act*, which should be read carefully, particularly Section 318 (c) (*Ontario Companies Act*) and Sections 70 (7) and 71 (*Ontario Insurance Act*); also the "Explanatory Notes."

R. LEIGHTON FOSTER,
 Superintendent of Insurance.

Toronto, Ontario,
 January 3rd, 1933.

Enc. with C.L. 1, 1933.

ASSETS

1. Book value of real estate	\$
2. Mortgage loans on real estate
